

Northern

Associate of Applied Science
RADIOLOGIC TECHNOLOGY

The Radiography program at Northern New Mexico College is a two year (22 month) program leading to an associate of applied science degree in Radiologic Technology. Students will prepare to meet the health care needs of the community by functioning as a radiologic technologist in hospitals, clinics, doctors' offices, and in similar health delivery agencies. Upon completion of the program, the student will be eligible to take the examination for National Registration. Passing the National Registry exam fulfills the New Mexico requirements for licensure.

Students mix classroom time with time spent in the clinical setting working and training with technologists in the field. The didactic (classroom) phase will incorporate the formal education process along with laboratory experience giving the a student hands-on approach to leaning while applying the knowledge currently being learned to practical experience.

Formal application to and acceptance into the program is necessary before you may enroll in any RAD designated courses. Acceptance is granted for the fall semester of each year. Applications for the program may be obtained from the Radiography Department by calling 505-747-2220 or on the Radiography page at www.nnmc.edu.

Pre-requisites

Completion of the following required courses or equivalent with a minimum grade of C prior to starting the program. Pre-requisites may require placemen testing or may have other pre-requisites required before taking courses.
