

Bachelor of Science BIOLOGY 2012-2014

This program prepares you to pursue a graduate degree in biology or to go on to professional schools in the health sciences. Training in biology also prepares you for a wide variety of career choices, including careers in research in academic, government, and private research laboratories, science teaching, positions in the biomedical, biotechnology, and pharmaceutical industries, and other related fields. While many positions are open to those holding a BS degree, some may only be open to those holding advanced graduate degrees.

Matriculation into this program is dependent upon:

- 1) your having been granted final regular admission to Northern;
- 2) your having a cumulative grade point average of at least 2.50 in all coursework attempted at Northern and/or other institutions;
- 3) your having completed 48 credits of college-level work, including the following required courses: BIOL 151/L, BIOL 201/L, BIOL 202/L, BIOL 203/L, and BIOL 204/L, CHEM 121/L, CHEM 122/L, and MATH 150; and
- 4) submission of a personal statement to the program director in which you outline your interest in biology and your career goals.
