This catalog describes the curriculum, programs, and academic regulations of Northern New Mexico College. The provisions of this catalog are not to be regarded as an irrevocable contract between the student and the College. While every effort is made to ensure the accuracy of the information available at the time this catalog is prepared, Northern reserves the right to make changes at any time without prior notice.

The most updated version of this catalog is available online at www.nnmc.edu

Northern is a state institution. All facilities, equipment, and materials are for official use only and may not be used for private business or benefit.

CAMPUS LOCATIONS

HISTORY OF NORTHERN NEW MEXICO COLLEGE

Northern New Mexico College and its mission have always played an integral role in the State of New Mexico’s goal to provide educational opportunities for its residents.

In the early 1900s the New Mexico Territorial Legislature determined that a facility was needed as a “normal school” with a primary function of training teachers for the State’s Spanish-speaking population. The Spanish American Normal School at El Rito opened its doors in September 1909, and celebrated its centennial as Northern New Mexico College.

When the New Mexico Territory applied for statehood in 1912, the State Constitution (Article 12, Section 11) identified the Spanish American Normal School as one of ten educational institutions which would be supported by the state. The Spanish American School provided both secondary and post-secondary educational programs.

In 1953, the State Legislature changed the name of the institution to Northern New Mexico State School and, mandating that the institution provide training not available in public schools, implemented a secondary school curriculum. Six years later, the Board of Regents renamed the school Northern New Mexico College. NNMC continued to teach grades 7-12 along with the new college curriculum.

By 1961, the College was offering two-year programs in business education, general studies, and selected vocational programs. Technical-vocational programs proved popular, and enrollment increased due to a school-operated transportation system which allowed the population from the surrounding rural villages to attend the school.

In 1969 the high school curriculum was transferred to a newly-created public school district and the curriculum at the College was limited to technical-vocational course offerings. One year later, the Board of Regents again renamed the school the New Mexico Technical-Vocational School to indicate the changes in course offerings.

Operating under its new name, the Technical-Vocational School expanded its curriculum and faculty, and developed a campus in Española, approximately 30 miles from El Rito. The school assumed the Practical Nurse program from St. Vincent’s Hospital in Santa Fe. As educational needs in northern New Mexico evolved, educators and legislators identified a need for a more comprehensive delivery of educational services. In 1976 a task force was created whose membership included representatives from the New Mexico Technical-Vocational School, the University of New Mexico, and local school boards and citizens to assess the feasibility of establishing a community college. The task force recommended that the University of New Mexico-Northern Branch (at Santa Cruz) be dissolved and their academic course offerings be combined with those of the New Mexico Technical-Vocational School. The Legislature accepted this recommendation and provided for the expansion of the institution’s mission.

The Board of Regents soon accepted the new mission of the institution, renamed the institution Northern New Mexico Community College, and began combining existing programs, philosophies, and procedures in order to establish a comprehensive community college.

The new institution was headed by a president appointed by the Board of Regents. The programs to be offered by the new institution included associate degrees in various...
academic and occupational disciplines, certificate-granting programs in occupational studies, special interest courses granting continuing education units (CEUs), and other courses offered for no credit.

In 2004, legislative approval and accreditation was extended to Northern, permitting it to be the first community college in the state of New Mexico to offer a four-year degree, a BA in Elementary Education. In 2005, legislation was enacted which permitted the college to offer four-year degrees in any programs deemed necessary and appropriate. Northern New Mexico Community College was renamed Northern New Mexico College.

Currently, Northern offers bachelor’s degree programs in Early Childhood and Elementary Education, Business Administration, Biology, Environmental Science, Electromechanical Engineering Technology and Information Engineering Technology, Integrated Studies in the Humanities and Social Sciences, Mathematics, and Nursing (RN-BSN).

MISSION STATEMENT

The mission of Northern New Mexico College is to ensure student success by providing access to affordable community-based learning opportunities that meet the educational, cultural, and economic needs of the region.

VISION STATEMENT

Northern New Mexico College is a Hispanic- and Native American-serving comprehensive institution that will be recognized nationally for cultural sustainability, quality student learning, and developing economically strong communities among diverse populations.

ACCREDITATION

Northern New Mexico College is accredited by the Higher Learning Commission (HLC). Northern gained candidacy status in 1975, full accreditation status in 1982, and achieved the highest HLC accreditation in 2016. Northern’s reaffirmation of accreditation was granted for ten years (2016-2026). Moving forward, Northern has selected Open Pathways program.

In addition to regional accreditation, Northern’s educational offerings are accredited or approved by other agencies, including:

The Bachelor of Engineering in Information Engineering Technology Program is accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET, www.abet.org. Accreditation is proof that the quality of an academic program meets the standards of the profession.

The Baccalaureate Degree in Nursing at Northern New Mexico College was recently re-accredited by the Commission on Collegiate Nursing Education for 10 years (One Dupont Circle NW, Suite 530, Washington, DC 20036, (202.887.6791).

The Associate Degree Nursing (ADN) program is nationally accredited by the Accreditation Commission for Education in Nursing (ACEN), 3343 Peachtree Road NE, Suite 850, Atlanta, Georgia 30326, www.acenursing.org/commission-actions-spring-2017/ (404) 975-5000.

6 FALL 2019 – SUMMER 2020 Catalog www.nmec.edu

The College of Business Administration’s bachelor’s and associate degree programs are accredited by the Accreditation Council for Business Schools and Programs (ACBSP, www.acbsp.org).

Northern’s occupational courses are approved by the New Mexico State Department of Public Education and the Barbering, Cosmetology programs are approved by their respective state licensing boards.

State approval for benefits under Title 38 USC for veterans and other eligible persons has been granted by the New Mexico Veterans Service Commission.

Those wishing to review or verify the above statements concerning accreditation should contact the Office of Institutional Research at 505.747.2118.

PHYSICAL SETTING

Northern has campuses in Española and El Rito. In addition, Northern also regularly offers classes upon request at other communities within its service area.

The Española campus is an attractive thirty-acre tract which runs from state highway 85 to the banks of the Rio Grande. From anywhere on campus one may appreciate the panorama of the Sangre de Cristo and Jemez Mountain ranges.

The surrounding area offers a wide range of outdoor recreational activities such as boating, swimming, fishing, hunting, camping, and skiing. Española is the center of commerce for the area which has a growing population of approximately 35,000. The Española campus is located 25 miles north of Santa Fe and 40 miles south of Taos. The Española campus consists of eleven buildings dedicated to classrooms and labs, plus a gymnasium.

The El Rito campus is 32 miles north of Española on a sixty-acre tract on the southernmost slope of the San Juan Mountains at an elevation of 6,600 feet. Adjacent to the campus is the scenic and peaceful village of El Rito which is located at the entrance of the vast Carson National Forest. This forest is known for its excellent fishing, hunting, and camping sites. Fifteen miles to the east is the village of Ojo Caliente, which is famous for its hot mineral springs and related resort facilities. Eighteen miles to the northwest is Abiquiu Lake, which is a prime water recreation area.

Undergraduate Admissions

ADMISSIONS

Northern has an open admissions policy for any person who can benefit from the instructional programs offered by the College. No applicant will be denied admission on the basis of race, color, creed, age, sex, sexual orientation, religion, national origin, physical handicap, or marital status. However, because Northern is a post-secondary institution, we do have restrictions on admission for those who have not yet graduated from high school.

Detailed information concerning deadlines for submitting applications for admission appear in each semester’s Schedule of Classes and at www.nnmc.edu.
USE OF SOCIAL SECURITY NUMBERS

Northern does not use individual Social Security Numbers as a means of identification; the College issues student ID numbers generated by its administrative software as its primary identification system. The College requires that Social Security Numbers be supplied in order to comply with various state and federal reporting requirements (e.g. financial aid). In no instance will an individual’s Social Security Number be disclosed to other parties for any purpose without the written consent of the student.

GENERAL POLICIES

If you wish to obtain a degree or certificate from Northern, you may apply for regular admission status* and must show that you:

1. have received a diploma from a public or private high school/home school (home school graduates must be at least 16).

   Note: a Certificate of Completion or Attendance from a high school is not a diploma. If you present a Certificate of Completion/Attendance, you will be classified in Non-Degree status until such time as you earn a High School Equivalency (HSE) credential.

2. have received a High School Equivalency (HSE) credential; or

3. are a transfer student in good standing from another accredited college, university, or other post-secondary institution. If you are on academic probation or suspension at another institution Northern New Mexico College will also place you on probation until you have met satisfactory academic standards.

   * Admission in regular status amounts to “matriculation,” which is a formal acceptance by the college of your qualifications to pursue a degree or certificate. You may be matriculated at only one college at a time. Therefore, if you are already matriculated at, for example, New Mexico Highlands University, regular status at Northern would not be appropriate; you would then seek admission to Northern in Non-Degree status.

Declaring a Major and Changing a Major

If you are declaring a major for a certificate or associate degree, you will achieve matriculation (final admission status) when we have received official transcripts from every institution you have previously attended. If you have never attended college before, a copy of your high school or HSE credential will suffice. If you will be seeking financial assistance, you will have to supply an official transcript showing HS graduation or HSE credential. The fact that one or more colleges consolidate courses from other colleges onto their transcripts does not mean that you can choose which transcripts to have sent to Northern—official transcripts from all post-secondary institutions/schools are required must be submitted to NNMC’s Office of Admissions.

Some programs have their own special admission standards (e.g., Nursing, Education, Engineering); when you apply to the college for those majors, you will be considered a “tracking” student until such time as the department/college informs the Office of Admissions that you have applied to and been accepted to that specific program.

If, once you have started classes, you decide to change your major it will be your responsibility to inform the Office of the Registrar in writing by submitting a properly completed Change of Major form with the appropriate signatures. Again, if the new
department or college has its own application process, you will revert to a “tracking” status until your application has been accepted by that entity.

This is a very important process when it comes to graduating. At Northern, you are eligible to graduate under the terms of the catalog which you began your major or under any subsequent catalog under which you may be eligible, given that you haven’t “stopped out.” Your eligibility does not begin when you decide you have chosen the major; it begins only after the proper form has been approved and input to the student information system.

If you have “stopped out” (not attended for more than one academic year), you will have to submit an application for readmission when you return to Northern. At that time, no matter what major you declare, your eligibility status starts with the current catalog. You would no longer be eligible to follow any catalog for which you had previously been eligible.

FIRST–TIME–ANY–COLLEGE (FTAC) STUDENTS

If you have demonstrated eligibility through HS graduation or High School Equivalency (HSE) credential, your application will be processed as incomplete until you present a copy of your official transcript (for high school graduates) or an official HSE credential, plus ACT or SAT scores or Course Placement Evaluations.

TRANSFER STUDENTS

If you are in good standing at the last college attended, you are eligible to attend Northern in either regular or non-degree status, depending on your interests and needs. Good standing means that you are not on an academic or disciplinary suspension.

We require that you list on your application for admission all colleges attended, with dates, and degrees earned and, if you choose to attend in regular status, we require that you have each college or other post-secondary school you have attended send us an official transcript.

If, before you register, analysis of your transcript(s) does not show either that you have completed or that you qualify for college-level English or math, your application will be considered as incomplete, pending receipt of adequate Course Placement scores.

If you are not in good standing, you are not automatically eligible to apply for admission to Northern. You may complete the application form and attach to it a letter of appeal addressed to the Director of Admissions. In your letter, you must state what caused the lack of good standing and how you plan to maintain good standing while at Northern. To facilitate your appeal, attach a copy of the transcript on which the Suspension is recorded. Your appeal will be processed and you will be notified of acceptance or denial. If your appeal is granted you will be placed on Academic Probation until you meet satisfactory academic standards.

Until all transcripts have been received at the Office of Admissions, you will not be able to qualify for financial aid or be able to graduate: your admission status will remain Incomplete

INTERNATIONAL STUDENTS

Northern is approved by the United States Customs and Immigration Service (USCIS), a division of the Department of Homeland Security, to issue I-20s for those
applicants who meet our requirements. Most, but not all, degree programs are available for those seeking a student (F-1) visa.

If you are a non-immigrant alien who wishes to apply to Northern, please contact the Director of Admissions (forona@nnmc.edu) for the necessary forms, or download the special application form from our website at www.nnmc.edu.

Proof of English language competency is required before being accepted to the College; only those who have graduated from a U.S. high school or college will be exempt from this requirement. Refer to the special application packet for details/choices of test instruments. This packet is available online at www.nnmc.edu.

The Designated Service Officer at Northern is the Director of Admissions (admissions@nnmc.edu or 505.747.2111).

READMISSION

If you have previously been a student at Northern other than as a high school student, and if it has been at least one academic year since your last attendance, you will have to re-apply for admission. If your status has not changed since your last attendance, no paperwork other than a new application will be necessary; however, if you are re-applying for regular status and have been to another college in the meantime, you must have an official transcript sent from each such college. When all required documentation has been received, the Office of Admissions will determine if you will need to provide Course Placement Evaluation scores before granting regular status. Until everything is in order, your admission status will be classified as Incomplete.

If you re-apply in Non-degree status, you only need to complete the Non-degree Application Form.

NON-DEGREE

This status is for those over the age of 18 who do not meet or do not wish to meet the criteria for matriculation (regular status). If you are accepted in this status, you may later apply for regular status when you can demonstrate that you have met the requirements. If you have attended any college other than NNMC you must have all transcripts sent from those schools if you are moving from non-degree status to degree seeking status. Please note that no type of financial assistance is extended to students in non-degree status.

CONCURRENT ENROLLMENT

Concurrent enrollment is a term used to define a relationship existing between public or private school districts and/or other high school students who do not place into college level courses but would otherwise like to enroll in a class, and public colleges and universities in New Mexico. If you are in grades 9-12, carry a 2.00 minimum cumulative high school GPA, and have tested into at least ENG 108N, MATH 100N, and RDG 108N, you may apply for admission. If you are still in high school, you must use the Application for Admission for Students Still in High School.

In case you should disagree with either your high school or Northern concerning your selection and/or admittance, each entity has set up a formal appellate process. To appeal at the college level, contact the Director of Admissions; at the high school level, contact your counselor.
DUAL CREDIT

Student eligibility and enrollment in dual credit courses is based on your high school counselor’s approval and placement scores, or other test instruments approved by Northern or by completion of course prerequisites.

If you are enrolled in a public school district (or one of its charter schools), or a BIA school and if you qualify for college-level courses after being admitted to the college, you will be eligible for Dual Credit enrollment, which means that the college will cover your tuition, general and course-specific fees (such as lab and media fees), your public school district or BIA school will buy and loan you the required textbooks, and you and your parents will be responsible for transportation and third party fees (such as background checks or fingerprinting). In order for you to participate in the Dual Credit program your high school counselor must sign off on a special form (Dual Credit Request Form), which you will bring to Northern’s Office of Admissions in order to enroll. Completion of that form guarantees credit both toward high school graduation and toward a college degree at Northern.

If you wish to enroll in any course which is not approved by your school district (including remedial courses), you and your parents will be responsible for all costs associated with such enrollment.

If you are enrolled in a private high school (including home school), after admission to the college you may enroll in those courses for which you meet the prerequisites. If you fall into this category, you and your parents will be responsible for all costs associated with such enrollment.

EARLY ADMISSION OF PUBLIC HIGH SCHOOL STUDENTS FOR FULL–TIME ATTENDANCE

If you are a high school senior with a 3.00 cumulative grade point average (based on grades 9 through 11) and wish to apply for admission as a full-time student in your senior year, you must have parental permission (if under 18) and a release from your school district (if public) or high school (if private).

In other words, there must be general agreement among the school, your parents/guardians, and yourself that trading high school for full-time college attendance is the most appropriate educational goal for you. This status will not preclude your high school from counting the college credits you earn against the requirements for earning a high school diploma. That will be a decision made by your district.

To accomplish this, you will need to have your high school send Northern an official transcript showing your coursework from grades 9 through 11. If you are admitted under this special status but your high school will not use Northern credits toward graduation, we encourage you to work toward earning an HSE credential as soon as possible while you are enrolled in college credit courses. Although you do not have to do so, it is to your benefit in the long run to complete an HSE credential while attending college classes.

ADMISSION FOR THOSE WHO DO NOT OTHERWISE QUALIFY

If you do not otherwise qualify for admission to Northern, you may provide a written appeal of Northern’s admission policies to the Director of Admissions, providing such evidence as may be required by that official. If the Director of Admissions does not grant your appeal, you would then have the right to appeal to Northern’s Academic
Standards Committee, a Faculty Committee. If the committee hears your appeal, you must be present at the hearing. A favorable recommendation from that committee could permit admission in an appropriate status, with enrollment in appropriate courses, as determined by Course Placement Evaluation scores.

**SPECIAL PROGRAM REQUIREMENTS**

Admission to the college does not carry with it admission to all certificate or associate degree programs of study. You should check with the department chairpersons or program directors of specific programs for admission criteria to their programs.

**BACCALAUREATE PROGRAM ADMISSION STANDARDS**

In addition to the minimum standards established for admission to its certificate-granting and associate degree-granting programs, Northern has set additional standards for those desiring to enter its four-year baccalaureate degree programs.

See the standards for matriculation to each program as shown in the degree section of this catalog. In general, you must have completed at least the 38-39 credits of the College’s General Education Common Core, and have at least a 2.50 cumulative grade point average (excluding any remedial courses) before being eligible to apply for acceptance to these programs.

**TRANSFER AMONG NEW MEXICO HIGHER EDUCATION INSTITUTIONS**

To facilitate transfer of students and course credits among New Mexico’s colleges and universities, the state’s public institutions of higher education are required to accept in transfer the courses taken within approved modules of lower-division course work and apply them toward degree requirements. Several transfer guides have been developed through collaboration of New Mexico’s public post-secondary institutions, consistent with requirements of state law (21-1B, NMSA 1978). Students enrolling for first-year or second-year study at a New Mexico institution who wish to prepare for possible transfer into a degree program at another institution are advised to take these courses during their freshman and sophomore years. [Refer to the New Mexico Higher Education Department website at www.hed.state.nm.us for complete lists of courses.]

**STUDENT RESPONSIBILITY**

New Mexico’s colleges and universities have collaborated to produce guides to assist students who plan to transfer before completing a program of study. Course modules are designed to help you select courses carefully so that they may transfer with little or no loss of credit. However, planning for effective transfer with maximum efficiency is ultimately your responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-seeking institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

**TRANSFERABLE LOWER–DIVISION GENERAL EDUCATION COMMON CORE**

Students enrolling for first-year study who have not yet selected either an academic focus or the institution where they wish to graduate are advised during their freshman year to take General Education course (see pages 21-23). For students enrolled at any public institution in New Mexico, courses which have been approved to be part of the statewide general education curriculum by the New Mexico Higher Education
Department are guaranteed to transfer to any other New Mexico public institution in the area they were approved. Students should consult advisors at their current institution regarding which specific courses have been approved for Areas I-VI. Students should be aware that some general education courses approved only for Associate of Applied Science degrees may not transfer to Associate of Arts, Associate of Science, and/or Bachelor programs.

TRANSFER OF CREDIT AND AWARDING OF CREDIT THROUGH EXAMINATION

Northern recognizes that there are many ways in which college credit may be amassed and, in an effort to maximize the opportunities available to its public, has adopted the following policies:

A. Academic credit may be granted upon:
   1. the completion of any of Northern’s credit-bearing classes with a grade of “C-” or better. Academic credit in this context refers to credit accepted against courses required for graduation in your declared major.
   2. receipt at Northern of an official transcript from another regionally or nationally accredited college or university showing successful completion of an equivalent credit-bearing course. Grades from other institutions are not accepted; grades of TR are posted. At the time your admission status has been finalized with the receipt of all required college transcripts, your transcripts will be sent from the Office of Admissions to the Office of the Registrar to be evaluated and appropriate credit posted to your official Northern record.

Note: Northern does not accept every course in transfer. We consider only those courses required for graduation in your declared major or to establish prerequisites.

3. receipt at Northern of official AP/CIE/CLEP/DSST scores which meet minimum cut-off scores as listed on the following page.

Advanced Placement (AP): minimum score = 3, English = 4

AP exam title and credit allowable:
- Art History = ARTH 2110 (3) & ARTH 2120 (3)
- Biology = BIOL 2110/L (4) & BIOL 2410C (4)*
- Calculus AB or BC = MATH 1510 (4)
- Chemistry = CHEM 1215/L (4) & CHEM 1225/L (4)*
- Computer Science = CS 2201/L & EECE 1152L
- Economics = ECON 2110 (3)
- English = ENGL 1110 (3) & ENGL 1120 (3)
- Government & Politics = POLS 1120 (3)
- Physics B = PHYS 1230/L (4) & PHYS 1240/L (4)*
- Physics C = PHYS 1310/L (4) & PHYS 1320/L (4)*
   *must include lab experiences
- Psychology = PSYC 1110 (3)
- Spanish = SPAN 1110 (3) & SPAN 1120 (3)
- Statistics = MATH 1350 (3)
- Studio Art = ARTS 1610 (3)*
   *Additional 3 credits available upon portfolio evaluation
- US History = HIST 1110 (3) & HIST 1120 (3)
University of Cambridge International Examinations (CIE): Northern will grant credit for grades of A-C on A & AS level examinations, as appropriate to degree requirements.

College Level Examination Program (CLEP): Subject examinations are administered by the Student Success Center. At the time of publication of this catalog, the fee is $72.00 per test (payable to CLEP), plus a $15.00 administrative fee (payable to Northern). Call 505.747.2164 for details. These examinations are computer-based.

CLEP Subject Exams:

- Principles of Management (46) MGMT 2110 (3)
- Introduction to Marketing (50) MKTG 2110 (3)
- Introduction to Business Law (50) BLAW 2110 (3)
- Principles of Macroeconomics (44) ECON 2110 (3)
- Principles of Microeconomics (41) ECON 2110 (3)
- Freshman College Comp. (44) ENGL 1120 (3) *(Essay is required)*
- Analysis & Interp. of Lit. (50) ENGL 1120 (3)
- American History I (50) HIST 1110 (3)
- American History II (50) HIST 1120 (3)
- College Algebra (46) MATH 1215 (3)
- College Algebra (50)* MATH 1220 (3)
  *(A score of 50 or better will earn credit for 1215 & 1220)*
- College Algebra/Trigonometry (61) MATH 1250 (3)
  *(A score of 61 will earn credit for 1220 & 1250)*
- Calculus w/ Elem. Functions (47) MATH 1510 (3)
- American Government (50) POLS 1120 (3)
- General Psychology (50) PSYC 1110 (3)
- Human Growth & Development (50) PSYC 2120 (3)
- Introduction to Sociology (50) SOCI 1110 (3)
- College Spanish I & II (50) SPAN 1110/1120 (6)
  *(A score of 50-62 will earn 6 cr)*
- College Spanish I and II (63) SPAN 1110/1120 (6)
  *(A score of 63 or better will earn 12 cr.)*

COMPLAINT PROCEDURE FOR TRANSFER STUDENTS

All New Mexico public post-secondary institutions are required to establish policies and practices for receiving and resolving complaints from students or from other complainants regarding the transfer of coursework from other public institutions in the state. A copy of Northern New Mexico College’s complaint policy may be accessed online on Northern’s website at www.nnmc.edu. If you have not received satisfaction from internal college processes, you may contact the New Mexico Higher Education Department, 2048 Galisteo Street, Santa Fe, NM 87505-2100, 505.476.8400 (http://hed.state.nm.us).
CLASSIFICATION OF STUDENTS

As a student, you are classified as a freshman, sophomore, junior, or senior based on the number of credit hours you have earned toward your declared degree, whether in residence at Northern, through standardized testing, or in transfer from other colleges. For all practical purposes, these credits include any remediation you may have taken. The breakdowns on these classifications are:

- Freshman: 1.00 to 32.9 cr
- Sophomore: 33.0 to 67.9 cr
- Junior: 68.0 to 100.9 cr
- Senior: 101.0 to 999.9 cr

These classifications are used for reporting to state and federal agencies, as well as for financial aid purposes.

STUDENT EMAIL ACCESS REQUIRED FOR ALL NNMC STUDENTS

All students who have completed the application process and have been assigned a Student ID number will, at the same time, receive a student email account which is accessible by clicking on myNNMC on Northern’s home page, www.nnmc.edu. You must do a one-time activation of your Eagles email, and then you can participate in the payment plan and receive all broadcast messages concerning course cancellations, closings or delays because of bad weather, etc. Your nnmc.edu email account is the college’s official means of communication. All college-related information will be sent to you via this email account. It is your responsibility to check your nnmc.edu email account regularly for information being sent out from various departments at the college. If you have forgotten your nnmc email password, please contact IT Services at 505-747-2259

ADMISSION / RE–ADMISSION OR RESIDENCY CLASSIFICATION APPEAL

If you have applied to the College for admission, re-admission, or for classification of residency and believe that the Office of Admissions & Recruitment and/or the Registrar has not adequately fulfilled its responsibilities in any of these areas, you may appeal by:

1. Providing the Director of Admissions & Recruitment with a letter of appeal, stating in detail what you believe to be inappropriate or incorrect about the decision. If the Director upholds your appeal, you will be admitted or re-admitted, as appropriate.

2. If, after your residency classification has been assigned, you feel that the admissions office has made a wrongful determination, contact the Classification Officer (the Registrar) to appeal. If you are still not satisfied, you may direct a written letter of appeal to the Chairperson of the Student Appeals Committee. According to state law and the New Mexico Higher Education Department, Northern’s appellate process is your last recourse prior to the courts (citation: HED Rule 910.10, effective 6/19/92).
Enrollment

STUDENT ADVISEMENT CENTER

The Student Advisement Center (SAC) serves all freshmen students, provides new student orientation information (required), assistance for all non-degree declared students, and individuals needing academic advisement. Mandatory advisement is required for all FTAC’s (first time any college) students during their first three semesters. Northern offers a variety of advising resources such as Accessibility Resource Center (ARC), Veteran’s Resource Center Advisor, Native American Student Advisor and Faculty Advising.

COURSE PLACEMENT

In order to be placed into the appropriate Math and/or English courses students must either take a course placement exam or provide ACT/SAT test scores that are no more than two years old. Northern currently offers course placement testing through the Student Success Center. Please contact us at (505) 747-2164 for more information or to schedule an appointment.

_You are not required to provide course placement evaluation scores if:_

1. You are a transfer student who has received grades of “C-” or better in the equivalent of Northern's MATH 1215 or ENGL 1110 or higher; or
2. You apply in non-degree status; or
3. You can provide appropriate-level ACT, SAT, or Accuplacer evaluation scores which are no more than 2 years old.

Note that testing above a required course into the next higher level does not relieve you of the necessity to take the lower course if it is itself required for graduation.

Visit the Student Services Area or call 747-2164 for inquiries. We strongly suggest that you take advantage of test-prep materials available in Student Services before you test.

If you are not satisfied with your scores, you may re-test, but you will need to wait a minimum of one day and will be charged $12.00 for the re-take of the exam.

REGISTRATION

Registration for Summer and Fall begins in the middle of April; for Spring, in late October/early November. We encourage you to register as early as you can—and to do so online. Dates for registration activity appear in each session’s Schedule of Classes. First-time-any-college students must attend New Student Orientation in order to register. All registration holds (academic advisement, financial, incomplete admissions) must be addressed by the student and cleared by the appropriate NNMC office before a student can register.

If you wish to register for short courses, you must do so by midnight of the Sunday before the course starts.

Deadlines for course enrollment and changes in enrollment (i.e., dropping and withdrawing) vary based on the length of an individual course’s Part of Term (POT). Detailed information on each different POT appears in each term’s Schedule of Classes. It is important to review this information before you attempt to enroll. You must meet the deadlines.
Enrollment Limitations

GRADUATING IN A REASONABLE TIME

In order to complete a program within the norm (2 years for an associate degree or 4 years for a bachelor degree), you need to enroll for 16-18 credits per semester (not including summer sessions and not including any remediation courses which may be required).

CHANGES IN ENROLLMENT

Once you have registered for classes you may find it necessary or desirable to change your schedule. Northern permits such changes if they take place within the time frame specified in the published catalog and/or schedule of classes; i.e., the first week of a regular semester or the first two days of a summer session. This activity usually involves dropping from one class and enrolling in another; however, you may wish to drop only one class or drop all classes.

You should always discuss dropping or withdrawing from a course with your academic advisor as well as your financial aid advisor. To drop your last class for the semester you must see your academic advisor; check with financial aid and complete the withdrawal with the Office of the Registrar.

A special time limit for moving from one level of English, math, or foreign language is described in the section entitled “Vertical Transfer.”

VERTICAL TRANSFER

Northern recognizes that no diagnostic test (such as its ACCUPLACER, ACT, etc.) is foolproof in making a decision about which level of English or math is appropriate for any given student. For that reason, if you or your instructor find that you are in the wrong level of English, Math, or Spanish during the first two weeks of a fall or spring semester, you may request movement to the next higher or lower level. This movement must take place by the end of the second week of instruction, and the gaining instructor must be willing to accept you into the new class.

Note also that this policy does not allow you to move, for example, from an English course to a history course, only vertically within the same academic discipline. Vertical transfer during a summer session must take place by the end of the first week of the session. Contact the Registrar’s Office for assistance with vertical transfer.

ENROLLMENT VERIFICATION

Northern New Mexico College has authorized the National Student Clearinghouse to provide enrollment verifications. The National Student Clearinghouse can be contacted on the web at www.enrollmentverify.org, and by mail: National Student Clearinghouse 2300 Dulles Station Boulevard, Suite 300, Herndon, Virginia 20171

Note that it is possible to verify only what you have done or are now doing, not what you intend to do. In other words, you may register in May or July for Fall courses; however, you cannot certify your enrollment for courses before the first day of class in any given term.
ATTENDANCE

You are expected to attend all meetings of courses in which you have enrolled. The opportunity to make up class work or examinations missed through absences is at the discretion of the instructor. Each instructor establishes attendance requirements for the course and informs students in writing at the beginning of the course by providing them with a copy of the course syllabus.

If you know that you will miss several class meetings because of unforeseen circumstances, you should inform the instructor (of each course) as soon as possible.

If you are funded through any outside agency, you may be subject to additional attendance requirements or reporting.

Important: Certain departments (e.g., Nursing, Engineering) and certain courses have special policies on attendance which can be found in the handbooks for those departments and in their course syllabi.

ADMINISTRATIVE WITHDRAWALS

Although the College recognizes that students must exercise their responsibility to attend and satisfactorily complete courses, it also recognizes that sometimes circumstances come into play that prevent the proper exercise of that responsibility. When it is evident that such circumstances exist, the College will exercise its authority to administratively withdraw the student from courses. Some circumstances which would warrant this action on the part of the College might include a death or sudden serious illness in the immediate family, incarceration, or military activation. In such circumstances, the Registrar will exercise the responsibility for the student as soon as the situation becomes known.

Northern’s policy concerning military activation and deployment permits the Registrar, upon receipt of a copy of the student’s orders, to drop the student from all courses or, if requested by the student, arrange for Incomplete grades to be entered to the record (if appropriate). Our policy is to protect the GPA of such individuals who have been called to active military duty. This same policy covers firefighters activated in the exercise of their profession.

The College also recognizes other situations in which it must exercise its own authority to withdraw students from the College. Examples of such situations might include the failure by a student to complete the payment process, the falsification of admission documents, the failure to reveal previous attendance at other colleges/universities, or a serious violation of the Student Code of Conduct.

Center for Distance Education

Northern New Mexico College offers online courses as an alternative to the traditional campus experience. Individuals who have scheduling problems, work full-time, or live at a distance from campus may want to consider taking an online class. Online or hybrid courses are taught on a semester basis for college credit, and follow the regular Northern course schedule. All Northern admissions and registration deadlines, policies, tuition and procedures apply. Consult the College’s course catalog to determine what format best suits your learning style.
Northern uses the following ACCUPLACER, ACT and SAT scores for course placement.

<table>

HOW TO BECOME A SUCCESSFUL ONLINE COLLEGE STUDENT

First Day of the Semester

Log into the NNMC Blackboard© web site on the first day of class making sure you have an Eagles Email Address, Eagle ID and required password plus purchase or rent any course related materials such as a textbook or E-Book. Please note: access to online courses will not be available until the first day of the semester.

Blackboard Orientation

It is recommended that all online students who need Blackboard assistance can find it by clicking on the Bb Student Guide located in the NNMC Student Help course menu in Bb. This brief tutorial provides an overview of Blackboard by topic another resource is Youtube where you will find an extensive collection of short “how to” videos.

Student Commitment

NNMC students taking online courses are expected to spend two hours of study per credit hour enrolled. They are also expected to participate in class, keep up with coursework, keep track of assignments and due dates, connect with instructors, and interact with classmates. Self-direction, time management, and a dedicated study space are highly recommended.
**Student Participation**

Active interaction with your fellow online students and instructor is very important especially when you have questions. Make sure you have your instructors contact information and most important download a copy of the course syllabus so you know the expectations for each of your NNMC college instructors.

**What does a student need to know to take an online course?**

- Working knowledge of Windows or Mac OS
- Experience with copying, saving computer files and understanding how to upload completed assignments to Blackboard using either a Windows or MAC OS laptop, tablet, or campus computers.
- A computer with all current software updates for running web browsers such as Firefox, Google Chrome, or Safari with the ability to stream video and audio.
- Your course may also require hardware such as a headset with a microphone for use with Zoom videoconferencing.
- For course-specific computer requirements make sure you read the course syllabus found in your Blackboard course site.

**Internet Access**

Online courses perform best on a high speed Internet connection. Cable and DSL connections improve the user’s experience with the course. NNMC’s Ben Lujan Library offers an excellent study venue for completing online assignments with its array of computers, wireless Internet access, private study rooms and flexible hours of operation.

The Center for Distance Education provides technical/training assistance for students using Blackboard. Please email distanceed@nnmc.edu, or phone our Distance Education Support Line 505.747-2221 to set up an appointment, or visit the Center for Distance Education at www.nnmc.edu for additional information.

**Undergraduate General Curriculum Requirements and Academic Policies**

Every degree or certificate at Northern is structured to provide a certain minimum spread of knowledge and competency for our graduates. In general, if you receive a diploma in a certificate program from Northern, you will have been provided all the job skills and the minimal level of competency in English and mathematics that will be required to obtain entry-level employment in the field. If you earn a degree, your background will be much broader, with exposure to several different types of academic disciplines.

1. **Certificate requirements (minimum):** Program course requirements

2. **Degree requirements:** The following General Education spread are minimum requirements throughout all Associate of Applied Science (AAS) and Associate of Engineering (AEng) degree majors shown in this catalog. The standards for Associates of Art or Science are much more detailed.

   Students will choose 12 credits from four of the following six content areas. plus three (3) elective credits from Areas I-VI.
Area I. Communication;
Area II. Mathematics;
Area III. Science;
Area IV. Social and Behavioral science;
Area V. Humanities; and
Area VI. Creative and Fine arts.

These are the general guidelines, but each AAS degree may have specific requirements within general education as well as additional requirements. The approved courses for Areas I-IV are listed on the following page.

In order to facilitate your choice of appropriate courses to fulfill these General Education requirements for the applied science degrees, we have defined certain course disciplines from which courses may be chosen to satisfy general education requirements.

**Northern’s General Education Common Core Offerings**

For purposes of selecting appropriate courses to meet Northern’s Associate of Arts and/or Associate of Science and Northern’s baccalaureate degree requirements for the General Education Common Core, you will select courses from each area shown.

Northern New Mexico College’s general education requirements reflect the values of the college and its faculty. The purpose of these courses is to help you achieve a foundation of knowledge that broadens and enriches your abilities to communicate, to think critically, to problem solve, and to broaden your world view regarding global awareness, human values, and social consciousness.

These selections call for you to develop written and oral communication skills, problem solving skills, scientific, historical, cultural, and ethical thinking. Northern has added courses to the state-wide transfer common core which present you with a greater choice of electives. If you will be transferring these courses to another college/university, you may be required to verify acceptance of such courses at the transferring institutions.

**AREA I. COMMUNICATIONS (6 CR)**

| ENGL 1110 | Composition I |
| ENGL 1120 | Composition II |
| ENGL 1210 | Technical Communications |

**AREA II. MATHEMATICS (3 CR)**

Choose one of the following:

| MATH 1350 | Introduction to Statistics |
| MATH 1220 | College Algebra |
| MATH 1130 | Survey of Mathematics |
| ENGR 1121L/1122L | Introduction to Math for Engineering Applications I & II |
AREA III. SCIENCE (4 CR)

Choose one of the following:

- ASTR 1115/L Introduction to Astronomy with Lab
- BIOL 1110/L General Biology with Lab
- BIOL 2310/L Microbiology with Lab
- CHEM 1120/L Introduction to Chemistry (non majors) with Lab
- CHEM 1215/L General Chemistry I for STEM Majors with Lab
- ENGR 1101/L Introduction to Computational Science and Modeling
- ENVS 1110/L Environmental Science I with Lab
- GEOL 1110/L Physical Geology with Lab
- GEOL 2110/L Historical Geology with Lab
- PHYS 1230/L Algebra-based Physics I with Lab

Or higher level 100 or 200 science courses with labs that are not also used for specific degree requirements.

AREA IV. SOCIAL AND BEHAVIORAL SCIENCES (3 CR)

Choose one of the following:

- ANTH 1140 Introduction to Cultural Anthropology
- CJUS 1110 Introduction to Criminal Justice
- ECON 2110 Macroeconomic Principles
- ECON 2120 Microeconomic Principles
- GEOG 1120 World Regional Geography
- PSYC 1110 Introduction to Psychology
- PSYC 2120 Developmental Psychology
- SOCI 1110 Introduction to Sociology
- SOCI 2210 Sociology of Deviance

AREA V. HUMANITIES (3 CR)

Choose one of the following:

Humans

- HUMN 1110 Introduction to World Humanities I
- HUMN 2110 Introduction to World Humanities II
- HUMN 1120 Search for Meaning
- HUMN 2120 Comparative Religion
- HUMN 2130 World Mythology

History

- HIST 1150 Western Civilization I
- HIST 1160 Western Civilization II

Philosophy

- PHIL 1120 Logic, Reasoning and Critical Thinking
- PHIL 2110 Introduction to Ethics

Chicano and Pueblo Indian Studies

- CCST 2110 Introduction to Chicana & Chicano Studies
- PINS 1110 Introduction to Pueblo Indian Studies
AREA VI. FINE ARTS (3 CR)

Choose one of the following:

- ARTS 1120 Introduction to Art
- ARTS 1320 Ceramics I
- ARTS 1410 Introduction to Photography
- FDMA 1110 Film History
- FDMA 1210 Digital Video Production I
- FDMA 1265 Digital Media Literacy

■ ADDITIONAL 9 CREDIT HOURS

1) COMM 1130 Public Speaking
2) Civics Course: Choose one of the following:
   - POLS 1110 Introduction to Political Science
   - POLS 1120 American National Government
   - HIST 1110 United States History I
   - HIST 1120 United States History II
   - SOCI 2310 Contemporary Social Problems

3) Third course depends on whether the student is a STEM or Non-STEM major. However, if a student switches majors, the first course taken in this area will substitute for the requirement.

NON-STEMH RECOMMENDATION

Choose one of the following:

- Literature Course
  - ENGL 1410 Introduction to Literature
  - ENGL 2310 Introduction to Creative Writing
  - ENGL 2650 World Literature I
  - ENGL 2660 World Literature II
  - ENGL 2420 Children’s Literature

(Note that a course cannot count in two areas. For example, ENGL 2420 cannot count for Area V and for the additional 9 credit hours)

STEMH RECOMMENDATION

- ENVS 2130 Critical Thinking in Science
- PSYC 2120 Developmental Psychology (For nursing majors)

(Note that this course cannot count both here and in Area IV)

TOTAL GEN ED CREDITS required for baccalaureate degrees = 31 semester hours

WRITING INTENSIVE COURSES

An additional new bachelor’s degree requirement that does not add hours to the General Education Core is the Writing Intensive Course requirement. Writing Intensive Courses (which will be designated as WIC) are upper division writing courses that focus on the writing process within specific disciplines. All bachelor degree seeking students are required to take at least one Writing Intensive Course in their declared
field of study where they will be given the opportunities to learn the appropriate writing genres for the field, the guidelines of their discipline’s writing format, and complete professional writing assignments using models of writing from within their chosen field. The WIC in each bachelor’s degree program is a course that is already part of the program requirements so it does not add to the total number of General Education credits required.

**FOR PURPOSES OF MEETING GRADUATION REQUIREMENTS**, courses that appear on Northern’s General Education Common Core list and that also appear as part of your program/major core will be used to satisfy only major core requirements. For example, if your major requires ECON 200, you may not count this course to also satisfy General Education Common Core requirements.

Programs and their courses listed in this catalog are subject to change through normal academic channels. New courses and changes in existing course work are initiated by the responsible department, approved by the faculty curriculum committee and by the Faculty Senate.

If you have any questions concerning the Application of the General Education Common Core, please check with your academic advisor to avoid signing up for what might be an inappropriate course.

### Grading System

*Following are the allowable grades and associated grade points:*

<table>
<thead>
<tr>
<th>Grade</th>

<td>Below Passing*</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
<td>Not Passing</td>
</tr>
</tbody>
</table>

Letter grades are issued by instructors to indicate the quality of work done; instructors are not required to issue +/- grades.

*Grades of D+ and below do not count toward graduation and do not meet the criteria for satisfying prerequisites.

From Fall 2008 through Fall 2009 remedial MATH 100N and 102N used letter grades with a suffix of “N.” These grades, such as a BN or a CN were not used in computing a GPA. As of Spring Semester 2010, these grades are no longer used.

The following grade entries are not options which you may choose at the time of registration. They are attached to the course in which you enroll:

- **CR–Credit**: a passing grade which gives credit for the course but is not used in com-
puting your grade point average. Unless you indicate otherwise at the time you register for a course, we assume that a course is desired for “credit.”

**NC—No Credit:** a failing grade, but one which is not used in computing your grade point average. A grade of NC does not meet the requirements for meeting prerequisites.

**TR:** a grade used to show that credit has been accepted in transfer for a course taken at another than Northern or is the entry posted in cases of successfully passing a locally-developed exam.

The following grade entries have no effect on your cumulative grade point average nor do they count towards credits earned:

**AU—Audit:** a grading option which you may choose for any course in which you enroll, but you must indicate this at the time of enrollment or make a change from credit to audit or audit to credit, either by the end of the second week of a regular semester or by the end of the first week of a summer session.

**W—Withdrawal:** records the fact that you officially withdrew from a specific course at some time after the period established for getting a refund (usually the end of the third week of a regular semester). “Officially” describes a process in which you withdraw online (within given deadlines). Failure to “officially” withdraw from a course results in an automatic failing grade of “F” being assigned to the course. You may not attempt to withdraw from a course after the deadline or if a final examination has already been given for the course. Check each semester’s Schedule of Classes for a detailed breakdown on withdrawal deadlines for those courses which run for less than 16 weeks. Refer any questions to the Registrar.

In certain circumstances, instructors can exercise the right to withdraw students from their courses for failure to attend/having stopped attending. However, it is the student’s responsibility to withdraw from a course to avoid receiving a failing grade.

**I—Incomplete:** records a course for which, because of serious reasons beyond your control (e.g., you had an automobile accident on the way to the final exam, or you were hospitalized in the last couple of weeks of the term), you were not able to complete that last small portion of the course requirements. By mutual, signed agreement between you and the instructor, and subsequently accepted by the Registrar, you will have up to one year to complete that small portion of the course still lacking. The deadline for completion will usually be one to three months rather than a full twelve months. These deadlines are carefully monitored and, if the grade of “I” has not been promptly removed, the Registrar administratively changes the grade to a failing grade (“F”). Such an administratively-assigned grade cannot later be changed by the original instructor of the course.

The instructor of the course must submit a request to give an “I” grade at the time the instructor turns in the final grade sheet for the course. When the instructor converts the “I” into a regular grade, your transcript will reflect the grade, its grade points, and an adjusted cumulative grade point average.

**NR—Not Recorded:** used to designate that course for which the instructor failed to turn in the grade on a timely basis. Grades must be run as soon as possible after the deadline for submission, and an “NR” is used to clear those courses for which no grades have been received. This is the only way to get grades entered without undue delay, although it does not often happen that the “NR” is used. “NR” grade entries not changed within 30 days are administratively changed to failing grades.
GRADE CHANGES

A change in grade or a correction of an improperly reported grade may normally be made only by the originating instructor who must complete the proper form (which includes submitting justification for the change), obtaining the required signatures of approval, and delivering the completed form to the Registrar.

If you wish, as a student, to challenge a grade, refer to the section of this catalog below dealing with appeals of grades. If the grade you question has been issued by an instructor who is no longer employed by Northern, you should contact the chairperson responsible for that department.

No requests for a grade change or correction will be accepted after one year from the initial assigning of the grade (Issuance of Grades), you are responsible for accessing your records online to determine any discrepancy. If anything seems to be incorrect about the grade, it is your responsibility to promptly alert the Office of the Registrar.

GRADE APPEALS

Only you, the affected student, may challenge or appeal a final course grade (henceforth “grade”) which you feel is improper or incorrect. The Grade Appeal Form is available on the Registrar’s page at www.nnmc.edu:

Step 1) The student must read and understand the policy, and compose and attach a letter or memo stating the exact nature of the appeal and the reason(s) for the appeal. The student must initiate the appeal with the instructor no later:

- Fifteen (15) college business days of the Spring semester following a grade awarded in the previous Fall semester;
- Fifteen (15) college business days of the Fall semester following a grade awarded in the previous Spring semester;
- Fifteen (15) college business days of the Fall semester following a grade awarded in the previous Summer term.

The chair/director (dean if chair/director is not available) shall become the instructor for purposes of the grade appeal if the instructor is not available or unreachable in which case Step 3 is omitted.

The instructor must initial and date this form at the time of receipt from the student.

Step 2) Upon receipt of this completed form:

- The instructor shall record the decision on this form, and sign and date; and
- The instructor shall inform (email, letter, in-person) the student of his/her decision within ten (10) college business days; and
- The instructor shall return this form to the student and attach a memo or letter describing the basis for the decision and supporting the decision with documentation (e.g. homework, exam scores). If the student is communicating via email, the form can be returned to the student by email after the form is scanned.

Step 3) If the appeal is denied at Step 2:

- If the appeal is denied at Step 2, the student may continue the appeal with the department chair/director (or Dean if there is no chair/director). The student has five (5) college business days following the decision at Step 2 to continue with the appeal.
• The chair/director/dean will review the grade appeal and attempt to resolve the grade appeal with the instructor and the student. If the grade appeal cannot be resolved, the chair/director/dean will send his or her recommendation to the Academics Standards Committee.

• If the grade appeal is resolved, the instructor shall submit a Change of Grade form to the Office of the Registrar within ten (10) college business days.

STEP 4) If the appeal is denied at Step 3:

• If the appeal is denied at Step 3 by the department chair/director (or Dean if there is no chair/director), the student may continue the appeal to the Academic Standards Committee via e-mail: academic-sc@nnmc.edu within ten (10) college business days. The department chair/director (or Dean if there is no chair/director) shall inform the chairperson of the Academic Standards Committee of the denial. The Academic Standards Committee shall review the appeal (based on information from both the student and the instructor) and hold a hearing if indicated within twenty (20) college business days. The Academic Standards Committee may not convene over the summer for a hearing due to limited availability of faculty. Then the committee shall submit a recommendation to the Office of the Provost within five (5) college business days. The Office of the Provost shall communicate the final decision on the appeal to the Dean of Students who will inform the student within five (5) college business days.

• If the appeal is granted, the department chair/director (or Dean if there is no chair/director) shall submit a Change of Grade form to the Office of the Registrar within five (5) college business days.

RETROACTIVE WITHDRAWAL

The Retroactive Withdrawal policy is designed to allow for the change of failing grades to grades of “W” (withdraw) when a serious and unforeseen circumstance occurs which makes it impossible for the student to complete the official withdrawal process prior to the withdrawal deadline set in the academic calendar.

A student may petition for Retroactive Withdrawal from a course(s) or from all courses taken during a prior semester if circumstances of a serious and compelling nature prevented the completion of course work and extenuating circumstances prevented submission of a regular withdrawal petition by the deadline. In filing a petition for Retroactive Withdrawal, withdrawal from all courses taken during the term is normally expected since ‘extenuating circumstances’ are not course-specific. When a retroactive withdrawal is approved, failing grades for the semester will be changed to a “W”. Students who gain a retroactive withdrawal are not candidates for the remission of tuition and fees. The time limit for filing a petition for a retroactive withdrawal is one year from the last day of the semester for which the retroactive withdrawal is sought. Petitions require approval from either the Dean or Chairperson of the College that the student is declared under.

Students may be candidates for retroactive withdrawal when: The extenuating circumstances that contributed to the inability to withdraw by the deadline were: 1) beyond their control 2) unforeseeable 3) severe 4) verifiable.

For more information, please contact the Registrar at 505.747.2138
GRADE POINT AVERAGE (GPA)

You may calculate your GPA by dividing the number of grade points earned by the total number of credit hours generating those points, excluding any course for which a grade of W, NC, CR, AU, or I has been recorded and any course which was accepted by Northern in transfer. Your GPA is based only on courses taken at Northern, not on course grades transferred to Northern from another college or university.

ISSUANCE OF GRADES

All grades are available online. Northern does not mail mid-term or final grade reports.

ACADEMIC FORGIVENESS

Northern recognizes that sometimes students are not academically prepared to start college, or are perhaps not emotionally or socially prepared, and sometimes receive failing grades or have to withdraw in their first term(s). The results may follow them throughout their academic careers and even affect them to the point that they drop out of college or are denied financial aid. Northern has, therefore, adopted a policy which allows those who fall into this category to request that such grades be deleted from their academic transcript. Students who meet all of the criteria listed below may submit a Request for Academic Forgiveness form to the Office of the Registrar, who is responsible for administering this policy.

The criteria for exercising Academic Forgiveness:

1. The term(s) for which you seek forgiveness must have happened at least three years prior to your formal request for forgiveness, and your semester GPA at that time for each term involved must have been below 2.00; and
2. The terms involved are limited to your first, or first two, terms at Northern; and
3. Since returning to Northern, you must have completed at least 12 credit hours (spread over one or more terms) and must have a minimum cumulative GPA of 2.00 over those courses (completed after the period for which forgiveness is sought) before applying for forgiveness; and
4. You must not yet have graduated from Northern.

The result of achieving Academic Forgiveness will be that the term(s) and all associated courses in that term(s) will no longer appear on your transcript, although a notation will appear on the transcript to the effect that “Academic Forgiveness was granted for (whichever term was appropriate).” A separate paper trail will be maintained to track the action taken.

REPEATING COURSES

You may re-enroll, without special permission, for any course which you have taken at Northern. Each course enrollment and its grade will appear on your transcript, but only the last grade earned will be used to calculate your cumulative GPA and only the last grade earned will be counted toward graduation.

Some courses, however, are already designed to permit a certain number of repeats (i.e., a PHED course, an ARTS-studio course, etc.) without affecting your cumulative GPA. For such repeatable courses, each enrollment and its grade will be counted, not just the last.
If, because of curricular changes that take place, the repeat of a course has a different credit hour value, the value of the repeat course (the latest) will be used to calculate your cumulative GPA and to satisfy graduation requirements.

If you do not pass a course which is a prerequisite to enrolling in another, higher level course, you must repeat the prerequisite course before enrolling at the higher level. An example of this would be completing ENG 109N with a grade of CR before being able to enroll in ENG 1110.

Please note: certain forms of financial aid will not provide assistance for repeats of courses which have previously been successfully completed. Compliance with such regulations is your responsibility if you receive such assistance.

**SCHOLASTIC STANDING**

Scholastic standing will be determined at the close of each semester and an appropriate entry posted to your transcript. In the absence of any other notation, you may assume that you are in Good Standing.

Your end-of-term standing (Good Standing, Dean’s List, Probation, or Suspension) is based on the total number of semester hours attempted and the GPA achieved for those credit hours and is permanently recorded on your transcript.

Regulations governing academic probation and suspension are based on the 2.00 minimum cumulative GPA which is required to graduate from any certificate or degree program offered by Northern. A semester of course work with less than a 2.00 GPA results in a deficiency which must be removed in succeeding semesters if you are to graduate or successfully transfer to another college or university.

**GOOD STANDING**

You are considered to be in Good (academic) Standing if your cumulative GPA is at or above the 2.00 level.

**THE DEAN’S LIST**

At the end of each fall and spring semesters, the Dean’s List is published as the official recognition of outstanding academic accomplishments. Only full-time students who are pursuing a declared major and who have earned a semester GPA of at least 3.50 over a minimum of 12 credit hours (excluding any courses labeled as remedial), and completed each course with a grade of C or better, are eligible for this honor. The entry will be posted to your transcript, and you will receive a letter of congratulations from the College Provost.

*Note:* The following policies regarding probation and suspension relate to academic probation and suspension, not financial aid probation and suspension. For financial aid policies, see page XX.

**ACADEMIC PROBATION**

If, at the end of any term, your cumulative GPA, based on at least 16 credit hours of course work attempted at Northern, fails to equal at least a 2.00, you will be placed on Academic Probation.

Probation is not a penalty, but an emphatic warning that the quality of your work must improve if you are to attain the GPA necessary to graduate from Northern. You may not appeal probation.
If you are notified that you are on Probation, you may continue to enroll, but you must maintain a semester GPA of 2.00 or higher, and you will not be permitted to enroll in more than 12 credit hours of course work during a regular semester or more than 6 credit hours during a summer session without special permission from the Provost. As you continue to raise your GPA, your status will be recorded as Continued Academic Probation until you have achieved a cumulative GPA of 2.00 or higher and achieve Good Standing.

**ACADEMIC SUSPENSION**

If, at the end of any term, your cumulative GPA, based on at least 36 credit hours of course work attempted at Northern, fails to equal at least a 2.0, you will be placed on Academic Suspension, which may or may not have been preceded by a period of Academic Probation or Continued Academic Probation.

The duration of an initial suspension is one semester; for subsequent, repeat suspensions, one full year. If you have registered early for a succeeding term and then are put on suspension, the Registrar’s Office will delete your enrollment until after you have submitted an official appeal. Under these conditions, you will have no guarantee of enrollment in the course which will have been dropped.

At Northern, Suspension is not viewed as a penalty for failure, but rather as an opportunity to deal with the pressures of life and school (which may have contributed to the low grades that brought on a period of Suspension) prior to re-applying for admission and a chance to continue your education.

**SUSPENSION APPEAL**

*If you have been placed on Academic Suspension, you may appeal such status by:

1. Providing the Dean of Student Services with a letter of appeal, stating what caused the low grades which resulted in suspension and what you plan to do to correct the situation. If the Dean of Student Services accepts the appeal, you will be re-admitted to the College on Academic Probation and may be restricted in terms of the number of hours for which you may enroll and/or in terms of specific courses which you must take or may not take.

2. If the Dean of Student Services denies your appeal, you may appeal to the Faculty’s Academic Standards Committee, providing that Committee with a written summary of the situation and a detailed, specific statement of what you want. If the Committee recommendation is in your favor, it will send its recommendation through the Faculty Senate to the Provost for approval and forwarding to the Dean of Student Services for action.*

**Graduation**

**GENERAL REQUIREMENTS**

In order to be eligible to receive a degree or certificate from Northern, you are responsible for meeting the following requirements as well as meeting specific admission and course requirements listed under the major you have chosen to pursue.
1. An overall cumulative GPA of 2.0 or higher and completion of all required coursework with no grade below a “C” if the course was completed before Fall 2018 or with no grade below a “C-” if the course was completed during or after Fall 2018. Certain programs with professional accreditation may require special or additional standards for graduation.

2. You may not count toward degree requirements any course considered to be remedial in nature (i.e., usually bearing a suffix of “N,” such as MATH 100N). Certain certificate programs, however, may allow you to count a limited amount of remedial work against graduation requirements in the area of General Education.

3. You may not count a course more than once for any requirements for a certificate, degree, major, or minor. This includes courses required for a major that might also be on the list for General Education courses, courses in a minor that are also required for a major or vice versa, etc. One exception is that General Education as well as core courses in a degree program may count toward a double major, as long as you have taken all of the other distinct courses in the second major. In addition, students pursuing a second degree may use the same General Education and required major core courses for both degrees as long as you take an additional 30 new hours approved by the Department chair of the second department.

4. Residency for Graduation: for a certificate or associate degree program, you must have earned at Northern at least the last 15 credit hours towards an associate degree or certificate; for a baccalaureate degree, the minimum is the last 30 credit hours. Any exception to this must be cleared by the Registrar before your last term at Northern starts. Failure to comply may be grounds for denying acceptance of your courses in transfer, thus delaying graduation.

5. Upper Division Coursework Requirement: Students must complete 40 credit hours of upper division coursework for a Baccalaureate degree. Of the 40 credit hours, 20 credit hours are to be in the major.

6. You must complete an online Graduation Application as well as a Petition to Graduate form. This includes payment of the required graduation fee, (currently $100.00 (2016-2017); completing and obtaining signatures from your academic advisor and department chair; and submission of the petition to graduate form through various college departments for signatures; and finally to the Office of the Registrar.

   Applications are due by the end of the second week of the semester you intend to graduate. Check the Academic Calendar for the exact deadline. The Registrar will conduct a further review of your records and, if the Registrar identifies concerns with credit hours or requirements you will be notified that your graduation may be in jeopardy. You will begin to receive information for the Office of the Registrar about the Commencement program around the middle of the semester.

7. If you start a program and continue uninterrupted, you are entitled to graduate under the terms of the degree plan in the catalog in effect at the time of your initial written declaration of the major, or under any later issued catalog, whichever is more beneficial to you.

   If, however, you interrupt your attendance by more than one (1) academic year of non-attendance you will be bound by the terms of the catalog in effect at the time of your latest re-admission to the College.
The graduation fee of $100.00 covers all degrees earned over the course of five years.

8. You cannot receive your diploma or official transcripts if you owe a debt or have an administrative hold of any kind to the College or if your undergraduate admission status is incomplete.

9. Your diploma(s) will reflect the legal name under which you have been admitted to Northern. If you wish any other name to appear, you will have to document a legal change of name (as described in the section titled “Change of Name”) prior to graduation.

10. Replacement diplomas will be provided for a fee of $7.50 each, but only if the diploma was awarded since 1999. Northern cannot produce a diploma for any period earlier than 1999.

11. Graduation takes place at the end of the semester in which all program requirements and financial requirements have been met, even though there may not be a formal graduation ceremony scheduled for that semester. In other words, you may have completed all of the required courses in a prior term, but if you haven’t paid the graduation fee and/or completed the processing during the same term in which you completed the course work, you won’t graduate until the end of the term in which the last requirements are met (payment, for example). If you should find yourself in this situation, you must submit a Graduation Application and Petition-to-Graduate within two years of having completed all of your program requirements.

GRADUATION WITH HONORS

You will meet the requirements for graduating with honors if you have completed at least 50 percent of your program requirements here at Northern. Your transcripts and diploma will reflect that honor within the following guidelines:

- **Cum Laude**: 3.50–3.74 cum. GPA
- **Magna Cum Laude**: 3.75–3.94 cum. GPA
- **Summa Cum Laude**: 3.95–4.00 cum. GPA

GRADUATION WITH MENTION OF HONOR SOCIETY MEMBERSHIP

If you are a member in good standing in Northern’s Alpha Lota Sigma chapter of Phi Theta Kappa, the international honor society for two-year colleges, you will be entitled to wear the Society’s honor regalia at graduation. See the chapter advisor for information on membership and honor regalia.

ALUMNI STATUS

Once you have graduated from a program, you become a Northern alum. This is an important role: satisfied graduates make the best recruiters for any college. You satisfy this role by mentioning where you received your degree and recommending Northern to family, friends, and co-workers as well as by becoming active in the Northern Alumni Association. As an alum, it is important that you stay in touch with Northern and keep your information current for our records.
# Tuition & Fees (Fall 2019)

ESTIMATED EXPENSES FOR NEW MEXICO RESIDENT PER SEMESTER
Tuition: see pertinent section about resident vs. non-resident on page xx.
Books, Supplies, and Equipment: $600.00
Living Expenses/Other: $650.00

SPECIAL ASSESSMENTS
In the event of damage to College property, the College reserves the right to charge those responsible for replacement or repair costs.

PAYMENT POLICY
All charges incurred in connection with college attendance are payable in advance of the services rendered. Tuition, fees, and other charges are subject to change at any time by the Northern New Mexico College Board of Regents.

*The $100.00 graduation fee covers all degrees earned over the course of five years. The fee includes the diploma, diploma cover, honor cords, etc. but not the cost of cap and gown.
Once you have registered for a class, you are liable for payment in full unless you drop the class within the period designated for a full (100%) refund. Failure to pay will result in disenrollment. Check the Course Schedule or myNNMC for exact disenrollment dates and other deadlines for each semester.

Northern has a Payment Plan which you can automatically access by paying 5% of the total charges at the time you register, and a $25.00 service charge. For summer sessions, there will be two installments due on 15th of each month; for fall and spring semesters, there will be three installments due on the 15th of each month. When you enter into the agreement, you will be charged a fee of $25.00. If your payment(s) is late, you will be charged a $10.00 late payment fee.

You are responsible for payment of all financial obligations when due. If you fail to do so, there will be sufficient cause to: 1) prevent further registration; 2) withhold academic records, including transcripts and diplomas; and 3) take disciplinary action including suspension or dismissal.

The Bill+Payment System is a secure site. You can access the Bill+Payment System by clicking on TouchNet Online Bill Pay after logging into myNNMC (next to the search field at the top of the Northern’s home page). There you can:

1. View your tuition and fee charges for the term.
2. Make an online payment using your debit card, credit card, or electronic check.
3. Enroll online for a payment plan (Note: A $25 service charge is assessed and due at time of enrolling in a payment plan; a late fee of $10 will be assessed if the payment plan amount is not paid by the due date.)
4. Sign up for electronic refund of your financial aid or any credit balances on your student account. All refunds will be delivered via Direct Deposit.
5. Authorize parent or third party access to your student account information to make an online payment or enroll online for a payment plan on behalf of the student.
6. Receive automatic emails sent to you and/or an authorized third party when payments are due or a new statement is posted. Note: You must activate your NNMC email account. Instructions are available at myNNMC.

Personal checks submitted for any fees must have your student ID number written on them. If you prefer to not have your student ID on your check, you may submit payment by cashier’s check, money order, or cash. The cashier will write your student ID number on checks if you have not already done so.

Students expecting payment by a third party must turn in authorization documentation to Student Billing a minimum of 2 weeks prior to the class start date.

OTHER DEADLINES

Departments that offer assistance grants for special programs must turn in authorization documentation to Student Billing prior to the payment deadline published in the Academic Calendar.

Tuition waivers for faculty and staff must be received in the Business Office a minimum of 2 weeks prior to the class start date. Note: Faculty and staff are responsible for paying 100% of all required fees and books. You may choose to set up a payment plan to pay these fees or make payments via payroll deduction. Otherwise fees must be paid in full when you register.
Failure to submit authorizations, pay in full or enroll in a payment plan in a timely manner will result in disenrollment. Disenrollment is one week before the semester begins and the two subsequent Fridays through the first week of the semester.

**Some Exceptions**

**SENIOR CITIZENS**

If you are age 65 and above and are classified as a resident of New Mexico, you will be charged $5.00 per credit hour if you enroll for 6 credit hours or less. If you enroll for more than 6 credit hours in such courses, charges for credit hours in excess of 6 will be charged at the regular rate of $198.55 per credit. New Mexico Senior Citizens are subject to all regular student fees.

**COLORADO RECIPROCITY**

The states of New Mexico and Colorado have entered into an agreement which permits citizens of either state to attend the other state’s colleges at in-state tuition rates. There are some restrictions. For example, Northern will permit any Colorado resident to be admitted and enroll under the terms of this agreement, limiting the privilege in only one program (Nursing), for which no more than three Colorado residents may be enrolled at any one time; Colorado restricts this reciprocity to New Mexico residents attending only those colleges near the New Mexico/Colorado border. Check with the Admissions Office to see if you are eligible.

If you are a resident of Colorado and maintain your Colorado residency while attending Northern, you may be eligible to enjoy in-state tuition rates if you enroll for not less than 15 credits per regular term. Check with the Admissions Office at the time you are admitted and/or each term when you register for classes.

*Note:* If you are admitted and register under this basis, you will not be eligible to claim New Mexico residency until one full year has passed since you ceased enrollment under the reciprocity agreement.

If you are granted this waiver, it is applicable to fall and spring terms only.

**WESTERN UNDERGRADUATE EXCHANGE (WUE)**

New Mexico is one of several states which have entered into an agreement which allows students to attend college in another state at a rate of tuition which is between in-state and out-of-state tuition. This is designed primarily to allow a citizen to pursue a degree which is not offered in his own home state but which is offered in another state which is signatory to the agreement.

If you are a resident of one of the following states, you may be eligible to enjoy a tuition rate ($203.78 per credit) which is 150% of the in-state rate: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, or Wyoming.

To use this benefit, you must clearly state your intention to do so on your Application for Admission form [there is a box to check on the form].

Check with the Admissions Office each time you register for classes. You must register for at least 15 credit hours to use this benefit.
Note: If you are admitted and register under this basis, you will not be eligible to claim New Mexico residency until one full year has passed since you ceased enrollment under the reciprocity agreement.

If you are granted this waiver, it is applicable to fall and spring terms only.

DETERMINATION OF RESIDENCY STATUS

A. At time of first admission. A person’s residency classification for tuition purposes shall be determined at time of admission and must be completed by the census date of that first enrollment in a given public postsecondary educational institution. A person not meeting the residency requirements shall be classified as a non-resident for purposes of tuition charges. The student’s classification at time of admission remains in effect unless the individual is re-admitted to the institution or until the individual petitions to become a New Mexico resident.

B. Petition for resident tuition classification. Once determined a non-resident at the time of census date, a student can petition to be classified as a New Mexico resident by completing the Petition for resident tuition classification form (see Paragraph (3) of Section B of 5.7.18.12 NMAC, procedure to petition for resident tuition classification).

[5.7.18.8 NMAC-Rp, 5.7.18.10 NMAC, 8/30/2007]

REQUIREMENTS TO ESTABLISH NEW MEXICO RESIDENCY:

To become a legal resident of New Mexico for tuition purposes each of the following requirements must be satisfied:

A. Twelve month durational requirement. A person must physically reside in New Mexico for the twelve consecutive months immediately preceding the term for which the resident classification is requested.

B. Financial independence requirement. Only persons who are financially independent may establish residency apart from parents or guardians. A student cannot be approved for residency who is financially dependent upon his or her parents or legal guardians who are non-residents of New Mexico. Dependency will be determined according to the 1954 Internal Revenue Service Code, Section 152 and is always based on the previous tax year for residency purposes. If under the age of 23 at the time the student applies for residency, a copy of his/her parents’ or guardians’ 1040 or 1040A U.S. income tax form for the previous tax year is required. If the student is shown to be a dependent on this tax form, he/she will not be considered financially independent or eligible for residency during the current year.

C. Written declaration of intent requirement. The student or person must sign a written declaration of intent to relinquish residency in any other state and to establish it in New Mexico.

D. Overt acts requirement.

(1) Overt acts are required to evidence support of the written declaration of intent to establish permanent residency in New Mexico. Any act considered inconsistent with being a New Mexico resident, will cause the request for resident classification to be denied. The required overt acts are evidence of any two of the following:

(a) the applicant is financially dependent, a copy of the parent or guardian’s previous year’s income tax return showing the applicant as a dependent and the
parent's address as New Mexico; or

(b) a New Mexico high school transcript issued in the past year confirming attendance at a New Mexico public or private high school within the past twelve (12) months; or

(c) a transcript from an online high school showing a New Mexico address confirming attendance within the past twelve (12) months; or

(d) a New Mexico driver's license or ID card with an original date of issue or a renewal date issued prior to the first day of the term or semester; or

(e) proof of payment of New Mexico state income tax for the previous year; or

(f) evidence of employment within the state of New Mexico; or

(g) New Mexico vehicle registration; or

(h) voter registration in New Mexico; or

(i) proof of residential property ownership in New Mexico; or

(j) a rental agreement within New Mexico; or

(k) utility bills showing the applicant's name and a New Mexico address; or

(l) other evidence which would reasonably support the individual’s intent to establish and maintain New Mexico residency.

(2) The department recognizes that there may be circumstances in which a student would not be able to fulfill the requirements of an overt act as listed in this section, such as: 1) individual is physically disabled and does not have a driver's license, or 2) individual is a convicted felon and therefore cannot vote, etc. In instances such as these, the institution will afford the student an opportunity to provide other documentary evidence or reasonable explanation which demonstrates that permanent residency in New Mexico has been established by the student.

E. Exceptions to the twelve (12) month requirement. If a student has met the requirements of one of the following exceptions, and is granted residency status, the student shall continue to be classified and reported as a resident for subsequent continuing enrollment.

(1) An individual married to a legal resident of New Mexico and providing appropriate evidence shall not be required to complete the 12-month durational requirement but must satisfy all other requirements listed in Subsections B, C, and D of 5.7.18.9 NMAC.

(2) Any person, their spouse and dependents who move to New Mexico or who now live in New Mexico and who provide appropriate evidence that they work in a permanent full-time position or practice a profession or conduct a business full-time in New Mexico, shall not be required to complete the 12-month durational requirement but must satisfy all other requirements listed in Subsections B, C, and D of 5.7.18.9 NMAC.

(3) Any person entering the active [military] service of the United States while a resident of New Mexico and who enters a state institution of postsecondary education in New Mexico after separation from such service may be classified as having been a legal resident in New Mexico during the time spent in the service provided they:

(a) have not while in the service done anything (such as voting in another state) to show abandonment of their New Mexico residency;
(b) have not established residence in some other state subsequent to being separated from service;

(c) return to New Mexico within one year after separation from service with the intention of maintaining this state as their legal residence;

(d) are not a dependent minor with parent(s) or guardian(s) whose place of residence classifies him or her as a non-resident of New Mexico.

(4) Any person, their spouse and dependents, who move to New Mexico for retirement purposes, and who provide appropriate evidence of retirement shall not be required to complete the 12-month durational requirement. They must, however, satisfy the other requirements listed in Subsections B, C, and D of 5.7.18.9 NMAC.

5.7.18.10 WAIVERS

If a student has met the requirement of one of the following waivers, the student shall continue to be considered a non-resident for reporting purposes but will receive the benefit of in-state tuition rates. In receiving such a waiver, the student does not become eligible for state-funded student financial aid, unless the regulations for a particular aid program allow for such eligibility.

A. American Indian nations, tribes and pueblos. All out-of-state members of an American Indian nation, tribe, and/or pueblo located wholly or partially in New Mexico, regardless of the residence of the member prior to acceptance at a post-secondary educational institution, shall be eligible to pay the in-state tuition rate. These include members of the following tribes or pueblos: Navajo Nation, Jicarilla Apache, Mescalero Apache, Taos Pueblo, Picuris Pueblo, Ohkay Owingeh, Santa Clara Pueblo, Nambe Pueblo, San Ildefonso Pueblo, Pojoaque Pueblo, Tesuque Pueblo, Cochiti Pueblo, Jemez Pueblo, Santo Domingo Pueblo, San Felipe Pueblo, Zia Pueblo, Santa Ana Pueblo, Sandia Pueblo, Isleta Pueblo, Laguna Pueblo, Acoma Pueblo, Zuni Pueblo, and the Ute Mountain tribe.

B. Armed forces. Any person, their spouse or dependent child, not otherwise entitled to claim residence, who is a member of the armed forces of the United States or armed forces of a foreign country assigned to active duty in the state of New Mexico, will be assessed in-state tuition rates.

(1) Assignment to active duty within New Mexico must be certified by the military person’s commanding officer upon the student’s initial enrollment. Such students may continue paying resident rates for as long as they attend consecutive semesters at the same institution.

(2) A spouse or child of a veteran of the armed forces is entitled to pay tuition and fees at the rate provided for New Mexico residents; provide that spouse or child is eligible for benefits pursuant to the federal Post-9/11 Veterans Educations Assistance Act of 2008 or any other federal law authorizing educational benefits for a veteran and the dependents of a veteran.

C. National Guard. Pursuant to Section 20-4-14, NMSA 1978, an active member of the National Guard and the member’s spouse and children shall be deemed in-state residents for purposes of determining tuition and fees at all state institutions of higher learning.
D. Summer session. During summer sessions, non-resident tuition may be waived according to the institution's tuition policy.

E. Certain Texas residents. Pursuant to Section 21-1-3D, NMSA 1978, for the purposes of tuition payment and budget and revenue calculations, the board of regents of any post-secondary, state educational institution, as defined in Article 12, Section 11 of the constitution of New Mexico (specifically, NMHU, ENMU, NMSU, or WNMU), may determine that any Texas resident who resides within a (one hundred thirty-five) 135 mile radius of that institution may qualify for in-state tuition rates.

F. Colorado and Arizona reciprocity. Tuition reciprocity participants from Colorado and Arizona shall be selected by eligible institutions to pay in-state tuition rates based on criteria set forth by each eligible institution. The department will notify each eligible institution of the maximum waivers allocated on an annual basis.

G. Athletic scholarship recipients. Pursuant to Section 21-1-3E, NMSA 1978, for the purposes of tuition payment and budget and revenue calculations, any student (U.S. citizens and foreign nationals) receiving an athletic scholarship from a post-secondary educational institution set forth in Article 12, Section 11 of the Constitution of New Mexico (specifically, UNM, NMSU, NMHU, ENMU, [or] WNMU, or NNMC) may qualify for in-state tuition rates.

H. Competitive scholarship recipients. Any student participating in this program shall be recognized as a competitive scholar and reported as such, unless the student petitions for and is granted residency status.

I. Graduate assistants, including research and teaching assistants, employed at least one-fourth time (10 hours weekly), will be assessed in-state tuition rates. To be eligible, students (U.S. citizens and foreign nationals) must be enrolled full-time, as defined in the graduate catalogue of the public postsecondary institution, during regular terms.

J. Nondiscrimination principle. Notwithstanding the provisions of Section of 5.7.18.7 NMAC, any tuition or state-funded financial aid that is granted to residents of New Mexico shall also be granted on the same terms to all persons, regardless of immigration status, who have attended a secondary educational institution in New Mexico for at least one year and who have either graduated from a New Mexico high school or received high school equivalency credential (such as a GED®) in New Mexico. State-funded financial aid programs with an employment component may require U.S. citizenship or eligible non-citizen status.

[5.7.18.10 NMAC–Rp, 5.7.18.12 NMAC, 8/30/2007; A, 5/30/2008]

APPEAL OF RESIDENCY

If, after your residency classification has been assigned, you feel that the admissions office has made a wrongful determination, you should contact the Dean of Student Services to appeal. If you are still not satisfied, you may direct a written letter of appeal to the Chairperson of the Student Appeals Committee.

According to state law and the New Mexico Higher Education Department, Northern’s appellate process is your last recourse prior to the courts (citation: HED Rule 910.10, effective 6/19/92).
Refunds

TUITION AND FEES

Refunds are computed from the course cancellation or enrollment drop date according to the following schedules:

Note: No refund is made on regular or late registration fees, or in the case of disciplinary suspension or dismissal. If you are dismissed for falsification of records, eligibility for a refund will be entirely at the option of the College.

REFUNDS APPEAL

If you believe that the College’s policy for the refunding of charges has not been properly implemented, you may appeal to the Student Appeals Committee by providing the committee chair a letter of appeal, stating in detail what you believe to be inappropriate or incorrect with the decision. If the Student Appeals Committee upholds your appeal, the refund will be adjusted appropriately.

DROPPING/WITHDRAWING FROM COURSES

Once you have registered, you may drop (during the refund period) or withdraw (after the refund period) from any course online—without special permission—at www.nnmc.edu. Click on myNNMC, then on Banner Connect, and follow the directions. You may not drop or withdraw from a course by telephone, nor may anyone other than you or your instructor drop or withdraw you from a course. If you are withdrawing from your last remaining class for the semester you must complete the process in person. You cannot drop/withdraw from your last class though your student myNNMC portal. You must see your academic advisor; receive signature from the Office of Financial Aid; and turn in the signed form to the Office of the Registrar for final processing.

If it is established that you have never attended or have at least three consecutive absences during the first three weeks of a regular term (first week of a summer session) without prior knowledge of your instructor, that instructor has the right to withdraw you from the course—has the right to, but does not have to withdraw you. If you should stop attending a class after the deadlines mentioned above, do not assume that you will be withdrawn by your instructor—follow the instructions in the previous paragraph to avoid being billed or receiving an “F” for the course(s).

If you drop a course within the refund period (the first two weeks of a regular fall or spring semester or the first week of a summer session), your enrollment in that course will not appear on your transcript.

COURSE CANCELLATION REFUNDS

Normally prior to the first day of class, the Provost will cancel those classes having insufficient enrollment. An email message will be sent to your college email address, informing you that one of your classes has been cancelled. If the Provost deems it advisable to wait until the first day of class to make the determination, the class will be met by a department representative, the students informed of the cancellation and given an opportunity to immediately change their schedules.

Those fees which are normally non-refundable will be refunded if the cancellation completely withdraws the student from all courses for the term.

BOOKSTORE REFUNDS

Textbook purchases will be fully refunded within 10 working days from the start of classes. For courses offered for a weekend and/or one week, you will have only until the first day of class to return for a full refund. For any purchases made after the first 10 days, the student will have only 48 hours to return for a full refund. New textbooks are fully refundable only when returned in the same condition as purchased. No book purchased during the week of mid-terms or finals will be refunded; however, you may sell them back at the end of the term during the book buy-back period.

If your course has been cancelled, bring a copy of the cancellation (e.g., a new copy of your schedule showing “CC” on the line for that course) and your receipt to the Bookstore within 48 hours of the cancellation, and you will receive a full refund. New books must be in their new condition; if a shrink-wrapped book’s wrapper has been broken, the refund amount will be discounted by a stocking fee.

Non-text merchandise is fully refundable within 7 days of receipt. Merchandise must be in original salable condition. No refund is given on magazines or newspapers.

Note: You must retain your receipt to process a return. If you have paid by check and wish a refund, you may have a 3-day waiting period before refunds are made.
GRADUATION FEE REFUNDS

If, after submitting your Graduation Application, you should decide not to graduate as scheduled or if you fail to meet the requirements for graduation, you will receive no refund.

Financial Aid

The Financial Aid Office at Northern New Mexico College is committed to helping students overcome financial barriers to reach success in higher education. To fulfill this goal, Northern’s Financial Aid Office administers a broad spectrum of grants, scholarships, student employment, and student loan programs to help meet the financial needs of our students.

The principle and primary responsibility to finance a college education though, belongs to the student. Therefore, it is important to recognize that whether you are a dependent student relying on financial support from your parents or are an independent student, you must be prepared to make some financial sacrifice to pay for the investment of earning your college degree.

APPLYING FOR FINANCIAL AID

To apply for most types of financial aid students must complete the Free Application for Federal Student Aid commonly referred to as the FAFSA. Students can complete the FAFSA online at www.fafsa.ed.gov. Northern’s school code is 005286. Students may also seek assistance with the FAFSA by visiting the Financial Aid Office. Some types of financial aid are limited, therefore, completing the FAFSA by the April 30th priority processing date and following through with all requested requirements will increase the likelihood of being awarded the maximum amount of financial aid possible.

GENERAL ELIGIBILITY REQUIREMENTS

To receive financial aid you must demonstrate the following:

1. Meet United States citizenship requirements for federal aid; non-citizens must meet state requirements for certain state aid; and
2. Meet the minimum Satisfactory Academic Progress (SAP) standards (explained later in this section); and
3. Not be in default on a Federal Perkins Loan, a Federal Stafford Loan, or Federal Direct Student Loan; and
4. Not owe a refund/overpayment on a Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Federal Student Loans; and
5. Have been accepted and enrolled in an eligible program of study.

Please note: Federal financial aid does not pay for PD Math 100NL or certain other developmental courses.

SATISFACTORY ACADEMIC PROGRESS (SAP)

There are three major standards listed below that are used to determine eligibility for participation in financial aid programs at Northern New Mexico College. To maintain eligibility a student must be meeting the minimum standards for SAP by
the end of any given enrollment period. Though this policy establishes the minimum standards for federal financial aid programs at NNMC, an individual aid program may have unique qualitative and/or quantitative standards as mandated by law or the program’s governing entity (e.g., Legislative 3% Scholarship and the Legislative Lottery Scholarship).

**MINIMUM STANDARDS OF SATISFACTORY ACADEMIC PROGRESS (SAP)**

1. **Cumulative Grade Point Average (GPA)**
   Students must meet the minimum of a 2.0 cumulative GPA.

2. **Completion Rate (Academic Progress)**
   Students must earn 67 percent of the total number of credits they attempt. A student’s completion rate or “academic progress” is calculated by dividing the total number of earned credits by the total number of attempted credits.

3. **Maximum Time Frame**
   Financial aid eligibility is limited to 150 percent of the published length of the student’s declared program of study.
   
   Example:
   
   *Bachelor’s in Business Administration requires 120 credit hours*
   
   \[
   120 \text{ credit hours} \times 150\% = 180 \text{ credit hours maximum}
   \]

4. **The following criterion applies when evaluating a student’s Satisfactory Academic Progress Standards:**
   
   - **Earned Credit**: Courses in which grades of A, B, C, D, or CR are considered earned and completed.
   
   - **Attempted Credit**: Courses with assigned grades of W, I, NC, and F are considered attempted but not earned hours.
   
   - **Repeated courses**: Are included in the calculation of both attempted and earned hours. A student is allowed to repeat a course once if previously passed. A student is allowed to repeat a course twice if previously failed.
   
   - **Audited courses**: Are not included in the determination of SAP nor are they eligible to be counted in a student’s enrollment status for the purpose of awarding aid.
   
   - **Remedial courses**: For the purpose of evaluating the maximum time frame, up to 30 hours of remedial courses are excluded in the calculation of both attempted and earned hours, and for the purpose of evaluating the GPA standard, passing grades of (CR) are calculated at a 4.0 grade point average.
   
   - **Transfer credits**: With the exception of remedial courses, all transfer credit hours that are counted as credit toward a student’s declared degree/certificate are included in the maximum time frame calculation (even if the student received no federal student aid for those courses). Transfer credits however, are not included in the calculation of GPA.
   
   - **Changing a Program of Study and/or Pursuing Additional Degree**: Students are allowed to change majors, but may not exceed the maximum time frame as noted in item 3 above.

   **Semester Satisfactory Academic Progress (SAP) Review**: Those students not meeting the minimum Satisfactory Academic Progress standards at the end of any given enrollment period will be placed in either of the following statuses:

   - **Warning**: Status assigned to a student who was previously in good financial aid eligibility standing, but then fails to meet one or more of the SAP standards.
A student may continue to receive financial aid for the assigned warning payment period/semester, but must meet the SAP the minimum standards by the end of the warning semester. No appeal is necessary for this status.

- **Suspension:** If a student does not attain the required cumulative GPA and/or credit completion ratio by the end of the semester that has been assigned to the warning status, or if it is determined that a student is within 36 credits of reaching the 150% maximum time frame or has exceeded the time frame, the student will be placed on financial aid suspension status and will be notified of the change in eligibility. While on suspension status a student is not eligible to receive financial aid (The exceptions are external scholarships that may have different eligibility requirements). To regain eligibility a student must meet the minimum SAP standards by enrolling in and completing courses or by successfully gaining back eligibility through the appeal process. Appealing suspension status is explained below.

**APPEALING THE SUSPENSION OF FINANCIAL AID ELIGIBILITY**

If there are extenuating circumstances that contributed to a student’s inability to meet the minimum SAP standards the student can formally appeal the suspension status by submitting an Appeal/Academic Plan to the Financial Aid Office. The appeal must contain a typed and signed letter that clearly explains the extenuating circumstances that hindered the student from meeting the SAP standards and must also contain appropriate supporting documentation. Some examples of extenuating circumstances might include, but are not limited to:

- **Illness, accident, or injury** experienced by you or a significant person in your life. Documentation required: physician’s statement, police report, or other documentation from a third party professional; hospital billing statement.

- **Death of a family member** or significant person in your life. Documentation required: a copy of the obituary or death certificate.

- **Divorce experienced by you or parent.** Documentation required: attorney’s letter on law firm’s letterhead or copy of divorce decree.

- **Personal problems or issues** with your spouse, family, roommate, or other significant person. Documentation required: written statement from medical doctor, counselor, attorney, or other professional advisor.

**APPROVED APPEAL:** If the appeal/academic plan is approved, the student’s financial aid eligibility will be reinstated on a probationary status with the requirement for the student to follow the approved academic plan. The purpose of the academic plan is to help a student meet the GPA and/or Completion Rate requirement or to insure that the student will complete their intended degree within the 150% max time frame. The successful completion of the academic plan is monitored by the Financial Aid Office at the end of each term of enrollment and students must demonstrate academic progress or be subject to lose eligibility and be placed back on suspension status.

**DENIED APPEAL:** If the appeal is denied, then generally, financial aid suspension status remains until the student completes courses and attains the minimum SAP standards. The student will be responsible for any charges incurred by enrolling in courses.
SATISFACTORY ACADEMIC PROGRESS FOR STUDENT LOANS

Students MUST be meeting the minimum SAP requirements to apply for and/or to continue receiving both Federal Direct Subsidized/Unsubsidized Loans and Federal Parent Plus Loans. This is a non-appealable requirement.

ENROLLMENT REQUIREMENTS FOR FINANCIAL AID

To receive federal financial aid, students must generally enroll at least half-time as regular students in an eligible program. Most scholarships typically require full-time enrollment. Award amounts are prorated according to enrollment status (i.e., full-time, ¾ time and half-time). Audited classes are not included toward financial aid enrollment requirements. Grant awards are locked after the third week (census date) of the fall and spring semester. If a student increases his/her enrollment after the third week, the grant funding does not increase – for this reason it is important to enroll in all courses, including late starting courses by the census date.

Federal financial aid only covers the cost of courses that are part of a student’s declared course of study.

FINANCIAL AID DISBURSEMENTS AND REFUNDS

If all requirements are met for awarding before the start of the semester, financial aid funds are memoed to the student account prior to the start of the term. If authorized, the memo can be used to pay for tuition, fees, and other non-institutional charges. Books and supplies can be purchased with memoed financial aid that remains after tuition and fees have been paid. Any remaining balance will be refunded by direct deposit into the bank account that has previously been authorized for this purpose.

The Business Office will notify students regarding the specific refund disbursement dates for the semester, but typically, refunds occur five weeks after the start of classes. Disbursement for grants and scholarships will not be issued for late starting classes until approximately a week after the first date of attendance. Single semester loans will be issued in two disbursements, the second being after midterms.

WITHDRAWAL FROM COURSES AND THE RETURN OF TITLE IV FUNDS

Title IV Federal Student Aid funds are awarded under the assumption students will attend classes for the entire period for which the aid is awarded. When students completely withdraw, officially or unofficially, they may no longer be eligible to receive the full amount of Title IV aid originally awarded. When students who begin the academic period do not complete at least 60 percent of the period, a recalculation must occur to determine the percentage of aid that was earned. This percentage is derived by dividing the number of days students attended by the number of days in the period. This process is referred to as a Return of Title IV Funds calculation.

If the amount of aid disbursed to the student is greater than the amount of aid that the student earned, any unearned funds must be returned to the appropriate aid program. If the amount disbursed to a student is less than the amount the student earned, and for which he/she is otherwise eligible, any earned funds may be made available to the student as a post-withdrawal disbursement.

Students who receive all “F’s” for the semester are considered to be unofficially withdrawn.
Federal Aid funds determined to be unearned by means of the Return of Title IV calculation will be returned to the U.S. Department of Education in this order:

- Sub/Unsubsidized Stafford Loan
- Perkins Loan
- PLUS Loan
- Pell Grant
- SEOG Grant
- Iraq and Afghanistan Service Grant

Students withdrawing from classes are liable for any balance due to Northern New Mexico College as a result of the Return of Title IV aid funds. An unpaid balance resulting from a Return of Title IV funds will result in a hold being placed on the student’s account that will prevent the student from registering and obtaining official transcripts until the balance is paid in full. To find out more information see Return of Title IV on the Financial Aid web page.

**Typical Sources of Financial Aid**

Northern participates in the following federal and state financial aid programs. Unless otherwise indicated, students must meet all general eligibility requirements as mentioned above. For the most up to date list of available aid programs please visit Northern’s financial aid web page.

**GRANTS**

**Federal Pell Grant:** Intended to be the “foundation” of your financial aid package and is usually combined with other forms of student financial aid to meet your financial need. The maximum amount for the 18-19 aid year is $6,095.

**Federal Supplemental Educational Opportunity Grant (FSEOG):** Available if you have exceptional financial need. Priority is given to students who receive a Federal Pell Grant. An FSEOG does not have to be repaid. Award amounts range from $200 to $1,200 and are based on need and enrollment status.

**New Mexico Student Incentive Grant (NMSIG):** Combines federal and state funds to provide aid for New Mexico undergraduate students with substantial financial need. Award amount ranges from $200 - $1,200.

**New Mexico College Affordability Grant:** Recipients must demonstrate financial need and not qualify for other state grants or scholarships. A student cannot receive an NMSIG, SEOG and NM College Affordability Grant simultaneously.

**STUDENT EMPLOYMENT**

**Federal College Work Study Program (FWS):** Provides part-time employment to students who demonstrate financial need, allowing you to earn money to help pay your educational expenses. When awarded, you can work on-campus or at selected off-campus employment sites.

**New Mexico Work Study Program (SWS):** Provides part-time employment opportunities to qualified students. Although the program parallels the Federal College Work Study Program, an eligible student may not necessarily have an unmet need to participate. To be eligible, you must be a New Mexico resident.
FEDERAL AND STATE LOAN PROGRAMS

Northern participates in the following Federal Loan programs:

The William D. Ford Federal Direct Loan (subsidized and unsubsidized): These loans are available to eligible students to help pay for educational expenses that are not covered by other financial aid. To qualify, students must complete a FAFSA and be enrolled in at least six credit hours. All funds received must be used for educational expenses.

Federal Direct Parent PLUS Loan: is a loan for parents of dependent students. Must be the biological or adoptive parent of the student and the student must be enrolled at least half-time.

New Mexico Teaching and Health Professions: Student Loan-for-Service Programs. These loans provide New Mexico residents with loans to complete nursing and education (teaching) programs. These loans are repaid through service in a designated area that is under-served by licensed registered nurses and teachers. To be eligible, the recipient must demonstrate financial need and be enrolled in six or more credit hours per semester. Information is available on www.hed.state.nm.us or at Northern’s Financial Aid Office.

SCHOLARSHIPS

There are numerous scholarships offered to students attending Northern. For a complete updated list of available scholarships and their eligibility criteria, go to Northern’s Scholarship webpage located in the Student menu at www.nnmc.edu, or visit Northern’s Financial Aid Office on the Española campus.

Northern’s BRIDGE Scholarship: This one-time, tuition-only scholarship is offered to current year high school graduates or GED recipients and is applied to the cost of the first semester of attendance. The award is dependent upon available funds and ranges from $750 to full-tuition cost. To be eligible a recipient MUST be a NM resident who graduated from a NM accredited public or private school with a graduating grade point average of a 2.0 or better and register for a minimum of 15 credits within 16 months of earning their high school credential. A completed FAFSA form is required.

New Mexico LEGISLATIVE LOTTERY Scholarship: This is a tuition-only scholarship. A recipient MUST be a NM resident and must have graduated from a NM accredited public or private high school or equivalency program within 16 months of enrolling in college. To qualify the student must successfully complete his/her first regular semester at Northern with 15 or more credit hours and a minimum grade point average of 2.5 or better. A student can receive this scholarship for up to three (3) semesters if declared under an Associates degree program and up to seven (7) semesters if declared under a Bachelor’s degree. A FAFSA form is not required; however, we encourage students to complete the FAFSA to ensure eligibility for other financial aid programs.

NORTHERN Student Scholarships: The Northern Foundation, a non-profit 501(c) (3) corporation, has awarded scholarships to over 1500 qualified and deserving students since 1996. Northern New Mexico College continues to provide institutional scholarships for students to help defray the cost of attending college.

BIENVENIDO Non-Resident Scholarship: This academically competitive scholarship aims to attract high performing students from across the country to further enrich Northern’s diverse and talented student population. Applicants must be non-residents in New Mexico and meet at least one of the following criteria: A minimum cumulative high school GPA of 3.0; 23 or greater on an ACT exam; 1070 or greater on an SAT exam;
have completed at least 12 higher education credit hours with a cumulative higher education GPA of 3.0 or higher. *High School Equivalency graduates with the following test scores will also qualify for the scholarship program:* HISET: 60 (total score); TASC: 500 (total score); GED (for years 2002-2014: 600 (total score); PearsonVue GED (years 2014 and later): 150 (total score).

**TRIBAL Scholarships:** If you are a Native American tribal member with financial need, you may be eligible for a tribal scholarship. We encourage you to contact your Tribal Scholarship Agency for specific requirements.

**New Mexico VIETNAM VETERANS:** Administered by the New Mexico Department of Veterans Services in conjunction with the New Mexico Higher Education Department for Vietnam Veterans who were residents of New Mexico at the time of original entry into the armed forces and who were awarded the Vietnam Campaign Medal. To apply for this scholarship, contact the New Mexico Veterans Service Commission in Santa Fe at 505.827.6300 or online at [http://www.nmdvs.org](http://www.nmdvs.org).

**VETERANS Educational Benefits (The GI Bills):** Most programs at Northern are approved by the Veterans Service Commission (Veterans Approval Office) for the education of veterans, war orphans, and other eligible persons. If you are eligible under one of the many current laws, contact the Veterans Representative who is responsible for certifying to the VA the enrollment of eligible persons. They can be contacted at 505.747.5499. You can also find more information about VA benefits by visiting Northern’s Veterans Resource Center online.

**TUITION DISCOUNT PROGRAMS**

**55+ TUITION DISCOUNT Program:** Northern’s “55+ Tuition Discount Program” allows students who are age 55 and older to take one 3- or 4-credit non-art course per semester for $150, all fees included, applied to the first non-art course that a 55+ student enrolls in each semester.

**COMMUNITY RATE For Art Classes:** Northern also offers a Community Rate for art classes of $100 per credit hour, or $300 for a typical art class, all fees included. The Community Rate is designed for non-degree students of any age taking 6 credits or less.

**Student Services Information**

**ACCESSIBILITY RESOURCES**

If you have any type of disability, you may avail yourself of the educational and personal support provided in this area. If you have questions about the availability of facilities for people with disabilities, or for any type of assistance, contact our Accessibility Services department at 505.747.2152.

**THE ADVISEMENT CENTER**

Productive advising is built on a true partnership in which the student and the advisor work together. The spirit of an ideal advising partnership is one of mutual engagement, responsiveness, and dedication. Regular advising conversations, the fundamental building blocks of the partnership, enable an advisor to serve as a resource of knowledge and a source of referrals—so that students may plan and prepare, in the broadest sense, over the course of their years at Northern. For assistance, call 505.747.2150.
VETERANS RESOURCE CENTER

This office serves the advisement and certification needs for students and their dependents eligible for veterans’ educational benefits under any of the various G.I. Bills. For assistance, contact 505.747.5499.

COLLEGE ASSISTANCE MIGRANT PROGRAM (CAMP)

The CAMP program is a federally-funded program that provides academic support services, and financial resources for migrant/seasonal farmworkers throughout their first year of college. CAMP provides tuition assistance, book stipends, tutoring services, academic advisement, and monthly stipends to eligible full-time students for their first year of college at Northern. The program serves 35 students annually. For information, contact the CAMP office at 505.747.2200.

FIRST YEAR EXPERIENCE PROGRAM

Northern offers a unique array of programs and support services for first-year students. These include a First-Year Experience seminar, New Student Orientation, Comprehensive Academic Advisement and other transitional/preparatory programs. These programs are designed to promote student success at Northern New Mexico College and beyond.

Through the first-year experience students will become engaged with the college and community, develop self-understanding, learn about strategies for studying, notetaking, preparing for exams, skills and resources that will advance their personal and academic success, build their information literacy and research skills, and plan for their future at the college and in their careers.

MATH CENTER

Do you need to improve your math skills? The Math Center, located in the Sigfredo Maestas High Tech building, offers assistance through individual tutoring, study groups, and math tutorial software. To schedule an appointment or obtain more information please call 505.747.2164.

WRITING CENTER

Do you need to improve your writing skills? If you feel challenged by the writing process, from brainstorming and organization to drafting and revising, the tutors at Northern’s Writing Center are available by appointment for one-on-one sessions throughout the week. Appointments are generally for half-hour working periods, concentrating on a single aspect of your personal writing process.

The Writing Center is located in AD 129. For an appointment, hours of operation, or further information, call the Writing Center at 505.747.2294.

CAREER SERVICES

We offer resume writing, interview skills and dress-for-success sessions. For additional information, contact the Director of Admissions and Recruitment at 505.747.2269.

STUDENT ACTIVITIES

All students are encouraged to become aware of and involved in co-curricular activities. Because the student population at Northern is so diverse, activities are set up to serve as many students as possible.
Student activities are coordinated by the Student Senate and the Student Life department. Activities range from social to athletic and cultural events. Opportunities exist for becoming a member of the Student Senate, Student Ambassadors or for joining clubs such as the literary club, engineering club, etc., or for joining our honor society, Alpha Lota Sigma (a chapter of Phi Theta Kappa, the international honor society for two-year colleges). For information about Phi Theta Kappa, contact Dr. Brenda Linnell at 505.747.2248.

**STUDENT SENATE**

The Student Senate is comprised of the elected officers of the Associated Students of Northern New Mexico College, which is the chartered organization representing students and their interests. You may obtain more detailed information about the Student Senate and college clubs by contacting the Coordinator of Student Activities, at 505.747.2254, or by reviewing the information contained in the Student Handbook.

**STUDENT PHOTO ID**

Students will be issued a photo ID to be eligible for services available at NNMC. Students are required to validate their registration for each academic term of enrollment and receive a current semester sticker.

Students who are officially enrolled in the Adult Education or High School Equivalency Programs will be issued a photo ID, without charge, restricted only in terms of specific beginning and ending dates of their program (as established by the programs, but not to exceed the normal ending date of a term).

Photo IDs will be issued to those enrolled in Continuing Education courses which have a minimum length of seven weeks.

Students may use gymnasium facilities only if their validated photo ID is in their possession at all times while in the gymnasium.

**INSURANCE**

If you are an international student who will be attending under a student visa, you are required to obtain health and accident insurance. Please contact the Director of Admissions and Recruitment, 505.747.2269.

In addition, students in some specific programs and/or courses must obtain specific types of insurance before enrolling. For further information, check with the Department Chairperson responsible for your particular major, such as Nursing, Cosmetology, etc.

**Auxiliary Services**

**FOOD SERVICES**

Northern provides food service at its Española campus.

**BOOKSTORE SERVICES**

The College Bookstore on the Española campus is a full-service bookstore. Students should familiarize themselves with Bookstore hours and policies posted on Northern’s website at www.nnmc.edu. The Bookstore policy allows book buy-backs during finals week at the end of the Spring and Fall semesters. No receipt is necessary.
LIBRARY SERVICES

The main library facility is at Northern’s Española campus. A Northern ID card is required to borrow materials but the facilities are open to students, faculty, staff, and the community for quiet study, research, viewing of audiovisual materials, and computer usage. Only five books in one subject area may be checked out at one time.

Electronic books as well as subscription library databases consisting of full text journal articles in various disciplines are made available on campus and remotely twenty-four hours daily, seven days a week; however, Northern ID numbers are required to gain access. All of these options are available through the Northern Library website, including the library book catalog. Those community members who are not enrolled as students can pay an annual borrowing fee to checkout physical materials, but they do not have access to electronic databases or eBooks.

The Library provides orientation sessions for class groups and/or individualized instruction on the use of library database utilization. In addition, the library provides a copy machine, computers for library database access as well as Internet access and Microsoft Office products, group study rooms, WiFi, an audiovisual viewing and listening space, Interlibrary loan and reciprocal borrowing privileges. For more detailed information, go to the Library webpage located in the Academics menu at www.nnmc.edu, call 505.747.2243, or email library@nnmc.edu.

PARKING

In general, the only reserved parking is for those who are handicapped and whose automobile shows a valid handicapped placard. Unless you have a physical disability and possess the required placard, do not park in spaces reserved specifically for the physically disabled; your vehicle will be ticketed or towed.

ON–CAMPUS SPEED LIMITS

On-campus driving is restricted to a maximum of 10 mph, or less. You are expected to obey all traffic signs and give the right of way to anyone not in an automobile who is traveling between buildings and/or parking lots.

CHILDREN ON CAMPUS

NNMC values its employees and students and recognizes the importance that families play in our communities. The College desires to be a family friendly place of business for our employees and students; however, the workplace is not the appropriate place for childcare.

Our Children on Campus policy serves to address guidelines and foster respect for all parties impacted by the presence of non-student, minor children on the campus, in the workplace, or in the classroom. The college recognizes that family responsibilities may in some circumstances require the presence of a child on campus for a limited amount of time.

Anyone who brings a child to campus should be respectful of the needs of others to have a quiet educational and/or work setting. To protect the safety of young visitors and to avoid disruptive behavior, children accompanying employees, students, or visitors of NNMC must be under the supervision of a responsible adult while on NNMC property.
Employees of the college have assigned duties and cannot take supervisory responsibility for any unattended children of employees, students, or visitors. It is not appropriate for a nonstudent, minor child of any age to be in the workplace on a regular basis, including after school each school day or on regularly scheduled school holidays, or when they are too ill to go to school or childcare.

This policy is not intended to prohibit appropriately supervised children from the campus when their purpose is to attend specific specified cultural events, sporting events, or to accompany students and families seeking advisement or information about the college. Please see our full policy and guidelines on our website at nnmc.edu.

Other Services

In addition to the services already listed, a number of others are provided by various programs at Northern: Adult Education (AE), High School Equivalency Program (HEP), High School Equivalency Testing (HSE), and Continuing Education.

ADULT EDUCATION (AE)

This program provides instruction throughout northern New Mexico in the area of HSE test preparation, pre-HSE, English and math basic skills brush-up, Integrated Life Skills, literacy improvement, English for speakers of other languages (ESL), and U.S. citizenship preparation. For information, call 505.747.2198.

CHANGE OF NAME

If you wish to process a change of name for your academic record, you must bring appropriate documentation (at least two types of identification showing the new name) to the Office of Admissions. Examples of such documentation include a marriage certificate, birth certificate, or court order for legal name change. A name change will be processed only if you are a currently enrolled student. Diplomas will be issued only for the official name under which your admission is granted or as officially amended. In addition, name changes are not made for alumni.

CONTINUING EDUCATION AND COMMUNITY SERVICES (CE/CS)

This is the non-credit division of the College which provides communities in our service area with special interest courses using conference, workshop, and seminar formats.

Business, professional, or community groups interested in meeting to discuss topics of special interest at either the Española or the El Rito campus may contact the Office of Continuing Education/Community Services at 505.747.5447.

Emphasizing its community service component, the Office of Continuing Education and Community Services actively seeks to identify educational needs of the community and to serve those needs by using existing resources and through cooperative efforts with other educational institutions and service agencies.

HIGH SCHOOL EQUIVALENCY PROGRAM (HEP)

The Northern New Mexico College High School Equivalency Program (HEP) is a Federal Program funded by the Office of Migrant Education, a department of the United Stated Department of Education.
The mission of Northern's HEP is to provide academic instruction, support services, and financial resources for migrant/seasonal farmworkers pursuing a high school equivalency diploma. Students must be at least 16 years of age. For information, contact the HEP office at the Española campus at 505.747.2144 or 505.747.5441.

Note: Students enrolled in either the AE or HEP programs are not eligible for admission to the college until they have earned their HSE.

STUDENT RECORDS AND FERPA

The Office of the Registrar is responsible for the maintenance of your educational records at Northern New Mexico College. Such records include but are not limited to student transcripts, academic folders and faculty grade reports. Annual notice concerning our policy is made available in each semester's published Schedule of Classes, in the Student Handbook, and in each catalog. The following information provides policies and procedures as they pertain to educational records:

Access to and Confidentiality of Student Records. The confidentiality of educational records is governed by a federal law, the Family Educational Rights and Privacy Act, 34 CFR (hereafter referred to as FERPA). Under that law, you have certain rights with regard to the inspection, access, and correction of inaccuracies in your records. Under certain circumstances, parents or guardians of students may also enjoy such privilege. Under the provision of this Act, the following policies apply:

1. If you are currently enrolled or have previously attended Northern, you may inspect your educational records by obtaining an appointment to review your records with the Registrar. At the time of the review you will be asked to produce a photo ID to validate your identity. “Educational records” consist of any record (regardless of the medium in which it exists) which is maintained by the College and which is directly related to you, the student, with the exception of the following types of records:
   a. Personal records kept by a faculty or staff member which have never been revealed or made available to another person unless to the maker’s temporary substitute.
   b. Employment records of an individual whose employment is not contingent on the fact that he is a student, provided that the record is used only in relation to the individual's employment. Transcripts submitted for the purposes of employment are not part of your educational record.
   c. Records maintained by a college security unit if the record is maintained solely for law enforcement purposes, is revealed only to law enforcement agencies of the same jurisdiction, and the unit does not have access to education records maintained by the college.
   d. Alumni records which contain information about you after you are no longer in attendance at the College and the records do not relate to you as a student.

2. You may challenge (in writing) inaccuracies or misleading items; however, you may not challenge the fairness of a grade nor may you challenge the information in any transcript which did not originate at Northern. In support of a written challenge, you may request and obtain a photocopy (at nominal charge) of any item under dispute. Direct any challenges, in writing, to the attention of the Registrar.

3. Your records will not be released without your written consent, except to college officials with a legitimate educational interest.
a. A college official is one who is employed by Northern in an administrative, supervisory, or support staff position (academic or research); is a member of the Board of Regents; or is employed by or is under contract to the College to perform a special task, such as, perhaps, an attorney or auditor.

b. An educational interest is legitimate if the official is performing a task that is specified in his job description or by a contract agreement; performing a task related to a student’s education; performing a task related to the discipline of a student; or providing a service or benefit relating to the college, the student, or the student’s family, such as job placement or financial aid. Included under the area of legitimate interest would be the National Student Clearinghouse.

4. Exceptions to the requirement that you provide written authorization include:

a. Access, upon request, to officials of another school in which you seek or intend to enroll. In this case, we will make a reasonable attempt to notify you of the transfer of information.

b. Access to certain officials of the U.S. Department of Education, the Office of Veterans Affairs, the Bureau of Homeland Security, and state and local educational authorities in connection with certain state or federally supported education programs.

c. Access to law enforcement agents pursuant to Section 507 of the USA Patriot Act. Upon such access you will be notified as required by NM House Memorial 2, Laws of 2003.

d. Access in connection with your request for or receipt of financial aid, as necessary to determine eligibility, amount, or conditions of the financial aid, or to enforce the terms and conditions of the aid.

e. Access to organizations conducting certain studies for or on behalf of the College.

f. Access to accrediting organizations to carry out their functions.

g. Access to parents/guardians who show proof that you were claimed as a dependent for income tax purposes in the previous tax year.

h. Access to comply with a judicial order or a lawfully issued subpoena, although the college has an obligation to make a reasonable attempt to give you prior notice before complying with the subpoena. An exception to the “reasonable attempt” exists when the subpoena is issued for a federal grand jury or for law enforcement purposes.

i. Access to appropriate parties in a health or safety emergency.

**Directory Information.** Directory information may be released without your written consent unless you have requested in writing that directory information be withheld. You may specify that individual portions of the directory information or the entire listing be restricted without your written consent. A form to implement such a restriction may be obtained on-line or from the Office of Admissions and Records. If no restriction is received by the Registrar, your information will be classified as directory information until such a restriction is placed. *Directory information that may be released includes:*

- Name
- mailing address
- major field of study
- classification
- enrollment status (full- or part-time)
In addition to the release of information permitted under FERPA guidelines, the National Defense Authorization Act of 1995, the National Defense Authorization Act for 1996, and the Omnibus Consolidated Appropriations Act for 1997 allow the Department of Defense (under special authority granted under what is called the Solomon Amendment) to request the following information about you under its own special definition of “directory information.”

This exception has been created in order to permit the Secretary of Defense access to the following particular information for recruitment purposes: Your name, address, telephone listing, date of birth, level of education, academic major, degrees received, and the name of the educational institution in which you had been most recently enrolled (prior to enrollment at Northern). The only students excluded under this definition are those who are under the age of seventeen and those seventeen or older who have signed a written request denying access to their records by a third party. Also excluded are those above the age of forty-two.

When a transcript is released, the recipient is notified by Northern that the record may not be released to any other person.

Details concerning your rights and privileges under the Family Educational Rights and Privacy Act are available in the Registrar’s Office at the Española Campus.

Restriction of Access. You may request this restriction only during a term in which you are then enrolled. If you have applied a restriction to your records, it will continue in effect after you graduate and/or otherwise leave the college.

A brief version of FERPA (FERPA for Dummies) may be found on the Office of the Registrar’s webpage located in the Students menu at www.nnmc.edu.

TRANSCRIPTS

Obtaining a Northern transcript or having a transcript sent on your behalf:

In order to obtain an official transcript for yourself or to have one sent to a person, agency, or school, you must submit a Transcript Request Form to the Office of the Registrar. You may pick up a transcript request form at the Registrar’s office, or download one from Northern’s website at Office of the Registrar located in the Students menu. You can fax (505.747.5449) or email. Please allow three working days for processing. After the end of the semester or during registration periods, there will be a delay in processing. If you have questions, please call 505.747.2138.

Each transcript will be issued at $5.00 per official copy and $2.00 per unofficial copy. However, no transcripts will be issued unless all institutional obligations are paid (including loans issued through the instrumentality of Northern).
You may also request that your transcript be sent via a secure email system (eScrip) directly to whomever you provide an email address for. Be sure to verify that the receiving party is willing to accept an electronic transcript before deciding to have us send one by that method.

Students can now log into their Banner account to order official transcripts online in Transcripts on Demand. This automated system gives students the freedom to request transcripts online 24/7, from anywhere. Transcripts can be delivered to academic institutions, prospective employers, and other recipients through this integrated eScrip-Safe electronic transcript delivery network.

You can obtain an unofficial copy of your transcript by visiting our website, clicking on myNNMC, and following the appropriate links.

TESTING SERVICES

Northern New Mexico College is the designated testing center for Rio Arriba County. For further information, contact Testing at the Española campus at 505.747.2164.

TRANSCRIPTS FROM OTHER INSTITUTIONS

Transcripts from other institutions which you have had sent to Northern for purposes of establishing admission eligibility for regular status do not belong to you and will not be returned to you. Do not expect that these transcripts will forever remain a physical part of your official educational record. Once their purpose has been served, they may legally be destroyed in accordance with state policies dealing with records retention. In unusual circumstances, we may make a photocopy of another institution’s transcript, but it will be reduced in size, so it cannot be modified.

UPWARD BOUND

TRIO Upward Bound is an intensive academic preparation program for college-bound low-income and first generation students at Española Valley High School. Participants in this program receive a number of services including: afterschool tutoring, Saturday Academy workshops at NNMC, a six-week Summer Academy, field trips and college visits, leadership development and family engagement, and academic counseling. This program is sponsored by a grant from the U.S. Department of Education.

Standards of Conduct

Students at Northern are expected to act in a responsible manner and to abide by all College policies while on Northern’s campuses.

An individual who enrolls at Northern can rightfully expect an environment conducive to teaching and learning. This assures each student that a safe and healthy environment exists at Northern. To ensure the attainment of this goal, Northern has developed Standards of Conduct for all students. These standards identify behavior that impedes the teaching and learning process. We ask that each of you assist in assuring that Northern is a place where quality teaching and learning will occur in a friendly setting.

Northern’s Student Handbook contains detailed information concerning specific standards expected from each student, information about disciplinary sanctions which could be invoked for infractions of the standards of conduct, and the appellate process applicable to appeals of disciplinary action imposed under the code.
The Student Handbook is considered an official part of this catalog even though it is published in a separate document.

**PLAGIARISM**

Dishonesty in connection with tests, quizzes, or coursework assignments may be cause for dismissal from the College.

Plagiarism is the most common type of academic dishonesty. Plagiarism consists of any representation of another person's work as one's own without proper acknowledgment. Examples include but are not limited to 1) submitting as one's work a paper which includes a part copied from a book or article without identifying the quoted selection and/or sources, 2) presenting an author's ideas as though they were your own original ideas, or 3) using work by another student with your name as the author.

When an instructor suspects a student of academic dishonesty, the instructor will bring it to the student's attention. If the problem is not resolved to the instructor's satisfaction, the incident will be reported to the department or program chairperson for follow-up action.

**Title IX / Anti-Sexual Harrassment & Gender Discrimination Policy**

[www.nnmc.edu/titleix](http://www.nnmc.edu/titleix)

Northern New Mexico College is committed to providing a learning and working environment free of all forms of harassment and discrimination for everyone in the College community.

Northern New Mexico College does not discriminate on the basis of race, color, religion or creed, national origin or ancestry, sex, gender, gender identity, sexual orientation, pregnancy, spousal affiliation, age, physical or mental disability, medical condition, veteran status genetic information, citizenship and any other basis protected by law, in employment, admission to, participation in, or receipt of the services and benefits under any of its programs and activities.

Sexual harassment is a violation of Title VII of the Civil Rights Act of 1964 and Title IX of the Educational Amendments of 1972 and will not be tolerated at Northern.

**TITLE IX OF THE EDUCATION AMENDMENTS OF 1972**

*Title IX is a federal law that protects people from:*

- **Discrimination based on sex**, regardless of gender, identity, or orientation in educational programs or activities receiving federal funding, and;

- **Sexual harassment or sexual misconduct**, including unwelcome sexual advances, requests for sexual favors, stalking, and intimate partner violence, to name a few examples.
If you believe that you or someone else has been harassed or discriminated against on the basis of sex, you should report the alleged incident to the Title IX Coordinator, who will initiate and oversee a thorough investigation.

NORTHERN’S TITLE IX COORDINATOR:
Please contact the Assistant Provost for Student Affairs at title9@nnmc.edu.

In addition, all Northern staff and faculty members are mandatory reporters, and are required to share information related to incidents of sexual misconduct with the Title IX Coordinator.

Both Federal and State law prohibits retaliation against anyone who has opposed an unlawful discriminatory practice or has filed a complaint, testified or participated in any proceedings under Federal or State law. Retaliation against an employee or student for filing a sexual harassment or gender discrimination complaint is strictly prohibited and grounds for a subsequent harassment complaint and possible disciplinary action up to and including termination or expulsion.

Go to nnmc.edu/titleix to read Northern’s full Title IX policy, and to learn more about the procedures for filing a sexual harassment or gender discrimination complaint, and the resources available to students at Northern and in the community.

Substance Abuse Policy

OUR PHILOSOPHY
Northern is committed to a safe working and learning environment for its faculty, staff, students, and the general public. Because substance abuse affects people’s performance, conduct, reliability, and general ability to learn and complete assigned tasks, Northern has adopted the following policy on substance abuse:

OUR POLICY
While you are on College property, you are denied the unauthorized use, manufacture, distribution, dispensation, sale, possession, or transfer of controlled substances, including the unauthorized use or possession of, or being under the influence of, alcohol or alcoholic beverages.

DRUG TESTING
Routine drug testing is not permitted; however, if there is reasonable suspicion that a specific individual is in violation of this policy, that person may be required to undergo testing as a condition of continued enrollment as a student. This does not preclude the College, at its discretion, from conducting random drug testing programs for students who might be participating in athletic activities conducted or sponsored by the College.

PENALTY FOR VIOLATION
Violation of this policy may result in such disciplinary action as dismissal and referral for investigation and/or prosecution by appropriate law enforcement agencies.
Student Right-to-Know and Campus Security Policies

In compliance with the provisions of Public Laws 101-542 and 102-26, Northern has established policies governing the availability of information concerning graduation rates and campus security.

GRADUATION RATES

Northern will produce and make readily available, upon request, to current students and to each prospective student enrolling or entering into any financial obligation with Northern, the completion/graduation rate and transfer rate of certificate or degree-seeking, full-time undergraduate students. Specific questions concerning this policy should be directed to the Director of Institutional Research at 505.747.2118.

CAMPUS SECURITY

All students, faculty, and staff are to report to the Director of Campus Security any criminal activity occurring within the campus facilities or during any college-sponsored activity. No type of criminal activity within the campus or during college activities will be tolerated.

Under the terms of the law, in September of each year the College prepares, publishes, and distributes an annual Campus Safety and Security Report, which is available upon request to current students and employees, and to any applicant for enrollment or employment.

In addition, Section 485(f)(1) of the Higher Education Act of 1965 (20 USC 1092(f)(1)) requires that the College notify the campus community how to obtain information provided by the state under the Violent Crime Control and Law Enforcement Act of 1994 (42 USC 14071(j))* concerning registered sex offenders. For our area, this information can be obtained from the New Mexico Department of Public Safety website (www.nmsexoffender.com).

Specific questions concerning this policy should be directed to the Dean of Student Services.

* Commonly referred to as the Megan Act.
COLLEGE of ARTS and SCIENCES

Department of Arts, Film & Media

The mission of the School of Arts, Film & Media is to advance the role of arts, film and media arts creation in public life by preparing students for global, professional careers in arts, film, and media arts, through rigorous scholarship, professional training, experiential learning, research and trans-disciplinary exploration.

Department of Biology, Chemistry & Environmental Sciences (BCES)

The mission of the Biology, Chemistry and Environmental Science Department at NNMC is to provide a progressive and balanced learning experience to prepare students for placement in advanced professional programs, and applied technical and research-oriented careers. Our department is committed to student education in fundamental concepts, laboratory and field techniques, research principles and practices that are aligned with marketable skills and the pursuit of life-long scholarship to meet the needs of our culturally rich and diverse student population.

BIOLOGY

This program prepares you to pursue a graduate degree in biology or to go on to professional schools in the health sciences. Training in biology also prepares you for a wide variety of career choices, including careers in research in academic, government, and private research laboratories, science teaching, positions in the biomedical, biotechnology, and pharmaceutical industries, and other related fields. While many positions are open to those holding a BS degree, some may only be open to those holding advanced graduate degrees.

GENERAL EDUCATION (31 CR) SEE PAGES 21-23

Courses listed under each area are specific requirements for the BS in Biology that also fulfill the requirements for General Education. See Pages 21-23 for additional courses to meet the required credits in each area.

### Additional Program Requirements (31)

The remaining 31 credit hours MUST be upper division (3000-4999). Please seek departmental advisement to tailor your course selections to your individual career objectives. The following courses are suggestions from each discipline. Upper division Special Topics (3399 or 4499) and Independent Study (3398 or 4498) courses, which are taught on an occasional basis, may also count toward these credit hours. Credits from courses in the Immersive Biology Experience area (in addition to the 7 credits required) can also count toward these credit hours. Note: Course selection must be approved by a BIOL program advisor and Chair of the department.
### Suggested Areas of Concentration:

#### PRE-HEALTH

Associate of Science
BIOLOGY

The associate of science in biology program prepares you to pursue a baccalaureate degree in biology for ecology, wildlife, molecular and pre-professional medical studies. While some positions are open to holders of the associate degree, most of the opportunities exist at the bachelor, master, and doctoral levels.

GENERAL EDUCATION (31 CR) SEE PAGES 21-23

Courses listed under each area are specific requirements for the AS in Biology that also fulfill the requirements for General Education. See pages 21-23 for additional courses to meet the required credits in each area.

Area I. Communications (6 cr)
ENGL  1110  Composition I (3)

or
ENGL  1120  Composition II (3)

TOTAL CREDITS: 62
Technical Certificate
RADIATION CONTROL TECHNICIAN

This certificate is designed to provide entry-level skills required for employment in the nuclear industry. This program provides the technical skills to conduct radiation surveys, interpret survey data, and assess personnel protection requirements for the protection of human health.

Qualified radiation protection technicians work at Department of Energy (DOE) National Laboratories, medical facilities, research laboratories, nuclear power plants under the direction of the Nuclear Regulatory Commission (NRC) medical facilities, and industries that work with radioactive material. In addition to specialized classroom and laboratory instruction, students are required to complete supervised field experience.

Department of Humanities and Social Sciences

The mission of the Humanities and Social Sciences Department is aligned with the strategic mission of Northern New Mexico college, to provide students with skills such as communication, critical thinking, research, and inter-personal ability, through high quality academic course work.

Degrees offered include: Certificate Program in Trauma Aide, Associate degrees in Substance Abuse Counselor, General Psychology, Criminal Justice, and the Bachelor’s in Integrated Studies.

Our Bachelor of Integrated Studies (BAIS) is a unique program, relevant to students’ personal and professional needs; they develop critical thinking skills and are self-transformed as individuals into organized, focused, empowered, and independent lifelong learners.

The BAIS at Northern is first and foremost geared towards creating a learning community, offering dialog style classes which integrate student learning by reading original texts and engaging in essential questions that give rise to thoughtful discussion and critical inquiry.

Bachelor of Arts
INTEGRATED STUDIES in the
HUMANITIES and SOCIAL SCIENCES:

Emphasis areas in Humanities, Psychology, Crime and Justice Studies, Pueblo Indian Studies, and Self-Design

According to the Center for Integrated Studies, integrated studies is based upon the idea that to integrate is “to blend into a whole.” All learning is integrative in this sense, since all learning blends old and new experiences, information, and perspectives. Students who study integrative methods are able to be both intentional and reflective, to blend their diverse educational experiences into pursuit of personal and career goals.

Integrated studies is a degree program that will prepare students for many careers that require reliable and flexible thinking and communication, such as in counseling agencies, local and state government, law enforcement, and public service. It will also provide a solid basis for those wishing to pursue advanced degrees in various fields, including social work, addiction recovery, psychology, law, and cultural anthropology.

This is an academic degree that seeks to provide not only the skills and knowledge promised by a liberal arts education but also the encouragement that will allow students to use the skills and knowledge to become effective and inspired leaders.

GENERAL EDUCATION (31 CR) SEE PAGES 21-23

Area I. Communications (6 cr)
Area II. Mathematics (3 cr)
Area III. Laboratory Sciences (4 cr)
Area IV. Social/Behavioral Sciences (3 cr)

</tbody>
</table>

Multi-Disciplinary Requirement (12 cr)

As part of the multi-disciplinary requirement, students must take at least 12 credit hours in upper division courses (300 level or higher) outside their emphasis, from Humanities, Psychology, Crime and Justice Studies, or Pueblo Indian Studies. At least three of these hours must be in Pueblo Indian Studies (or, alternatively, HIST 360). Additionally, students must take at least three hours in Social Sciences (PSYC, CJUS, SOCI) and three hours in Humanities (HUMN, ENGL, PHIL).

INTEGRATED STUDIES Emphases Requirements

Students must choose one of the following emphases or concentrations: Humanities, Psychology, Crime and Justice Studies, Pueblo Indian Studies, or Self-Design.

HUMANITIES EMPHASIS (56 CR)

Groups A and B (27)

Students complete a total of 27 credit hours from courses that fall under the humanities umbrella. Eighteen of those hours must be upper-division.

Group A: The following 9 credit hours are required. (9 cr)

<table>

Elective Requirement for Humanities Emphasis (29 cr)

The remaining 29 credits for the baccalaureate degree (totaling 120 credits) with this emphasis are electives. No more than four hours of PHED may count toward the degree.

TOTAL CREDITS: 120

PSYCHOLOGY EMPHASIS (56 CR)

Group A and B (45 cr)

Students must complete all courses from Group A and at least 12 hours from Group B. Topic courses and independent studies may qualify in any group for substitute credits, with departmental approval. This emphasis articulates with the AA in Substance Abuse Counseling and with the AA in General Psychology and Liberal Arts.

Group A. The following 30 credit hours are required:

- PHIL 1120 Logic, Reasoning, & Critical Thinking (3)
- PSYC 1110 Introduction to Psychology (3)
- PSYC 2240 Psychology of Personality (3)
- PSYC 2160 Basic Counseling Techniques (3)
- PSYC 2210 Abnormal Psychology (3)
- PSYC 2140 Family Systems Theory (3)
- PSYC 2120 Developmental Psychology (3)
- PSYC 3321 Research Design (3)
- PSYC 4421 Independent Research Project (3)
- PSYC 2110 Social Psychology (3)

Group B. Students must choose 15 credits from the following courses, 9 of which must be upper division courses (300 level or higher):

- HUMN 1110 Group Dynamics (3)
- PSYC 3301 Biopsychology (3)
- PSYC 3302 Issues in Death and Dying (3)
- PSYC 3305 Positive Psychology (3)
- PSYC 3375 Humanistic Psychology (3)
- PSYC 4400 Special Topics in Psychology (3)
- PSYC 4405 Psychology and Film (3)
- PSYC 4410 Comparative Perspectives in Psychology (3)
- PSYC 4411 Human Ecology (3)
- PSYC 4420 Media Psychology (3)
- PSYC 4477 Psychology of Gender and Sexuality (3)

Additional Electives for Psychology Emphasis (11 cr)

The remaining 11 credits for the baccalaureate degree (totaling 120 credits) with this emphasis are electives. No more than four hours of PHED may count toward the degree.

TOTAL CREDITS: 120
PUEBLO INDIAN STUDIES EMPHASIS (56 CR)

Group A and B (30 cr)

Thirty credits, at least 12 upper division, must be completed from the courses listed below. Students must complete all courses in Group A and at least 15 hours in Group B. Topics courses and independent studies may qualify for substitute credits with permission of the department chair. (This emphasis articulates with the AA in Pueblo Indian Studies.)

Group A. The following 15 credit hours are required:

- PHIL 2110 Logic, Reasoning, & Critical Thinking (3)
- PINS 1110 Introduction to Pueblo Indian Studies (3)
- PINS 2996 Topics in Tribal Languages (3)
- PINS 4458 Advanced Research (3)
- PINS 4488 Pueblo Indian Studies Senior Seminar (3)

Group B. At least 15 hours must be chosen from the following courses:

- PINS 2140 Pueblo Arts, Crafts, and Cultures (3)
- PINS 2991 Research Topics in Pueblo Indian Studies (1-6)
- PINS 2150 Pueblo Indian Women’s Lives (3)
- PINS 2998 Internship in Tribal Leadership (3)
- PINS 2130 Pueblo Indian History (3)
- PINS 2256 Pueblo Indian Government (3)
- PINS 2258 Indian Gaming, Entrepreneurship, Sovereignty, & Casinos (3)
- PINS 2100 /ENG 2100 Native American Literature I (3)
- PINS 2120 /ENG 2120 Native American Literature II (3)
- PINS 3346 /HUM 3346 Tourism and the Arts in New Mexico Pueblos (3)
- PINS 3370 Pueblo Indians and Education (3)
- PINS 3372 Pueblo Health Concepts and Practices (3)
- PINS 3381 /HUM 3381 Spirit of Place: Native Senses of Place (3)
- PINS 3386 Special Topics in PIS (3)
- PINS 4483 Tewa Enthnobiology: Plants & Animals of Tewa World (3)
- PINS 4484 Agricultural Practices of the Pueblo World (3)

Additional Electives for PIS Emphasis (26 cr)

The remaining 26 credits for the baccalaureate degree (totaling 120 credits) with this emphasis are electives. No more than four credits of PHED may count toward the degree.

TOTAL CREDITS: 120
CRIME AND JUSTICE STUDIES EMPHASIS (56 CR)

Students must complete all courses from Group A and at least 12 hours from Group B.

**Group A: Concentration (27 cr)**

*The following credit hours are required:*

- **PSYC 1110** Introduction to Psychology (3)
- **PINS 1110** Introduction to Pueblo Indian Studies (3)
- **PHIL 2110** Introduction to Ethics (3)
- **CJUS 1110** Introduction to Criminal Justice System (3)
- **CJUS 3320** Theories of Crime (3)
- **CJUS 3321** Research Design (3)
- **CJUS 4400** Topics in Crime and Justice (3)
- **CJUS 4410** Comparative Perspectives in Crime and Justice (3)
- **CJUS 4421** Independent Research Project (3)

**Group B: Additional Courses (12 cr)**

*Students must choose 12 credits from the following courses:*

- **CJUS 1170** Introduction to Criminology (3)
- **CJUS 1120** Criminal Law (3)
- **CJUS 2120** Courts and Criminal Justice (3)
- **CJUS 2150** Corrections Systems (3)
- **CJUS 1140** Juvenile Justice (3)
- **CJUS 4488** Internship/Practicum/Service Learning (3)

*May be taken more than once for credit*

- **CJUS 4499** Topics (3) *May be taken more than once for credit*
- **PSYC 1140** Psychology of Alcohol and Drug Abuse (3)
- **PSYC 2160** Basic Counseling Skills (3)
- **PSYC 2210** Abnormal Psychology (3)
- **PSYC 2315** Alcohol and Substance Abuse Evaluation (3)
- **PSYC 2440** Family Systems Theory (3)
- **SOCI 1310** Sociology of Alcohol and Substance Abuse (3)

- **Additional Electives for Crime and Justice Emphasis (17 cr)**

The remaining 17 credits for the baccalaureate degree (totaling 120 credits) with this emphasis are electives. No more than four hours of PHED may count toward the degree.

**TOTAL CREDITS: 120**
SELF-DESIGN EMPHASIS (85 CR)

This program is designed for students whose interests don’t fit into other programs on campus or who wish to major in more than one subject. In the Self Design emphasis, students create their own individualized degree plan, which must be approved by their advisor.

Group A: Integrating Core and Senior Project (9 cr)

Students in the Self-Design emphasis take an integrating core designed to help create an individualized degree plan and Senior Project:

- HUMN 2160 Foundations of Integrated Studies (3)
- HUMN 3389 Senior Project I (3)
- HUMN 4489 Senior Project II (3)

Group B: Concentrations (33 cr)

Students should complete a primary and secondary concentration and complete a minimum of 40 hours of upper-division coursework.

Primary Concentration: 18 hours within any discipline or thematic interest. The courses must be approved by the academic advisor and relate to the Senior Project.

Secondary Concentration: 15 hours within any discipline. The courses should relate to knowledge or themes found in the Primary Concentration or Senior Project.

Group C: Electives (47 cr)

Students must have at least 40 hours of upper-division coursework to graduate, and electives may be used to fulfill that requirement. The following comparative and interdisciplinary courses are recommended as possible upper-division electives:

- HUMN 3311 Readings in the Social Sciences (4)
- HUMN 3320 Genesis of Mathematics and Science (4)
- HUMN 4414 Humanity and Creativity (4)
- HUMN 4421 Themes in the Humanities (4)
- HUMN 4450 Readings in Crime and Justice (4)
- ENGL 3390 Topics in Comparative Literature (3)
- HUMN 3324 Epic Literature as Psychological Insight (3)
- HUMN 4460 Psychology of Myth (3)
- PHIL 3300 Comparative Metaphysics (3)
- PSYC 4410 Comparative Perspectives in Psychology (3)

TOTAL CREDITS: 120
Undergraduate Minor
HUMANITIES

To obtain a minor, students must complete eighteen (18) credit hours with a grade of “C” or better in disciplines related to the humanities. Six credit hours must be taken at Northern New Mexico College to meet residency requirements.

1. At least one course from the following selection:
   - HUMN 1120 The Search for Meaning (3)
   - HIST 1110 Western Civilization I (3)
   - HIST 2110 Western Civilization II (3)
   - PHIL 1160 Introduction to Philosophical Problems (3)
   - ENGL 2650 World Literature I (3)
   - ENGL 2660 World Literature II (3)

2. At least one course from one of the following:
   - HUMN 2120 Comparative Religion (3)
   - HUMN 2130 World Mythology (3)
   - HUMN 3390 Topics in the Study of Religion (3)
   - HUMN 4460 Mythic Ways of Knowing (3)
   - PHIL 3300 Comparative Metaphysics (3)

3. At least 12 hours of upper division courses in History, Philosophy, or Humanities.

Undergraduate Minor
PSYCHOLOGY

REQUIREMENTS FOR THE MINOR IN PSYCHOLOGY (18 CR)

To obtain a minor, students must complete eighteen (18) credit hours of psychology courses with a grade of “C” or better. Six credit hours must be taken at Northern New Mexico College to meet residency requirements.

1. Students must take the following:
   - PSYC 1110 General Psychology
   - PSYC 2120 Developmental Psychology
   - PSYC 2240 Psychology of Personality
   - PSYC 2210 Abnormal Psychology

2. At least 12 hours of upper division courses must be taken in psychology.
Undergraduate Minor
PUEBLO INDIAN STUDIES

Pueblo Indian Studies is committed to providing a historical foundation by integrating the unique cultural perspectives of pueblo nations and its people. Pueblo Indian Studies is situated among the academic fields of Indigenous Studies and Native American Studies that are committed to providing the context and critical thinking skills that best protect the integrity of indigenous peoples. The minor in Pueblo Indian Studies not only stresses sound academic preparation in the classroom but also encourages students to interact and conduct meaningful research with tribal governments, organizations, and communities with whom Northern continues to form strong partnerships.

The minor in Pueblo Indian Studies provides students a foundation to pursue and connect BA and BS degree programs in areas such as Biology, Business, Education, Environmental Science, Fine Arts and the Humanities.

The Pueblo Indian Studies minor requires completion of 18 credits. A minimum of nine credits must be lower-division as well as nine credits in upper-division. A minimum grade of a “C” is required. No pass/fail non-credit courses may be applied to the minor.

All 200 level courses have a prerequisite of ENG 109N or adequate score on Course Placement Evaluation. All 300 and 400 courses have a prerequisite of PINS 1110 and ENG 1110.

REQUIREMENTS

1. The following courses are required:
   - PINS 1110 Introduction to Pueblo Indian Studies (3)
   - PINS 2996 Special Topics in Tribal Languages (3)

2. At least one course from the following:
   - PINS 2991 Research Topics in Pueblo Indian Studies (3)
   - PINS 2150 Pueblo Indian Women’s Lives (3)
   - PINS 2130 Pueblo Indian History (3)
   - PINS 2256 Pueblo Indian Government (3)
   - PINS 2258 Indian Gaming (3)
   - PINS 2100 Native American Literature I (3)
   - PINS 2120 Native American Literature II (3)

3. Nine (9) credit hours must be selected from the following 300 or 400 Pueblo Indian Studies courses:
   - PINS 3346 Tourism and the Arts in New Mexico Pueblos (3)
   - PINS 3370 Pueblo Indians and Education (3)
   - PINS 3372 Pueblo Health Concepts and Practices (3)
   - PINS 3381 Spirit of Place: Native Senses of Place (3)
   - PINS 3386 Special Topics in Pueblo Indian Studies (3)
   - PINS 4458 Advanced Research (3)
   - PINS 4483 Tewa Ethnobiology (3)
   - PINS 4484 Agricultural Practices of the Pueblo World (3)
   - PINS 4488 Pueblo Indian Studies Senior Seminar (3)
Associate of Arts
CRIMINAL JUSTICE

This program is designed to prepare students for entry-level positions in protective services and law enforcement and for transfer into a four-year program such as the Crime and Justice Studies emphasis in the Integrated Studies program here at Northern.

GENERAL EDUCATION (31 CR) SEE PAGES 21-23
Area I. Communications (6 cr)
Area II. Mathematics (3 cr)
Area III. Laboratory Sciences (4 cr)
Area IV. Social/Behavioral Sciences (3 cr)

Certificate
TRAUMATIC STRESS AIDE

This program provides an educational foundation for students and professionals working in the field of trauma treatment, counseling and social work. The program focuses on posttraumatic stress disorder, including its diagnosis and treatment; on crisis intervention, coping strategies and client stabilization.

Courses noted with an asterisk (*) are eligible for Continuing Education Units (CEUs) awarded through the New Mexico Counseling and Therapy Practice Board.

Upon completion of this program, students will be able to:
- Identify the diagnostic criteria for PTSD.
- Apply therapeutic models of crisis intervention.
- Reference effective community interventions.
- Identify prevention strategies.

CORE REQUIREMENTS: (9.5 CR)
- HLED 1120 American Red Cross CPR/First Aid (0.5, 0.5T+OS)
- PSYC 2230 Psychology of Adjustment (3)
- HMSV 2130 Crisis Intervention (3)
- PSYC 2286 Posttraumatic Stress Disorder, Diagnosis and Treatment (3)

RELATED REQUIREMENTS: (6 CR)
Choose two from the following:
- SOWK 2110 Introduction to Human Services and Social Work (3)
- HMSV 1110 Group Process (3)*
- PSYC 2286 Grief Counseling Skills (3)
- PSYC 1141 Psychology of Drug and Alcohol Abuse (3)*
- SOCI 1141 Effects of Alcohol and Drug Abuse (3)
- PSYC 2315 Drug and Alcohol Assessment, Referral, and Treatment Methods (3)*
- PSYC 2440 Family Systems Theory (3)*
- PSYC 2990 Practicum (3)
- PSYC 2160 Basic Counseling Techniques (3)*
- PSYC 2210 Abnormal Psychology (3)

*Courses eligible for Continuing Education Units (CEUs) awarded through the New Mexico Counseling and Therapy Practice Board.

TOTAL CREDITS: 15.5
Department of Language and Letters

The mission of the Language and Letters Department is to provide an in-depth examination of the relationship between power and language in developing critical and creative thinking skills for thoughtful communication dedicated to engaged citizenship and social change. The Department of Language and Letters provides graduates with critical thinking and writing skills, and the values and ethical background necessary to become active, productive, and successful members of society.

Language and Letters offers an Associate of Arts degree in Liberal Arts. Through this program, students gain a solid foundation in the liberal arts with the flexibility to pursue courses of interest within Arts and Sciences. This program can lead into a Bachelor’s degree in a wide range of fields or into the Bachelor of Integrated Studies program here at Northern New Mexico College.

Language and Letters also houses many core courses of general education, such as Composition, Public Speaking, Creative Writing, and literature courses. Our faculty members are dedicated to supporting students’ academic growth as they sharpen their ability to communicate clearly and develop their own unique voices.

To support student success, the Writing Center offers free tutoring. Here, students can work individually with tutors on reading and writing assignments with the goal of gaining confidence and mastering essential reading and writing skills.

Language and Letters celebrates creativity through our literary journal, Trickster. Students, staff, faculty, and community members are welcome to submit poetry, fiction, nonfiction, and art for possible publication. Students may also join our Trickster Student Club and serve on our student editorial board for valuable experience with the process of creating and editing a literary journal.

For more information on Language and Letters and our programs, contact Department Chair, Lori Franklin, (747-2215) or Administrative Assistant, Rachel Begay (747-2229).

Associate of Arts
LIBERAL ARTS

This program provides a strong academic foundation for successful transfer to various bachelor degrees, such as the Bachelor of Arts in Integrated Studies at Northern. This degree fosters exploration of differing perspectives and fields of study; provides development of essential skills of critical thinking, communication, and creativity; and supports awareness of community and diversity.

Twelve credits must be taken within the College of Arts and Sciences.

TOTAL CREDITS: 60
Department of Math and Physical Sciences

The Department of Mathematics and Physical Sciences provides fundamental knowledge in mathematics by engaging the student in problem solving, analytical and logical thinking through the basic method of inquiry. The department is committed to equipping students with the mathematical tools needed for its application to diverse fields.

Many of the courses in the associate program offered by this department are designed to transfer to four-year programs.

Note: In 2014, Northern completed a review of the total credit hours required to earn an associate and bachelor's degree, leading to a reduction of required hours to 60 and 120 respectively for most degrees. Due to accreditation requirements and other industry regulations, some degrees may require additional hours.

TOTAL CREDITS: 60
Northern’s College of Business Administration (CoBA) offers baccalaureate, associate and certificate programs designed to provide practice-oriented training and skill development for students who aspire to successful careers in business.

Our bachelor’s degree (BBA) programs with concentrations in Accounting, Management and Project Management, and our Associate of Applied Science in Office Administration (AAS) are accredited by the Accreditation Council for Business Schools and Programs (ACBSP).

The Associate of Applied Science in Barbering (AAS) and in Cosmetology (AAS) meet the New Mexico Board of Barbers and Cosmetology licensure requirements.

Note: In 2014, Northern completed a review of the total credit hours required to earn an associate and bachelor’s degree, leading to a reduction of required hours to 60 and 120 respectively for most degrees. Due to accreditation requirements and other industry regulations, some degrees may require additional hours.

BBA ADMISSION REQUIREMENTS

Admission into the BBA program at Northern can occur in one of two ways:

1. As an AABA graduate from Northern’s BA Department or from any ACBSP accredited college as long as the coursework at that college is equivalent to that of Northern’s AABA curriculum. The BA Department can determine the equivalence and approve admission.

2. As an admitted student at Northern who has:

   (a) completed at least 45 credit hours of the coursework from an accredited college including 35 credit hours of the General Education Common Core
(b) attained an overall 2.5 GPA in all college coursework
(c) completed satisfactorily 15 credit hours in the following courses or their equivalents at other colleges:

- MATH 1350 Introduction to Statistics
- ACCT 2110 Accounting Principles I
- ACCT 2120 Accounting Principles II
- ECON 2110 Macroeconomic Principles
- ECON 2120 Microeconomic Principles

(d) submitted and have had accepted an application for admission form with a letter of intent declaring a BBA major (or major field or course plan) to an academic advisor in Northern’s BA Department.

**BBA Graduation Requirements**

To graduate with the degree of BBA, the student must meet the following requirements:

1. Completion of all admission requirements with a grade of “C-” or better and an overall GPA of 2.5 and admission into the BBA program
2. Completion of all required coursework in one of the BBA majors with a grade “C-” or better and an overall GPA of 2.5
3. Completion of at least 30 credit hours from the NNMC BA Department, 24 hours of which must be from upper division courses including BA 4485 (Internship) or BA 4490 (Capstone).
4. Completion of 120 credits

**Associate of Arts**

**BUSINESS ADMINISTRATION (AABA)**

The Associate of Arts Degree in Business Administration is an ACBSP accredited terminal degree for those graduates who intend to enter the workplace with a sound fundamental knowledge of economics, accounting, management, business technology and marketing. It is designed for students who intend to pursue a business career at the technical level. The AABA is a transfer degree program which can lead to a baccalaureate with two additional years of full-time study in the BA Department at NNMC.

BARBERING

The Barbering/Cosmetology program accepts students in the Fall and Spring terms only. Requirements include:

1. Final admission standing in the College as a degree-seeking student.

2. Applicants must achieve a Course Placement Score placing them into ENG 109N or show evidence that they have completed ENG 109N and have completed OA 117 Business Math.

3. After meeting criteria 1 and 2, arrange for an appointment with Cosmetology/Barbering for an admission interview prior to being accepted into the program. Call 505.747.5473 for this appointment.

4. Complete the registration process required by the New Mexico State Board of Barbers and Cosmetologists upon acceptance into the program.

The program provides cosmetologists/barbers with the courses required by the New Mexico Board of Barbers and Cosmetology for licensure (63 credit hours, 1600 clock hours for cosmetologists and 48 credit hours, 1200 clock hours for barbers). It also expands these skills with the addition of general education courses. These are not transfer programs.

College of EDUCATION

The Department of Teacher Education at Northern New Mexico College is accredited based on the Council for the Accreditation of Educator Preparation standards (CAEP, www.ncate.org). We are committed to preparing high quality teachers and advancing the profession in partnership with educational institutions and communities in the region and beyond.

We offer Associate of Arts and Bachelor of Arts degrees in Early Childhood Education and Elementary Education, and endorsements in Bilingual Education and Teachers of English to Speakers of Other Languages (TESOL). Through the Alternative Licensure Program, the College of Education offers Post Baccalaureate certificates in Elementary Education, Secondary Education, and Special Education.

The College of Education at Northern is housed in the Richard C. Martinez, Teacher Education Center on the Española Campus. For general inquiries or applications, contact us at COE@nnmc.edu or (505) 747-5431.

Admission to the Associate of Arts in Early Childhood Education and Elementary Education programs

Students must declare an Associate of Arts in Early Childhood Education, an Associate of Arts in Elementary Education, or an Alternative Licensure degree in order to be officially accepted into a program of study and advised accordingly by the College of Education. Students may also transfer from other institutions into our Bachelor Degree Programs (Elementary and Early Childhood Education).
Associate of Arts
EARLY CHILDHOOD EDUCATION

The Early Childhood Education Program at Northern New Mexico College is part of New Mexico Early Childhood Education and Development Articulation Catalog of Courses and Programs. The program offers instruction and practical experience in working with young children birth to grade 3 and their families.

The course's student learning outcomes (SLO’s) are taken from the New Mexico Public Education’s Competencies for early childhood professionals and are aligned with the SLO’s provided in the revised NM Early Childhood Education and Development Articulation Catalog. The core competencies are designed to describe what early childhood professionals should know and be able to do at the conclusion of this program.

Upon completion of this program students will be able to demonstrate the New Mexico Public Education entry level Competencies for early childhood professionals and be prepared to teach students birth-grade three. This program also provides a seamless transition to Northern New Mexico College’s Bachelor Degree in Early Childhood Education.

EARLY CHILDHOOD EDUCATION–LICENSURE

NNMC offers an Early Childhood Education Bachelor's degree leading to a New Mexico Early Childhood Teacher License.

This competency-based program is part of New Mexico Early Childhood Education and Development Articulation Catalog of Courses and Programs and it will prepare students to teach children age 3 through grade 3. Graduates of the program will be able to provide high-quality care and education to young children through experiential learning and developmentally appropriate practices.

ADMISSION CRITERIA

1. Admission to the College in regular status (i.e., all transcripts have been received),
2. Good standing at NNMC,
3. Completion of at least 62 credits of coursework toward an Associate of Arts in Early Childhood Education,
4. Cumulative GPA of at least 2.50,
5. Passing score on the Essential Academic Skills Assessment (Subtests I, II, III) required by the State of New Mexico. This assessment should be passed preferably in the last semester of A.A. in Early Childhood Education coursework. Students need to pass this assessment in order to be finally admitted into this Bachelor's Degree Program at NNMC.

APPLICATION PROCESS

1. Students must declare a Bachelor of Arts in Early Childhood Education to be officially accepted into a program of study and advised accordingly by the College of Education.
2. Complete a BA Program application: a) obtained at www.nnmc.edu, or at the COE Administrative Office, Teacher Education Center, Room 201.
3. Letter of Intent: a one page typed letter stating a) your reasons for wanting to become a teacher, b) experience, and c) personal strengths.
4. Personal Philosophy of Education Statement: a one-page typed statement that describes your beliefs about a) education, b) learning, and c) working with students.
5. **Provide proof of a passing score**: on the Essential Academic Skills (I, II, III) Assessment required by the State of New Mexico.

6. **Signed Assurance form**: a) obtained at www.nnmc.edu, or at COE Administrative Office, Teacher Education Center, Room 201.

7. **Provide copies of all college transcripts**.

Completed application materials will be reviewed by the College of Education and teacher candidates will be advised accordingly.

**ENTRANCE INTERVIEW**

Once your application materials are received and prior to acceptance into the BA Program, you will be interviewed by the College of Education Interview Committee.

**TRANSFER STUDENTS**

Applicants who transfer from other institutions must have been granted admission in regular status (i.e., all transcripts have been received) prior to applying to the BA Program.

**TRANSFER CREDITS**

Up to 12 credits of professional preparation coursework will be considered on a case-by-case basis.

**NEW MEXICO ASSESSMENTS**

Teacher Candidates must provide proof of passing all of the required State of New Mexico teacher assessments before enrolling in ECED 4479 Student Teaching.

**ASSESSMENT OF CANDIDATE LEARNING**

Teacher candidates must maintain a specific GPA determined by the College of Education to remain in good standing in the program. In addition, your progress will be evaluated by: 1) providing proof of passing all of the required State of New Mexico teacher assessments, 2) an entry-level teacher, competency-based collection of artifacts; and 3) practicum and student teaching observations and assessments.

Courses in which the teacher candidates earn a grade lower than a C- do not count towards graduation or certification and do not meet criteria for satisfying prerequisites.

Bachelor of Arts
EARLY CHILDHOOD EDUCATION
–NON-LICENSURE PATHWAY

Our Early Childhood Education Studies program is a non-licensure pathway of study leading to a Bachelor of Arts (BA) degree.

The BA program is aligned with our Bachelor of Art in Early Childhood Education – Licensure pathway. It provides a strong background for students who want to pursue areas in which a strong knowledge of early childhood education and child development is desired, but a licensure is not required.

This program is centered on knowledge and skills that are critical for professionals in order to ensure success among children of culturally and linguistically diverse populations.

This program will prepare students to work with children age 3 through grade 3. Graduates of the program will be able to provide high-quality services to young children and their families.
ADMISSION CRITERIA
1. Admission to the College in regular status (i.e., all transcripts have been received),
2. Good standing at NNMC,
3. Completion of at least 67 credits of coursework toward an Associate of Arts in Early Childhood Education,
4. Cumulative GPA of at least 2.50

APPLICATION PROCESS
1. Students must declare a Bachelor of Arts in Early Childhood Education to be officially accepted into a program of study and advised accordingly by the College of Education.
2. Completed BA Program application: a) obtained at www.nnmc.edu, or at the COE Administrative Office, Teacher Education Center, Room 201.
3. Letter of Intent: a one page typed letter stating a) your reasons for wanting to become a teacher, b) experience, and c) personal strengths.
4. Personal Philosophy of Education Statement: a one-page typed statement that describes your beliefs about a) education, b) learning, and c) working with students.
5. Signed Assurance form: a) obtained at www.nnmc.edu, or at COE Administrative Office, Teacher Education Center, Room 201.
6. Copies of all college transcripts.
7. An interview will be required.

Completed application materials will be reviewed by the College of Education and teacher candidates will be advised accordingly.

PERSONAL INTERVIEW
Once your application materials are received and prior to acceptance into the BA Program, you will be interviewed by the College of Education Interview Committee.

TRANSFER STUDENTS
Applicants who transfer from other institutions must have been granted admission in regular status (i.e., all transcripts have been received) prior to applying to the BA Program.

TRANSFER CREDITS
Up to 12 credits of professional preparation coursework will be considered on a case-by-case basis.

ASSESSMENT OF CANDIDATE LEARNING
Teacher candidates must maintain a specific GPA determined by the College of Education to remain in good standing in the program.

Courses in which students earn a grade below C- do not count towards graduation or certification and do not meet criteria for satisfying prerequisites.

Bachelor of Arts
ELEMENTARY EDUCATION

The Elementary Education program is designed so that teacher candidates may earn a baccalaureate degree in Elementary Education completely at Northern. Upon successful completion of the BA program and passing scores on the required State of New Mexico teacher assessments, teacher candidates will be eligible to apply for a teacher license through the New Mexico Public Education Department. This program meets the New Mexico Public Education Department’s (PED) Entry-Level Teacher Competencies and the Interstate New Mexico Teacher Assessment and Support Consortium (INTASC) Standards. This program prepares teacher candidates to work in diverse educational settings in grades kindergarten through eight. Teacher candidates can choose from one of the following six (6) concentrations:

- **Bilingual Education** (24 cr)—work effectively in the classroom with diverse bilingual students, and engage collaboratively with colleagues, families and communities for student success.

- **TESOL (Teaching English to Speakers of Other Languages, 24 cr)**—teach English to non-English speakers.

- **Social Studies** (24 cr – minimum of 12 upper division)

- **Language Arts** (24 cr – minimum of 12 upper division)

- **Mathematics** (24 cr – minimum of 12 upper division)

- **Science** (24 cr – minimum of 12 upper division)

ADMISSION CRITERIA

1. *Admission to the College* in regular status (i.e., all transcripts have been received),
2. *Good standing at NNMC*,
3. *Completion of at least 60 credits of coursework* toward an Associate of Arts in Elementary Education,
4. *Cumulative GPA of at least 2.50*,
5. *Passing score on the Essential Academic Skills Assessment* (subtests I, II, and III) required by the State of New Mexico. This assessment should be passed preferably in the last semester of A.A. in Elementary Education course work.

APPLICATION PROCESS

1. **Students must declare a Bachelor of Arts in Education** to be officially accepted into a program of study and advised accordingly by the College of Education.
2. **Completed BA Program application:** a) obtained on www.nnmc.edu website, or at COE Administrative Office, Teacher Education Center, Room 201.
3. **Letter of Intent:** a one page typed letter stating a) your reasons for wanting to become a teacher, b) experience, and c) personal strengths.
4. **Personal Philosophy of Education Statement:** a one-page statement that describes your beliefs about a) education, b) learning, and c) working with students.
5. Proof of a passing score on the Essential Academic Skills Assessment (I, II, III) required by the State of New Mexico.

6. Signed Assurance form: a) obtained at www.nnmc.edu, or at COE Administrative Office, Teacher Education Center, Room 201.

- **EDBE 3305** Spanish Literacy for Bilingual Education (3)*
- **EDBE 3306** Spanish for the Bilingual Classroom (3)*
- **EDBE 4403** Foundations of Bilingual/ESL Multicultural Education (3)
- **EDBE 4406** Methods and Materials of Teaching Bilingual/ESL (3)
- **EDBE 4412** Formal/Informal Assessments (3)
- **EDBE 4416** Second Language Acquisition (3)
- **EDBE 4481** Linguistics and Phonetics for the Bilingual Teacher (3)*
- **EDBE 482** Spanish Language and Folklore of New Mexico for the Bilingual Teacher (3)*
  
  SPAN 101/102 or 6 SPAN from CLEP Testing are prerequisites for all EDBE Courses.  

*Courses taught in Spanish.

##### TESOL (Teaching English to Speakers of Other Languages) (24 cr)
- **EDTE 4403** Foundations of Bilingual/ESL Multicultural Education (3)
- **EDTE 4406** Methods and Material of Teaching Bilingual/ESL (3)
- **EDTE 4408** Approaches to Teaching English Literacy Skills (3)
EDTE 4412  Formal/Informal Assessment (3)
EDTE 4414  Introduction to Linguistics (3)
EDTE 4416  Second Language Acquisition (3)
Language electives (6) *
Language other than English or CLEP testing required.

SOCIAL STUDIES (History, Geography, Economics, Civics, Government)
(24 cr – minimum 12 upper division)
EDTE 4403  Foundations of Bilingual/ESL Multicultural Education (3)
EDTE 4406  Methods and Materials of Teaching Bilingual/ESL (3)
EDTE 4414  Introduction to Linguistics (3)
Social Studies Electives (15 cr)
*15 credits of Social Studies electives meet the remaining 6.64.6 NMAC Competencies for entry-level history, geography, economics, civics, and government teachers.

LANGUAGE ARTS (24 CR – minimum 12 upper division)
EDTE 4406  Methods and Materials for Teaching Bilingual/ESL (3)
EDTE 4408  Approaches to Teaching English Literacy Skills (3)
EDTE 4412  Formal/Informal Assessments (3)
EDTE 4416  Second Language Acquisition (3)

LANGUAGE ARTS ELECTIVES (12 CR)
*12 credits of language arts electives that meet the NMPED remaining 6.64.2 Competencies for entry level language arts teachers.

MATHEMATICS (24 CR – minimum 12 upper division)
Mathematics Electives (24 cr)
*24 credits of mathematics electives that meet the NMPED remaining 6.64.4. NMAC Competencies for entry-level mathematics teachers.

SCIENCE (24 cr – minimum 12 upper division)
Science Electives (24 cr)
*24 credits of science electives that meet the NMPED remaining 6.64.5 NMAC Competencies for entry-level science teachers.

TOTAL CREDITS: 120
Bachelor of Arts
ELEMENTARY EDUCATION – NON-LICENSURE PATHWAY

Northern New Mexico College offers a Bachelor’s degree in Elementary Education. This program does NOT meet the NMPED requirements for licensure in Elementary Education. This track prepares candidates to work with students in diverse educational settings, from K to grade 8, which do not require a teaching license. The degree prepares individuals to understand children’s educational/learning process and to provide high-quality education to children.

GENERAL EDUCATION (31 CR)

Area I. Communications (6 cr)

Choose one of the following courses:

- ENGL 1110 Composition I (3)
- ENGL 1120 Composition II (3)
- ENGL 1210 Technical Communications (3)

Area II. Mathematics (3 cr)

Choose one of the following courses:

- MATH 1350 Introduction to Statistics (3)
- MATH 1220 College Algebra (3)
- MATH 1130 Survey of Mathematics (3)
- ENGR 1121 & ENGR 1122 Introduction to Math for Engineering Applications I and II (2 credits each)

Area III. Laboratory Sciences (4 cr)

You must select one science course with a Lab.

Area IV. Social/Behavioral Sciences (3 cr)

Select one area IV course on page 22.

Area V. Humanities (3 cr)

Select one area V course on page 22.

Area VI. Fine Arts (3 cr)

Select one area VI course on page 23.

Additional Requirements (9 cr)

Choose one of the following Civics Courses:

- COMM 1130 Public Speaking (3)
- POLS 1110 Introduction to Political Sciences (3)
- POLS 1120 American National Politics (3)
- CJUS 1110 Introduction to Criminal Justice (3)
- HIST 1110 United States History I (3)
- HIST 1120 United States History II (3)
Choose one of the following Literature Courses
ENGL 1410 Introduction to Literature (3)
ENGL 2310 Introduction to Creative Writing (3)
ENGL 2650 World Literature I (3)
ENGL 2660 World Literature II (3)
ENGL 2420 Children’s Literature (3)
ENGL 2247 Topics (3)

PROGRAM PREPARATION REQUIREMENTS
(19 cr NMPED Additional General Education Requirements)
– 9 credits must be upper division – 300 and above
Math Elective (3) Prerequisite MATH 1215
Laboratory Science Elective (4)
Social or Behavioral Science Elective (3)
Humanities, Fine Arts (9)

ELEMENTARY EDUCATION FOUNDATIONAL COURSES (43 CR)
EDUC 1120 Introduction to Education (3)
EDUC 1190 Introduction to Education Practicum (1)
ECED 1110 Child Growth Development, and Learning (3)
ECED 1130 Family and Community Collaboration (3)
EDUC 2220 Educational Psychology (3)
EDUC 2345 Strategies for Successful Classrooms (3)
EDUC 2345L Strategies for Successful Classrooms (1)
EDUC 2445 Science and Math I (3)
EDUC 4450 Pedagogy and Learning (3)
EDUC 4410 Teaching and Diagnosis of Reading (3)
EDUC 4411 Lab III (1)
EDUC 4460 Teaching Reading and Writing (Elem.) (3)
SPED 4475 Curriculum Methods & Materials for Special Education (3)
EDUC 4495 Assessment and Evaluation of Student Learning (3)
EDUC 4422 Math for Educators I (3)
SPED 4455 The Special Education Program: IEPs and Assessments (4)

Select one area of study:

BILINGUAL EDUCATION (24 CR)
EDBE 3305 Spanish Literacy for Bilingual Education (3)*
EDBE 3306 Spanish for the Bilingual Classroom (3)*
EDBE 4403 Foundations of Bilingual/ESL Multicultural Education (3)
EDBE 4406 Methods and Materials of Teaching Bilingual/ESL (3)
EDBE 4412 Formal/Informal Assessments (3)
EDBE 4416 Second Language Acquisition (3)
EDBE 4481 Linguistics and Phonetics for the Bilingual Teacher (3)*
EDBE 4482 Spanish Language and Folklore of NM for the Bilingual Teacher (3) *

SPAN 1110/1120 or 6 SPAN from CLEP Testing are prerequisites for all EDBE Courses.

*Courses taught in Spanish.

TESOL (TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES) (24 CR)

EDTE 4403 Foundations of Bilingual/ESL Multicultural Education (3)
EDTE 4406 Methods and Material of Teaching Bilingual/ESL (3)
EDTE 4408 Approaches to Teaching English Literacy Skills (3)
EDTE 4412 Formal/Informal Assessment (3)
EDTE 4414 Introduction to Linguistics (3)
EDTE 4416 Second Language Acquisition (3)

Language electives (6) *

Language other than English or CLEP testing required.

TOTAL CREDITS: 120

Alternative Licensure Program (Certificate)

ELEMENTARY, SECONDARY, or SPECIAL EDUCATION

The College of Education is accredited by the New Mexico Public Education Department. These programs of study lead to teacher licensure for individuals who already hold a degree (bachelor’s, master’s, or doctorate) from a regionally accredited college or university. Teacher candidates can choose from one of the following courses of study:

Elementary Education (K-8th grades) work in diverse educational settings in grades kindergarten through eight.

Secondary Education (7th-12th grades) work in diverse educational settings in grades seven through twelve.

Special Education (K-12th grades) work with students with special needs and acquire strategies that are effective for all learners in grades kindergarten through twelve.

ADMISSION TO THE ALTERNATIVE LICENSURE PROGRAM

In order to be accepted into the ALP Program, the teacher candidate must be admitted to NNMC and have official transcripts from all colleges sent to the Office of Admissions.

The second step is to submit an application packet to Northern New Mexico College of Education, Teacher Education Center, Room 201, which includes the following:

1. Proof of admission to Northern New Mexico College, i.e. student ID/banner ID (Students must declare an ALP Certificate Program on their application),

2. Completed Alternative Licensure Program application a) found in the ALP Handbook, www.nnmc.edu, or at COE Administrative Office, Teacher Education Center, Room 201,

3. Letter of Intent: a one page typed letter stating a) reasons for wanting to become a teacher, b) experience, and c) personal strengths,
4. **Philosophy of Education**: a one-page statement that describes beliefs about a) education, b) learning, and c) working with students,

5. **Two (2) letters of recommendation,**

6. **Transcript(s)** of highest degree conferred,

7. **Copy of favorable background check,**

8. **Signed Assurance form** a) found in ALP Handbook, www.nnmc.edu, or at COE Administrative Office, Teacher Education Center, Room 201,

9. Completed application materials will be reviewed by the College of Education and teacher candidates will be advised accordingly.

10. An interview will be scheduled.

**FOR ALP ELEMENTARY (K-8) you must have one of the following:**

- **Bachelor's Degree** (from an accredited college or university) including 30 semester hours in a combination of language arts, mathematics, science, history, fine & performing arts and modern, classical & native language, OR

- **Master's Degree** (from an accredited college or university) including 12 graduate hours in a combination of language arts, mathematics, science, history, fine & performing arts and modern, classical & native language, OR

- **Doctor's Degree** (from an accredited college or university) in a teaching field.

**FOR ALP SECONDARY (7-12) you must have one of the following:**

- **Bachelor's Degree** (from an accredited college or university) including 30 semester hours in a teaching field, OR

- **Master's Degree** (from an accredited college or university) including 12 graduate hours in a teaching field, OR

- **Doctor's Degree** (from an accredited college or university) in a teaching field.

**FOR ALTERNATIVE SPECIAL EDUCATION (K-12) you must have one of the following:**

- **Bachelor's Degree** (from an accredited college or university) including 30 semester hours in a combination of language arts, mathematics, science, history, fine & performing arts and modern, classical & native language, OR

- **Master's Degree** (from an accredited college or university) including 12 graduate hours in a combination of language arts, mathematics, science, history, fine & performing arts and modern, classical & native language, OR

- **Doctor's Degree** (from an accredited college or university) in special education.

**TRANSFER CREDITS**

Up to 6 credits of professional preparation coursework will be considered on a case-by-case basis.

**NEW MEXICO ASSESSMENTS**

Before admission into the ALP Program, and no later than during the first semester of enrollment, teacher candidates must provide a passing score on the Essential Academic Skills Assessment (I, II, III) required by the State of New Mexico. In the last semester of course work, the teacher candidate must provide proof of a passing
score on the remaining required State of New Mexico teacher assessments respective to their program. The College of Education’s ALP Office must receive copies from the teacher candidate of their assessment results in order to provide them with a letter of completion.

**ASSESSMENT OF CANDIDATE LEARNING**

Teacher candidates must earn a C or better in all courses to remain in good standing in the program. In addition, students’ progress will be evaluated by: 1) providing proof of passing all of the required State of New Mexico teacher assessments respective to their program, 2) an entry-level teacher competency-based collection of artifacts portfolio; and 3) practicum and student teaching observations and self-assessments.

**ELEMENTARY (K-8)**

- EDUC 4401 Foundations of Education (3)
- EDUC 4410 Teaching and Diagnosis of Reading (Elem) (3)
- EDUC 4450 Pedagogy and Learning (3)
- EDUC 4460 Teaching Reading and Writing (Elem) (3)
- EDUC 4495 Assessment and Evaluation of Student Learning (3)
- SPED 4475 Curriculum Methods and Materials for Special Education (3)
- EDUC 4480 Student Teaching Seminar (Elem/Sec) (1)
- EDUC 4496L Supervised Field Experience (Elem/Sec) (2)

**TOTAL CREDITS: 21**

**SECONDARY (7-12)**

- EDUC 4401 Foundations of Education (3)
- EDUC 4450 Pedagogy and Learning (3)
- EDUC 4462 Reading and Writing Across the Curriculum (Sec)(3)
- EDUC 4474 Methods and Materials in Secondary Education (3)
- EDUC 4495 Assessment & Evaluation of Student Learning (3)
- EDUC 4480 Student Teaching Seminar (Elem/Sec) (1)
- EDUC 4496L Supervised Field Experience (Elem/Sec) (2)

**TOTAL CREDITS: 18**

**SPECIAL EDUCATION (K-12)**

- SPED 4401 Foundations of Special Education (3)
- SPED 4455 The Special Education Program: IEP's and Assessments (4)
- SPED 4465 Reading for Special Learners (3)
- SPED 4475 Curriculum Methods and Materials for Special Education (3)
- SPED 4485 Teaching Reading in Special Education (3)
- EDUC 4480 Student Teaching Seminar (1)
- SPED 4497L Supervised Field Experience Lab (3)

**TOTAL CREDITS: 20**
College of 
ENGINEERING and TECHNOLOGY

The College of Engineering and Technology offers Engineering Technology degrees and Career and Technical Education (CTE). The following degrees are offered in the Engineering field: Post Baccalaureate Certificate in Information Engineering Technology, Bachelor of Engineering (BEng) degrees in Information Engineering Technology/IET and Electromechanical Engineering Technology/EMET, as well as Associate of Engineering (AEng) degrees in Information Engineering Technology, Software Engineering, and Pre-Engineering. The following degrees are offered in CTE: Associate in Applied Science (AAS) in Electrical Technology, and Renewable Energy as well as a Certificate in Electrical Technology.

Sadia Ahmed, PhD
Chair 747.5016  sadia.ahmed@nnmc.edu
Steve Cox, PhD
EMET 747.5424  steve.cox@nnmc.edu
Qi Lu, PhD
IET 747.5415  qi.lu@nnmc.edu
Bryan Malone, DCS
IET 747.2264  bryan.malone@nnmc.edu
Behnam Mousavi, PhD
EMET 747.5415  behnam.mousavi@nnmc.edu
Ashis Nandy, PhD
EMET 747.2249  ashis@nnmc.edu
Andrea Padilla, AA
Administrative Assistant 747.5425  andrea.padilla@nnmc.edu

ADMISSION REQUIREMENTS FOR ASSOCIATE OF CTE PROGRAMS
All students admitted to NNMC will be admitted to the Associate Degree of Applied Science Program if they declare the degree on the Degree Declaration form.

ADMISSION REQUIREMENTS FOR ASSOCIATE OF ENGINEERING PROGRAMS
All students admitted to NNMC will be admitted to the Associate Degree of Engineering Program if they declare the degree on the Degree Declaration form.

ADMISSION REQUIREMENTS FOR BACHELOR OF ENGINEERING PROGRAMS
All students that attempt admission for any of the Bachelor of Engineering Programs must fulfill the following requirements:
(a) Have completed the degree declaration form at the registrar office;
(b) I) INFORMATION ENGINEERING TECHNOLOGY
Have completed the following courses with a grade average of 2.5, and a minimum grade of C- for each course:
ENGR 1122L  Introduction to Math for Engineering Applications II
CS 2201  Mathematical Foundations of Computer Science
EECE 1152L  Computer Programming
II) ELECTROMECHANICAL ENGINEERING TECHNOLOGY

Have completed the following courses with a grade average of 2.5, and a minimum grade of C for each course:

- EECE 2231L Intermediate Programming
- EECE 1132 Computer Networks I
- IT 2250 Introduction to Databases

(c) Have completed the following courses with a grade average of 2.5, and a minimum grade of C for each course:

- ENGR 1122L Introduction to Math for Engineering Applications II
- ENGR 2217L Physics for Engineers III
- DRFT 1100 Computer Aided Drafting I
- MET 2201 Applied Mechanics I
- EET 2200 Electrical Systems I

(\textit{Note:} If a student does not fulfill the admission requirements for the Bachelor Programs, the student will still be eligible to finish the degree requirements for an Associate of Engineering Degree.

Admission Requirements for the Post Baccalaureate Engineering Certificate

All students that attempt admission for any of the Post Baccalaureate Engineering Programs must fulfill the following minimum requirements:

1. Have earned a bachelor’s degree in the engineering field
2. Have completed the online admission application form
3. Have earned a minimum 3.0 GPA in the bachelor degree
4. Have submitted three letters of recommendation from faculty or previous/current employers.

Although not currently required, we encourage students to submit Graduate Record Examination (GRE) scores along with the application.

(\textit{Note:} Admission is competitive and completion of the above requirements does not suffice for admission to the program. The College of Engineering and Technology is ultimately responsible for granting admission to a Post Baccalaureate Certificate.

Advisement Requirement for All Engineering Students

All declared engineering students are required to receive mandatory advisement prior to registration every semester. A mandatory advisement hold will be lifted only after a student has met with his/her advisor. New students will be advised by the Dean/Chair of the College of Engineering and Technology the first time and then will be assigned to a faculty academic advisor.

Students are advised not to attempt upper division coursework (3300 and 4400-level classes) unless they have earned a GPA of 2.50 or better in all coursework taken at the 1100 and 2200-level.
GRADUATION REQUIREMENTS FOR ASSOCIATE OF ENGINEERING STUDENTS

The College of Engineering and Technology requires that all the students enrolled in an Associate of Engineering degree fulfill all of the following requirements before they can graduate:

1. Have been admitted to the NNMC Associate of Engineering Program
2. Have fulfilled all NNMC graduation requirements
3. An overall GPA of at least 2.50 in all coursework

GRADUATION REQUIREMENTS FOR BACCALAUREATE STUDENTS

The College of Engineering and Technology requires that all Baccalaureate students fulfill the following requirements for graduation:

1. Have been admitted to the NNMC Engineering Baccalaureate Program
2. Have fulfilled all NNMC graduation requirements
3. An overall GPA of at least 2.50 in all coursework
4. Have a minimum of 50 hours of community/college service *

*Mentoring, tutoring, internships and research projects are examples of available opportunities for students to fulfill this requirement. Before students begin working on any activity towards this requirement, they need approval from their academic advisor. Students can discuss these and any other community service opportunities with their academic advisor and/or Dean.

GRADUATION REQUIREMENTS FOR POST BACCALAUREATE STUDENTS

The College of Engineering and Technology requires that all Post Baccalaureate students fulfill the following requirements for graduation:

1. Have fulfilled all NNMC graduation requirements
2. A minimum overall GPA of 3.0 for graduation and no more than one C+ or below grade in the coursework.
PROGRAMS in ENGINEERING

Associate in Engineering in INFORMATION ENGINEERING TECHNOLOGY

The curriculum for the Associate in Engineering (AEng) in Information Engineering Technology is designed for those engineering students who intend to launch a career in the design, installation, maintenance, and management of computer networks used for critical data entry, transfer, retrieval, and management.

Coursework in the program is practice-oriented and prepares students to work in a variety of computer-intensive environments, such as technical organizations, small or large businesses, product design or manufacturing companies, and data-directed services. The breadth of training in hardware, software, troubleshooting equipment, and other computer tools will enable the graduate to work in a variety of roles in such occupations as network designer and administrator, project manager, datacenter engineer, and developer of business applications or computer communications engineer, test and integration manager or technologist in business applications.

The graduate of this curriculum could be a computer network specialist, and will be broadly versed in mathematics, physics, computer science, and business fundamentals.

The program objectives are the following:

1. Graduates will be situated in growing entry-level careers involving support of Information Technology Systems.
2. Graduates will have demonstrated involvement in high-level technical roles.

Completion of this program should result in the following student outcomes:

1. An ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly-defined engineering technology activities.
2. An ability to select and apply a knowledge of mathematics, science, engineering, and technology to engineering technology problems that require the application of principles and applied procedures or methodologies.
3. An ability to conduct standard tests and measurements; to conduct, analyze, and interpret experiments; and to apply experimental results to improve processes.
4. An ability to identify, analyze, and solve broadly-defined engineering technology problems.
5. A commitment to quality, timeliness, and continuous improvement.

GENERAL EDUCATION REQUIREMENTS (32 CR)

Area I: Communications (6 Credits)

ENGL 1110 Composition I (3)
Prerequisites: ENGL 109 or adequate score on the Course Placement Evaluation
ENGL 1210 Technical Communications (3)  
*Prerequisite: ENGL 1110*

**Area II: Mathematics (4 cr)**
ENGR 1121L/ENGR 1122L Introduction to Math for Engineering Applications I/II (2 credits each for engineering majors)  
*Prerequisite: MATH 1215*

**Area III: Laboratory Sciences (4 cr)**
You must select one science course with a lab.
ENGR 1101/L An Introduction to Computational Science & Modeling Lab (4)

**Area IV: Social/Behavioral Sciences (3 cr)**
You must select one course in Area IV on page 22.  
*Prerequisite: ENGL 109 or adequate score on the Course Placement Evaluation*

**Area V: Humanities (3 cr)**
You must select one course from Area V on page 22.  
*Prerequisite: ENGL 109 or adequate score on the Course Placement Evaluation*

**Area VI: Fine Arts (3 cr)**
You must select one course from Area VI on page 23.

- **Additional Nine Credit Hours (9 cr)**
  COMM 1130 Public Speaking (3)  
  *Prerequisite: ENG 109*

Choose one of the following Civics Courses (3)
- POLS 1100 Introduction to Political Science (3)
- POLS 1120 American National Government (3)
- CJUS 1110 Introduction to Criminal Justice (3)
- HIST 1110 United States History I (3)
- HIST 1120 United States History II (3)

Choose one of the following STEM-H recommended Courses (3)
- ENVS 2130 Critical Thinking in Science (3)
- PSYC 2120 Developmental Psychology (3)

**SUPPORT COURSES (8 Credits)**
- MATH 1350 Introduction to Statistics (3)  
  *Prerequisite: Math 1215*
- ENGR 2215 Physics for Engineers I (2)  
  *Prerequisite: ENGR 1121L*
- ENGR 2217L Physics for Engineers III (3)  
  *Prerequisite: ENGR 2215*

**PROGRAM REQUIREMENTS (20 Credits)**
EECE 1105L Microcomputer Systems (3)  
*Prerequisite: ENGL 109 or adequate score on the Course Placement Evaluation*
EECE 1132 Computer Networks I (3)  
*Prerequisite: None*
EECE 1152L Computer Programming (3)
Prerequisite: None

EECE 2230 Introduction to Routing and Switching (3)
Prerequisite: EECE 1132

EECE 2231L Intermediate Programming (3)
Prerequisite: EECE 1152L

Information Technology (3 cr)
IT 2250 Introduction to Databases (3)
Prerequisite: EECE 1152L

Support Technologies (2 cr)
EECE 1110L Introduction to Engineering (2)
Prerequisites: None

TOTAL CREDITS: 60

SUGGESTED SEQUENCE OF COURSES

FIRST SEMESTER (16 cr)
Elective Fine Arts (3)
ENGR 1110L Introduction to Engineering (2)
ENGR 1121L Introduction to Math for Engineering Applications I (2) (first 8 weeks)
ENGR 2215 Physics for Engineers I (2) (second 8 weeks)
EECE 1132 Computer Networks I (3)
Elective Laboratory Sciences (4)

SECOND SEMESTER (14 cr)
ENGL 1110 Composition I (3)
EECE 1152L Computer Programming (3)
ENGR 1122L Introduction to Math for Engineering Applications II (2)
EECE 2230 Introduction to Routing and Switching (3)
Elective Social/Behavioral Sciences (3)

THIRD SEMESTER (15 cr)
EECE 1105L Microcomputer Systems (3)
ENGL 1210 Technical Communications (3)
ENGR 2217L Physics for Engineers III with lab (3)
MATH 1350 Introduction to Statistics (3)
IT 2250 Introduction to Databases

FOURTH SEMESTER (15 cr)
COMM 1130 Public Speaking (3)
Elective From additional 9 credit hours section (3)
EECE 2231L Intermediate Programming (3)
Elective Humanities (3)
Elective From additional 9 credit hours section (3)
Associate in Engineering  
**PRE-ENGINEERING**

This program will prepare you for a bachelor’s degree in engineering. You will obtain both a general background in mathematics and the physical sciences, and an introduction to the concepts and methods of engineering. This program is not a professional degree and does not prepare you for specific job opportunities. It does, however, provide a broad educational foundation on which to build a career through additional education or work experience.

**The program objectives are the following:**
1. Graduates will have demonstrated knowledge and skills to pursue an engineering bachelor program.
2. Graduates will have demonstrated involvement in high-level technical roles.

**Completion of this program should result in the following student outcomes:**
1. An ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly-defined engineering technology activities.
2. An ability to select and apply a knowledge of mathematics, science, engineering, and technology to engineering technology problems that require the application of principles and applied procedures or methodologies.
3. An ability to conduct standard tests and measurements; to conduct, analyze, and interpret experiments; and to apply experimental results to improve processes.
4. An ability to identify, analyze, and solve broadly-defined engineering technology problems.
5. A commitment to quality, timeliness, and continuous improvement.

Associate in Engineering in SOFTWARE ENGINEERING

The curriculum in the Associate Degree in Engineering (AEng) in Software Engineering is designed for those who intend to launch a career in the testing, installation, and maintenance of computer software modules and systems.

Coursework in the program is hands-on oriented and prepares students to work in a variety of computer-intensive environments that involve engineering support: technical organizations, small or large businesses, manufacturing companies, and data-directed services.

The breadth of training in hardware, software, troubleshooting equipment, and other computer tools will enable the graduate to work in a variety of roles in such occupations as software technician, computer systems technician, data applications or computer technician, or as a test and integration assistant.
Graduates of this program will be a software engineering technician versed in mathematics, physics, computer science, software development, and business fundamentals.

The program objectives are the following:
1. Graduates will have demonstrated knowledge and skills to pursue an engineering bachelor program.
2. Graduates will have demonstrated involvement in high-level technical roles.

Completion of this program should result in the following student outcomes:
1. An ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly-defined engineering technology activities.
2. An ability to select and apply a knowledge of mathematics, science, engineering, and technology to engineering technology problems that require the application of principles and applied procedures or methodologies.
3. An ability to conduct standard tests and measurements; to conduct, analyze, and interpret experiments; and to apply experimental results to improve processes.
4. An ability to identify, analyze, and solve broadly-defined engineering technology problems.
5. A commitment to quality, timeliness, and continuous improvement.

Bachelor of Engineering (BEng)  
INFORMATION ENGINEERING TECHNOLOGY

The Bachelor of Engineering in Information Engineering Technology Program is accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET, www.abet.org. Accreditation is proof that the quality of an academic program meets the standards of the profession.

The curriculum of the Bachelor of Engineering (BEng) in Information Engineering Technology is designed for those students who intend to launch a career in the design, installation, maintenance, and management of computing technologies. Coursework in the program is practice-oriented and prepares students to work in a variety of computer-intensive environments, such as technical organizations, small or large businesses, product design or manufacturing companies, and data-directed services.

The breadth of training in hardware, software, troubleshooting equipment, and other computer tools will enable the graduate to work in a variety of roles such as network and datacenter engineer, software developer, database manager, project manager, and technologist in business applications. The graduate of this curriculum will be versed in mathematics, physics, computer science, and business fundamentals, giving him/her the fundamental knowledge for further graduate studies in Computer Science, Computer Engineering, or Telecommunication Systems.

Failure to maintain an overall GPA of 2.00 or better in all coursework will be sufficient cause for being dropped from the program.

The program objectives are the following:

1. Graduates will be situated in growing careers involving design, development, and support of Information Technology Systems.
2. Graduates will perform effectively individually and in teams.
3. Graduates will have demonstrated involvement in high-level technical and leadership roles.
4. Graduates will have accumulated technical expertise to remain globally competitive.

Completion of this program should result in the following student outcomes:

1. An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
2. An ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
3. An ability to apply written, oral, and graphical communication in broadly defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;

4. An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes;

5. An ability to function effectively as a member as well as a leader on technical teams. Students are advised not to attempt upper division coursework (3300 and 4400-level classes) unless they have earned a GPA of 2.50 or better in all IT, CS, and CT coursework taken at the 1100 and 2200-level.

Bachelor of Engineering (BEng) ELECTROMECHANICAL ENGINEERING TECHNOLOGY

The Bachelor of Engineering in Electromechanical Engineering Technology (BEng. EMET) program is offered in response to a growing demand from industrial and consulting companies for engineering staff members with a wide range of technical knowledge. At Northern, this program will provide a clear pathway towards a bachelor degree for students completing Career and Technical Education associates in Drafting, Electricity and Renewable Energy and Pre-engineering.

The primary aim of the BEng. EMET program is to provide graduates with the knowledge and skills necessary to apply current methods and technology to the development, design, operation, and management of electro-mechanical systems, particularly in those industries where automated systems are prevalent. The program will offer a concentration in Solar Energy and will provide the knowledge and skills for this technical field.

Students are advised not to attempt upper division coursework (3300 and 4400-level classes) unless you have earned a GPA of 2.5 or better in all coursework taken at the 1100 and 2200-level. Failure to maintain an overall GPA of 2.0 or better in all coursework will be sufficient cause for being dropped from the program.

The program objectives are the following:

1. Graduates will be situated in growing careers involving design, development, and support of Electro-Mechanical Engineering Systems.
2. Graduates will demonstrate involvement in significant technical roles and beginning leadership roles.
3. Graduates will perform effectively both individually and in teams and demonstrate oral and written communication skills in the working environment.
4. Graduates will continue personal and professional growth to remain globally competitive and develop a beginning understanding of business and ethical aspects of work.
5. Graduates will demonstrate an ability to creatively use science and technology to solve problems.

Completion of this program should result in the following student outcomes:

1. An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
2. An ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
3. An ability to apply written, oral, and graphical communication in broadly defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
4. An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes;
5. An ability to function effectively as a member as well as a leader on technical teams. Students are advised not to attempt upper division coursework (3300 and 4400-level classes) unless they have earned a GPA of 2.50 or better in all IT, CS, and CT coursework taken at the 1100 and 2200-level.

Post Baccalaureate Certificate in INFORMATION ENGINEERING TECHNOLOGY

The curriculum for the Post Baccalaureate Certificate in Engineering in Information Technology is a practice-oriented professional program, meant to extend students’ undergraduate education. The program will provide high-quality and affordable education to engineers who want to master their knowledge in networks used for critical data entry, transfer, retrieval, and management of information systems.

Coursework in the program is practice-oriented and prepares students to work as leaders in a variety of computer-intensive environments, such as technical organizations, small or large businesses, product design or manufacturing companies, and data-directed services. Coursework in the program consists of gateway courses towards pursuit of a master’s program in the field.

Completion of this program should result in the following student outcomes:

1. Graduates will have gained the theoretical and hands-on experience needed to pursue a Master’s Program in the field.
2. Graduates will encompass a deeper understanding of management solutions for professionals in information systems and information technology.
3. Graduates will excel in highly technical leadership roles.

Completion of this program should result in the following student outcomes:

1. An ability to apply knowledge of Information Engineering Technologies
2. An ability to function on multidisciplinary teams
3. An ability to communicate effectively
4. The ability to design, implement, provide, and supervise the security of facilities involved with the processing and transfer of information

- ELEC 1140 Electrical Theory I (3)
ELEC 1141  Electrical Code I (3)
ELEC 1142L  Residential Wiring Lab (6)
ELEC 1150  Electrical Theory II (3)
ELEC 1151  Electrical Code II (3)
ELEC 1152L  Commercial Wiring Lab (6)

TOTAL CREDITS: 31-32

Associate of Applied Science
RENEWABLE ENERGY

This program will provide you with the skills necessary to enter environmental fields – the renewable energy, alternative technology, and construction industries. You will be capable of entering at supervisory or management internship levels or have the skills to establish a small, related business.

GENERAL EDUCATION (28 CR)

Area I. Communications (9 cr)
ENGL 1110  Composition I (3)
ENGL 1210  Technical Communication (3)
COMM 1130  Public Speaking (3)

Areas II and III. Mathematics/Computers/Laboratory Science (10 cr)
ENGR 1110  Introduction to Engineering (2)
ENGR 1121L /1122L  Introduction to Math for Engineering Applications I/II (4)

Choose one of the following electives:
PHYS 1230 /L  Applied Physics I with lab (4)
PHYS 1310 /L  Engineering Physics I with lab (4)

Area IV. Social/Behavioral Sciences (3 cr)
Elective (3)  Select one course from Area IV on page 22.

Area V. Humanities (3 cr)
Elective (3)  Select one course from Area V on page 22.

Area VI. Fine Arts (3 cr)
Elective (3)  Select one course from Area VI on page 23.

PROGRAM REQUIREMENTS (33-35 CR)

General (3 cr)
RE 103  Renewable Energy Introduction and Overview (3)

Solar Heating (8 cr)
ADOB 107  Passive Solar Heating (3)
RE 108  Active Solar Heating (3)
RE 108L  Active Solar Heating Lab (2)
Renewable Electric and Electronics (20 cr)

College of NURSING and HEALTH SCIENCES

Dean: Ellen Trabka, MSN
505.747.2209, etrabka@nnmc.edu

The College of Nursing & Health Sciences offers certificates and degrees in the areas of Allied Health, and Nursing. Degrees offered include: Associate of Applied Science in Allied Health, Certificate of Practical Nursing, Associate of Applied Science in Nursing, and Bachelor of Science in Nursing (RN to BSN).

ASSOCIATE DEGREE NURSING PROGRAM

SPAN Elective (3)
Electives HLED or Laboratory Science electives (8)
Elective Any discipline (1)

TOTAL CREDITS: 60.5
Associate Degree in NURSING Program (ADN)

Northern offers a rigorous, evidence-based five semester associate degree in nursing curriculum. The ADN program is approved with warning by the State of New Mexico Board of Nursing and nationally accredited by the Accreditation Commission for Education in Nursing (ACEN), 3343 Peachtree Road NE Suite 850, Atlanta, Georgia 30326, 404-975-5000, www.acenursing.org

Northern’s Associate Degree in Nursing (ADN) Program is a full-time program of nursing studies with a licensed practical nurse (LPN) step-out option. The mission of the ADN program is to provide an affordable, quality, community-based nursing education that prepares registered nurses to provide safe, quality patient centered care to individuals and populations across the lifespan.

The ADN program has only one curriculum for all students accepted into the program. Once a student has completed the required pre-requisite courses and has been formally accepted into the program, the nursing curriculum is delivered over four semesters. Graduates of the ADN program obtain an Associate of Applied Science Degree in Nursing.

There is a Practical Nurse Certificate option after successful completion of the first three semesters of nursing coursework. During the third semester of nursing courses, students may opt to take one additional nursing course (NURS 119) and receive a Practical Nurse Certificate. Students are then eligible to take the PN National Council Licensure Examination (NCLEX-PN). Students may exit the program at this time or continue on with the fourth semester nursing courses.

Upon successful completion of the second year nursing courses (level II) students receive an Associate of Applied Science Degree in Nursing and are eligible to take the RN National Council Licensure Examination exam (NCLEX-RN).

Graduates of the ADN program are prepared to continue toward completion of a Bachelor of Science in Nursing.

Admission to Northern does not ensure admission to the ADN program. Program capacity requires limited enrollment. Applicants are rank-ordered based on cumulative points earned on selection criteria.

The ADN program is demanding and requires a full-time commitment, extensive study time outside the classroom, and occasional travel outside the area. Because of the rigorous nature of the program, limited employment is recommended.

Due to the rapidly changing nature of the health care system as well as state-mandated changes, the ADN program faculty review and revise the curriculum on an ongoing basis. Changes can be anticipated regarding admission requirements, course requirements, and program policies. Students are advised to seek initial and ongoing advisement from the program director or a nursing faculty advisor.

EMPLOYMENT OPPORTUNITIES

Graduates from the ADN program are prepared to enter nursing practice at the advanced beginner level. Areas of employment include acute care facilities, long-term care, home health care, physician’s offices, clinics, schools, and other settings.
ADDITIONAL REQUIREMENTS RELATING TO LICENSURE

The New Mexico State Board of Nursing has restrictions for licensure and may deny, revoke, or suspend any license applied for upon grounds of particular felony violations. Northern assumes no responsibility for the denial of licensure by the New Mexico Board of Nursing or any state Board of Nursing.

Federal law requires health care agencies to conduct criminal background checks on their employees. This requirement is also mandated for nursing students placed in these health care facilities for clinical training. Behaviors which may be cause for a student being ineligible for clinical placement include, but are not limited to, the following: physical or sexual abuse, theft, illegal use of weapons, and illegal use or possession of controlled substances.

ADMISSION REQUIREMENTS FOR THE ADN PROGRAM

1. Graduation from high school or HSE/GED
2. GPA of 2.75 or higher in the pre-requisite courses
3. A minimum total individual score of 67% on the KAPLAN pre-admission examination.
4. A minimum individual score of 73% in reading on the KAPLAN pre-admission examination.
5. A minimum individual score of 55% in science on the KAPLAN pre-admission examination.
6. Submission of a completed nursing application packet by April 30th for fall admission consideration.
7. Completion of the following pre-requisite course work by the end of the spring semester prior to anticipated entry into the ADN program with a grade of “C-” or better:
   
   CHEM  1110/L (4) or BIOL 2310/L (4) or any other BIOL (4)
   BIOL  2210/L (4)
   PSYC  1110 (3)
   ENGL  1110 (3)

Note:

- Anatomy and Physiology Courses must be completed within five (5) years prior to entry into the ADN program.
- All nursing students are expected to have basic computer skills including word processing and internet access.
- All nursing students must have and maintain current American Heart Association Basic Life Support (CPR) certification and current immunizations prior to participating in clinical nursing courses.
- Requirements for KAPLAN admission test scores, both total and content-specific, are subject to change.
- Formal application and acceptance into the nursing program is required before students may enroll in any NURS-prefixed courses listed in the program requirements, with the exception of NURS 2245 Pathophysiology. Support courses may be taken before entry into the program.
TRANSFER STUDENTS

Students transferring to the Associate Degree in Nursing Program are subject to the same admission and progression requirements as all nursing students. The Registrar and nursing faculty will evaluate transcripts, course syllabi, and course outlines to determine eligibility and placement status. Potential students must have completed general education and support transfer courses with a grade of “C-” or better and all nursing courses with a grade of “C” or better. Students must complete their last 15 credit hours at Northern in order to graduate.

For more information please contact:
Jessica Archuleta, Interim Administrative Assistant
College of Nursing & Health Sciences Office
505.747.2207

Certificate
PRACTICAL NURSING

Students who complete the pre-requisites and the first three semesters of nursing course work for the ADN Program as well as NURS 1119 Role Transition-PN have the option to petition for the Certificate in Practical Nursing. Students may exit the program at this time or continue on to completion of the fourth semester of nursing course work.

GENERAL EDUCATION (24 CR)

Area I. Communications (3 or 6 cr)

Required: (3)
ENGL 1110 Composition I (3)

An additional 3 credits must be taken either in Communications, Humanities and Fine Arts

Area II and III. Mathematics/Computers/Lab Science (12 cr)

Choose a minimum of 4 credits from the following:
Biology (4)
Chemistry (4)
Microbiology (4)

Required (8):
BIOL 2210/L Human Anatomy & Physiology I with Lab (4)
BIOL 2225/L Human Anatomy & Physiology II with Lab (4)

Area IV. Social/Behavioral (6 cr)

PSYC 1110 General Psychology (3)
PSYC 2120 Developmental Psychology (3)

Area V. Humanities (0 or 3 cr)

3 credits of Humanities may be taken in place of the additional 3 credits in Communications

RN to BSN NURSING PROGRAM

The RN to BSN Nursing Program is designed for and limited to individuals who are licensed as registered nurses (RN) in the United States. This Program is designed to articulate with many two-year Associate Degree Nursing (ADN) programs. The RN to BSN Program prepares registered nurses to assume leadership roles as an integral nurse at the bedside, within an organization, in the community, and in the profession.

The Program provides a unique and innovative nursing curriculum that is based upon the Theory of Integral Nursing. Through its integrative care focus, this Program prepares nurses to provide holistic, intentional, relationship-centered care that addresses individual and collective health.

The Program requires 126-128 credit hours for graduation. Forty credits of lower-division courses, to include nursing courses from an Associate Degree in Nursing program, may be applied toward the BSN degree. Students must then complete a total of forty credits of upper-division courses: 32 nursing credits and 8 elective credits with a Nursing (NURS) prefix, Integrative Health Studies (IHS) prefix, or other approved upper division course(s).
GENERAL EDUCATION (38 CR)

Area I. Communications (6 cr)
- ENGL 1110 Composition I (3)

Choose one of the following courses:
- ENGL 1120 Composition II (3)
- ENGL 1210 Technical Communications (3)

- ENVS 2130 Critical Thinking in Science (3)
- PSYC 2120 Developmental Psychology (3) Required

PROGRAM REQUIREMENTS

Required Lower-Division Coursework (40 cr)
Forty credits of lower-division courses, to include nursing courses from ADN program, will be applied toward the BSN degree.

SUPPORT COURSES (15-17 CR)
- NUTR 2110 Nutrition (3)
- BIOL 2225/L Human Anatomy & Physiology II with lab (4)
- BIOL 2305/L Microbiology for Health Sciences with lab (4)
Pathophysiology (4-6 cr) can be lower-or upper division courses
RN TO BSN PROGRAM CURRICULUM

A minimum of 40 credits of upper-division courses must be completed, to include 32 credits of required upper-division nursing courses and 8 credits of upper-division electives.

NURS 4400 Nursing in Transition and NURS 4401 Integral Nursing Theory must be the first two courses taken in the curriculum. They may be taken concurrently with the following courses: NURS 4410 An Integral Approach to Evidence-Based Practice; NURS 4420 Integral Health Assessment; NURS 4430 Complementary and Alternative Therapies in Nursing; NURS 4440 Health Issues, Policy and Politics in Health Care; NURS 4450 Community and Global Health I. NURS 4480 Integral Nursing Capstone Course is the last course taken in the program.

NURS 4400 Nursing in Transition (2)
NURS 4401 Integral Nursing Theory (3)
NURS 4410 An Integral Approach to Evidence-Based Practice (3)
NURS 4420 Integral Health Assessment (3)
NURS 4430 Complementary and Alternative Therapies in Nursing (3)
NURS 4440 Health Issues, Policy and Politics in Health Care (3)
NURS 4450 Community and Global Health I (3)
NURS 4451 Community and Global Health II (4)
NURS 4460 Integral Communication and Teaching (2)
NURS 4470 Transformational Leadership in Nursing (4)
NURS 4480 Integral Nursing Capstone Course (2)

Electives 8 credits of upper-division electives (8)

TOTAL CREDITS: 126-128
(INCLUDES A TOTAL OF 135 CLINICAL HOURS)
Course Descriptions

1. Freshman courses are numbered 1100-1199; sophomore courses numbered 2200-2299; junior courses numbered 3300-3399; senior courses numbered 4400-4499, and graduate courses numbered 5500-5599. Lower-division topic courses are number 1147 and 1247; upper-division topic courses are numbered 3399 and 4499.

2. Courses labeled with an “N” immediately after the course number are considered to be remedial in nature and will not be accepted to fill the requirements for any degree at Northern. Remedial courses will normally not transfer to other colleges.

3. Courses designated with WIC are Writing Intensive Courses required for a bachelor's degree. See page XX for more information.

4. No course with a grade of less than a C- or CR (as appropriate) will be accepted for graduation.

5. Any course which is designated as a Prerequisite to another course must be passed with at least a grade of C- or CR (as appropriate) in order to proceed to the next level course.

6. Immediately after the course description appears an entry inside parentheses. This number is read in two parts. For example, (3, 1T+2S) is read as: course value = 3 credits; 1 credit of theory, 2 credits of activity/shop/studio. If the course were a laboratory, it might read (1, 0T+1L). Each credit of theory (T) requires the equivalent per week of 50 minutes of instructional time; each credit of shop/activity (S) requires 100 minutes per week; and each credit of laboratory (L) requires 150 minutes per week. Therefore, an entry of 3, 1T+2S would be scheduled to meet a total of 250 minutes per week of instructional time. These calculations refer to a course offered over a full sixteen-week semester. The amount of time per week for a course offered over a shorter period of time is increased to meet the required time in a shorter period.

7. Courses listed in this catalog are subject to change or deletion through normal academic channels. New courses and changes in existing course work are initiated by the responsible department chairperson, approved by the faculty curriculum committee, the faculty senate, and the Provost. [Strikethrough text indicates that a course is no longer offered.]

ACCOUNTING (ACCT)

1135 SURVEY OF ACCOUNTING Designed to provide a basic understanding of accounting procedures for small businesses. Provides a foundation of the accounting cycle for a small business enterprise and a practical understanding of business financial statements. (3, 3T+0L)

2115 PRINCIPLES OF ACCOUNTING I An introduction to financial accounting concepts emphasizing the analysis of business transactions in accordance with generally accepted accounting principles (GAAP), the effect of these transactions on the financial statements, financial analysis, and the interrelationships of the financial statements. Prerequisite: MATH 100N. (3, 3T+0L)

2120 PRINCIPLES OF ACCOUNTING II An introduction to the use of accounting information in the management decision making processes of planning, implementing, and controlling business activities. In addition, the course will discuss the accumulation and classification of costs as well as demonstrate the difference between costing systems. Prerequisite: ACCT 2110. (3, 3T+0L)

2220 COMPUTERIZED ACCOUNTING This course requires the prior knowledge from Survey of Accounting or Principles of Accounting I (Financial). It employs integrated
accounting software for payroll, inventory control, accounts payable, accounts receivable and general ledger functions. Course reviews the accounting cycle. Prerequisites: ACCT 2110 or ACCT 2115. (3, 3T+0L)

3304  INTERMEDIATE ACCOUNTING I  Accounting principles within a conceptual framework determined by generally accepted accounting principles, financial accounting functions and theory, and recognition and measurement of assets. Prerequisites: ACCT 2120. (3, 3T+0L)

3305  INTERMEDIATE ACCOUNTING II  Accounting with the study of current accounting objectives, principles, theory and practice in the preparation, interpretation, and analysis of general purpose financial statements for business entities. Emphasis will be on problems relating to investments, liabilities, and stockholders equity, including EPS. Prerequisite: ACCT 2120. (3, 3T+0L)

3306  INTERMEDIATE ACCOUNTING III  Topics in accounting pertaining to public reporting of company financials. Review of recent FASB rules. Prerequisite: ACCT 2120. (3, 3T+0L)

3324  INCOME TAX ACCOUNTING  Latest tax law changes as they apply to individuals; problems in tax computation and reporting for individuals, with some emphasis on taxation in business. Prerequisite: ACCT 2110. (3, 3T+0L)

4405  ACCOUNTING FOR NON-PROFIT ORGANIZATIONS  Accounting and financial reporting for governmental and non-profit organizations, including topics such as fund accounting for governmental organizations and adherence to GASB standards as well as statement preparation and analysis. Prerequisite: ACCT 2120 (Spring) (3, 3T+0L)

4411  MANAGERIAL ACCOUNTING  You will examine the role of accounting in management decision-making for planning and control. Topics include: interpretation and analysis of financial information, relevant cost analysis; budgeting and responsibility accounting, planning for capital expenditures. Prerequisite: ACCT 2120 (3, 3T, 0L)

4429  ADVANCED ACCOUNTING  Advanced study of corporate financial analysis and planning, including capital budgeting, cost of funds, and capital structure and valuation. Prerequisites: ACCT 2120 (Principles of Accounting II) and BFIN 2110 (Principles of Finance). (3, 3T+0L)

4445  COST ACCOUNTING  Advanced topics in the development and interpretation of accounting information as an aid to management. Includes collecting cost information; cost estimation and allocation; standard costing and variance analysis; activity-based costing and cost-value relationships. Prerequisite: ACCT 2120. (3,3T+0L)

4446  AUDITING THEORY AND PRACTICE  Accepted principles, practices, and procedures used by public accountants for certifying corporate financial statements. Prerequisite: BUSA 3304 (3,3T+0L)

ANTHROPOLOGY (ANTH)

Note: Each course in this department bears a Prerequisite of ENG 109N or an adequate score on the Course Placement Evaluation.

1140  INTRODUCTION TO CULTURAL ANTHROPOLOGY  This is an introductory course that provides an overview of cultural anthropology as a subfield within the broader discipline of anthropology and as a research approach within the social sciences more generally. The course presents core concepts and methods of cultural anthropology that are used to understand the ways in which human beings organize and experience their lives through distinctive cultural practices. More specifically, this course explores social
and cultural differences and similarities around the world through a variety of topics such as: language and communication, economics, ways of making a living, marriage and family, kinship and descent, race, ethnicity, political organization, supernatural beliefs, sex and gender, and globalization. This course ultimately aims to present a broad range of perspectives and practices of various cultural groups from across the globe. (Fall only) (3, 3T+0L)

1155 INTRODUCTION TO LINGUISTIC ANTHROPOLOGY This is an introductory course, which provides an overview of the discipline of Linguistic Anthropology. The course will discuss the implications of language within anthropology, as well as within the sciences and social sciences more generally. The course explores the core concepts and methods of linguistic anthropology, such as the basic structure of language, first and second language acquisition, bilingualism, and social and regional variations that are used to help students understand what it means to be human and the role of language in human societies. Pre-requisite: ENG 109N. (3, 3T+0L)

2140 INDIGENOUS PEOPLES OF NORTH AMERICA This course is a general survey of the history and ethnology of indigenous groups in North America. The course is designed to give students a comprehensive view of major issues pertaining to the indigenous cultures of North America, such as family structure, social organization, subsistence and contemporary economies, environmental adaptation, Indian-White relations, religious practices, and contemporary issues. (3, 3T+0L)

ARTS (ARTS)

All studio courses may be repeated without penalty; however, no course may be counted more than once toward graduation requirements.

1120 INTRODUCTION TO ART In this class, students will be introduced to the nature, vocabulary, media and history of the visual arts, illustrated by examples drawn from many cultures, both Western and non-Western and across many centuries. We will begin with a general overview of the subject, including basic concepts and themes that shed light on the continuity of the artistic enterprise across the span of human experience. We will study the visual elements from which art is made, including how artists use these elements and how the artists' use of visual elements affects our experience of looking at art. We will examine both two-dimensional and three-dimensional media including drawing, painting, printmaking, camera and computer arts, graphic design, sculpture, installation, crafts and architecture. Selected works will be examined in context, including the history of the time and place in which they were created, as well as their function, patronage, and the character and intent of individual artists. (3, 3T+0S). Meets New Mexico Lower Division General Education Core Curriculum Area VI Fine Arts (NMCCN ART 1113)

1312L MICACEOUS POTTERY I Micaceous Clay is a unique type of clay found in Northern New Mexico. It has been used for centuries by Jicarilla Apache, Pueblo and Hispanic potters to produce cooling vessels. This course presents the history of its traditional use as well as traditional and nontraditional techniques for working with this clay. Students produce a variety of open bowls, closed bowls and lidded forms using hand-building techniques, electric kilns and open-pit firing processes. (3, 1T+2S)

1320 CERAMICS I An introduction to the medium of clay incorporating hand building and wheel throwing to introduce the student to both the sculptural and utilitarian uses of clay. The student will also be introduced to a variety of glazing and firing techniques. (3, 1T+2S)

1410 INTRODUCTION TO PHOTOGRAPHY This course introduces the making of photographic images from a broad viewpoint to consider both as an art practice and as a
ART

cultural practice. The course covers technical information on camera use and functionality, composition and visual design, digital workflow and editing, professional functions of manipulating and enhancing images, and printing correctly and effectively. The historical aspects of photography are also covered. (3, 1T+2S) Meets New Mexico Lower Division General Education Core Curriculum Area VI Fine Arts

1610 DRAWING I This course introduces the basic principles, materials, and skills of observational drawing. Emphasis is placed on rendering a 3-D subject on a 2-D surface with visual accuracy. Other topics include historical and contemporary references as well as an investigation of linear perspective, line, value, shape, space & composition. (3, 1T+2S) Meets New Mexico Lower Division General Education Core Curriculum Area VI Fine Arts

1630 PAINTING I This course introduces the tradition of painting as a medium for artistic expression. Students will investigate materials, tools, techniques, history and concepts of painting. Emphasis is placed on developing descriptive and perceptual skills, color theory, and composition. (3, 1T+2S) Meets New Mexico Lower Division General Education Core Curriculum Area VI Fine Arts

2110 HISTORY OF ART I This survey course explores the art and architecture of ancient pre-historic cultures through the end of the fourteenth century. While focused primarily on the art of the Western civilizations, this course will also provide insights into the works of other major cultures in order to provide alternate views of art and history. Emphasis will be placed on the relationship of artworks to political, social, spiritual, intellectual, and cultural movements that affect and are affected by their creation and development. (3, 3T+0S).

2120 HISTORY OF ART II This survey course will explore the architecture, sculpture, ceramics, paintings, drawings, and glass objects from the 14th century to the modern era. While focused primarily on the art of the Western civilizations, this course will also provide insights into the works of other major cultures in order to provide alternate views of art and history. Emphasis will be placed on the relationship of artworks to political, social, spiritual, intellectual, and cultural movements that affect and are affected by their creation and development. (3, 3T+0S)

2310 CERAMICS II This course continues the students’ instruction in ceramics, with an emphasis given to the continuing development of form, surface, and firing processes, expanded critical awareness, and the development of a personal aesthetic. Prerequisite: ARTS 1320. (3, 1T+2S)

2328 POTTERY GLAZE MAKING AND STUDIO PRACTICES Instruction and experience in making and altering pottery glazes, in maintaining and firing a kiln, in recycling clay and in maintaining a pottery studio. Prerequisite: ARTS 1320. (1, 0.5T+0.5S)

2610 DRAWING II This course introduces color and colored media as an element of composition while emphasizing descriptive and perceptual drawing skills and conceptual approaches to contemporary drawing. Prerequisite: ARTS 1610. (3, 1T+2S)

2630 PAINTING II This course focuses on the expressive and conceptual aspects of painting, building on the observational, compositional, technical, and critical skills gained previously. Students will investigate a variety of approaches to subject matter, materials, and creative processes through in-class projects, related out-of-class assignments, library research or museum/gallery attendance, written responses, and critiques. Prerequisite: ARTS 1630. (3, 1T+2S)

1640 WATERCOLOR I This course introduces watercolor painting materials and techniques with an emphasis on capturing light, shadow, color and spatial manipulation to describe form. Covers both traditional and contemporary approaches to watercolor painting. (3, 1T+2S)
2426 PHOTOGRAPHY II This course is a continuation of Photography I in which students will study advanced black and white techniques covering exposure, development, various films, and the use of filters, with special emphasis on tonal control through the creative use of the zone system; increased emphasis on personal vision, aspects of design, composition, and perception. Prerequisite: ARTS 1410. (3, 1T+2S)

2327 MICACEOUS POTTERY II You will learn micaceous clay pottery in the tradition of northern New Mexico through a continuation of the techniques learned in Micaceous Potter I. You will also experiment with advanced techniques of hand-building and out-door firing. Prerequisite: ARTS 1312L. (3, 1T+2S)

2428 PHOTOGRAPHY III In this continuation of Photography II, which concentrates on advanced black and white printing, you will learn single filter printing, split filter printing, and high key printing. You will use fiber papers and various archival toning processes. Prerequisite: ARTS 2426. (3, 1T+2S)

2329 POTTERY III A continuation of Ceramics II in which you will study advanced methods for hand-building and wheel throwing of pottery. You will have hands-on experience in kiln loading and glaze making. Prerequisite: ARTS 2310. (3, 1T+2S)

2433 PHOTOGRAPHY PORTFOLIO To assist students in entering the world of professional photography, they will create your own portfolio with a strong emphasis on editing, content, printing, and presentation. Students will engage in discussions on how to market their work to enter graduate schools; includes publications, shows, and galleries. Prerequisite: ARTS 2426. (3, 1T+2S)

ASTRONOMY (ASTR)

1115 INTRODUCTION TO ASTRONOMY This course surveys observations, theories, and methods of modern astronomy. The course is predominantly for non-science majors, aiming to provide a conceptual understanding of the universe and the basic physics that governs it. Due to the broad coverage of this course, the specific topics and concepts treated may vary. Commonly presented subjects include the general movements of the sky and history of astronomy, followed by an introduction to basic physics concepts like Newton’s and Kepler’s laws of motion. The course may also provide modern details and facts about celestial bodies in our solar system, as well as differentiation between them – Terrestrial and Jovian planets, exoplanets, the practical meaning of “dwarf planets”, asteroids, comets, and Kuiper Belt and Trans-Neptunian Objects. Beyond this we may study stars and galaxies, star clusters, nebulae, black holes, clusters of galaxies and dark matter. Finally, we may study cosmology – the structure and history of the universe. Prerequisite: ENG 109N and MATH 100N. Co-requisite: ASTR 1115L. (3, 3T+0L)

1115L INTRODUCTION TO ASTRONOMY LAB Introduction to Astronomy Lab will include hands-on exercises that work to reinforce concepts covered in the lecture, and may include additional components that introduce students to the night sky. Co-requisite: ASTR 1115. (1, 0T+1L)

BARBERING (BARB)

Prerequisite any Barbering course is completion of ENG 108N or adequate scores on the Course Placement Evaluation instrument.

1110 BARBERING I This course presents an integrated study and overview of the demands of the profession and the self-discipline needed to succeed in the field of barbering. It includes concepts related to professional image, work ethic, professional standards,
communication skills, infection control, and industry history. As this course requires both theory and lab, you will perform practical skills on mannequins. The course introduces you to state-required study in theory, facials, hair coloring, chemical texturizing, haircutting, shampooing, hairstyling, and shaving. Prerequisites: ENG 109, BUSA 1180 (17, 7T+10L)

1120  BARBERING II This course is a continuation of Barbering I. You will perform practical skills on clients, while continuing your study in theory, facials, hair coloring, chemical texturizing, haircutting, shampooing, hairstyling and shaving. Prerequisite: BARB 1110. (16, 5T+11L)

2210  BARBERING III This course is a continuation of Barbering II. You will perform practical skills on clients, while continuing your study in theory, salon business, facials, hair coloring, chemical texturizing, haircutting, shampooing, hairstyling, and shaving. Prerequisite: BARB 1120. (15, 3T+12L)

2222  BARBERING DIRECTED STUDY This course is an independent clinical practice of all skills and knowledge learned in related courses. It is designed for students to make up missed state-required clock hours. It may be repeated once. Prerequisite: COSM 1120 or 2210 or 2220. (6, 0T+6L)

2230  COSMETOLOGY/BARBER REFRESHER This course is designed for the cosmetologist or barber whose license has expired. You will complete a review of state laws and regulations, take mini-board exams (state laws and practical), and review all required cosmetology/barber course work. Prerequisite: proof of expired cosmetology/barber license. (Summer only) (10, 8T+2L)

BIOLOGY (BIOL)

1110  GENERAL BIOLOGY This course introduces nonscience majors to basic biological concepts including, but not limited to, the properties of life, biochemistry, cell biology, molecular biology, evolution, biodiversity, and ecology. Co-requisite: BIOL 1110. (3, 3T+0L)

1110L  GENERAL BIOLOGY LAB This laboratory course for non-science majors complements the concepts covered in the associated general biology lecture course. Students will learn quantitative skills involved in scientific measurement and data analysis. Students will also perform experiments related to topics such as biochemistry, cell structure and function, molecular biology, evolution, taxonomic classification and phylogeny, biodiversity, and ecology. (1, 0T+1L)

2110  PRINCIPLES OF BIOLOGY: CELLULAR AND MOLECULAR BIOLOGY This course introduces students to major topics in general biology. This course focuses on the principles of structure and function of living things at the molecular, cellular and organismic levels of organization. Major topics included are introduction to the scientific process, chemistry of cells, organization of cells, cellular respiration, photosynthesis, cell division, DNA replication, transcription, and translation. Prerequisites: CHEM 1120/L or BIOL 1110/L and ENG 1110; Co-requisite: BIOL 2110L. (3, 3T+0L)

2110L  PRINCIPLES OF BIOLOGY: CELLULAR AND MOLECULAR AND BIOLOGY LAB This course introduces students to major topics in general biology. This course focuses on the principles of structure and function of living things at the molecular, cellular and organismic levels of organization. Major topics included are introduction to the scientific process, chemistry of cells, organization of cells, cellular respiration, photosynthesis, cell division, genetics, DNA replication, transcription, and translation.: BIOL 2110. (1, 0T+1L)
2210  HUMAN ANATOMY AND PHYSIOLOGY I This course is the first of two that serve as an introduction to human anatomy and physiology for biology majors and allied health students. The course entails describing, explaining, and analyzing structure and function from the submicroscopic to the organismal level with emphasis on anatomic, directional, and sectional terminology, basic cellular structure and metabolism, tissue differentiation and characteristics, and organ system structure and function; specifically the integumentary, skeletal, muscular, and nervous systems. Co-requisite: BIOL 2210L. (3, 3T+0L)

2210L  HUMAN ANATOMY AND PHYSIOLOGY I LAB This is the first in a series of two laboratory courses designed to introduce laboratory practices and techniques for human anatomy and physiology, from the basic cell structure through the organ system level; specifically the integumentary, skeletal, muscle, and nervous systems. Co-requisite: BIOL 237. (1, 0T+1L)

2225  HUMAN ANATOMY AND PHYSIOLOGY II This course is the second of two that serve as an introduction to human anatomy and physiology for biology majors and allied health students. The course entails describing, explaining, and analyzing structure and function from the submicroscopic to the organismal level with emphasis on specific cellular, tissue, and organ structure and physiology, and organ system structure and function; specifically the endocrine, cardiovascular, respiratory, urinary, and reproductive systems. Additionally, an analysis of these concepts is included: fluid and electrolyte balance, pregnancy, growth and development from zygote to newborn, and heredity. Prerequisite: BIOL 2210/L; Co-requisite: BIOL 2225L. (3, 3T+0L)

2225L  HUMAN ANATOMY AND PHYSIOLOGY II LAB This is the second in a series of two laboratory courses designed to introduce laboratory practices and techniques for human anatomy and physiology, from the basic cell structure through the organ system level; specifically the endocrine, cardiovascular, lymphatic, respiratory, urinary, and reproductive systems. Co-requisite: BIOL 2225. (1, 0T+1L)

2310  MICROBIOLOGY Introduction to the basic principles of microbiology, microbial pathogenesis, host defenses and infectious diseases. The course will emphasize concepts related to the structure and function of microorganisms, including their mechanisms of metabolism and growth. Host parasite interactions will also be emphasized, including mechanisms of microbial pathogenesis and mechanisms of host defenses against infectious diseases. Co-requisite: BIOL 2310L. (3, 3T+0L)

2310L  MICROBIOLOGY LAB This course will emphasize both the theory and hands-on application of techniques used in a microbiology laboratory for the growth and identification of bacterial species. Students will learn microscopy skills and staining techniques for the observation of bacteria. Students will also learn aseptic techniques used for isolation of bacteria, inoculation of cultures, and interpretation of selective and differential growth media for the identification of bacterial species. Co-requisite: BIOL 2310. (1, 0T+1L)

2410  PRINCIPLES OF BIOLOGY: GENETICS This course introduces the fundamental principles of heredity; DNA structure and replication; the processes of transcription, translation, and regulation of gene expression; and structural, functional, and comparative genomics. The course covers the application of major genetic concepts, principles, and techniques to understand and solve biological questions. Prerequisite: BIOL 2110/L; Co-requisite: BIOL 2410L. (3, 3T+0L)

2410L  PRINCIPLES OF BIOLOGY: GENETICS LAB This laboratory course introduces the fundamental principles of heredity and uses scientific method to understand and solve genetic questions. Emphasis is placed on transmission genetics, molecular genetics,
genomics, and biotechnology, with work focused on discussion and problem-solving activities. Students must engage with primary literature (e.g., written paper or annotated bibliography). Students must give oral presentations. Wet lab work is not required. **Co-requisite:** BIOL 2410. (1, 0T+1L)

**2610 PRINCIPLES OF BIOLOGY: BIODIVERSITY, ECOLOGY, AND EVOLUTION** This course is an introduction to the dynamic processes of living things. Major topics include the mechanisms of evolution, biological diversity, population genetics, and ecology. **Prerequisite:** BIOL 1110/L; **Co-requisite:** BIOL 2610L. (3, 3T+0L)

**2610L PRINCIPLES OF BIOLOGY: BIODIVERSITY, ECOLOGY, AND EVOLUTION LAB** This laboratory course is an introduction to the dynamic processes of living things. This course introduces students to the methods used in the study of evolution, ecology, and biological diversity. Designed for students continuing in life sciences. **Co-requisite:** BIOL 2610. (1, 0T+1L)

**2640 PLANT AND ANIMAL FORM AND FUNCTION** Focuses on comparative botany and zoology. Topics covered are plant structure and growth, transport, nutrition, reproduction and development in plants. Introduction to animal form and function, animal nutrition, circulation and gas exchange, immune system function and evolution, control of the internal environment, chemical signaling, reproduction and development, nervous systems, sensory and motor mechanisms. **Prerequisite:** BIOL 1110/L. **Co-requisite:** BIOL 2640L. (3, 3T+0L)

**2640L PLANT AND ANIMAL FORM AND FUNCTION LAB** This laboratory course complements concepts learned in the lecture, focusing on comparative botany and zoology. Plant concepts covered include plant structure and growth, transport, nutrition, reproduction and development. Animal concepts covered include an introduction to animal form and function, nutrition, circulation and gas exchange, immune system function and evolution, homeostasis, chemical signaling, reproduction and development, nervous systems, and sensory/motor systems. **Co-requisite:** BIOL 2640. (1, 0T+1L)

**3310 SCIENCE AND SOCIETY** You will examine the principles and practice of modern science and the relationship between science and technology in society. You will also focus on issues of biological science that relate to current political and social challenges and problems, using current topics as a way of understanding how scientific progress impacts culture and society. You will also gain practical experience in learning about the scientific method with observations, evidence, and testing to address general biological and physical questions. **Prerequisite:** BIOL 1110/L or BIOL 2110/L. (4, 4T+0L)

**3329 MOLECULAR CELL BIOLOGY** You will learn about basic cellular processes and their control mechanisms, including gene expression, protein synthesis, signal transduction pathways, receptor activation and cell cycle. This course is designed to expand the knowledge base of students who have completed introductory-level courses and to serve as a foundation for 400-level courses in biology. **Prerequisite:** BIOL 2640/L. (4, 4T+0L)

**3360 PLANT BIOLOGY** You will study plant anatomy, physiology, classification, evolution, and ecology as it deals with both higher and lower plants. **Prerequisite:** BIOL 204/L. **Co-requisite:** BIOL 3360. (3, 3T+0L)

**3360L PLANT BIOLOGY LAB** You will engage in laboratory experiences supportive of BIOL 360. **Co-requisite:** BIOL 3360. (1, 0T+1L)

**3371 INVERTEBRATE BIOLOGY** You will study the major invertebrate groups with emphasis on evolutionary and ecological relationships, as well as the correlation of structure with function. **Prerequisite:** BIOL 2640/L; **Co-requisite:** 3371L. (3, 3T+0L)
3371L  INVERTEBRATE BIOLOGY LAB  You will engage in laboratory experiences supportive of BIOL 3371. (1, 0T+1L)

3372  ADVANCES IN BIOLOGY DISCUSSION You will participate in weekly convening of discussions of contemporary research, journal articles, to even ideas or studies done by group participants. This forum thus provides an opportunity to evaluate embryonic or fully-fledged research results, to keep abreast of newly published ideas or books, and to develop or teach communications skills. The focus here is how to lead discussion of a scientific journal article, but our group maintains flexibility by inviting outside seminar speakers, discussing the research of group members, and taking on extended discussion of book-length works, among other activities. Prerequisite: Permission of instructor. (3, 3T+0L)

3380-3385  UNDERGRADUATE TEACHING EXPERIENCE Undergraduate instruction allows students to learn first-hand what teaching is like while also providing valuable experience of a type that very few students get to have. Responsibilities may include laboratory preparation, assistance in the grading of quizzes and reports and the guiding of students in exercises and discussions. As the term progresses, the student usually assumes more responsibilities as appropriate. Prerequisite: Permission of instructor. (3, 3T+0L)

3386  VERTEBRATE BIOLOGY You will study the ecology, behavior, sociology, adaptations, and evolution of the vertebrates. Prerequisite: BIOL 2640/L or BIOL 2225L (4, 4T+0L)

3390-3397  UNDERGRADUATE RESEARCH EXPERIENCE This is a practical faulty-directed research experience for upper-division biology majors. During the regular semester you will perform 8-10 hours per week of work alongside your mentor in a project with a time frame agreed to by you, the student intern, and the mentor. Arrangements involve all aspects of biological research that can include fieldwork, bench laboratory work, library research, or any combination of these activities. The mentor will actively engage you in sharing the responsibility for the research process. (3, 3T+0L)

3398  INDEPENDENT STUDY A variable credit theory course for science majors pertaining to a specific topic not available in the regular curriculum. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit. Prerequisite: Permission of instructor. (1-4, 1-4T+0L)

4000-4009  SPECIAL TOPICS A variable credit lecture and/or laboratory course for biology majors pertaining to a specific biological topic not available in the regular curriculum. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit. Prerequisite: Permission of instructor. (1-4, 1-4T+0L)

4405  ANIMAL BEHAVIOR The study of animal behavior brings together research on the proximate causes of behavior such as genetics, neurobiology, and endocrinology, as well as the ultimate functions of behavior that affect an animal's evolutionary fitness integrating aspects such as communication, aggression, sexual reproduction, parental investment and mating systems. The course will focus on theory and experimental/observational hypothesis testing, with many examples from nature. (4, 4T+0L)

4406  STREAM ECOLOGY AND FIELD METHODS You will use the scientific method to understand and explain concepts in stream ecology, hydrology, and biology. You will obtain experience in general field methods for stream characterization and sampling in streams of northern New Mexico. Prerequisites: BIOL 2610/L; Co-requisite: BIOL 4406L. (4, 3T+1L)

4406L  STREAM ECOLOGY AND FIELD METHODS LAB You will engage in laboratory experiences supportive of BIOL 4406. (1, 0T+1L)

BUSINESS ADMINISTRATION (BUSA)

1110  INTRODUCTION TO BUSINESS  Fundamental concepts and terminology of business including areas such as management, marketing, accounting, economics, personnel, and finance; and the global environment in which they operate. Prerequisite: ENG 109N. (3, 3T+0L) (NM Common Course Number: BUSA 1113, Business Transfer Module)

1180  BUSINESS MATH  Applies basic mathematical operations to business and accounting applications. (3, 3T+0L)

1195  INTRODUCTION TO PROJECT MANAGEMENT  This course teaches the basics of using Microsoft Project to help you manage projects, keep track of deadlines, resources, task distribution, constraints and contingencies. This is an inter-disciplinary course designed to assist in meeting project deadlines in all fields of study. (Fall) (3, 3T+0L)

1210  RECORDS MANAGEMENT  Principles, methods and procedures for the selection, operation and control of manual and automated records systems. (Fall) (3, 3T+0L)

2110  BUSINESS COMMUNICATIONS  Skill development in business writing with an emphasis on the preparation of letters and reports, and on presenting information in a logical, forceful and acceptable form. Included are strategies for effective oral communication in a professional environment. Prerequisite: ENG 109N. (3, 3T+0L)

2130  BUSINESS STATISTICS  Use of statistics in business; techniques for describing and analyzing descriptive and numerical data; estimation, hypotheses testing, t-tests, and regression; application to business problems. Prerequisite: MATH 1215 or higher. (3,3T+0L)

2140  INTEGRATED MANAGEMENT  This course provides a management-simulated environment to make critical decisions based on the situations that arise in operating competitive business enterprises. Prerequisite: ENTR 2110 (Spring) (3, 3T+0L)

2175  PERSONAL DEVELOPMENT  Development of a marketable, employable office systems person, to include interview, voice, manners, and apparel. (3, 3T+0L)

2180  INTRODUCTION TO E-COMMERCE  Survey of methods and practices in e-commerce. Topics include the evolution and forms of e-commerce, secure online business transactions, and basic business concepts of e-commerce. (Spring) (3, 3T+0L)

3313  ORGANIZATIONAL BEHAVIOR (WIC)  Diverse conceptual and theoretical perspectives in organizations, focusing on problems related to perception, motivation, leadership, conflict, stress, influence, decision making, work/family balance, and ethics. Prerequisite: MGMT 2110. (3, 3T+0L)

3330  PRINCIPLES OF PROJECT MANAGEMENT  This course provides the foundation for understanding project management from a perspective of managing a single project. This course will cover the aspects of initiating, planning, executing, monitoring/controlling and closing with scenario based information case studies to help understand the course material. The material covered follows the Project Management Institute’s (PMI) Guide to the Project Management Body of Knowledge (PMBOK). (3, 3T+0L)

3334  ORGANIZATIONAL MANAGEMENT  This course provides the foundation for understanding how project-based work is accomplished in contemporary organizations. Organizational model for accomplishing work will be covered including projectized, functional and matrix models. An overview of project program and portfolio management will be covered. The course is completed with the review of various approaches to strategy development, enterprise-level performance measurement, and models for organizational performance improvement (such as Baldrige, ISO, and PMI’s OPM3). Prerequisite: BUSA 3330 (3,3T+0L)
BUSINESS ADMINISTRATION

3335  PROJECT PLANNING AND CONTROLS  This course covers the process of planning, scheduling, and using control techniques and systems to effectively manage a project. The objective of this course is to furnish the student with the skills and knowledge needed to effectively plan and schedule a project using contemporary computer modeling tools such as Microsoft SharePoint., Microsoft Project and Oracle Primavera. Using a representative tool, you will learn how to use project control systems to monitor, forecast, and solve problems as they occur. You will learn the elements of project planning and ways to set up meaningful control systems that can help as the project manager and team a successfully completed project. The material covered follows the Project Management Institute’s; (PMI) Guide to the Project Management Body of Knowledge (PMBOK). Prerequisite: BUSA 3330. (3,3T+0L)

3336  PROJECT COMMUNICATIONS AND STAKEHOLDER MANAGEMENT  This course provides communications skills used to delegate responsibilities, motivate teams, solve problems, organize, sell ideas, obtain/provide information, report on performance, manage organizational transition, and implement actions. Studies are provided with practical communications strategies, tools and best practices along with plenty of real life examples of their application in an interactive format, to enhance learning. The material covered follows the Project Management Institute’s (PMI) Guide to the Project Management Body of Knowledge (PMBOK). Prerequisite: BUSA 3330. (3,3T+0L)

3354  E-COMMERCE  Techniques, problems, and solutions in e-commerce. Marketing plan considerations, online catalogs, payment methods, security, outsourcing options, and the technologies behind e-commerce web sites. Prerequisites: MGMT 2110, MKTG 2110. (3, 3T+0L)

3361  ADVANCED MANAGEMENT INFORMATION SYSTEMS  The course includes such topics as security, decision support services, system life cycle, social issues of computing, database administration, data mining, data modeling, systems development and emerging technologies. Focus is from the technical manager perspective. Prerequisites: BCIS 2140, BUSA 3354 and IT 3350. (3, 3T +0L)

4433  PROJECT QUALITY AND RISK MANAGEMENT  This course provides skills needed to implement quality tools, techniques and practices in all phases of the project life cycle and in assessing and managing the risks related to project success. Elements of a systematic approach to risk management are covered including risk identification, qualitative analysis, quantitative analysis, risk planning and monitoring for outcome realization. The material covered follow the Project Management Institute’s; (PMI) Guide to the Project Management Body of Knowledge (PMBOK). Prerequisite: BUSA 3330. (3, 3T+0L)

4438  PROJECT LEADERSHIP AND HR MANAGEMENT  This course covers the processes of Project Leadership and Human Resource Management into day-to-day project management activities. Models for communications planning, technology, requirements, and methods will be covered. Emphasis will also cover negotiation and acquisition planning and execution, leadership team building, team problem solving, decision making and how to conduct team and individual performance appraisals. The material covered follows the Project Management Institute’s (PMI) Guide to Project Management Body of Knowledge (PMBOK). Prerequisite: BUSA 3330. (3,3T+0L)

4460  LABOR RELATIONS  Labor union history, labor law, collective bargaining, labor-management relations, and the concept of management prerogative with respect to defining jobs, working conditions, and other human resources functions. (3, 3T+0L)

4464  BUSINESS CONTINUITY PLANNING/DISASTER PLANNING  Examine and critique various Business Continuity and Disaster Recovery Planning models and documents. Students will conduct a business impact analysis of one business function. Prerequisites: 30 hours of BUSA courses or instructor permission and BUSA 3354. (3, 3T+0L)
4470 MANAGING SCIENCE, ENGINEERING, AND TECHNOLOGY PROJECTS  This course provides the foundations for understanding project management for science, technology, engineering and Math (STEM) projects. This course provides an overview of the management tools and techniques most applicable to those types of projects where outcomes are not always known at the start of the project or where scientific discovery is a significant portion of the planned effort. The material covered is based on the Project Management Institute's (PMI) Guide to Project Management Body of Knowledge. Prerequisite: BUSA 3330 (3, 3T+0L)

4485 INTERNSHIP  Service learning in field of interest within a job-related environment. Prerequisite: You must petition to enroll in this course. (6, 6T+0L)

4490 CAPSTONE  Service Learning project in a field of interest within a job-related environment. Course will also include completion of a Major Field Test. Prerequisites: completion of at least 18 hours of Common BBA requirements and permission of instructor. (6, 6T+0L)

BUSINESS COMPUTING INFORMATION SYSTEMS (BCIS)

1120 COMPUTER LITERACY  Overview of computer hardware, software, and the Windows or Linux environment. You will cover basic computer operating principles, file management, the using the Internet, along with an introduction to word processors, spreadsheets, and database programs. (3, 3T+0L)

1210 INTRODUCTION TO MS ACCESS  Introduction to the electronic database, specifically, how to use, design, and edit databases for use in a variety of personal and business applications. (1, 1T+0L)

1215 INTRODUCTION TO MS EXCEL  Introduction to the electronic spreadsheet, specifically how to use, design, and edit spreadsheets for use in a variety of personal and business applications. (1, 1T+0L)

1220 INTRODUCTION TO MS WORD  A brief overview of the word processing application package, Microsoft Word. You will learn to create basic documents, such as letters and memos. You will be provided with the basic knowledge as well as hands-on experience to allow you to become computer literate in Word. (1, 1T+0L)

1230 INTRODUCTION TO MS POWERPOINT  Introduction to the electronic presentation, specifically how to use, design, and edit presentation graphics for use in a variety of personal and business applications. (1, 1T+0L)

2110 BUSINESS COMPUTER APPLICATIONS  The owner/manager approach to the use of microcomputers: systems design, software, business applications, and the Windows environment. (3, 3T+0L)

2210 MICROSOFT ACCESS  A Windows database course teaching basic through intermediate features: creating and editing databases by using step-by-step activities; formatting fields and entering calculated fields, as well as creating forms and using queries to extract information. (3, 3T+0L)

2217 EXCEL  This course provides an in-depth study of Microsoft Excel spreadsheet software (3, 3T+0L)

2220 MICROSOFT WORD  Covers the commands of Microsoft Word by using step-by-step applications; provides a working knowledge of the basic and intermediate capabilities of Microsoft Word on an IBM compatible. (3, 3T+0L)
2230  POWERPOINT  Microsoft PowerPoint is a complete presentation graphics software program that produces a professional-looking presentation. PowerPoint enables informal presentations in a small conference room using overhead transparencies. (3, 3T+0L)

2261  BUSINESS TECHNOLOGY  Focuses on how technologies are used to support business needs or initiatives. Course will cover such topics as Customer Relations Management (CRM), Enterprise Resource Planning (ERP), Point of Sale (POS), Accounting Information Systems, E-commerce, Artificial Intelligence (AI), Business Continuity Planning (BCP), risk management, operation security, and/or information security in addition to discussion of ethics as related to technology usage. Prerequisite: ENGL 1110, (3, 3T+0L)

BUSINESS LAW (BLAW)

2110  BUSINESS LAW I  Survey of the legal environment of business and common legal principles including: the sources of law, dispute resolution and the U.S. court systems, administrative law, tort law, contract law, agency and employment law, business structure and governance, ethics and corporate social responsibility. Explores sources of liability and presents strategies to minimize legal risk. Prerequisites: ENGL 1110. (3, 3T+0L)

4461  ETHICAL AND LEGAL ISSUES IN BUSINESS  Current topics in the areas of law, regulatory controls, and ethical issues, focusing discussions on the implications of these legal situations in management. Prerequisite: BLAW 2110. (3, 3T+0L)

CHEMISTRY (CHEM)

1120  INTRODUCTION TO CHEMISTRY  This course covers qualitative and quantitative areas of non-organic general chemistry for nonscience majors and some health professions. Students will learn and apply principles pertaining, but not limited to, atomic and molecular structure, the periodic table, acids and bases, mass relationships, and solutions. Prerequisite: MATH 102N and ENG 109N; Co-requisite: CHEM 1120L. (3, 3T+0L).

1120L  INTRODUCTION TO CHEMISTRY LAB  Introduction to Chemistry Laboratory is a laboratory course designed to complement the theory and concepts presented in the Introduction to Chemistry lecture component, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment. Co-requisite: CHEM 1120. (1, 0T+1L)

1215  GENERAL CHEMISTRY I FOR STEM MAJORS  This course is intended to serve as an introduction to General Chemistry for students enrolled in science, engineering, and certain preprofessional programs. Students will be introduced to several fundamental concepts, including mole, concentration, heat, atomic and molecular structure, periodicity, bonding, physical states, stoichiometry, and reactions. Prerequisite: MATH 130, high school chemistry, or an ACT score of 19 or higher in Natural Science, and ENG 1110. Co-requisite: CHEM 1215L. (3, 3T+0L)

1215L  GENERAL CHEMISTRY I FOR STEM MAJORS LAB  General Chemistry I Laboratory for Science Majors is the first semester laboratory course designed to complement the theory and concepts presented in General Chemistry I lecture. The laboratory component will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment. Co-requisite: CHEM 1215. (1, 0T+1L)

1225  GENERAL CHEMISTRY FOR STEM MAJORS II  This course is intended to serve as a continuation of general chemistry principles for students enrolled in science, engineering, and certain preprofessional programs. The course includes, but is not limited to a theoretical and quantitative coverage of solutions and their properties, kinetics, chemical
equilibrium, acids and bases, entropy and free energy, electrochemistry, and nuclear chemistry. Additional topics may include (as time permits) organic, polymer, atmospheric, and biochemistry. Co-requisite: CHEM 1225L. (3, 3T+0L)

1225L GENERAL CHEMISTRY II LAB General Chemistry II Laboratory for Science Majors is the second of a two semester sequence of laboratory courses designed to complement the theory and concepts presented in General Chemistry II lecture. The laboratory component will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment. Co-requisite: CHEM 1225. (1, 0T+1L)

2120 INTEGRATED ORGANIC & BIOCHEMISTRY This course is a one semester introduction to Organic Chemistry and Biochemistry designed for students in health and environmental occupations. The course surveys organic compounds in terms of structure, physical, and chemical properties, followed by coverage of the chemistry of specific classes of organic compounds in the biological environment. Students will apply course concepts to everyday organic and biological chemistry problems in preparation for careers in health and environmental fields. Prerequisite: CHEM 1120/L or CHEM 1215/L; Co-requisite: CHEM 2120L. (3, 3T+0L)

2120L INTEGRATED ORGANIC & BIOCHEMISTRY LAB This course provides experiences with the physical properties and laboratory synthesis of organic compounds. Co-requisite: CHEM 2120. (1, 0T+1L)

2310 QUANTITATIVE & ANALYTICAL CHEMISTRY Analytical Chemistry is the science of chemical characterization. In this course, you will learn how particular chemical species of interest can be detected and how the amounts of those species can be determined. You will learn how chemical characterization involves chemical reactivity, physical measurement, and data interpretation. All these aspects of chemical characterization will be explored in lecture, reading, and problem solving. The study of precise and reliable chemical characterization is fundamental to further study and practice in chemistry, biology, medicine, geology, chemical engineering, and many other related fields. The understanding of the methods and limitations of chemical characterization is helpful in making informed judgments on a large variety of social and political issues. Co-requisite: CHEM 2310L. Prerequisites: CHEM 1225L and MATH 1350. (2, 2T+0L)

2310L QUANTITATIVE & ANALYTICAL CHEMISTRY LAB Laboratory experiments involving instrumentation emphasis on sampling, statistical, measurement, and separation techniques. You will focus on proper documentation and data analysis. Co-requisite: CHEM 221. Prerequisites: CHEM 1215/L. (2, 0T+2L)

3301 ORGANIC CHEMISTRY I The study of the compounds of carbon and the relationships among molecular structure, chemical reactivity, physical properties, and spectral features, approached by way of the functional group classification of organic compounds. Prerequisite: CHEM 1225/L; Co-requisite: CHEM 3301L. (Fall) (3, 3T+0L)

3301L ORGANIC CHEMISTRY I LAB Introduction to the techniques involved in the preparation, isolation, purification, and characterization of organic compounds. Co-requisite: CHEM 3301. (Fall) (1, 0T+1L)

3302 ORGANIC CHEMISTRY II The study of the compounds of carbon and the relationships among molecular structure, chemical reactivity, physical properties, and spectral features, approached by way of the functional group classification of organic compounds. Prerequisite: CHEM 3301/L; Co-requisite: CHEM 3302L (Spring). (3, 3T+0L)

3302L ORGANIC CHEMISTRY II LAB Application of more advanced techniques in the preparation, isolation, purification, and characterization of organ compounds, with special
emphasize on the use of spectroscopic techniques to elucidate structure. **Co-requisite:** CHEM 3302. (Spring) (1, 0T+1L)

**3311 PHYSICAL CHEMISTRY** You will study the quantitative principles of chemistry, gases, thermodynamics, quantum systems, equilibrium, kinetics, and spectroscopy. **Prerequisites:** CHEM 1225/L, 2310/L; **Co-requisite:** CHEM 3311. (3, 3T+0L)

**3311L PHYSICAL CHEMISTRY LAB** You will engage in laboratory experiences supportive of CHEM 3311. **Co-requisite:** CHEM 3311. (1, 0T+1L)

**3341 SURVEY OF BIOCHEMISTRY** Covers the basic principles of biochemistry, including properties of nucleic acids, proteins, carbohydrates, fats, and lipids, while also introducing the chemistry of metabolic pathways, pH regulation, membranes and receptors, cell organization, enzymes kinetics and mechanisms, hormonal regulation, energy transformations, chemical reactions in living cells, ATP synthesis and use, and biochemical genetics. **Prerequisite:** CHEM 2120/L or 3301/L. (Spring) (3, 3T+0L)

**4421 BIOCHEMISTRY** You will study the fundamentals of general and organic chemistry to understand the complex array of structures and chemical processes that occur in living organisms. **Prerequisites:** CHEM 3301/L, 3302/L; **Co-requisite:** CHEM 4421L. (3, 3T+0L)

**4421L BIOCHEMISTRY LAB** A laboratory to support the study the fundamentals of general and organic chemistry to understand the complex array of structures and chemical processes that occur in living organisms. **Prerequisites:** CHEM 3301/L, 3302/L; **Co-requisite:** CHEM 4421L. (1, 0T+1L)

**CHICANA/O STUDIES (CCST)**

**2110 INTRODUCTION TO CHICANA & CHICANO STUDIES** Introductory survey of the Mexican American experience in the United States, with special reference to New Mexico. Exploration of historical, political, social and cultural dimensions. **Prerequisite:** ENG 109N or permission of the Instructor. (3, 3T+0L)

**COMMUNICATION (COMM)**

**1130 PUBLIC SPEAKING** This course introduces the theory and fundamental principles of public speaking, emphasizing audience analysis, reasoning, the use of evidence, and effective delivery. Students will study principles of communication theory and rhetoric and apply them in the analysis, preparation and presentation of speeches, including informative, persuasive, and impromptu speeches. **Prerequisite:** ENG 109N. (3, 3T+0L) Meets New Mexico Lower Division General Education Core Curriculum Area I Communications

**COMPUTER SCIENCE (CS)**

**2201 MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE** You will study the formal mathematical concepts of computer science, including such topics as elementary logic, induction, algorithmic processes, graph theory, and model of computation. (Fall) **Prerequisite:** EECE 152L. (3, 3T+0L)

**COSMETOLOGY (COSM)**

**Prerequisite** for any Cosmetology course is completion of ENG 108N or adequate scores on the Course Placement Evaluation instrument.

**1110 COSMETOLOGY I** This course presents an integrated study and overview of the demands of the profession and the self-discipline needed to succeed in the field of cosmetology. It includes concepts related to professional image, work ethic, professional standards,
communication skills, infection control, and industry history. As this course requires both theory and lab, you will perform practical skills on mannequins. The course introduces you to state-required study in theory, facials, hair coloring, chemical texturizing, haircutting, shampooing, hairstyling, manicuring, and pedicuring. Prerequisites: ENG 109, BUSA 1180 (17, 7T+10L)

1120 COSMETOLOGY II This course is a continuation of Cosmetology I. You will perform practical skills on mannequins, while continuing your study in theory, facials, hair coloring, chemical texturizing, haircutting, shampooing, hairstyling, manicuring, and pedicuring. Prerequisite: COSM 1110. (16, 5T+11L)

2210 COSMETOLOGY III This course is a continuation of Cosmetology II. You will perform practical skills on mannequins and clients, while continuing your study in theory, salon business, facials, hair coloring, chemical texturizing, haircutting, shampooing, hairstyling, manicuring and pedicuring. Prerequisite: COSM 1120. (15, 3T+12L)

2220 COSMETOLOGY IV This course is a continuation of Cosmetology III. You will perform practical skills on clients, while continuing your study in theory, salon business, facials, hair coloring, chemical texturizing, haircutting, shampooing, hairstyling, and shaving. You will study State Board Regulations and prepare for state and national exams. Prerequisite: COSM 1120. (15, 3T+12L)

2222 COSMETOLOGY DIRECTED STUDY This course is an independent clinical practice of all skills and knowledge learned in related courses. It is designed for students to make-up missed state-required clock hours. It may be repeated once. Prerequisite: COSM 1120 or 2210 or 2220. (6, 0T+6L)

2230 COSMETOLOGY/BARBER REFRESHER This course is designed for the cosmetology or barber whose license has expired. You will complete a review of state laws and regulations, take mini-board exams (state laws and practical), and review all required cosmetology/barber course work Prerequisite: proof of expired cosmetology/barber license. (Summer only) (10, 8T+2L)

CRIMINAL JUSTICE (CJUS)

Note: Each course in this program has a Prerequisite of ENG 109N or an adequate score on the Course Placement Evaluation.

1110 INTRODUCTION TO CRIMINAL JUSTICE This course provides an overall exploration of the historical development and structure of the United States criminal justice system, with emphasis on how the varied components of the justice system intertwine to protect and preserve individual rights. The course covers critical analysis of criminal justice processes and the ethical, legal, and political factors affecting the exercise of discretion by criminal justice professionals. (3, 3T+0L)

1120 CRIMINAL LAW This course covers basic principles of substantive criminal law including elements of crimes against persons, property, public order, public morality, defenses to crimes, and parties to crime. (3, 3T+0L)

1130 FORENSIC SCIENCE I This course covers the application of science in criminal investigations. This includes the techniques, limitations, and significance of crime laboratory analysis, with emphasis on physical evidence and how it relates to the crime solving process. Proper techniques in collection and preservation of evidence will be covered. (3, 3T+0L)

1140 JUVENILE JUSTICE This course covers the diversity of the informal and formal juvenile justice system, the process of identifying delinquent behavior, the importance of
CRIMINAL JUSTICE

legislation, law enforcement, courts, diversion, referrals, and juvenile correctional facilities. (3, 3T+0L)

1170 INTRODUCTION TO CRIMINOLOGY The course will explore the crime problem, its context, and especially to explain causes of crime. The course will cover Foundations for Criminology, Theories of Crime, and Types of Crime. The first half of the class will be lectures on Crime and Criminology, The Nature and Extent of Crime, and Victims and Victimization. The second part of the class will be lectures on Rational Choice Theories, Trait Theories, Social Structure Theories, Social Conflict, Developmental Theories, Social Structure Theories of Crime, Social Process Theories of Crime, Social Reaction Theories of Crime. The third part will cover lectures in Interpersonal Violence, Political Crime and Terrorism, Property Crime, Enterprise Crime, Public Order Crime. The class will also be devoted to discussion groups who will be assigned special discussion questions related to the chapter being discussed. Discussion groups will give opportunity to students to use communication skills with each other as they work as a team to resolve a question/problem. The instructor will use handouts, films and guest speakers as additional information on topics. (3, 3T+0L)

2120 CRIMINAL COURTS AND PROCEDURES This course covers the structures and functions of American trial and appellate courts, including the roles of attorneys, judges, and other court personnel, the formal and informal process of applying constitutional law, rules of evidence, case law and an understanding of the logic used by the courts. (3, 3T+0L)

2130 POLICE AND SOCIETY The course presents a focused practical introduction to the key principles and practices of policing. Topics covered include issues of law enforcement fragmentation and jurisdiction, philosophies of policing, enforcement discretion, deployment strategies, use of force, personnel selection, socialization, tactics, and stress. (3, 3T+0L)

2140 CRIMINAL INVESTIGATIONS This course introduces criminal investigations within the various local, state, and federal law enforcement agencies. Emphasis is given to the theory, techniques, aids, technology, collection, and preservation procedures, which insure the evidentiary integrity. Courtroom evidentiary procedures and techniques will be introduced. (3, 3T+0L)

2150 CORRECTIONS SYSTEM This course introduces the corrections system in the United States, including the processing of an offender in the system and the responsibilities and duties of correctional professionals. The course covers the historical development, theory, and practice, as well as the institutional and community-based alternatives available in the corrections process. (3, 3T+0L)

2153 COMMUNITY-BASED CORRECTIONS A detailed analysis of community-based corrections. The philosophical basis of community corrections will be explored in the context of diversion, pretrial release programs, probation, parole, intermediate sanctions, alternative sanctions, mental health and substance abuse treatment in both the juvenile and adult systems. (3, 3T+0L)

3320 THEORIES OF CRIME This course is designed to acquaint students with the major criminological theories within the fields of criminology and criminal justice. The goal of this course is to provide the student with a comprehensive understanding of the criminological research related to major systems of social control, offenders, offending, victimology, juvenile justice, and the social contexts of crime. In particular, this course will examine biological, psychological, and sociological theories that attempt to predict why people commit crimes or what are the consequences of living in family contexts where crime or criminality occur. In addition to the social context related to various theories, and how each theory
proposes to explain crime, this course will address how theory and research translate into real-life action or crime policy. (3, 3T+0L)

3321 RESEARCH DESIGN This course presents the method of scientific research, using active learning and hands-on experiences, to include an emphasis in theory and in learning the basic skill of research methodology such as experimental design, quasi-experimental design. There will be a module on ethics of research. The goal of this class is for the student to have acquired the skills necessary to conduct research in an independent research project. Offered only in the Fall. Students planning to graduate in May should take this course in the Fall before their projected Spring graduation. Prerequisites: ENGL 1110, PSY 1110. Cross listed with PSYC 3321. (3, 3T+0L)

4400 SPECIAL TOPICS Students may enroll in this course more than once for credit as its content and focus will be on varied specialized fields in the discipline of social justice, such as the history, theory, practice and legal environments, police organization, discretion, and subculture with specific interest in recent developments. Such topics may include terrorism, border patrol, sexual trafficking, globalized crime, etc. Prerequisite: ENGL 1110. (3, 3T+0L)

4410 COMPARATIVE PERSPECTIVES IN CRIME AND JUSTICE Students may enroll in this course twice for credit as its content and focus will be on varied specialized fields in the areas of criminal law, criminal procedures, prosecution, defense, and court procedures and decision-making. Prerequisite: ENGL 1110. (3, 3T+0L)

4421 INDEPENDENT RESEARCH PROJECT Each student will implement, interpret, and report on individually designed research projects. Prerequisite: CJUS 3321. Offered only in the Spring. Students planning to graduate in May should take this course in the Spring of their projected Spring graduation. Cross-listed with PSYC 4421. (3, 3T+0L)

4488 INTERNSHIP/PRACTICUM/SERVICE LEARNING In this course, with the assistance of the advisor for the program, students would undertake an independent study, paid or unpaid internship, volunteer in a criminal justice setting, or obtain service learning credits for the work they are already accomplishing in a law, justice or enforcement setting. Approval/permission by department chair is required. (3-12)

DRAFTING (DRFT)

1100 COMPUTER AIDED DRAFTING I You will develop basic drafting skills using computer-aided drafting software including lettering, scales, line types, line weight, 2- and 3-view orthographic projection, dimensioning, and sectioning. (4, 3T+1L)

EARLY CHILDHOOD EDUCATION (ECED)

1110 CHILD GROWTH, DEVELOPMENT AND LEARNING (3) This basic course in the growth, development, and learning of young children, prenatal through age eight, provides students with the theoretical foundation for becoming competent early childhood professionals. The course includes knowledge of how young children grow, develop and learn. Major theories of child development are integrated with all domains of development, including biological-physical, social, cultural, emotional, cognitive and language. The adult’s role in supporting each child’s growth, development and learning is emphasized. (3, 3T+0L)

1115 HEALTH, SAFETY, AND NUTRITION (2) This course provides information related to standards and practices that promote children’s physical and mental well-being, sound nutritional practices, and maintenance of safe learning environments. It includes information for developing sound health and safety management procedures for indoor and outdoor learning environments for young children. The course examines the many scheduling factors
that are important for children’s total development, healthy nutrition, physical activity, and rest. (2, 2T+0L)

1120  GUIDING YOUNG CHILDREN (3) This course explores various theories of child guidance and the practical applications of each. It provides developmentally appropriate methods for guiding young children and effective strategies and suggestions for facilitating positive social interactions. Strategies for preventing challenging behaviors through the use of environment, routines and schedule will be presented. Emphasis is placed on helping children become self-responsible, competent, independent, and cooperative learners and including families as part of the guidance approach. (3, 3T+0L)

1125  ASSESSMENT OF CHILDREN AND EVALUATION OF PROGRAMS (3) This basic course familiarizes students with a variety of culturally appropriate assessment methods and instruments, including systematic observation of typically and on-typically developing children. The course addresses the development and the use of formative and summative assessment and evaluation instruments to ensure comprehensive quality of the total environment for children, families, and the community. Students will develop skills for evaluating the assessment process and involving other teachers, professionals and families in the process. (3, 3T+0L).

1130  FAMILY AND COMMUNITY COLLABORATION (3) This course examines the involvement of families and communities from diverse cultural and linguistic backgrounds in early childhood programs. Ways to establish collaborative relationships with families in early childhood settings is discussed. Families' goals and desires for their children will be supported through culturally responsive strategies. (3, 3T+0L)

2110  PROFESSIONALISM (2) This course provides a broad-based orientation to the field of early care and education. Early childhood history, philosophy, ethics and advocacy are introduced. Basic principles of early childhood systems are explored. Multiple perspectives on early care and education are introduced. Professional responsibilities such as cultural responsiveness and reflective practice are examined. (2, 2T+0L)

2115  INTRODUCTION TO LANGUAGE, LITERACY AND READING (3) This course is designed to prepare early childhood professionals for promoting children’s emergent literacy and reading development. Through a developmental approach, the course addresses ways in which early childhood professionals can foster young children’s oral language development, phonemic awareness, and literacy problem solving skills, fluency, vocabulary, and comprehension. This course provides the foundation for early childhood professionals to become knowledgeable about literacy development in young children. Instructional approaches and theory-based and research based strategies to support the emergent literacy and reading skills of native speakers and English language learners will be presented. (3, 3T+0L)

2120  CURRICULUM DEVELOPMENT THROUGH PLAY BIRTH THROUGH AGE (3) The beginning curriculum course places play at the center of curriculum in developmentally appropriate early childhood programs. It addresses content that is relevant for children birth through age four in developmentally and culturally sensitive ways of integrating content into teaching and learning experiences. Information on adapting content areas to meet the needs of children with special needs and the development of IFSP is included. Curriculum development is all areas, including literacy, numeracy, the arts, health, science, social skills, and adaptive learning for children, birth through age four, is emphasized. Co-requisite: ECED 2120L (3, 3T+0L)

2121L CURRICULUM DEVELOPMENT THROUGH PLAY PRACTICUM-BIRTH THROUGH AGE 4 (3) The field-based component of this course will provide experiences that address curriculum content that is relevant for children birth through age four in developmentally
and culturally sensitive ways of integrating content into teaching and learning experiences. Information on adapting content areas to meet the needs of children with special needs and the development of IFSPs is included. Curriculum development in all areas, including literacy, numeracy, the arts, health science, social skills, and adaptive learning for children birth through age four, is emphasized. As assigned by the instructor, you will be engaged in specific responsibilities for 75 hours in field and/or lab experiences. You must have a background check on file with the College of Education. **Co-requisite:** ECED 2120. (3, 0T+3L)

### 2130 CURRICULUM DEVELOPMENT AND IMPLEMENTATION AGE 3 THROUGH GRADE 3 (3)
The curriculum course focuses on developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Development and implementation of curriculum in all content areas, including literacy, numeracy, the arts, health and emotional wellness, science, motor and social skills, is emphasized. Information on adapting content areas to meet the needs of children with special needs and development of IEPs is included. **Co-requisite:** ECED 2131L. (3,3T+0L)

### 2131L CURRICULUM DEVELOPMENT AND IMPLEMENTATION PRACTICUM AGE 3 THROUGH GRADE 3 (3)
The field-based component of this course will provide experiences that address developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Development and implementation of curriculum in all content areas, including literacy, numeracy, the arts, health and emotional wellness, science, motor and social skills is emphasized. Information on adapting content areas to meet the needs of children with special needs and the development of IEPs is included. As assigned by the instructor, you will be engaged in specific responsibilities for 75 hours in field and/or lab experiences. You must have a background check on file with the College of Education. **Co-requisite:** ECED 2130. (3,0T+3L)

### 3302 RESEARCH IN CHILD GROWTH AND DEVELOPMENT (3)
This advanced course in child growth, development, and learning builds upon the foundational material covered in the basic course ECE 202 Child growth, Development, and learning course. An integration of major theories of child development is provided by focusing on contemporary research in all aspects of development, including bio-ecological, social-affective, cognitive-learning and language-cultural. This course considers methodological aspects of research in early childhood development and education with a focus on preparing early childhood professionals to use empirically-based research to inform their teaching of young children and prepares teachers to be researchers in their own classrooms. **Prerequisite:** COE permission(3, 3T+0L)

### 3303 FAMILY, LANGUAGE AND CULTURE (3)
This course analyzes the interrelationships between family, language, and culture as connected to children’s development and learning. In this course, language is understood as a human activity and a higher mental process which builds on the children’s families, community, and cultural background. Language conceived as human activity will be examined through an understanding of dialogue, because dialogue is a way of promoting positive relationships between home, school and community partnerships. In the course of these collaborative partnerships, a vision for how to promote well-being for young children will emerge and concretize in a culturally and linguistically responsive pedagogy, **Prerequisite:** COE permission. (3, 3T+0L)

### 3304 YOUNG CHILDREN WITH DIVERSE ABILITIES (3)
This course builds on the broad knowledge gained in previous coursework. It provides a specific focus on educational policies, programs, practices, and services appropriate for infants, toddlers, preschoolers, and early primary children who exhibit delays and disabilities. The course will provide a means toward a deeper understanding and sensitivity to the needs and feelings of children with diverse abilities and their families. The foundations include research-based decision-making, developmentally and individually appropriate practices, a holistic view of young
EARLY CHILDHOOD EDUCATION

children and their families; cultural sensitivity and competence, and activity-based interventions. **Prerequisite:** COE permission. (3, 3T+0L)

**4470 SOCIAL EMOTIONAL LEARNING AND SELF REGULATION IN YOUNG CHILDREN (3)** This course will address classroom management for teachers working with groups of children 3-8 years old. It will explore the research on social-emotional learning and the skills needed to provide an environment in which children can begin to learn and practice appropriate and acceptable behaviors as individuals and as a group. This course will also review federal and state policies that promote social-emotional learning during preschool and early elementary grades. Appropriate guidance including: setting limits, use of logical and natural consequences and helping children learn social problem solving, conflict resolution and negotiation will also be presented. Students in this course will spend at least 10 hours in a preK-3 grade classroom. **Prerequisite:** COE permission. (3, 3T+0L)

**4475 TEACHING AND LEARNING MATH AND SCIENCE (4)** The focus of this advanced curriculum is on the standards, principles and practices in teaching mathematics and science to young children in preschool through grade 3. An emphasis is placed on developing a content-rich integrated math and science curriculum that focuses on children’s development and interests including appropriate content, process, environment, and materials with special consideration given to problem-solving as the major method of constructing basic concepts. **Field Experience Required. Prerequisite:** COE permission. (4, 4T+0L)

**4476 TEACHING AND LEARNING READING AND WRITING (3)** The foundation of this course is an understanding of the reading process including the relationship between reading, writing, listening, and speaking, individual needs and abilities in reading instruction, and classroom organization and material selection to support literacy development. Concepts of phonemic awareness, phonics instruction, vocabulary development, fluency, and comprehension are integrated with the use of developmentally appropriate authentic assessment techniques, immersion & multicultural literacy. **Prerequisite:** COE permission. (3, 3T+0L)

**4477 TEACHING AND LEARNING SOCIAL STUDIES, FINE ARTS AND MOVEMENT (3)** This course focuses on the aims, scope, and integration of methods of teaching social studies, the fine arts, and movement across the curriculum. This course emphasizes an integrated approach to teaching the “what and why” of social studies, assessing student learning, planning units lessons and activities, developing effective instructional strategies, and acquiring knowledge of social studies content. **Prerequisite:** COE permission. (3, 3T+0L)

**4478L TEACHING AND LEARNING PRACTICUM (3)** The field practicum is a **Co-requisite** course of teaching and learning reading and writing; teaching and learning math and science, teaching and learning social studies, fine arts, and movement. The field base component will provide experiences that address curriculum content and practice teaching that is relevant for children pre-K through grade three in developmentally and culturally sensitive ways. **Prerequisite:** COE permission. **Co-requisites:** ECED 4475 or ECED 4477. (3, 0T+3L)

**4479L STUDENT TEACHING (9)** This course is designed as the capstone field experience in the teacher preparation program and provides opportunities for the Student Teacher to integrate and refine the many competencies acquired throughout the ECE program. This course is a full-time practicum requiring Student Teachers to complete a minimum of 15 weeks with a full day being 100% of the school day. Student Teachers are placed with one Mentor Teacher. Student teaching is a time of continued learning, improvement and growth, supported by the Mentor Teacher and the Student Teaching Faculty in the College of Education. Final placement in a school is decided by the College of Education. Student teaching also involves the collection of competency based artifacts providing evidence toward the understanding of the teaching profession. **Prerequisites:** Completion of the Early Childhood Education Core and passing NES Essential Academic Skills (I, II III). **Co-requisite:** ECED 4480 Seminar. (9, 0T+9L)
4480  **SEMINAR (3)** This course provides guided discussion, reflections, lesson planning, and observations revolving around the student teaching experience. As part of the lab course, student will complete a student teaching experience and student study assignment by collaborating with a mentor, principle, and the school community. This course provides interaction with other students in the ECE field setting. Guided discussions address classroom management, student learning, lesson plans, discipline, school/home communication, and professional development. Additional areas include professional issues, ethics and portfolio preparation. **Prerequisites:** Completion of the Early Childhood Education Core, Passing the Essential Academic Skills Assessment, pre-student teaching application packet and interview. **Co-requisite:** ECED 4479 Student Teaching. (3, 3T+0L)

**ECONOMICS (ECON)**

2110  **MACROECONOMIC PRINCIPLES** Macroeconomics is the study of national and global economies. Topics include output, unemployment and inflation; and how they are affected by financial systems, fiscal and monetary policies. **Prerequisite:** ENG 109N. (3, 3T+0L) Meets New Mexico Lower Division General Education Core Curriculum Area IV Social and Behavioral Sciences (NMCCN ECON 2113)

2120  **MICROECONOMIC PRINCIPLES** This course will provide a broad overview of microeconomics. Microeconomics is the study of issues specific to households, firms, or industries with an emphasis on the role of markets. Topics discussed will include household and firm behavior, demand and supply, government intervention, market structures, and the efficient allocation of resources. **Prerequisite:** ENG 109N. (3, 3T+0L) Meets New Mexico Lower Division General Education Core Curriculum Area IV Social and Behavioral Sciences (NMCCN ECON 2123)

**EDUCATION–ELEMENTARY, ALT. LICENSURE–ELEMENTARY/SECONDARY (EDUC)**

1120  **INTRODUCTION TO EDUCATION (3)** This course introduces you to the basics of the teaching profession. It includes societal expectations of teachers, social problems which impact students, essential knowledge needed for teaching, recent reforms in education, historical perspectives on education, the role of schools in today’s society, school governance, and the legal and ethical issues in education. Further, you will be expected to begin to articulate your philosophy of education. **Co-requisite:** EDUC 1190. (3, 3T+ 0L)

1190L  **INTRODUCTION TO EDUCATION PRACTICUM I (1)** You will do initial observations of classroom environments and determinations of what classroom teacher do. You will participate in seminars and observe 37.5 hours of classroom instruction in the field. You must have a background check on file with the College of Education. **Co-requisite:** EDUC 1120.(1, 0T+1L)

2220  **EDUCATIONAL PSYCHOLOGY (3)** Introduces you to psychological principles as they apply to teaching and learning. You will examine the relationships between theory, research, and practice in learning, memory, child development, motivation, and educational assessment for the school setting. You will address cognitive, linguistic, affective, and social development, with particular attention to the K-8 learner. Emphasis is on the integration of theory and practice, with numerous classroom applications of psychological theories and principles. (3, 3T+0L)

2345  **STRATEGIES FOR SUCCESSFUL CLASSROOMS (3)** You will develop a rationale and plan for creating classroom procedures, routines, and structures that lead to increased student learning and teacher classroom management. You will research and be presented with learning theories and research that result in the creation of learning environments which are safe emotionally, physically and psychologically. You will understand the principals
involved in motivating students and overcoming resistance to learning. Co-requisite: EDUC 2345. (3, 3T+0L)

2345L **STRATEGIES FOR SUCCESSFUL CLASSROOMS (1)** This course is designed to supplement EDUC 2345. As assigned by the instructor, you will be engaged in specific responsibilities for 37.5 hours in the field and/or lab experiences. You must have a favorable background check on file with the College of Education. Co-requisite: EDUC 2345 (1,0t+1L)

2445 **SCIENCE AND MATH (3)** This course prepares teacher credential candidates to use best practices in science and math teaching for K-8 students. Students will 1) Understand the nature and purpose of teaching constructivist, inquire-based science and math in the elementary school curriculum, especially FOSS and STC lessons used in northern New Mexico School Districts. 2) Make connections between the teaching of science and math in the classroom and learn why science and math should matter to people in northern New Mexico. 3) Explore best methods in teaching science and math to children of diverse ethnic, cultural and linguistic backgrounds. 4) Become knowledgeable of the current National Science Education Standards and Benchmarks (Next Generation Science Standards). (3, 3T+0L)

4401 **FOUNDATIONS OF EDUCATION (3)** This course introduces you to the basics of the teaching profession. It includes societal expectations of teachers, social problems which impact students, essential knowledge needed for teaching, recent reforms in education, historical perspectives on education, the role of schools in today's society, school governance, and the legal and ethical issues in education. Further, you will be expected to begin to articulate your philosophy of education. You will participate in seminars and observe 10 hours of classroom instruction in the field. Co-requisite: EDUC 4452. (3, 3T+0L)

4410 **TEACHING AND DIAGNOSIS OF READING (3)** This course provides you with a conceptual framework for understanding the growth of language development and literacy throughout the elementary years. You will be introduced to instructional strategies to build reading, writing, and speaking abilities in your students. The course will address literacy differences through a standards approach to instruction, focusing on cognitive, affective, social, and cultural factors that created differences in literacy abilities. Common Core State Standards are incorporated into this course. You will be required to do field work. Prerequisite: COE permission. (3, 3T+0L)

4411L **LAB III (1)** Designed to supplement the Teaching and Diagnosis of Reading Course (ED 410). As assigned by the instructor, you will be engaged in specific responsibilities for 37.5 hours in the field and/or lab experiences. Prerequisite: COE permission. Co-requisite: EDUC 4410. (1, 0T+1L)

4422 **MATH FOR EDUCATORS I (3)** This course is designed to prepare you to teach the National Council of Teachers of Mathematics Standard 1, K-8, Numbers and Operations, and Standard 2, K-8 Algebra, integrated with Standards 6, 7, 8, 9, and 10 Problem Solving, Reasoning and Proof, Communications, Connections, and Representations. You will be assessed based on performance measures designed to demonstrate mastery of mathematical concepts. You will participate in seminars and observe 10 hours of classroom instruction in the field. Prerequisite: COE permission. (3, 3T+0L)

4450 **PEDAGOGY AND LEARNING (3)** This course will help the student to develop a solid theoretical foundation in education and a critical view of various educational practices and theories. Students will review aspects related to the social, emotional, physical, and cognitive development of students and will understand the role of regular education teachers in teaching students with disabilities in the regular classroom. Students will learn about the different disabilities covered under IDEA and will explore brain-based, multiple intelligences, multi-sensory instruction and different learning styles. Prerequisite: COE permission. (3, 3T+0L)
4460  TEACHING READING AND WRITING (ELEM) (3) This course provides you with an overview of literacy and language development, and focuses on the development and implementation of research based reading instructional approaches. at the elementary level. This course will emphasize the integration of Common Core State Standards. Prerequisite: COE permission. (3, 3T+0L)

4474  METHODS AND MATERIALS IN SECONDARY EDUCATION (3) This course explores the methods and materials appropriate in a secondary learning environment. You will learn teaching strategies, assessments, adaptive teaching for student learning styles, integration of content areas, and block scheduling. Alternatives to lecture are emphasized, with diversity of multiculturalism as a major focus. You will participate in seminars and observe 10 hours of classroom instruction in the field. Prerequisite: COE permission. (3, 3T+0L)

4479L  STUDENT TEACHING (12) This is a full-time assignment during the semester, in conjunction with ED 480 (Student Teaching Seminar). You will be engaged in a minimum of 16 weeks of student teaching. You will follow the daily schedule of the assigned grade, assume regular faculty and out-of-classroom duties, participate in faculty meetings, PTA/PTO meetings, and other appropriate school-community activities. Your final placement in a school is decided by the College of Education, contingent upon your being acceptable to the school in which you will do your teaching. Prerequisites: Completion of the Elementary Education Core, Passing the Essential Academic Skills Assessment, pre-student teaching application packet and interview. Co-requisite: EDUC 4480. (12, 0T+12L)

4480  STUDENT TEACHING SEMINAR (1) This course provides you interaction with guided discussion on reflections of the student teaching experience. Supplemental requirements include outside readings based upon educational research and corresponding reflective papers. Prerequisite: Student Teaching Interview. Co-requisite: EDUC 4479L. (1, 1T+0L)

4495  ASSESSMENT AND EVALUATION OF STUDENT LEARNING (3) Explores the construction and utilization of teacher-made and standardized tests. You will learn to gather data, report, and communicate assessment results to students, parents, and administrators in a variety of ways in an effort to meet diverse student needs. You will become familiar with the local school district’s testing program and will develop valid evaluation tools to measure students outcomes. You will participate in seminars and observe 10 hours of classroom instruction in the field. Prerequisite: COE permission. (3, 3T+0L)

4496L  SUPERVISED FIELD EXPERIENCE LAB (ELEM/SEC) (2) Provides a field experience in an appropriate elementary/secondary classroom setting under the advisement and supervision of a mentor teacher and college supervisor; emphasizes observation of student learning styles, teaching strategies, classroom management, and discipline. Requires 100 (75 Clock Hours + 25 Assessment and Accountability Framework hours) of practicum in the field, which includes a seminar. Interaction with students on a one-to-one basis and in small group settings is provided. Prerequisite: Passing NES, Essential Academic Skills (I, II, III); Co-requisite: Passing remaining NES Assessments required by the New Mexico Public Education Department (Competency, Content Knowledge, and Reading if Elem). (Cross-listed with SPED 4497) (2, 0T+2L)

EDUCATION – BILINGUAL EDUCATION (EDBE)

Prerequisite for these programs is at least 6 credit hours in Spanish as a Heritage Language, or permission from the department.

3305  SPANISH LITERACY FOR BILINGUAL EDUCATION (3) You will study the practical implementation of Spanish literacy skills, including reading, writing, listening, and speaking. This course will be taught in Spanish. Prerequisites: SPAN 1110 and 1120. (3, 3T+0L)
3306  SPANISH FOR THE BILINGUAL CLASSROOM (3)  This course will present the Spanish language as it is applied to school community settings in addition to the classroom setting. It will include both vernacular and formal language. Spanish will be the language of instruction inclusive of student presentations and participation. Prerequisites: SPAN 1110 and 1120. (3, 3T+0L)

4403  FOUNDATIONS OF BILINGUAL/ESL MULTICULTURAL EDUCATION (3)  This course focuses on the historical, legal, philosophical, theoretical paradigms of bilingual/ESL multicultural education. An emphasis on developing a deeper understanding of the culturally diverse student, their families and communities as it relates to learning is explored. Prerequisites: SPAN 1110 and 1120. (Cross-listed with EDTE 4403). (3, 3T+0L)

4406  METHODS AND MATERIALS OF TEACHING BILINGUAL ESL (3)  This course focuses on the understanding of teaching methodologies in the bilingual/ESL classroom. A variety of instructional strategies, techniques, and alternative assessments will be explored with an emphasis on critical reflective practice. Prerequisites: SPAN 1110 and 1120. (Cross-listed with EDTE 4406) (3, 3T+0L)

4412  FORMAL/INFORMAL ASSESSMENT (3)  This course will focus on the formal and informal assessment measures with an emphasis on English language development as it relates to reading and writing. You will develop a foundation of assessment theories, practices, and strategies with particular attention on how to link assessment to instructional activities. You will gain practical experience in designing, administering and interpreting assessments, with special attention to assessment instruments used in New Mexico. Prerequisites: SPAN 1110 and 1120. (Cross-listed with EDTE 4412). (3, 3T+0L)

4416  SECOND LANGUAGE ACQUISITION (3)  This course explores theories of both first and second language acquisition. It will also examine the relationship between language use and language development in the home, school and community. An emphasis will be placed on developing an understanding of language acquisition and bilingualism in a classroom environment. Prerequisites: SPAN 1110 and 1120. (Cross-listed with EDTE 4416) (3, 3T+0L)

4481  LINGUISTICS & PHONETICS FOR THE BILINGUAL TEACHER (3)  This course will apply linguistics and phonetics to the knowledge and use of Spanish in order to provide future teachers the ability to help students develop their language. It will cover the Spanish sound system, and include phonology, morphology, syntax, and dialectology of the Spanish language. Prerequisites: SPAN 101 and 102. (3, 3T+0L)

4482  SPANISH LANGUAGE & FOLKLORE OF NEW MEXICO FOR THE BILINGUAL TEACHER (3)  This course will cover aspects of New Mexican language and folklore: linguistic structure, regional and social variation, bilingualism, maintenance and shift, English influence, etc. It will also cover folkways of the Spanish-speaking people of New Mexico. Prerequisites: SPAN 1110 and 1120. (3, 3T+L)

EDUCATION – TEACHING ENGLISH AS A SECOND LANGUAGE/TESOL (EDTE)

Prerequisite for these programs is at least 6 credit hours in a language other than English, or permission from the department.

4403  FOUNDATIONS OF BILINGUAL/ESL MULTICULTURAL EDUCATION (3)  This course focuses on the historical, legal, philosophical, theoretical paradigms of bilingual/ESL multicultural education. An emphasis on developing a deeper understanding of the culturally diverse student, their families and communities as it relates to learning is explored. (Cross-listed with EDBE 4403). (3, 3T+0L)
4406 METHODS AND MATERIALS OF TEACHING BILINGUAL ESL (3) This course focuses on the understanding of teaching methodologies in the bilingual/ESL classroom. A variety of instructional strategies, techniques, and alternative assessments will be explored with an emphasis on critical reflective practice. (Cross-listed with EDBE 4406) (3, 3T+0L)

4408 APPROACHES TO TEACHING ENGLISH LITERACY SKILLS (3) This course focuses on effective writing instruction in the bilingual and TESOL classroom. The relationship between listening, speaking, reading and writing are explored to enhance the identification and development of effective instruction strategies and appropriate curriculum. Contextual factors that impact writing instruction across the content areas, such as the home environment, school environment, culture cognition, and assessment are examined. (3, 3T+0L)

4412 FORMAL/INFORMAL ASSESSMENT (3) This course will focus on the formal and informal assessment measures with an emphasis on English language development as it relates to reading and writing. You will develop a foundation of assessment theories, practices, and strategies with particular attention on how to link assessment to instructional activities. You will gain practical experience in designing, administering and interpreting assessments, with special attention to assessment instruments used in New Mexico. (Cross-listed with EDBE 4412). (3, 3T+0L)

4414 INTRODUCTION TO LINGUISTICS (3) You will be exposed to a broad overview of the field of linguistics as it pertains to the knowledge of language and language development. There is an emphasis on the study of phonetics, phonology, morphology, syntax, semantics and pragmatics. This course is oriented primarily to the needs of present and prospective teachers. (3, 3T+0L)

4416 SECOND LANGUAGE ACQUISITION (3) This course explores theories of both first and second language acquisition. It will also examine the relationship between language use and language development in the home, school and community. An emphasis will be placed on developing an understanding of language acquisition and bilingualism in a classroom environment. (Cross-listed with EDBE 4416) (3, 3T+0L)

4401 FOUNDATIONS OF EDUCATION (3) This course addresses competencies for entry-level teachers from a theoretical and historical perspective of models and theories that provide the basis of special education practice. It also addresses current and historical state and national rules and regulations relating to special education. The course provides the basis for procedural safeguards relating to educational services and state and federal mandates for students with disabilities. Based on principles of brain-based learning, as well as diversity and multiculturalism, the course provides defensible choices in your apprenticeship and professional practice. You will participate in seminars and observe 10 hours of classroom instruction in the field. Co-requisite: SPED 4455. (3, 3T+0L)

4455 THE SPECIAL EDUCATION PROGRAM: IEP’s AND ASSESSMENTS (4) This course addresses the planning and implementation of effective program for exceptionalities, least restrictive environments, classroom management, human growth and development, and transition. Major components include assessment and evaluation, diagnostics, placement and the Individual Education Plan (IEP). Co-requisite: SPED 4401. (4, 4T+0L)

4465 READING FOR SPECIAL LEARNERS (3) you with learning experiences in the diagnosis and analysis of reading difficulties and how to adapt materials for various disabilities of the exceptional learner. You will focus on experiences in developing and implementing appropriate instructional strategies in teaching reading across the curriculum.
Selection and adaptability of instructional materials are highlighted with the use of technological products for specific populations. You will participate in seminars and observe 10 hours of classroom instruction in the field. Prerequisite: COE permission. (3, 3T+0L)

**4475 CURRICULUM METHODS AND MATERIALS FOR SPECIAL EDUCATION (3)** You will focus on teacher knowledge and application skills in teaching curricula aligned with state content standards and benchmarks. You will explore areas of individualized modifications and/or accommodations when the general education curriculum is not appropriate. You will address instructional strategies in meeting the needs of the special learner with transition as a major component, with emphasis on the application of technology to support teaching and learning. You will address and integrate the Individual Education Plan (IEP) throughout the learning process. You will participate in seminars and observe 10 hours of classroom instruction in the field. Prerequisite: COE permission. (3, 3T+0L)

**4485 TEACHING READING IN SPECIAL EDUCATION (3)** Provides you with a conceptual framework for teachers in the development of competencies in the diagnosis and teaching of reading for the exceptional learner. This course will also provide experiences to understand and incorporate evidence-based research into the teaching of reading. You will acquire an understanding of reading assessments, including informal reading inventories, running records, miscue analysis and standardized reading assessments. You will also address skills in adaptive instructional strategies with an integrative approach across the curriculum. You will also participate in seminars and observe 10 hours of classroom instruction in the field. Prerequisite: COE permission. (3, 3T+0L)

**4497L SUPERVISED FIELD EXPERIENCE LAB (3)** Provides you with hours of supervised field experience in an educational setting under the supervision of a certified Special Education teacher and resource specialists. Your experiences will encompass the special education program addressing Special Education level competencies in parent/professional communication skills, planning and implementing effective programs, least restrictive environment, individual educational planning, assessment and evaluation, curriculum development and implementation, technology, classroom management, and accommodating strategies to meet the diversity of the exceptional learner. Requires 100 (75 clock hours +25 Assessment and Accountability Framework hours). Interaction with students on a one-to-one basis and in small group settings is provided. Prerequisite: passing NES, Essential Academic Skills (I, II, III). Co-requisites: Passing remaining NES Assessments required by the New Mexico Public Education Department (Competency, Content Knowledge and Reading if Elem) Co-requisite: EDUC 4480. (3, 0T+3L)

**ELECTRICAL TECHNOLOGY (ELEC)**

**1110 INTRO TO SOLAR ELECTRICITY** You will study the basics of electrical wiring technology found in photovoltaic systems, including direct current (DC) and alternating current (AC) circuits. You will review basic electrical theory and the current National Electrical Code (NEC) requirements. You will be introduced to the components found in grid-tied systems and stand-alone systems and given the opportunity to compare these systems. (1, 1T+0L)

**1110L INTRO TO SOLAR ELECTRICITY LAB** In this course, you will have laboratory experiences which apply to the theoretical material covered in ELEC 110. You will work with AC and DC components, methods, tools, and materials needed to connect photovoltaic systems from collector module wiring to panels to batteries to inverters to grid-tie equipment. Safety in the electrical environment is stressed. (2, 0T+2L)

**1140 ELECTRICAL THEORY I** Basic electrical theory, OHMs Law, series and parallel circuits, electrical symbols, AC and DC circuits. (3, 3T+0L)
1141 ELECTRICAL CODE I National Electrical Code (NEC) requirements for single and multi-family dwellings, use of NEC tables and calculations. (3, 3T+0L)

1142L RESIDENTIAL WIRING LAB Practical applications and operations in wiring techniques and codes for residential projects; tool safety, hardware use and identification. (6, 0T+6L)

1150 ELECTRICAL THEORY II Basic principles of electromagnetic induction as applied to electric motors, transformers, and solenoid coils. (3, 3T+0L)

1151 ELECTRICAL CODE II Code interpretation for commercial, industrial, and hazardous locations; load calculations, over-current protection and grounding. (3, 3T+0L)

1152L COMMERCIAL WIRING LAB Practical applications and operations using field work: wiring techniques and codes for assigned commercial and industrial projects. (6, 0T+6S)

1160 MOTOR CONTROLS Theory in across-the-line starters, solid-state control, programmable control, pilot devices, line and wiring diagrams, troubleshooting, repair techniques. Co-requisite: ELEC 160L. (3, 3T+0L)

1160L MOTOR CONTROLS LAB Co-requisite: ELEC 160. (3, 0T+3L)

1190 SOLAR AND WIND SYSTEMS IN THE ELECTRICAL CODE Starting with a review of DC electrical circuits, you will cover Sections 690 and 695 of the National Electrical Code, which deals with photovoltaic and wind-generated electrical systems. You will discuss conductor sizes, circuits, outlets, disconnects and over-current protection between the energy source and the service entrance. Recommended Co-requisites: RE 207 or 208. (2, 1T+1S)

ELECTRICAL, ELECTRONIC, AND COMPUTER ENGINEERING (EECE)

1105L MICROCOMPUTER SYSTEMS In this introductory course on microcomputers, you will study the characteristics and nature of modern-day computer systems, including hardware and software components. Among the principal software components, the course describes the role of operating systems, and then focuses on Linux. The course provides the background knowledge and skills in Linux you will require for any type of engineering, technology or computer science related career. The course also includes an introduction to scripting languages and their benefits to automate operating systems tasks. (Fall, Spring) (3, 2T+1L)

1132 COMPUTER NETWORKS I Students will learn both practical and conceptual skills that build the foundation of networking. They will examine the OSI and TCP/IP layers in detail to understand their functions and services. Students will become familiar with the various network devices, network addressing schemes, and types of media used to carry data across the network. They will gain experience designing and deploying inter-networks of WAN and LANS using static routing. (3, 3T+0L)

1152L COMPUTER PROGRAMMING This is an introductory programming class. No programming experience is assumed for students taking this course. Topics include problem solving, program design, implementation, testing and basic object-oriented concepts including classes, object, and encapsulation. (Fall and Spring) (3, 2T+1L)

2230 INTRODUCTION TO ROUTING AND SWITCHING This course describes the architecture, components, and operations of routers and switches. Students learn how to design Local Area Networks (LANs), Wide Area Networks (WANs), and inter-networks using modern intermediate devices, including Layer 2 and multi-layer switches and routers. Be the end of this course, students will be able to design and deploy networks and resolve common issues with RIPv1, RIPv2, single-area and multi-area OSPF, virtual LANs, and
inter-VLAN routing in both IPv4 and IPv6 networks. **Prerequisite:** EECE 1132. (3, 3T+0L)

**2231L INTERMEDIATE PROGRAMMING** This class teaches how to write medium complex computer programs that make use of structured decomposition, basic data structures, strings, recursion, files and dynamic memory. Knowledge of basic programming concepts is assumed. **Prerequisite:** EECE 1152L (3, 2T+1L)

**2238L COMPUTER LOGIC DESIGN** You will study binary number systems, Boolean logic; combinatorial, sequential, and register transfer logic; VHDL; arithmetic/logic unit; memories, computer organization, input-output, and microprocessors. **Prerequisites:** ENGR 1121L or MATH 1220 and EECE 1152L. (Cross-listed with CS 238L] (Spring) (4, 3T+1L)

**3329 HUMAN COMPUTER INTERACTION** This course covers the development of IT products considering the human-computer interaction, including human factors, performance analysis, usability studies, environment, and training. The course also covers the development of effective interfaces and accessibility. **Prerequisite:** EECE 2231L. (3, 3T+0L)

**3330 COMPUTER NETWORKS II** This course focuses on learning network design and operation from a layer 3 perspective, including both intra-domain static routing and dynamic routing protocols. Students will describe how routers discover remote networks and determine the best path to them. They will design addressing schemes and deploy WANs, LANs and inter-networks using static routing as well as RIPv1, RIPv2, EIGRP, and OSPF protocols. Based on these protocols, students will identify the characteristics of distance vector and link state routing protocols. They will learn fundamental tools for routing scalability, and will design hierarchical routing schemes with OSPF. Students will describe the concept of traffic engineering and apply multi-path schemes. **Prerequisite:** EECE 2230. (3, 2T+1L)

**3331 DATA STRUCTURES AND ALGORITHMS** You will be introduced to data structures and algorithms used in software programs; mathematics needed to analyze their time and space complexity. Topics include asymptotic notation, recurrence algorithms and their sorting, hash tables, basic priority queues, search trees, and basic graph representation and search. **Prerequisites:** EECE 2231 and EECE 3337. (3, 3T+0L)

**3342 WIRELESS AND MOBILE COMPUTING** This course focuses on principles and applications of wireless networks and Local Area Networks (LANs) including switches, Virtual LANs (VLANs) and extended switched networks. The course also provides an overview of mobile devices and an introduction to network security including message integrity, authentication and operational security in switched and wireless networks. **Prerequisite:** EECE 1132 (3, 2T+1L)

**3351 ADVANCED PROGRAMMING** This is an advanced programming class that exposes the student to computer science and software engineering concepts such as Object-oriented Design, data structures, graphical user interfaces and thread. The students will use an object-oriented language to learn about these concepts. **Prerequisite:** EECE 2231. (Spring) 3, 2T+1L)

**3355 WEB ENGINEERING** This course covers the design, implementation and testing of web-based applications including related software, database, interfaces and digital media. It also covers social, ethical and security issues arising from the web and social software. **Prerequisites:** IT 2250 and EECE 2231L. (3, 2T+1L)

**3380 INTRODUCTION TO CYBERSECURITY** This course provides an introduction to the fundamentals of cybersecurity, including confidentiality, integrity, authentication, non-repudiation, and availability. Modern malware threats, including viruses, Trojans, worms, and botnets and a general understanding of how to protect networks and systems using state-of-the-art security appliances, including next-generation firewalls, threat prevention,
logging and reporting functions, VPNs, and others are covered. **Prerequisites:** EECE 2230. (3,3T+0L)

**4435 SOFTWARE ENGINEERING** As junior- and senior-level science and engineering students, you will study modeling the process and life cycle, planning and managing the software project, designing, delivering, and maintaining the software systems. **Prerequisite:** EECE 2231 and IT 2250. (Fall) (3, 3T+0L)

**4440 ADVANCED COMPUTER NETWORKS** Students will research, design, and implement a variety of WANs considering different technologies and protocols such as Frame Relay and PPP. Students will also implement multimedia applications over WANs, and develop knowledge and expertise in network security and management. **Prerequisites:** EECE 3330. (Fall, Spring, Summer) (3,2T+1L)

**4447 ROUTING AND SWITCHING** You will learn how to connect computers in a network and how to connect the separate networks together to form an inter-network, through examination and implementation of bridging, switching concepts, and routing protocols and algorithms. **Prerequisite:** EECE 3330. (3, 2T+1L)

**4472 PHOTOVOLTAIC DEVICES** Student will study Photovoltaic effect in semiconductors; electrical and mechanical design of photovoltaic cells, panels, and systems; use of lenses and mirrors in PV systems; manufacturing methods of PV devices. **Prerequisite:** EET 2200/L. (3, 3T+0L)

**4451 ADVANCED PROGRAMMING APPLICATIONS** This course aims to expose the students to concepts of advanced programming and industry level programming applications. It focuses on Graphical User Interface (GUI), multithreading, networking, and database manipulation. Current industry standard programming language is used. At the completion of this course, the students are expected to write sophisticated industry level applications using standard language such as JAVA. **Prerequisite:** EECE 3351L. (1, 0T+1L)

**5547 ROUTING AND SWITCHING** Computer networking principles and operational structures of bridges, routers, routers. Packet switching techniques, routing protocols and packet processing algorithms. EECE 547 has higher standards and different deliverables than EECE 4447. (3, 2T+1L)

**ELECTRICAL ENGINEERING TECHNOLOGY (EET)**

**2200 ELECTRICAL SYSTEMS I** Study basic DC electrical elements and sources; resistor networks, network theorems, capacitance, inductance, RC and RL circuits. **Prerequisite:** ENGR 2217L. **Co-requisite:** 200L (1.5, 1.5T+0L)

**2200L ELECTRICAL SYSTEMS I LAB** Students will perform hands-on experiments related to DC circuits and digital circuits. This will include voltage, current, resistance measurement. First order and second order circuits will be analyzed as well as Thevenin’s equivalence. **Prerequisite:** ENGR 2217L. **Co-requisite:** EET 2200. (0.5, 0T+0.5L)

**2201 DIGITAL SYSTEMS** Students will be introduced to digital circuits and will learn Boolean logic, logic gates, combinatorial and sequential circuits. **Prerequisite:** ENGR 1121/L. **Co-requisite** EET 2201L. (1.5,1.5T+0L)

**2201L DIGITAL SYSTEMS LAB** Students will learn to implement and analyze digital circuits using VDHL to develop combinatorial and sequential circuits. **Prerequisite:** ENGR 1121/L. **Co-requisite** EET 2201. (0.5, 0T+0.5L)

**3300 ELECTRICAL SYSTEMS II** Study basic AC electrical elements; sinusoidal sources and complex representations; impedance, phasor, analysis, complex power, three-phase circuits, and transformers. Students also will be introduced to electronic devices: diode,
transistor, thyristors, rectifiers, OPAMPs and its applications. Prerequisites: EET 2200/L. Co-requisite: EET 3300L. (3, 3T+0L)

**300L  ELECTRICAL SYSTEMS II LAB** Students will perform hands-on experiments related to AC circuits and electronic circuits. This will include sine wave and power factor measurement. Implementation of three-phase circuits and transformers. The labs will also expose the student to electronics including rectifiers, amplifiers, and applications of thyristors, TRIACA and OPAMPS. Prerequisites: EET 2200/L, Co-requisite: EET 3300. (1 0T+1L)

**4400  CONTROL SYSTEMS AND INSTRUMENTATION** The course covers control systems terminology, analog and digital feedback control system, PID and relay controls, data-acquisition system, stability, actuators and sensors. Prerequisites: EET 3300/L. Co-requisite: EET 4400L. (3, 3T+0L)

**4400L  CONTROL SYSTEMS AND INSTRUMENTATION LAB** The course covers experiments, design and implementation of control systems. Control systems will be developed in discrete time using digital PID and also for discrete events using PLCs. Prerequisites: EET 3300/L Co-requisite: EET 4400. (1, 0T+1L)

**ELECTROMECHANICAL ENGINEERING TECHNOLOGY (EMET)**

**4400  ADVANCED ELECTRO-MECHANICAL DESIGN** This course is integration of mechanical disciplines, controls, electronics and computers in the design of high-performance machines, devices or processes. Hands-on lab exercises and design projects will provide extensive coverage of mechanical components and assembly, sensors and actuators, electrical drive. Prerequisites: EET2200/L, DRFT 1100 and MET 3302. (3, 3T+0L)

**4402  ROBOTICS** An introduction to the kinematics, dynamics and control of robot manipulators. This course will cover basics of a robot, forward and inverse kinematics, the manipulator Jacobian, force relations, dynamics and control-position and force control. Trajectory generation, actuators, sensors, and applications of robotics. Prerequisites: EET 4400/L (3, 2T+1L)

**4454  SOLAR THERMAL AND ELECTRIC ENERGY STORAGE** The focus of this course is on learning the fundamentals of energy storage using either solar thermal or electric energy. Students will study thermal processes of solar energy conversion in solar engineering through topics such as solar radiation, solar harnessing equipment and system, solar materials and properties, solar applications, and solar system design. Students will also study electrochemical, electrostatic, and electromechanical processes for storage of electrical energy; design of storage systems; storage efficiency measures. Prerequisite: ENGR 2217/L (4, 4T+0L)

**4490  CAPSTONE (WIC)** In this project course, students will exercise their knowledge of Electromechanical Engineering Technology, design and associated course work. EMET 4490 is a Writing, Intensive Course (WIC). (3, 1T+2L). Passing grade is C..

**ENGINEERING (ENGR)**

**1101  AN INTRODUCTION TO COMPUTATIONAL SCIENCE AND MODELING** This course will use the NetLogo Environment to explore the nature and methods of computational thinking prior to composing and studying computational models of interacting agents in problems drawn from the physical and social sciences. Prerequisites: none. Co-requisites: ENGR 1101L. (3, 3T+0L)

**1101L  AN INTRODUCTION TO COMPUTATIONAL SCIENCE AND MODELING LAB** This course will use the NetLogo Environment to explore the nature and methods of com-
computational thinking prior to composing and studying computational models of interacting agents in problems drawn from the physical and social sciences. Netlogo Environment will be used to study computational models (interacting with codes) for problems representing real world scenarios. *Prerequisites:* none. *Co-requisites:* ENGR 1101. (1,0T+1L)

**1110L INTRODUCTION TO ENGINEERING** This course is intended to provide an introduction to the engineering discipline. The course also provides a learning community experience for the mechanical engineering and information technology engineering students. Topics discussed include: departmental policies, code of ethics in engineering, history of engineering, introduction to writing technical reports, time management, introduction to concepts and techniques in computer programming. Students are exposed to intensive hands-on experiences that are assessed through a final project. Fall & Spring (2, 1T+1S)

**1121L INTRODUCTION TO MATH FOR ENGINEERING APPLICATIONS I** Students will learn basic concepts of straight lines in engineering, Trigonometry, Quadratic Equation, Systems of Linear Equations and Exponents. The students learn the fundamental and minimum of these topics in order to understand basic engineering applications. *Prerequisite:* MATH 1220 (2, 1.5T+0.5L)

**1122L INTRODUCTION TO MATH FOR ENGINEERING APPLICATIONS II** Students learn basic concepts of analytical geometry, sinusoids, complex numbers, derivatives, integrals, and differential equations. Students learn the fundamental and minimum of these topics in order to understand basic engineering applications. *Prerequisite:* ENGR 1121L. (2, 1.5T+0.5L)

**2215 PHYSICS FOR ENGINEERS I** Students will learn basic concepts of mechanics and will be introduced to the scalars and vectors, kinematics in one/two dimensions, Newton’s laws of motion, forces and moments. Students will perform free-body-diagram analysis for statical equilibrium problems. Finally, the concepts of work, energy, power and energy conservation principle will be introduced. *Prerequisite:* ENGR 1121L (2, 2T+0L)

**2216L PHYSICS FOR ENGINEERS II** Students will learn basic concepts of thermodynamics, dynamics, vibrations and fluid mechanics. Ideal gas laws, work, heat and 1st law of thermodynamics will be introduced. Students will be introduced to dynamics problems in one/two dimensions, linear impulse and momentum. Rotational motion of rigid bodies and simple harmonic motion. Finally, students will learn fundamental concepts of fluid mechanics. *Prerequisite:* ENGR 1122L (3, 2T+1L)

**2217L PHYSICS FOR ENGINEERS III** Students will learn basic concepts of electricity and magnetism with a focus on devices: resistors, capacitors, inductors, motors, generators and transformers. Python will be used to simulate and visualize device properties and students will build and analyze small circuits composed of these devices. *Prerequisite:* ENGR 1122L (3, 2T+1L)

**4472 ENGINEERING ENTREPRENEURSHIP** You will study the principles of engineering/technology entrepreneurship, marketing, people management, and team building for technology-based start-ups, focusing on best practices in the formation of a company which is focused on product and service innovations. As a member of a team, you will train in business plan assembly, presentation, and defense. *Prerequisite:* ENG 1110, with Senior standing recommended. (Spring) (3, 3T+0L)

**4475 DEVELOPING ENGINEERING PRODUCTS** You will study the art and science of managing engineering product development from the requirements phase to the testing phase and customer delivery and support while reviewing rapid time to market principles, along with product platform design processes. *Prerequisite:* ENG 1110, with Senior standing recommended. (Fall) (3, 3T+0L)
4478  ENGINEERING ETHICS  You will review the impact of engineering decisions in product design, testing and marketing in light of cases which depict appropriate and inappropriate ethical behavior in engineering organizations. You will also review cultural, ethnic, and historical factors in the formation of ethical systems. **Prerequisite:** ENG 1110, with Senior standing recommended. (Spring) (3, 3T+0L)

4480  ENGINEERING MANAGEMENT AND PROJECT MANAGEMENT  Student will learn Engineering management and business principles for first-time engineering, science or technology managers. Topics covered include time and budget management, employee and organization management, team building and rewards, and project strategy. Students will also be exposed to an introduction to the methods underlying modern project management in the development of engineering software, hardware or systems products. Specific topics include team formation, status reporting, project management tools and management of cross-disciplinary teams. **Prerequisite:** Junior standing or permission of Engineering academic adviser. (4, 4T+0L)

5578  ENGINEERING ETHICS  You will review the impact of engineering decisions in product design, testing and marketing in light of cases which depict appropriate and inappropriate ethical behavior in engineering organizations. You will also review cultural, ethnic, and historical factors in the formation of ethical systems. (Spring) (3, 3T+0L)

**ENGLISH (ENGL)**

106N  BASIC READING AND WRITING  Studies grammar, simple sentence structure, and reading improvement skills; develops abilities in critical thinking. **Prerequisite:** adequate score on Course Placement Evaluation; **Co-requisites:** Personal Development courses per direction of advisor. (4, 4T+0L)

108N  BASIC COMPOSITION I  This course focuses on basic writing skills necessary to create focused, well-organized and supported essays. Students will engage in the writing process to draft, revise, proofread and edit their essays so that their writing is coherent and clear. Students will practice the skills of critical reading and develop skills of critical thinking. They will also study the conventions of grammar, punctuation, and usage. **Prerequisites:** adequate score on Course Placement Evaluation. **Co-requisites:** RDG 108 N Reading Improvement and FYEX 1110 First Year Seminar. (4, 4T+0L)

109N  ACCELERATED BASIC COMPOSITION II  This course prepares students for college-level composition by engaging them in the writing process and focusing on the rhetorical skills necessary to write focused, clearly organized, well-supported, and grammatically correct essays. Students will critically read texts and incorporate ideas from sources to develop and support an arguable thesis. This will be accomplished by practicing the research skills of summarizing, paraphrasing, and quoting, using MLA format. This accelerated course has a **Co-requisite** of English 111 and is designed to support student's successful completion of the objectives of English 111. **Prerequisite:** English 108N, or adequate score on Course Placement Evaluation. **Co-requisites:** ENGL 1110 and FYEX 1110 (3, 3T+0L)

109NL  BASIC COMPOSITION II  This course prepares students for college-level composition by engaging them in the writing process and focusing on the rhetorical skills necessary to write focused, clearly organized, well-supported, and grammatically correct essays. Students will critically read texts and incorporate ideas from sources to develop and support an arguable thesis. This will be accomplished by practicing the research skills of summarizing, paraphrasing, and quoting, using MLA format. **Prerequisite:** English 108N, or adequate score on Course Placement Evaluation. **Co-requisites:** FYEX 1110 (4, 4T+0L)
110N  PUNCTUATION AND GRAMMAR REVIEW  This course focuses on the basic rules of punctuation, mechanics, and grammar to support students in their efforts to write clearly and correctly. Students will work towards becoming proficient at finding and correcting their own errors. (1, 1T+0L)

1110  COMPOSITION I  In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers, and practice techniques for writing, revising, and editing. Prerequisite: ENG 109N, or adequate score on Course Placement Evaluation. (3, 3T+0L) Meets New Mexico Lower Division General Education Core Curriculum Area I Communications

1120  COMPOSITION II  In this course, students will explore argument in multiple genres. Research and writing practices emphasize summary, analysis, evaluation, and integration of secondary sources. Students will analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading, writing, and research. Students will sharpen their understanding of how writing and other modes of communication work together for rhetorical purposes. The emphasis of this course will be on research methods. Prerequisite: ENGL 1110. (3, 3T+0L) Meets New Mexico Lower Division General Education Core Curriculum Area 1 Communications

1210  TECHNICAL COMMUNICATIONS  This is an introductory study of written and verbal communications used in the technical professions with emphasis in the planning, execution, and editing of professional and technical documents and other communication media. Prerequisite: ENGL 1110. (3, 3T+0L)

1220  INTRODUCTION TO MASS COMMUNICATIONS  Course covers the functions and organization of the mass media system in the United States; analyzes the cultural, social, and political impact of mass media on US society. Prerequisite: ENGL 1110. (3, 3T+0L)

1410  INTRODUCTION TO LITERATURE  In this course, students will examine a variety of literary genres, including fiction, poetry, and drama. Students will identify common literary elements in each genre, understanding how specific elements influence meaning. Prerequisite: ENGL 1110. (3, 3T+0L)

2310  INTRODUCTION TO CREATIVE WRITING  This course will introduce students to the basic elements of creative writing, including short fiction, poetry, and creative nonfiction. Students will read and study published works as models, but the focus of this "workshop" course is on students revising and reflecting on their own writing. Throughout this course, students will be expected to read poetry, fiction, and non-fiction closely, and analyze the craft features employed. They will be expected to write frequently in each of these genres. May be taken 2 times for credit. (3, 3T+0L)

2420  CHILDREN’S LITERATURE  Children’s Literature is an introductory literature course that will provide an opportunity to explore the children’s texts from analytical, pedagogical, and creative perspectives. We will explore literature for children through a lens of critical language arts pedagogy. We will discuss texts and think about ways that we can cultivate book joy for children and young adults, as well as how we can cultivate
ENGLISH

it for ourselves! Through a concentration on prose and poetry for young adult readers, we will consider various methods for interpreting literature for children with a focus on cultures, languages, and genres in children’s literature. Diversity and representation will be the cornerstone of our literary considerations, and through a diverse book list we will consider the importance of positive representations of identity in children’s literature as well the importance of providing children access to books. This course will have a SERVICE LEARNING component, meaning that we will work to develop a project that celebrates and supports literacy efforts in our community. Get ready to roll up your sleeves and get ready to read! Prerequisite: ENGL 1110. (3, 3T+0L)

2520 FILM AS LITERATURE The purpose of this course is to teach students how to analyze film as a visual text. Students will learn to analyze films, film techniques, eras, and genres. Students will also identify significant trends and developments in film-making, examining the ways in which film reflects and creates cultural trends and values. Prerequisite: ENGL 1110. (3, 3T+0L)

2550 INTRODUCTION TO SOUTHWEST LITERATURE New Mexico and the greater Southwest has long been a contested region. Through novels, poetry, and drama, the course focuses on the social, historical, and political issues that create complex portrayals of the beauty, borders, and violence that give the Southwest such a unique history. By the end of the course, students will have a broader appreciation for the many voices that make up literature from the American Southwest. Prerequisite: ENGL 1120. (3, 3T+0L)

2560 INTRODUCTION TO NATIVE AMERICAN LITERATURE This course will introduce students to the literature produced by Native American authors as well as explore issues relevant to the study of Native American literature. The course will also introduce the basic elements of literary analysis. Prerequisite: ENGL 1110. Cross-listed as PINS 2265. (3, 3T+0L)

2566 NATIVE AMERICAN LITERATURE II Indigenous peoples are the descendants of the original habitants of a region prior to colonization. Indigenous peoples have survived and maintained tribal languages, cultures and community structures in the face of violent coloniza- tion. They are societies distinct from the settler societies that currently govern their territories. Because of historical and on-going struggles to coexist with settler societies, indigenous peoples continue to work for sovereignty and self-determination in their homelands. As part of the effort to persist, indigenous people “transform” colonial languages through multiple and new genres of literature. In this course, we will read multiple texts and watch films that “take back [the] power over [indigenous peoples] that is constantly imposed on us from the outside” (bird, “writing as witness). Prerequisite: ENGL 1110. Cross-listed as PINS 2266. (3, 3T+0L)

2650 WORLD LITERATURE I In this course, students will read representative world masterpieces from ancient, medieval, and Renaissance literature. Students will broaden their understanding of literature and their knowledge of other cultures through exploration of how literature represents individuals, ideas and customs of world cultures. The course focuses strongly on examining the ways literature and culture intersect and define each other. Prerequisite: ENGL 1110. (3, 3T+0L)

2660 WORLD LITERATURE II In this course, students will read representative world masterpieces from the 1600L to the present. Students will broaden their understanding of literature and their knowledge of other cultures through exploration of how literature represents individuals, ideas and customs of world cultures. The course focuses strongly on examining the ways literature and culture intersect and define each other. Prerequisite: ENGL 1110. (3, 3T+0L)
ENGLISH

2680  WOMEN'S LITERATURE  Surveys women writers from the English-speaking tradition. Includes various genres that represent the diversity of women’s experiences.  Prerequisite: ENGL 1110. (3, 3T+0L)

2720  MYTHOLOGY  This course is an introduction to the nature and function of mythology. In this class we will study and compare mythologies of different cultures, keeping an eye on the ways in which myths expresses the inexpressible. If one aspect of myth is that it tends to speak in the indigenous layer of the psyche (what Freud called “primary thinking”), then the fascination with myth can be understood, at least partly, as a fascination with the archaic (or archetypal) aspect of life. From that perspective, the study of myth is partly the study of inner life, the life of the imagination, which is why myth has been central to so many other disciplines.  Prerequisite: ENGL 1110. (3, 3T+0L)

3318  ORAL TRADITIONS: FOLK STORIES  In order to develop an understanding of how oral traditions and folk stories shape the way people understand and interpret their experiences, you will explore folk stories from various cultures, with a special emphasis on Native American, Hispanic, and African American cultures. You will experience storytelling through guest speakers, class presentations, and films. Through class discussion and writing, you will develop critical responses and analysis of folktales, focusing on cultural patterns and perceptions. To help you better understand the role of folk stories in our community, you will participate in a service learning project that supports the preservation and celebration of folk stories and the oral tradition.  Prerequisite: ENGL 1120. Cross-listed as HUM 318. (3, 3T+0L)

3390  TOPICS IN COMPARATIVE LITERATURE: FORMS, GENRES, HISTORY  This course offers an introduction to literary and critical study from a comparatist perspective. It focuses on a relatively small number of texts and examines topics such as: how literary forms and genres shape our reading of texts; how their conventions manifest themselves; how these conventions vary within different cultural traditions; how the functions and effects of literary texts change over time, and from place to place; and how such texts (orals, written, visual; canonical or “popular”) provide occasions for revealing and refining their readers’ values and for sharpening their critical thinking. Students will examine the ways in which authors’ words and ideas — presented in common shared texts — construct for their readers differing, even contradictory, meanings and carry varied significance for individual readers.  Prerequisite: ENGL 1120 (3, 3T, 0L)

4456  SHAKESPEAREAN PLAYS  You will study a selection of Shakespearean dramatic forms as presented in histories, tragedies, and comedies. Through discussion and writing, you will engage in careful analysis of the text and interpretation of the characters, conflicts, and themes. Through this work, students will develop an appreciation for and understanding of Shakespeare’s plays: their literary value, their historical context, and their insight into the human condition. Additionally, you will analyze a film production of at least one play to examine the relationship between the text and the theatrical interpretation. You will develop and refine your own insights into Shakespearean drama through synthesizing literary criticism and theories of human behavior from other traditions and disciplines.  Prerequisite: ENGL 1120. (3, 3T+0L)

4468  ECO-CRITICISM  You will explore the interpretive possibilities of eco-criticism as it applies to the understanding and writing of literature. You will address the question of how literary texts represent and explore the relations between nature and culture and the human and non-human, and how they may help us understand environmental crisis and the multifaceted threat posed today by the domination of homo sapiens over the earth.  Prerequisite: ENGL 1120. (3, 3T+0L)
ENTREPRENEURSHIP (ENTR)

2110 SMALL BUSINESS MANAGEMENT This course is designed to acquaint the student with the opportunities encountered in the management and operations of a small business enterprise. Prerequisite: ENGL 1110. (Fall) (3, 3T+0L)

3350 ENTREPRENEURSHIP Methods of small business management and business formation, with an emphasis on the traditional business functions in a small setting. (3, 3T+0L)

ENVIRONMENTAL SCIENCE (ENVS)

1110 INTRODUCTION TO ENVIRONMENTAL SCIENCE I Introduction to environmental science as related to the protection, remediation, and sustainability of land, air, water, and food resources. Emphasis on the use of the scientific method and critical thinking skills in understanding environmental issues. Co-requisite: ES 1110L. (3, 3T+0L)

1110L INTRODUCTION TO ENVIRONMENTAL SCIENCE I LAB Covers general principles and theory relating to environmental science and management. Focal areas for the course include: water management, climate, pollution and waste management. Students taking this course will come away with a basic understanding of the main issues faced by technicians and managers of environmental science departments. Co-requisite: ENVS 1110. (1, 0T+1L)

2130 CRITICAL THINKING IN SCIENCE #Critical Thinking in Science will improve and/or develop student's proficiencies in thinking and problem solving ultimately resulting in improved decision-making abilities. This course will examine the process through which thought and problem-solving take place and to expand upon the critical thinking skills that will lead to optimizing the student’s ability to succeed in all fields of science. Many problems students will face as science professionals do not have obvious answers; therefore, the goal this course is to enable students to rely upon skills taught to address the problem aided by a proven method leading to greater creativity in problem solving, decision making and science leadership. (3, 3T+0L)

2201 ENVIRONMENTAL PHYSICAL AND CHEMICAL PROCESSES You will study basic general, analytical, organic, and polymer chemistry from an environmental perspective: the pollutants of air, water, and land; the rudiments of toxicology, and an introduction to green chemistry. You will learn about chemical processes in industry and nature, physical transport, risk, and aspects of human impacts and policy. Prerequisites: BIOL 2110/L and CHEM 1215/L; Co-requisite: ENVS 2201L. (3, 3T+0L)

2201L ENVIRONMENTAL PHYSICAL AND CHEMICAL PROCESSES LAB You will study the basic techniques for chemical analysis of environmental samples including air, water, and soil. You will also learn to use electronic data acquisition systems and further develop your scientific writing skills. Co-requisite: ENVS 2201. (1, 0T+1L)

2140 INTRODUCTION TO GIS/GPS AND CARTOGRAPHY You will evaluate the characteristics, uses, and limitations of computer applications in natural resource management including application programs in statistical analysis, computer modeling, geographic information systems (GIS), global positioning systems (GPS), and database management systems (DBMS). Prerequisite: permission of instructor. (3, 2T+1L)

2160 PRINCIPLES OF AGRICULTURE ECOLOGY You will be introduced to ecology in the analysis of agriculture and sustainable alternatives, with an emphasis on the fundamentals of agriculture: soils, seeds, and water, and the geographical and cultural context of farming systems. You will study topics in traditional agriculture, farm development and design, and sustainable farm practices. Prerequisites: ENVS 1110/L and BIOL 2610/L. (3, 3T+0L)
3307  ATMOSPHERIC SCIENCE  You will study how the climate system works, how climate has changed in the past, and how it is now being changed by human activity. You will develop the skills needed to analyze and critically evaluate public discussions of climate issues and written and oral communication skills in the context of climate and Earth system science. Prerequisites: ES 112/L, BIOL 203, CHEM 121/L. (3, 3T+0L)

3308  INVASIVE SPECIES  You will evaluate the role and scope of introduced species as well as their impact; conduct an overview of the problem and discuss how modes of exotics spread both historically and currently, as well as discussing terminology and political impacts. You will evaluate the common characteristics of successful invasive species, epidemics and epizootics, and describe the role of invasive species and the disruption of the normal ecosystem function by exotics. Prerequisites: ENVS 1110/L and BIOL 2610/L (3, 3T+0L)

3311  PLANT PATHOLOGY  You will study the historical foundation of plant pathology and will evaluate the current and future nature of plant disease and its causal agents (fungi, bacteria, viruses, nematodes, environmental/chemical agents) and of symbionts and their effect on plant health and disease resistance, epidemiological considerations on disease spreading and major outbreaks, and disease control and management techniques. Prerequisites: ENVS 1110/L and BIOL 2610. (3, 3T+0L)

3316  FIRE MANAGEMENT AND RESTORATION  You will study the concepts fire management, which involves predicting fire behavior and effects, as well as making decisions appropriate to natural resource management objectives. You will also study fire management options, which vary greatly, and may include fuels management and education, fire suppression, wildland fire use, and igniting and managing a prescribed fire, and post-fire rehabilitation. Prerequisites: ENVS 1110/L, ENVS 2140, and BIOL 2610/L. (3, 3T+0L)

3317  RANGELAND MANAGEMENT  You will study both the broad concepts of planning and the variety of planning approaches that are frequently used in rangeland planning on public and private land. You will also take an in-depth look at the management of grazing resources, including ecology, economics, burning, brush and weed control, grazing systems, and complementary grazing crops. You will address related topics, such as job satisfaction and leadership, communications, professionalism, ethics, and problem-solving. Prerequisites: ENVS 1110/L, and BIOL 2610/L. (3, 3T+0L)

3318  SILVICULTURE  You will study the physical, biological, social, historical, and economic forces shaping past and present forest structure and composition in the various regions of the United States, and you will learn how silvicultural practices have been adapted to address specific management problems. You will also evaluate silvicultural alternatives for addressing present and anticipated future forest management-related problems and issues. Prerequisites: ENVS 1110/L and BIOL 2610/L. (3, 3T+0L)

3319  PRINCIPLES OF WILDLIFE SCIENCE AND MANAGEMENT  This course will cover ecological principles of the management of various groups of wildlife, the history and development of wildlife management as a science, characteristics of, and factors affecting wildlife populations, techniques and theories of management, and wildlife conservation. Prerequisites: ENVS 1110/L and BIOL 2610/L. (3, 3T+0L)

3320  ENVIRONMENTAL ETHICS  You will study values systems underlying human relations to the natural environment with emphasis on issues that arise when these values conflict, beginning with a discussion of our current environmental crises, different approaches to solving these crises, and issues of environmental justice and how science and knowledge affect decisions. (3, 3T+0L)

3325  PRINCIPLES OF PHYSICAL HYDROLOGY  In this course, you will be exposed to a qualitative introduction to the dynamics of watersheds and groundwater flow from an
intuitive perspective, laying the foundations for understanding the physical mechanisms by which water is transported throughout a hydrologic system. **Prerequisites:** ENVS 1110/L, MATH 1510 (3, 3T+0L)

### 3333 RADIATION BIOLOGY
Survey of radiobiology: effects of differing types of radiation on matter, different radiations and their properties; detailed modes of action of radiation on biochemical and biophysical systems with emphasis on the large macromolecules of living tissue; nature of radiation damage to long-chain nucleic acid molecules; potential problems from indiscriminate use of radiation therapy and diagnostic x-rays, and nuclear facility accidents; effects of low-level radiation exposure. Cross-listed as RDPR 2233. (3, 3T+0L)

### 3336 ENVIRONMENTAL SAMPLING AND INSTRUMENTATION
You will study the fundamental standards of environmental monitoring, such as the application and use of site assessment, monitoring wells, permeability testing, soil vapor extraction and air sparging pilot installations, and employ principles such as obtaining a representative sample; sample containment; design, installation site assessment, monitoring wells, permeability testing, soil vapor extraction and air sparging pilot installations. You will employ principles such as: obtaining a representative sample; sample containment; design, installation, testing and monitoring of wells; design, establish, and collect data from permeability testing, groundwater contour maps, soil vapor extraction, and air sampling systems, and pilot tests. **Prerequisites:** ENVS 1110/L, or CHEM 1225/L, MATH 1350, and BIOL 2610/L. (3, 3T+0L)

### 3336L ENVIRONMENTAL SAMPLING AND INSTRUMENTATION LAB
In a hands-on setting, students will participate in the fundamentals of environmental sampling and instrumentation to include data collection and evaluation. **Prerequisites:** ENVS 1110/L, ENVS 2201 or CHEM 1225/L; **Co-requisite:** ENVS 3336. (1, 0T+1L)

### 3338 ENVIRONMENTAL LAW AND REGULATIONS
You will study the basic laws and regulations for the management of solid and hazardous wastes, as well as those regulations impacting national forests and agriculture. Supplemental courses will follow in the concentration areas. **Prerequisites:** ENVS 1110/L. (3, 3T+0L)

### 3340 PRINCIPLES OF CROP PRODUCTION
You will focus on the ecological principles underlying crop production systems, evaluating cropping systems, tillage methods, planting and harvesting methods, and crop growth patterns. You will examine crop production in the context of management approaches, environmental resources and constraints, and socioeconomic considerations. **Prerequisites:** ENVS 2160. (3, 3T+0L)

### 3365 PRINCIPLES OF SUSTAINABLE AGRICULTURE
You will study food production resources (soils, crops, and climates), with emphasis on the scientific principles of management that conserve or renew those resources for a continuing benefit to society. You will participate in field trips which stress hands-on experience with soils, crops, and descriptive climatology. **Prerequisites:** ENVS 2160 and BIOL 2610/L. (3, 3T+0L)

### 3380-3385 UNDERGRADUATE RESEARCH EXPERIENCE
This is a practical faculty-directed research experience for upper-division Environmental Science majors. During the regular semester you will perform 8-10 hours per week of work alongside your mentor in a project with a time frame agreed to by both, the student intern, and the mentor. Arrangements involve all aspects of environmental research that can include fieldwork, bench laboratory work, library research, or any combination of these activities. The mentor will actively engage you in sharing the responsibility for the research process. Fall & Spring (3, 3T, 0L)

### 4404 FOREST HEALTH, RESTORATION, AND MANAGEMENT
You will study the basic roles of natural disturbance agents, such as diseases, insects, fire, exotic organisms and their interactions in natural forest ecosystems. You will study how restoring and maintaining
the health of forests has become an internationally recognized goal for resource management agencies, public conservation organizations, and society in general. Prerequisites: ENVS 1110/L and ENVS 3318. (3, 3T+0L)

4410 SOIL TESTING AND INTERPRETATION You will become acquainted with soil composition and classification; relationship of soil to plant growth and animal health; use of fertilizers, erosion and control. You will study the four general components of soil testing: a) soil sampling and handling, b) analytical methodology involved in nutrient extraction from the soil by various tests, c) interpretation of the analytical results, and d) recommendations for the correction of soil nutritional problems, including acidity, deficiencies, imbalances, and excess levels. Prerequisites: ENVS 1110/L, ESNV 2201/L, BIOL 2610/L; Co-requisite: ENVS 4410L. (3, 3T+0L)

4410L SOIL TESTING AND INTERPRETATION LAB Soil morphology and development. Field analysis and characterization of soil profiles, impact of weather, drainage, agricultural, industrial, and man-made factors on edaphic characterization. Co-requisite: ENVS 4410. (1, 0T+1L)

4412 ENVIRONMENTAL HEALTH AND TOXICOLOGY You will study the relationship between human health and environmental toxicants from an interdisciplinary perspective. You will become familiar with a broad range of concepts, including the nature of hazards, epidemiological study design, exposure assessment, toxicology microbiology, risk assessment, risk perception, and risk management. You will learn to draw the links among human health and sustainability, urbanization, energy production, and relevant ethical issues. Prerequisites: ENVS 1110/L, ENVS 2201/L or CHEM 1225/L, BIOL 2610/L, and BIOL 2310/L. (3, 3T+0L)

4414 WILDLAND FIRE MANAGEMENT In this course, you will focus on fire in restoration ecology and the effects of fire on plants, animals, soils, water, and air, with an emphasis directed toward fire as an ecological process in wildland ecosystems. You will study how to characterize and predict fire effects over time and space, as well as how to apply this to restoration ecology. Prerequisites: ENVS 3318. (3, 3T+0L)

4416 IRRIGATION AND DRAINAGE You will participate in the design, management, and evaluation of irrigation and drainage systems, addressing the concepts and processes of system design, soil-water-plant relationships, evapo-transpiration and water requirements, effective water use, irrigation scheduling, infiltration, and irrigation systems planning. Prerequisites: ENVS 1110/L and MATH 1510. (3, 3T+0L)

4420 ECOLOGY AND HYDROLOGY OF SOUTHWESTERN RIVER SYSTEMS Students will experience the unique geology, ecology, and dynamic hydrology of the southwestern U.S. along the diverse ecosystems of New Mexico and Arizona. The curriculum includes three days of classroom lecture followed by multi-day field trips to ecologically diverse regions representative of the Chihuahuan and Sonoran deserts, southwestern forests and grasslands. The field trip will include a diverse set of hikes, lectures, and project investigation multiple aspects associated with the evolution of Southwest river and riparian systems including the geological, ecological, natural resources, the social and political ward issue and management practices. The ecology of “sky islands,” deserts, forests and range of Southwest Arizona includes trips to the Arizona Sonoran Desert Museum and Chiricahua National Park. (Spring only) The banks of the major river systems in New Mexico will be examined through a multi-day whitewater field trip on the Rio Chama and or the upper Rio Grande (Summer only). Prerequisite: Permission of instructor. (2, 2T+0L)

4480 SENIOR CAPSTONE This will be the culminating experience for you, as an environmental science student. You will work with an academic advisor who will serve as your
mentor in overseeing your final student internship with a government agency, environmental organization, or private company. In your fieldwork, you will search for solutions to real problems while working with professionals, acquiring important experience, and making connections with potential employers. You must identify a capstone field mentor who will provide on-site student support and who will periodically and ultimately evaluate your performance. (3, 0T+3L)

4490-4495 PROBLEM Topic developed between student and advisor (Var. 1-6) (1-6T)

**FILM & DIGITAL MEDIA ARTS (FDMA)**

1210 DIGITAL VIDEO PRODUCTION I An introduction to digital video production. Students learn camera operation, lights and audio equipment. Hands-on production is completed in the studio and on location. (4, 3T+1S)

1255 INTRODUCTION TO DIGITAL AUDIO DOCUMENTARY An introduction to basic digital studio and field production techniques and the procedures necessary for gathering aural history for the production of documentary radio/web broadcast. You will learn how to select and edit excerpts from your interviews to produce radio vignettes. You will study Pro Tools, basic audio field recording with digital technology, the practice of aural history, and the art of sound collage. (4, 3T+1S)

1265 DIGITAL MEDIA LITERACY You will create a personal web page, which will serve as the foundation for exploring communication and web publication/syndication in the modern world. (3, 1T+2S)

2540 INTRODUCTION TO NON-LINEAR VIDEO This course is an introduction to digital video editing using Adobe Premiere. Students will learn how to create simple and complex video sequences in a non-linear video editing system. Video projects will be optimized for web, eBook, mobile devices, and DVD distribution. (4, 3T+1S)

2315 DOCUMENTARY FILM PRODUCTION I An introduction to planning and producing a short documentary film. In this workshop-based class, students work individually and in teams. (4, 3T+1S)

1410 AUDIO PRODUCTION I Students will learn about and apply essential tools and techniques in analog and digital audio production. Topics include acoustic science, microphones, recording and mixing techniques, analog and digital audio hardware and software, including multi-track, computer-based recording and editing systems. (4, 3T+1S)

1660 sUAS (DRONE) TECHNOLOGY I This course is part one of a two-part six credit hour certificate program in Drone Technology. Curriculum includes: pilot operation, FAA Part 107 certification preparation, and commercial deployment of Small Unmanned Aerial Vehicles (sUAVs), more commonly known as drones. Topics covered will be Still and Moving Imagery, Surveying, and Mapping. (3, 3T+0S)

1665 sUAS (DRONE) TECHNOLOGY II This course is part two of a two-part six credit hour certificate program in Drone Technology. Curriculum includes: pilot operation, FAA Part 107 certification preparation, and commercial deployment of Small Unmanned Aerial Vehicles (sUASs), more commonly known as drones. Topics covered will be Still and Moving Imagery, Surveying, and Mapping. (3, 3T+0S)

1310 INTRODUCTION TO TELEVISION PRODUCTION This course will provide students with an introduction to producing programming for television broadcast. Students will learn basic shooting, editing and broadcast live and recorded media. Work is performed on location and in the studio. (4, 3T+1S)
1515  INTRODUCTION TO DIGITAL IMAGE EDITING: PHOTOSHOP  In this course, students will learn how to use the tools in Adobe Photoshop to create new images and edit existing images. Tools used will include selections, layers, and adjustments, among other pixel editing tools. Basic composition and output will be emphasized in all projects.  (4, 3T+1S)

1540  DIGITAL ANIMATION I: MOTION GRAPHICS  This course introduces students to digital animation using Adobe After Effects. Students will use After Effects to create layers, compositions, typefaces, visual effects, and rendering. Students will also design short animations of their own, and will work through lessons and tutorials.  (4, 3T+1S)

2245  ADVANCED DIGITAL VIDEO PRODUCTION  You will study advanced camera functions from a technical standpoint including maintaining optimum picture quality while filming, achieving higher caliber sound fidelity, and multi-camera shooting procedures.  

2265  DIGITAL MEDIA II  This course covers the theory of visual communication, storytelling, aesthetics, and the production of digital video content. Emphasis will be placed on narrative filmmaking, whether it is fiction or documentary film. Emphasis will also be placed on creative expression, personal vision, and productive collaboration.  Prerequisite: FDMA 1265.  (4, 2T+2S)

2230  TV PRODUCTION II  The study of media and documentary filmmaking in the fields of culture, ecology, anthropology and sociopolitical journalism. Explore social conscious stories and how filmmakers and scientists interconnect in the field 451 Revised 5/31/2019 of environmental journalism. The class will focus on forms, structures and styles of documentary filmmaking as well as the historical, social and cultural context of the genre.  (4, 3T+1S)

2250  DIGITAL IMAGING & DESIGN  The creation of a professional quality original media soundtrack is possible for relatively low production/postproduction costs. This class is designed to give the student an overview of creating sound for a variety of digital media. Topics include acoustic principles, sound design, audio hardware, recording techniques; and editing, processing, and multi-track mixing, using software applications.  Prerequisite: FDMA 1515 (4, 3T+1S)

1110  FILM HISTORY  This course surveys the history of cinema - investigating the process by which the original "cinema of attractions" evolved into a globally dominant form of visual storytelling. We will explore the development of cinema both as an art form and as an industry, and consider the technological, economic, cultural factors, and key international movements that shape it.  (3, 3T+0L)

2994  PORTFOLIO DESIGN & DEVELOPMENT  Varies.  (2,1T+1S)

2998  DIGITAL MEDIA PRODUCTION – INTERNSHIP  Varies.  Prerequisite: (Summer)  (6, 0T+6S)

FINANCE (BFIN)

2110  INTRODUCTION TO FINANCE  Introduces tools and techniques of financial management. Includes time value of money; financial planning, diversification and risk; debt and equity investment decisions; and financial statement analysis.  Prerequisites: BUSA 2130.  (3, 3T+0L)

4408  CORPORATE FINANCE  In-depth analysis of financial concepts including valuation capital budgeting, cost of capital, leasing, financial analysis, and working capital management.  Prerequisites: ACCT 2110, BFIN 2110.  (Spring)  (3,3T+0L)

4410  MONEY AND BANKING  In-depth analysis of modern monetary theory and policy,
commercial banking system and depository institutions, global financial system and foreign exchange market. *Prerequisites:* ECON 2110 and BFIN 2110 (Spring) (3, 3T+0L)

**FIRST YEAR EXPERIENCE (FYEX)**

**1110 FIRST-YEAR SEMINAR** This course is designed to help students achieve greater success in college and in life. Students will learn many proven strategies for creating greater academic, professional, and personal success. Topics may include career exploration, time management, study and test-taking strategies to adapt to different learning environments, interpersonal relationships, wellness management, financial literacy, and campus and community resources. *Prerequisite:* Freshman Standing Only. (Fall, Spring). (3, 3T+0L)

**GEOGRAPHY (GEOG)**

**1120 WORLD REGIONAL GEOGRAPHY** Overview of the physical geography, natural resources, cultural landscapes, and current problems of the world’s major regions. Students will also examine current events at a variety of geographic scales. (3, 3T+0L)

**GEOLOGY (GEOL)**

**1110 PHYSICAL GEOLOGY** Physical Geology is an introduction to our dynamic Earth, introducing students to the materials that make up Earth (rocks and minerals) and the processes that create and modify the features of our planet. The course will help students learn how mountains are formed, how volcanoes erupt, where earthquakes occur, and how water, wind, and ice can shape the landscape. Students will also develop a basic understanding of the ways humans have altered the planet including our impact on natural resources and global climate change. *Co-requisite:* GEOL 1110L. (3, 3T+0L)

**1110L PHYSICAL GEOLOGY LAB** Physical Geology Lab is the laboratory component of Physical Geology. Students will learn to identify rocks and minerals in hand samples, work with topographic maps, geologic maps, and geologic cross-sections, and apply stratigraphic principles to explore geologic time. *Co-requisite:* GEOL 1110. (1, 0T+1L)

**2110 HISTORICAL GEOLOGY** This course reviews the major geological and biological processes and events over the Earth’s 4.6-billion-year history. Students will learn about the formation of the Earth and its development through time including changes in the lithosphere, atmosphere, hydrosphere, and biosphere. The interrelationships between the physical aspects of Earth history and biological origins, evolution of species, and causes of extinctions will be explored. *Co-requisite:* GEOL 2110L. (3, 3T+0L)

**2110L HISTORICAL GEOLOGY LAB** Historical Geology Laboratory is the laboratory component of Historical Geology. This course applies geologic principles and techniques to reconstruct the history of Earth. Students will explore key concepts of geologic time and stratigraphy, identify fossils and use fossils to make stratigraphic correlations. Students will employ actualism to determine past depositional environments. *Co-requisite:* GEOL 2110. (1, 0T+1L)

**HEALTH EDUCATION (HLED)**

**1115 AMERICAN HEART ASSOCIATION CPR** The gross anatomy and physiology of the heart, electrical pathway, and respiratory system are discussed in preparation for CPR. Includes primary assessment and evaluation of ABCs. Successful completion of this course will result in American Heart Association CPR certification. Graded on a Credit/No Credit basis. (0.5, 0.5T+0L)
HEALTH SCIENCE / HISTORY

1120  AMERICAN RED CROSS FIRST AID & CPR/AED  Introduces students to the fundamentals, techniques and practices of standard First Aid, Safety and CPR/AED. Upon successful completion of the course, students will become eligible for ARC certification. Graded on a Credit/No Credit basis. (0.5, 0.5T+0L)

1510  MEDICAL TERMINOLOGY  Prefixes, suffixes and root words of Greek and/or Latin origin frequently used in medical terminology. Word part combination practices, pronunciation, spelling and common medical abbreviations. Prerequisite: ENG 106. (2, 2T + 0L)

HEALTH SCIENCE (HSCI)

1103  INTRODUCTION TO HEALTH CARE PROFESSIONS  This course is for students who are interested in a career in health care or health related field. You will be introduced to a variety of health care professions, determine the educational path required for your chosen field, and explore the personal qualities and professional skills essential for all health care providers. (3, 3T+0L)

1160L  EMERGENCY MEDICAL TECHNICIAN—BASIC (EMT-B)  This course is designed for individuals who have an interest in working in the pre-hospital setting. It trains ambulance and rescue personnel to recognize and stabilize patients with life-threatening emergencies at the scene and to transport using specialized items of equipment. When you complete this course you will be eligible to take the state licensing exam which is required to become an EMT in New Mexico. Co-requisite: HSCI 160L; Prerequisite: HLED 102, or current American Heart Association CPR certification. You must be at least 18 years of age to register for the state board exam; however, high school students are eligible for concurrent enrollment with permission from the department. In general, those 17 years of age may take the course and apply for licensure; however, such applicants must meet special criteria (check with Northern’s Health Science department). In order to register to take the state board exam to become a licensed EMT-B, you must earn 80% or better in this course. Co-requisite: HSCI 102 or current American Heart Association CPR certification. (8, 6T+2L)

HISTORY (HIST)

Note: Each course in this department bears a Prerequisite of ENG 109N or an adequate score on the Course Placement Evaluation.

1110  UNITED STATES HISTORY I  The primary objective of this course is to serve as an introduction to the history of the United States from the pre-colonial period to the immediate aftermath of the Civil War. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies. (3, 3T+0L)

1120  UNITED STATES HISTORY II  The primary objective of this course is to serve as an introduction to the history of the United States from reconstruction to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies. (3, 3T+0L)

1150  WESTERN CIVILIZATION I  This course is a chronological treatment of the history of the western world from ancient times to the early modern era. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to "non-western" civilizations which impact and influence the development of "western" civilization. (3, 3T+0L)
1160  WESTERN CIVILIZATION II  This course is a chronological treatment of the history of the western world from the early modern era to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to "non-western" civilizations which impact and influence the development of "western" civilization. (3, 3T+0L)

2110  SURVEY OF NEW MEXICO HISTORY  The primary objective of this course is to serve as an introduction to the history of New Mexico from the pre-Columbian times to the present day. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of New Mexico within the context of the Americas. (3, 3T+0L)

2122  CHICANO EXPERIENCE IN THE U.S.  In 1848, the United States violently wrested over half of the landmass of Mexico, displacing and forcing indigenous and traditional peoples of the Southwest to re-establish citizenry in their own homelands. The Treaty of Guadalupe-Hidalgo (1848) assured Mexicans the full rights to citizenship in the United States, but the imposition of a new governmental system often left the new “ethnic minority group” to deal with economic and psychological hardships. Despite these hardships, Chicanas/os have not only survived, but in many cases thrived, in the country that often treated them as “second class citizens.” In this class we will examine the historical, cultural, political, and economic conditions of Chicanas/os in the U.S. through the major court cases that have shaped Mexican American identity. (3, 3T+0L)

2130  SURVEY OF NATIVE AMERICAN HISTORY  The primary objective of this course is to serve as a survey of the history of Native American History from pre-colonial times until the present. This course will explore the cultural diversity of the Native Americans. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the history of Native Americans. (3, 3T+0L)

2155  SOUTHWESTERN WOMEN’S HISTORY  In this course, we will examine the multiple ways in which women helped to shape the U.S. Southwest. History has often left out the perspectives of women, but will research and discuss women’s involvement in Southwestern history, including politics, economics, and culture. (3, 3T+0L)

3301  HISTORY OF JUDEO-CHRISTIAN MUSLIM RELATIONS  You will examine the nature of Judeo-Christian Muslim relations in different contexts and years of world history, with focus ranging from the Crusades to modern experiences in the world. You will concentrate on historical and societal dimensions rather than theology. (3, 3T+0L)

3340  TOPICS IN AMERICAN HISTORY  The course is a focused study of topic or issues within the study of American history. Content varies from semester to semester. The course involves readings, lecture, discussion and composition. As topics vary, consult a current Schedule of Classes for specific content areas. Prerequisite: ENGL 1120. (Fall) (3, 3T+0L)

3360  INDIGENOUS HISTORY  The course is a concentrated study of the indigenous history of North America. The content includes both creative and academic readings that illustrate the theories and issues of the indigenous Americas. The course involves readings, lecture, discussion and composition. As topics vary consult the instructor for specific content areas. Prerequisite: ENGL 1110 (SPRING) (3, 3L+0L)

HONORS (HON)

1210  HONORS SEMINAR  A lower division seminar for students enrolled in the Honors Program. The course will emphasize the continued development of critical thinking, enhancement of study skills, and encourage participation in campus activities. The class
usually involves off-campus travel. This course may be taken for credit up to four times.  
**Prerequisite:** ENGL 1120 and a minimum 3.2 cumulative GPA.  
(3, 3T+0L)

### HOSPITALITY, RESTAURANT, AND TOURISM MANAGEMENT (HRTM)

**1115  INTRODUCTION TO MANAGEMENT IN THE HOSPITALITY INDUSTRY** You will explore and analyze management opportunities, functions, methods, and concepts in various segments of the hospitality industry.  
**Prerequisite:** ENG 109N, or adequate score on Course Placement Evaluation.  
(3, 3T+0L)

**1133  CASINO MANAGEMENT** You will study the historical and current perspectives of the gaming industry as those apply to management principles for casino operations, including coordination with traditional hospitality services.  
**Prerequisite:** HTRM 1115.  
(3, 3T+0L)

**1135  HOTEL MANAGEMENT** You will study rooms management, including front office, housekeeping, security, and engineering with emphasis on operations, coordination, and communication within and between departments.  
**Prerequisite:** HTRM 1115.  
(3, 3T+0L)

**1140  INTRODUCTION TO FOOD PREPARATION** The fundamental concepts, skills and techniques involved in basic cookery are covered in this course. Special emphasis is given to the study of ingredients, cooking theories, and the preparation of stocks, broth, glazes, and soups, thickening agents, the grand sauces and emulsion sauces. Lectures and demonstrations teach organization skills in the kitchen, work coordination, and knife skills.  
The basics of vegetable cookery, starch cookery, meat and poultry are covered. Emphasis is given to basic cooking techniques such as sautéing, roasting, poaching, braising and frying. Students must successfully pass a practical cooking examination covering a variety of cooking techniques.  
**Prerequisite:** ENG 109N, or adequate score on Course Placement Evaluation.  
(3, 3T+0L)

**1145  FOOD AND BEVERAGE SERVICE MANAGEMENT** You will study food and beverage service management systems in the hospitality field. You will learn to analyze cost control and quality control techniques. This course requires a work site practice location.  
**Prerequisite:** ENG 109N, or adequate score on Course Placement Evaluation.  
(3, 3T+0L)

**2210  INTERNSHIP** You will be involved in supervised off-campus non-group instruction including field experiences, practice, or internships with a requirement that you provide written and oral critiques of the activities required.  
**Prerequisite:** prior approval of proposed assignment by instructor and completion of all other courses.  
(3, 0T+3L)

### HUMANITIES (HUMN)

**1110  INTRODUCTION TO WORLD HUMANITIES I** This course is an interdisciplinary introduction to the cultural contributions and expressions in ancient world civilizations such as Mesopotamia, Greece, Rome, Asia, Africa, and the Americas, emphasizing artistic expression, philosophical thought, and religious practices in these civilizations, as well as historical, scientific, and technological developments.  
**Prerequisite:** ENG 109N, or adequate score on Course Placement Evaluation.  
(3, 3T+0L)

**1120  THE SEARCH FOR MEANING** This course examines various topics related to the personal search for meaning through the lens of the Humanities and within the social context. The course involves readings, discussions, research and composition.  
**Prerequisite:** ENG 109.  
(Fall, Spring)  
(3, 3T+0L)

**1105  HUMANITIES AND THE SOUTHWEST** This course emphasizes local and regional history, anthropology, ecology, art and folklore as a familiar, verifiable bridge into the universe
of human experience; local solutions of universal human problems; the human place in the natural and cultural environment of the Southwest; the human capacity for expression, creativity, and the nature and transmission of knowledge. Involvement is primarily based on personal investigative assignments. **Prerequisite:** ENG 109N. (3, 3T+0L)

**2110 INTRODUCTION TO WORLD HUMANITIES II** This course is an interdisciplinary introduction to the interrelationships of cultural contributions and values during the Renaissance, Baroque, Enlightenment, Romantic, and Modern eras in Europe as well as those during the same time periods in China, Japan, Africa, other parts of the Middle East, and Latin America. The course will emphasize artistic expression, philosophical thought, and religious practices in these regions, as well as historical and technological developments. **Prerequisite:** ENG 109N, or adequate score on Course Placement Evaluation. (3, 3T+0L)

**2120 COMPARATIVE RELIGION** To gain a familiarity with the major religious traditions in the world, you will examine various religious traditions and practices, focusing on the similarities and differences between their conception of the Divine and different religious conceptions of what it means to live the “good life.” You will alternate between (a) reading secondary texts that compare religious traditions from an “outsider” perspective and (b) reading primary texts central to each religion. **Prerequisite:** ENG 109N. (3, 3T+0L)

**2130 WORLD MYTHOLOGY** This course is an introduction to the nature and function of mythology. In this class we will study and compare mythologies of different cultures, keeping an eye on the ways in which myths expresses the inexpressible. Cross-listed with ENG 2720. **Prerequisite:** ENGL 1110. (Fall, Spring). (3, 3T+0L)

**2140 HISPANIC FEMINIST STUDIES** You will be introduced to the interdisciplinary field of Chicana Studies, including historical research on labor, political involvement, cultural studies, and feminism. (3, 3T+0L)

**2246 TOURISM AND THE ARTS IN NEW MEXICO PUEBLOS** As tourism and art production have become principal means for the Pueblo peoples of New Mexico to support their families and communities, you will study this course through a multi-lens perspective of this economic, cultural, and aesthetic reality using historical readings, short films, and visits to local museums and Pueblo artists’ galleries. **Prerequisite:** ENGL 1110. Cross-listed as PINS 2246. (3, 3T+0L)

**2160 FOUNDATIONS OF INTEGRATED STUDIES** This is an introductory course to the B.A. in Integrated Studies. Students will study the nature of disciplines and interdisciplinary work. They will also be introduced to the Integrated Studies degree and to inquiry-based learning that extends beyond the boxes of traditional disciplines. **Prerequisite:** ENGL 1110. (Fall, Spring). (3, 3T+0L)

**2281 SPIRIT OF PLACE, NATIVE SENSES OF PLACE** You will examine the meaning of place in your life and its particular importance to understanding Native identity and culture. You will focus on how to relate place with examples of how Native writers, poets, artists, storytellers, and other performers convey a “sense” or “spirit” of place in their work. **Prerequisite:** ENGL 1110. Cross-listed as PINS 2281. (3, 3T+0L)

**3311 READINGS IN THE SOCIAL SCIENCES** In this seminar, taught in the conversational method, students will read and discuss great works and ideas from the major social sciences. The works from these disciplines, such as Psychology, Sociology, Anthropology, Political Science, and Economics, explore the social structures that influence how we understand our social environment and ourselves. Often these works—such as the works of the psychologist Sigmund Freud—have themselves influenced our shared and individual experience so profoundly that they shape, perhaps unknowingly, our view of the world. **Prerequisite:** ENGL 1120. (4, 4T+0L)
3320  GENESIS OF MATHEMATICS AND SCIENCE  This seminar, taught according to the conversational method, will examine landmark works and ideas from the history of mathematics and the natural sciences. These disciplines represent a dialogue with a rich tradition. Isaac Newton once wrote that, “If I have seen a little further it is by standing on the shoulders of Giants.” In this class, we will be engaging in conversation with giants from the field of mathematics and the sciences by reading various texts and by asking basic questions that arise from those texts. We will be asking the most basic questions, the kind whose answers are mostly taken for granted in traditional mathematics and sciences classes.  
Prerequisite: ENGL 1120. (4, 4T+0L)

3324  EPIC LITERATURE AS PSYCHOLOGICAL INSIGHT  Students will learn to use epic literature as a way of developing a greater understanding of their own lives and the culture they live in. The course will focus on a critical reading of texts as a way of uncovering and understanding larger social, cultural and psychological ideas. (3, 3T+0L)

3388  INTEGRATED STUDIES II  In this junior-year, inquiry-based course, students will explore a single, fundamental question, such as the following: “What is the Enlightenment?” Questions will be fundamental and will require material and methods from more than one point of view, cultural tradition, and academic discipline.  
Prerequisite: HUMN 2160. (Fall). (3, 3T+0L)

3389  SENIOR PROJECT I  Students will deepen their understanding of interdisciplinary work. In addition, to further developing the theoretical underpinnings of their individual degree plan, student will propose their senior project.  
Prerequisite: HUMN 2160 (3, 3T+0L)

3390  TOPICS IN THE STUDY OF RELIGION  Focused study of religious traditions and/or issues within the study of religion; content varies each semester. The course involves readings, lecture, discussion, and composition. As topics vary, consult a current Schedule of Classes for specific content areas.  
Prerequisite: ENGL 1120. (Fall, Spring, Summer) (3, 3T)

4414  HUMANITY AND CREATIVITY  New Mexico is one of the great artistic areas of the United States. It is home to archaic petroglyphs and prehistoric pottery, as well as traditional retablos and weavings; it is the inspiration for distinctive artists such as Georgia O’Keeffe and D.H. Lawrence. This course will explore art and its place by applying the conversational method to great works and ideas of and about art. We will examine questions such as these: What is art? What is an artist? What in us needs art?  
Prerequisite: ENGL 1120. (4, 4T+0L)

4421  THEMES IN THE HUMANITIES: HISTORY, LITERATURE, ART, AND PHILOSOPHY  This seminar, taught according to the conversational method, will examine works from the humanities disciplines, such as philosophy, literature, and history. The great themes in the humanities are driven by the most fundamental needs and questions that human beings have, such as the need for meaning, and the questions “Why are we here?” and “What may be our highest hopes and aspirations?”  
Prerequisite: ENGL 1120. (4,4T+0L)

4460  PSYCHOLOGY OF MYTH  Students will explore mythology from a psychological point of view, paying particular attention to the relationship between mythology and psychoanalytic traditions. In addition students will learn mythological patterns and interpret their meaning within a psychological context, while also exploring both myth and psychology as different ways of knowing.  
Prerequisite: ENGL 1120. (3, 3T+0L)

4488  INTEGRATED STUDIES III (WIC)  In this intensive-writing capstone, under the guidance of the workshop instructor and under a general course theme, students will select a series of interdisciplinary questions that will be explored throughout the semester. Questions will be fundamental and will require material and methods from more than one point of view, cultural tradition, and academic discipline.  
Prerequisite: HUMN 3388. (Spring). (3, 3T+0L)
4489  SENIOR PROJECT II  This is an intensive-writing course for self-design students in Integrated Studies. Under the guidance of the workshop instructor, students will conduct a senior writing project that demonstrates a mastery of the interdisciplinary theme at the heart of their self-designed degree. Prerequisite: HUMN 3388 or 3389. (3, 3T+0L)

HUMAN SERVICES (HMSV)

1110  GROUP DYNAMICS  This course introduces you to basic issues and stages of development in the group counseling process; overview of types of counseling groups, group theory, leadership ethical guidelines, group formation and termination. (3, 3T+0L)

1120  INTERVIEWING TECHNIQUES  This course is designed to teach basic interviewing techniques used in a variety of settings. Theoretical foundations of various interviewing styles and techniques will be examined. The student will develop an awareness of ways in which the interviewer’s background, attitudes, and behaviors influence the interview. (Fall) (3, 3T+0L)

2450  CRISIS INTERVENTION  This course is an introduction to crisis intervention for human services workers. It will explore: the history of crisis intervention; crisis intervention models; ethical issues; cultural sensitivity; suicide assessment; developmental crises; crises of loss; HIV/AIDS; domestic violence, and community disasters. (Fall) (3, 3T+0L)

INFORMATION TECHNOLOGY (IT)

2250  INTRODUCTION TO DATABASES  Through an introduction to database software, you will study the Entity-Relationship model, basic database tables, queries, forms, and report creation and management. Prerequisite: EECE 1152L. (3, 3T+0L)

3350  DATABASE MANAGEMENT  You will study current trends in data management, studying topics which include database theory and architecture, normalization, query languages, security and Web applications, focusing primarily on a study of database structures and design, hierarchical and relational models, and database access using Oracle SQL. Prerequisite: IT 2250. (3, 2T+1L)

4410  INFORMATION ASSURANCE AND SECURITY  This course introduces students to the principles of assurance and security, and then applies those principles to industrial and enterprise networks and information systems. The course provides a theoretical background of traditional and modern cryptographic techniques to provide for confidentiality, integrity, and availability. Concepts are then applied to secure and assure information, using a variety of techniques and frameworks such as AAA architecture, firewall technologies, intrusion prevention systems, and virtual private networks and secure management. Prerequisites: EECE 2230 and 3330. (3, 2T+1L)

4450  ADVANCED DATABASE APPLICATIONS  The goal of this course is the development of applications using a relational database as the primary source and sink of data. Students will develop industry standard database applications using standalone PL/SQL programs (stored procedures, stored functions, and triggers), Java servlets and JDBC, JSP (Java Server Pages), and C#. JavaScript, XHTML, and CSS will be used on the client-side. Prerequisites: IT 3350 and EECE 3355. (1, 0T+1L)

4490  IT CAPSTONE I (WIC)  Capstone I is a project-oriented course where students work in teams to design and implement a large IT-related project. Projects are prepared in response to an industrial or in-house sponsor. Engineering ethics and project management skills, such as communication and team management, are reinforced through modules during the semester, and are applied to the different stages of the project. The course finalizes with oral presentations, written reports and/or student demonstrations which are judged by
a panel composed of faculty members and external guests. IT 4490 is a designated Writing Intensive Course (WIC). Prerequisite: senior standing, Information Engineering Technology major. (3, 2T+1L) Passing grade is C.

4491 IT CAPSTONE II Capstone II is a project-oriented course where students work in teams to design and implement a large IT-related project. Projects are prepared in response to an industrial or in-house sponsor and may be a continuation of the project developed in Capstone I. Project management skills such as communication and team management are applied to the different stages of the project. The course finalizes with oral presentations, written reports and/or student demonstrations which are judged by a panel composed of faculty members and external guests. Prerequisite: IT 4490. (3, 2T+1L) Passing grade is C.

5510 INFORMATION ASSURANCE AND SECURITY You will study the background of information systems-security fundamentals and tools, emphasizing the role of general and application systems controls in protecting data and computing resources, the identification of threats, and the administrative and technological tools and techniques used to audit and monitor access and access control. Prerequisites: EECE 3355 and IT 3350. (3, 2T+1L)

5530 NETWORK ADMINISTRATION The practice of network administration in organizations in which security, application control, software updates, hardware inventory control and operational costs are of paramount importance. Economic modeling of organizational tasks in capital outlay, operational budgets and expense savings. (3, 3T+0L)

5599 TOPICS IN IT Special topics in the IT field. (3, 3T+0L)

INTEGRATIVE HEALTH STUDIES (IHS)

3357 HERBAL MEDICINE In this course, you will be introduced to basic concepts of herbal medicine and explore advanced methods and specific uses of herbal preparations. Prerequisite: ENG 1110. (2, 2T+0L)

3358 HERBAL PHARMACY In this course you will explore hands-on methods for making herbal preparations, salves, tinctures, liniments, and teas. Co-requisite: IHS 3357. (2, 2T+0L)

4480 EVOLUTION OF CROSS-CULTURAL HEALING In this overview of cultural and anthropological influences on health beliefs, with an emphasis on New Mexico, you will examine “lay” or “folk” understanding of the causes and management of disease. You will discuss traditional approaches to health and healing (e.g., shamanism, curanderismo). Prerequisite: ENG 1120 and IHS 1118. (3, 3T+0L)

LANGUAGE, LETTERS, AND LIBERAL ARTS

101 FOUNDATIONS OF LIBERAL ARTS Liberal Arts Education is an approach to learning that empowers individuals and prepares them to deal with complexity, diversity, and change. It provides students with broad knowledge of the wider world (e.g. science, culture, and society) as well as in-depth study in specific areas of interest. A liberal arts education helps students develop a sense of social responsibility, as well as strong and transferable intellectual and practical skills such as communication, analytical and problem-solving skills, and a demonstrated ability to apply knowledge and skills in real-world settings. In this course, we will explore the concepts that inform the liberal arts, read and analyze texts that exemplify liberal arts learning, and discuss potential careers in the liberal arts. Prerequisite: ENG 111. (3, 3T+0L)
MANAGEMENT (MGMT)

2110  PRINCIPLES OF MANAGEMENT  An introduction to the basic theory of management including the functions of planning, organizing, staffing, leading, and controlling; while considering management’s ethical and social responsibilities. Prerequisite: ENG 109N. (3, 3T+0L) (NM Common Course Number: MGMT 2113, Business Transfer Module)

3353  OPERATIONS MANAGEMENT  This course explores the fundamental concepts of operations including productivity, quality control, new product and process development, inventory management, operations strategy, and computer applications. Prerequisites: MGMT 2110 and Math 1215 or higher. (3, 3T+0L)

3360  HUMAN RESOURCES MANAGEMENT  Basic concepts of Human Resource Management functions and organizational processes. Emphasizes legislation, specialization, job description, job analysis, self-managed teams, profit/gain sharing, health care, medical leave, harassment, diversity, management and/or labor relations, recruitment, and training. Prerequisite: MGMT 2110. (3, 3T+0L)

4432  STRATEGIC MANAGEMENT  Basic concepts, frameworks, and methodologies useful to managers in crafting and executing business strategy, including quality management. Prerequisite: MGMT 2110. (3, 3T+0L)

4456  MARKETING MANAGEMENT  The student will gain a comprehensive view and understanding of the role of marketing managers in today’s dynamic and rapidly changing global marketplace. They must provide their business with a vision for the future; monitor and understand a dynamic market environment; generate strategic options and deliver programs that sustain a measurable competitive advantage. The course focuses on these goals as well as issues that marketing managers are confronted with on a daily basis. It covers the most recent and relevant techniques and processes being applied to the functions of: strategy development; interpreting consumer behavior; market segmentation; B2C and B2B marketing; brand management; marketing communications; customer relationship management (CRM); distribution strategy; product pricing and promotion. The course also addresses the latest technologies in digital marketing and e-commerce. Prerequisites: MKTG 2110 and MGMT 2110. (3, 3T+0L)

4462  INTERNATIONAL BUSINESS AND MANAGEMENT  International business and environments by covering topics such as the international monetary system, import-export, growing competition and trading relationships in a global community. Prerequisites: MGMT 2110 and ECON 2110. (3, 3T+0L)

MARKETING (MKTG)

2110  PRINCIPLES OF MARKETING (MKTG)  Survey of modern marketing concepts and practices focusing on the marketing mix: product, pricing, promotion, and distribution strategies. Topics include; the marketing environment, consumer behavior, marketing research, target marketing, and the ethical and social responsibilities of marketers. (3, 3T+0L) (NM Common Course Number: MKTG 2113, Business Transfer Module)

MATHEMATICS (MATH)

100N  FUNDAMENTALS OF MATHEMATICS  Introduction to the mathematical method and its use in practical applications. Students will use fundamental operations with fractions, decimals and signed values; convert between fractions, decimals and percentages; apply the order of operations correctly; create algebraic expressions and equations; simplify algebraic expressions and equations; manipulate formulas; translate verbal statements into algebraic expressions and equations; solve linear equations; create tables and graphs;
interpret graphs; and describe the results of problem solving orally and in writing. Grades
are awarded on a CR/NC basis. Prerequisite: Adequate score on the Course Placement Exam.
(4, 4T+0L)

100NL  FUNDAMENTALS OF MATHEMATICS AND LAB  This course will cover basic
operations (addition, subtraction, multiplication and division) with numbers in addition
to all the topics listed in MATH 100N. Students will also spend additional time in a computer
lab. Grades are awarded on a CR/NC basis. (5, 4T+1L)

102N  BASIC ALGEBRA  First complete course in algebra for those not prepared for
college-level algebra. Students will learn ratio and proportion, solutions of linear equations
and systems of linear equations, exponents, radicals, graphs, factoring, quadratic equations,
rational expressions, polynomials, inequalities and applications involving the previous
concepts. Grades are awarded on a CR/NC basis. Prerequisite: MATH 100N or adequate
score on Course Placement Evaluation. (4, 4T+0L)

1130  SURVEY of MATHEMATICS  This course will develop students’ ability to work
with and interpret numerical data, to apply logical and symbolic analysis to a variety of
problems, and/or to model phenomena with mathematical or logical reasoning. Topics
include financial mathematics used in everyday life situations, statistics, and optional top-
ics from a wide array of authentic contexts. Prerequisite: MATH 100N or MATH 100NL. (3,
3T+0L)

1215  INTERMEDIATE ALGEBRA  A study of linear and quadratic functions, and an
introduction to polynomial, absolute value, rational, radical, exponential, and logarithmic
functions. A development of strategies for solving single-variable equations and contextual
problems. Prerequisite: 64-69 on Accuplacer or MATH 100N or MATH 100NL. (4, 4T+0L)

1220  COLLEGE ALGEBRA  The study of equations, functions and graphs, reviewing
linear and quadratic functions, and concentrating on polynomial, rational, exponential and
logarithmic functions. Emphasizes algebraic problem solving skills and graphical represen-
tation of functions. Prerequisite: MATH 1215. (3, 3T+0L)

1250  TRIGONOMETRY and PRE-CALCULUS  Trigonometry & Pre-Calculus includes
the study of functions in general with emphasis on the elementary functions: algebraic,
exponential, logarithmic, trigonometric and inverse trigonometric functions. Topics include
rates of change, limits, systems of equations, conic sections, sequences and series, trigo-
nometric equations and identities, complex number, vectors, and applications. Prerequisite:
MATH 1220. (4, 4T+0L)

1350  INTRODUCTION TO PROBABILITY & STATISTICS  This course discusses the
 fundamentals of descriptive and inferential statistics. Students will gain introductions to
topics such as descriptive statistics, probability and basic probability models used in
statistics, sampling and statistical inference, and techniques for the visual presentation
of numerical data. These concepts will be illustrated by examples from a variety of fields.
Prerequisite: MATH 1215. (3, 3T+0L)

1430  APPLICATIONS OF CALCULUS I  An algebraic and graphical study of derivatives
and integrals, with an emphasis on applications to business, social science, economics
and the sciences. Prerequisite: MATH 1220. (4, 4T+0L)

1510  CALCULUS I  Introduces the intuitive, numerical and theoretical concepts of
limits, continuity, differentiation and integration. Includes the study of extrema, curve
sketching, and applications involving algebraic, exponential, logarithmic and trigonometric
functions. Designed for mathematics, science and engineering majors. Prerequisite: MATH
1250. (4, 4T+0L)
1520 CALCULUS II Continues course of study begun in Calculus I. Covers integration techniques, numerical integration, improper integrals, some differential equations, sequences, series and applications. Prerequisite: MATH 1510. (4T+0L)

1991 UNDERGRADUATE RESEARCH EXPERIENCE IN MATHEMATICS This is a computer-based experience in mathematical research. You will learn computational modeling, experimental design, library and internet information searches and research methodology, while interacting with peers and faculty. You will prepare a technical report or poster on your activities. Research questions focus on nonlinear dynamics, differential equations, and mathematical physics. Prerequisite: MATH 1510. (May be repeated for credit) (3T+0L)

2140 INTRODUCTION TO NUMERICAL COMPUTING This course will introduce solutions of non linear equations of one variable, solutions of linear equations in many variables (matrices), interpolation, approximation of integration and differentiation of functions, computational solutions of initial value problems for ordinary differential equations, and programming with mathematical software. Prerequisite: MATH 1520 and a computer language. (3T+0L)

2410 INTRODUCTION TO APPLIED ORDINARY DIFFERENTIAL EQUATIONS An introduction to differential equations. Students will be able to classify, construct, and solve different types of equations. Systems of equations, Laplace transforms, series solutions, and numerical methods are introduced. Prerequisite: MATH 1520. (3T+0L)

2420 INTRODUCTION TO LINEAR ALGEBRA AND APPLICATIONS An introductory study of the analysis and application of systems of linear equations, vector spaces, matrices, and linear transformations, including computer-based linear algebra. Prerequisite: MATH 1520. (3T+0L)

2530 CALCULUS III Continuation of Calculus II including multivariate and vector calculus, level curves and surfaces, partial derivatives, gradient, directional derivatives, tangent planes, optimization, multiple integrals in Cartesian, cylindrical and spherical coordinate systems. Prerequisite: MATH 1520. (4T+0L)

3311 VECTOR ANALYSIS This course will cover vector algebra, lines, planes, parametric curves, arc length, tangent and normal vectors and curvature of parametric curves, vector identities, gradients and directional derivatives, line, surface and volume integrals, divergence and curl of vector-valued functions, Gauss’s and Stokes’s theorems and geometric interpretations. Prerequisite: MATH 2530. (4T+0L)

3312 PARTIAL DIFFERENTIAL EQUATIONS The course will cover the classification of partial differential equations, the heat, wave and Laplace’s equation, methods of solution of partial differential equations, separation of variables, Fourier series, Fourier transforms, Laplace transforms, coordinate transformations, and engineering and science applications. Prerequisites: MATH 2530 and 3316. (3T+0L)

3313 COMPLEX VARIABLES FOR ENGINEERING The course will cover the algebra of complex numbers, analytic functions and the Cauchy-Riemann equations, Cauchy’s integral theorem, conformal mapping, contour integration and residues. Applications in engineering and physical problems will be included. Prerequisite: MATH 2530. (3T+0L)

3314 LINEAR ALGEBRA WITH APPLICATIONS The course will cover systems of linear equations, Gaussian elimination, LU decomposition, matrix algebra and determinants, least squares regression, vector spaces, inner products, orthogonality, eigenvalues, and eigenvectors, and computational methods. Prerequisite: MATH 1520. (3T+0L)
APPLIED ORDINARY DIFFERENTIAL EQUATIONS  The course will cover solutions of first order differential equations (separable equations, exact equations and integrating factors), second order differential equations (homogeneous equations and characteristic equations, method of undetermined coefficients, variation of parameters), Laplace transforms, series solutions, numerical methods, and applications to physics, mechanical and electrical systems and population dynamics. Prerequisite: MATH 1520. (Fall) (3, 3T+0L)

DISCRETE STRUCTURES  The course will emphasize principles of discrete math, including mathematical logic, inductive and deductive reasoning, recursive methods, as well as concepts involving discrete structures and their connections to problems in science, technology, and engineering. Prerequisite: MATH 1520. (3, 3T+0L)

ELEMENTS OF MATHEMATICAL STATISTICS AND PROBABILITY THEORY  Students will study probability theory, including combinatorics, probability densities, expectation, variance, correlation, estimation, confidence intervals, and hypothesis testing. Statistical tests (e.g. t-test, Chi-squared, ANOVA) will be discussed and used in applications related to biostatistics, social science and environmental science. Prerequisite: MATH 1510. (3, 3T+0L)

NUMERICAL COMPUTING (WIC)  This course will cover solutions of nonlinear equations of one variable, solutions of linear equations in many variables (matrices), interpolation, techniques for approximation of integration and differentiation of functions, computational solutions of initial-value problems for ordinary differential equations, and programming with mathematical software. Students will be responsible for writing technical papers with citations describing the results of numerical computation. Prerequisite: MATH 1520 and a computer language. (Spring) (3, 3T+0L)

PRACTICUM IN MATHEMATICS  This course prepares the student to develop the skills to use mathematics and apply mathematical skills to model and solve a real life problem. The student will be involved in researching a topic of his/her choice under the guidance of a faculty member. The topic could be selected from any applied area: Biology, Engineering, Environmental Science, Physics, or Business, for example. Prerequisite: MATH 2410 or MATH 3316 or permission from the instructor. (3, 3T+0L)

ADVANCED CALCULUS I  Students will undergo a rigorous study of the calculus of one variable, the definition of real numbers, sequences, limits, functions, continuity, differentiation, and integration. You will be responsible for understanding and constructing proofs. Prerequisites: MATH 2530. (4, 4T+0L)

PROBABILITY  The course will cover mathematical models for random experiments, random variables, expectation, discrete and continuous distributions, joint distributions, conditional probabilities, independence, laws of large numbers, the central limit theorem, and moment generation functions. Prerequisite: MATH 2530. (3, 3T+0L)

APPLIED MATRIX THEORY  The course will cover the theory of linear equations, matrix analysis of systems of linear differential equations, eigenvalues and eigenvectors, iterative methods for solving linear systems, variational principles, and generalized inverses. Prerequisite: MATH 3314. (3, 3T+0L)

MATHEMATICAL METHODS IN SCIENCE AND ENGINEERING  The course will cover special functions, tensor algebra, calculus of variations, integral equations, difference equations, and mathematical methods for solving differential equations. Prerequisites: MATH 3312, 3316. (3, 3T+0L)
# MECHANICAL ENGINEERING TECHNOLOGY (MET)

## 2201 APPLIED MECHANICS I
The focus of this course is on learning the fundamentals of mechanics of bodies that are in static equilibrium. Students will learn conceptual skills that will build the foundation for performing force analysis of particles and rigid bodies in both two and three dimensions. Students will learn to draw the free-body-diagram and perform force and moment analysis. Students will apply concept of force and moment and couple to solve practical problems. Students will learn to analyze distributed force systems and forces in members of trusses and frames. They will apply concept of centroids, center of mass and center of gravity to solve mechanics problems. Finally, the students will learn concepts and applications on friction. **Prerequisite:** ENGR 2215 (3, 3T+0L)

## 3301 APPLIED MECHANICS II
The focus of this course is on learning the mechanics of particles and rigid bodies that are in motion under the action of forces. Students will learn conceptual skills that will build the foundation for performing kinematic and kinetic analysis of particles, system of particles and rigid bodies for engineering applications. Student will be introduced to three-dimensional dynamics of rigid bodies. Students will learn to apply the concepts of work, energy and power to engineering problems. **Prerequisite:** MET 2201 (2, 2T+0L)

## 3302 STRENGTH AND PROPERTIES OF MATERIALS
The focus of this course is on learning the fundamentals and applications of strength and properties of materials. Students will study stresses and strains in members subjected to tension, compression, torsion, and shear and bending. Concepts of combined and principle stresses, Mohr’s circle for plane stresses will be introduced. Students will learn to construct shear force and bending moment diagrams for beams. Students will analyze external and internal forces and moments in beams, bars, shafts, pressure vessels etc. Finally, students will be exposed to engineering applications involving combined loadings and to statically indeterminate members. **Prerequisite:** MET2201. (3, 3T+0L)

## 3303 THERMODYNAMICS
Students will study fundamental principles of thermodynamic equilibrium, thermodynamic properties and equations of state; first and second laws of thermodynamics and their application to second law analysis. Students will analyze heat engines and power and refrigeration cycles. **Prerequisite:** ENGR 2216/L. (3, 3T+0L)

## 3310 MANUFACTURING PROCESS AND AUTOMATION
Essentials of automated manufacturing. Overview to Computer Integrated Manufacturing (CIM). Introduction to Computer Numerical Control (CNC); Manufacturing economics and optimization of manufacturing processing systems. **Prerequisite:** DRFT 1100. (3, 3T+0L)

## 4421 HEAT TRANSFER
The focus of this course is on learning the fundamentals of heat transfer mechanisms and to apply them on practical engineering problems. Students will study different modes of heat transfer such as conduction, convection and radiation and apply them to solve engineering problems. They will be introduced to both steady and unsteady heat conduction problems. Students will also study different heat exchangers and analyze their performance. **Prerequisite:** MET 3317 (3, 3T+0L)

# NURSING (NURS)

A grade of “C” or greater is considered passing for all 1100, 2200, 3300, and 4400 level nursing courses. Clinical courses are graded on a Credit/No Credit basis. When participation is required at a clinical setting, students are responsible for their own transportation.

## 1100 NURSE AIDE
This course focuses on the acquisition of knowledge and skills necessary to serve in the capacity of nurse aide. Successful completion of the nurse aide
course prepares the student for The New Mexico Certification Exam for Nurse Aide. **Prerequisites:** ENG 108N and PD 108N; **Co-requisite:** NURS 1100L. (Fall, Spring, Summer) (4,4T+0L)

1100L  **NURSE AIDE LAB**  This course focuses on the application of nurse aide skills in simulated lab and clinical settings. Grades are awarded on a CR/NC basis. **Co-requisite:** NURS 1100. (Fall, Spring, Summer) (1.5, 0T+1.5L)

1106  **PHARMACOLOGY**  This course provides an introduction to the principles of pharmacology, including: pharmacokinetics, pharmacodynamics, medication interactions and potential adverse medication reactions. Emphasis is placed on drug classifications and nursing care related to the safe administration of medication to patients across the life span. **Prerequisite:** Admission to the Nursing Program. (Fall) (3, 3T+0L)

1113  **NURSING FUNDAMENTALS**  This course provides an introduction to nursing and roles of the nurse as well as profession related and patient care concepts. Emphasis is placed on the nursing process, knowledge and skills needed to provide safe, quality care. The theoretical foundation for basic assessment and nursing skills is presented. **Prerequisite:** Admission to the Nursing Program. **Co-requisite:** NURS 1113L (Fall) (4, 4T + 0L)

1113L  **NURSING FUNDAMENTALS CLINICAL**  The student is given an opportunity to demonstrate the skills acquired in NURS 113 in a skills laboratory setting. **Prerequisite:** Admission to the Nursing Program. (Fall) (2, 0T +2L)

1114L  **INTRODUCTION TO HEALTH ASSESSMENT**  This course provides the framework for preparing students to perform comprehensive health assessments on patients across the lifespan. Emphasis is placed on taking a thorough nursing history, performing physiological, psychological, sociological, cultural, and spiritual assessments, as well as identification of stressors and health risks. Laboratory experiences provide an opportunity to practice assessment skills on patients across the lifespan in a variety of settings. **Prerequisite:** Admission to the Nursing Program. (Fall). (2, 0T, +2S)

1119  **ROLE TRANSITION/PRACTICAL NURSE**  This course examines the role of the vocational prepared nurse in today's health care systems, including information specific to the discipline of practical nursing and the NCLEX-PN exam as well as the role and scope of the practical nurse related to the nursing process, management of care, legal responsibility, and accountability. **Prerequisites:** NURS 1106, NURS 1113/L, NURS 1114L, NURS 1125/L, NURS 2214/L. **Co-requisites:** NURS 2217/L, NURS 2218/L, NURS 2225/L. (Fall) (2, 2T + 0L)

1125  **MEDICAL SURGICAL NURSING I**  This course introduces nursing care and management of the adult client with common medical-surgical conditions. **Prerequisite:** NURS 1106, NURS 1114L, NURS 1113, NURS 1113L. **Co-requisite:** NURS 1125L (Spring) (3, 3T, 0L)

1125L  **MEDICAL/SURGICAL NURSING I CLINICAL**  Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe patient care to adults in a variety of settings. **Prerequisite:** NURS 1106, NURS 1113/L, NURS 1114L. **Co-requisite:** NURS 1125. (Spring) (3, 0T, 3L)

2214  **PSYCHIATRIC MENTAL HEALTH NURSING**  This course focuses on the care of patients across the lifespan experiencing cognitive, mental and behavioral disorders. Emphasis is placed on management of patients facing emotional and psychological stressors as well as promoting and maintaining the mental health of individuals and families. Concepts of crisis intervention, therapeutic communication, anger management, and coping skills are integrated throughout the course. The community as a site for care and support
NURSING

services is addressed. **Prerequisite:** NURS 1106, NURS 1113/L, NURS 1114L. **Co-requisite:** NURS 2214L. (Spring) (2, 2T, +0L)

**2214L  PSYCHIATRIC MENTAL HEALTH NURSING CLINICAL** Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe patient care to patients in selected mental health settings. **Prerequisite:** NURS 1106, NURS 1113/L, NURS 1114L. **Co-requisite:** NURS 2214. (Spring) (1, 0T, +1L)

**Note:** NRS 2 = Completion of all first year nursing courses

**2217  MATERNAL/NEWBORN NURSING** This course provides an integrative, family-centered approach to the care of mothers and newborns. Emphasis is placed on normal and high-risk pregnancies, normal growth and development, family dynamics and the promotion of healthy behaviors in patients. **Prerequisite:** NURS 1106, NURS 1113/L, NURS 1114L. **Co-requisite:** NURS 2217L. (Fall) (2, 2T, +0L)

**2217L  MATERNAL NEWBORN NURSING CLINICAL** Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe patient care to mothers and newborns in selected settings. **Prerequisite:** NRS 2. **Co-requisite:** NURS 2217. (Fall) (1, 0T, +1L)

**2218  PEDIATRIC NURSING** This course provides an integrative, family-centered approach to the care of children. Emphasis is placed on normal growth and development, family dynamics, common pediatric disorders and the promotion of healthy behaviors in patients. **Prerequisite:** NURS 1106, NURS 1113/L, NURS 1114L. **Co-requisite:** NURS 2218L. (Fall) (2, 2T, +0L)

**2218L  PEDIATRIC NURSING CLINICAL** Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe patient care to children in selected settings. **Prerequisite:** NRS 2. **Co-requisite:** NURS 2218. (Fall) (1, 0T +1L)

**2225  MEDICAL SURGICAL NURSING II** This course focuses on the care of adult clients with complex medical/surgical health problems. Emphasis is placed on helping clients and their families cope with alterations in body functions. Concepts of pharmacology, health promotion and education, evidence-based practice, and interdisciplinary collaboration will be integrated throughout the course. **Prerequisite:** NURS 1106, NURS 1113/L, NURS 1114L. **Co-requisite:** NURS 2217L. (Fall) (2, 2T, +0L)

**2225L  MEDICAL SURGICAL NURSING II CLINICAL** Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe patient care to clients and selected groups in a variety of settings. **Prerequisite:** NRS 2. **Co-requisite:** NURS 2217L. (Fall) (3, 0T, +3L)

**2235  MEDICAL SURGICAL NURSING III** This course focuses on advanced concepts of nursing care as they relate to patients across the lifespan with complex, multisystem alterations in health. Emphasis is placed on implementing time management and organizational skills while managing the care of patients with multiple needs and collaborating with the interdisciplinary team. Complex clinical skills, as well as priority setting, clinical judgment, and tenets of legal and ethical practice, are integrated throughout the course. **Prerequisite:** NURS 1106, NURS 1113/L, NURS 1114L. **Co-requisite:** NURS 2235L. (Spring) (3, 0T, +3L)

**2235L  MEDICAL SURGICAL NURSING III CLINICAL** Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe patient care to clients and selected groups in a variety of settings. Experiences that facilitate entry into practice are included in this practicum. **Prerequisite:** NURS 2217/L, NURS 2218/L, NURS 2225/L. **Co-requisite:** NURS 2235. (Spring) (3, 0T, +3L)

**2240  ROLE TRANSITION/RN** This course is offered in the final semester of nursing studies and prepares the student for taking the national board exam for RN licensure
NURSING

(NCLEX-RN). The focus of this course is to provide the student with multiple opportunities to take NCLEX style tests, to build their test taking skills and strategies, to analyze and remediate questions, and to concentrate their study in the areas of needed knowledge. **Prerequisite:** NURS 2217/L, NURS 2218/L, NURS 2225/L. (Spring) (2, 2T+ 0L)

2245 PATHOPHYSIOLOGY This course focuses on the altered processes of human physiology. An emphasis is placed on exploring changes of biological process of the body and the effects on homeostasis. Alterations of health problems are studied along with the associated clinical manifestations and treatments. **Prerequisite:** BIOL 2238/L. (Spring) (4, 4T, 0L)

4400 NURSING IN TRANSITION This course examines the role of the baccalaureate prepared nurse in today’s health care systems. Historic, contemporary and future roles of the nurse are addressed. Skills in scholarly exposition and the use of technology are developed. **Prerequisite:** Admission to the program. (2, 2T+0L)

4401 INTEGRAL NURSING THEORY The Theory of Integral Nursing and Holistic Nursing Theories are explored. The concept of praxis is introduced. Florence Nightingale’s legacy and philosophical foundation are included. Students develop skills related to concepts such as self-awareness, self-care, relationship-centered care, nurse as environment and reflective practice. The use of conscious intention is emphasized. **Pre- or Co-requisite:** NURS 4400. (3, 3T+0L)

4410 AN INTEGRATED APPROACH TO EVIDENCE-BASED PRACTICE This course examines research methodologies utilized in nursing research. Emphasis is on utilization of research findings to establish evidence-based nursing interventions. Students analyze research findings aimed at selected health concerns. Students explore definitions of evidenced-based practice and examine how worldviews and theories influence research. **Prerequisites:** MATH 1350; **Pre or Co-requisite:** NURS 4400 and NURS 4401. (3, 3T+0L)

4420 INTEGRAL HEALTH ASSESSMENT This course emphasizes development of skills in health assessment of (allopathic) human systems. Alternative systems (i.e., Ayurvedic, Native American, Oriental Medicine, and Intuitive) are introduced. Skills in interviewing, history taking, physical examination, and documentation and use of assessment data in planning care are developed. Laboratory and selected clinical settings are used to practice skill development. The Theory of Integral Nursing is explored as a model to frame data collection, organization, and synthesis into a cohesive whole. **Pre- or Co-requisite:** NURS 4400 and NURS 4401. (3, 2T+1L)

4430 COMPLEMENTARY AND ALTERNATIVE THERAPIES IN NURSING This course provides an introduction to evidence-based complementary and alternative approaches to health care. Students acquire knowledge related to alternative and complementary healing modalities that can be incorporated into professional nursing practice and self-care practices. Students experience and develop beginning skills in the provision of CAM modalities as they interact with practitioners in selected clinical settings. **Pre or Co-requisites:** NURS 4400 and NURS 4401. (3, 2T+1L)

4440 HEALTH ISSUES, POLICY AND POLITICS IN HEALTH CARE (WIC) This course emphasizes empowering students with knowledge, skills, and attitudes to effect change in health policy to improve health care delivery. Students analyze contemporary health care issues of concern to nursing and learn strategies for effective involvement in policy-making decisions and policy implementation. Students examine work environments and the impact of organizational systems on the quality of care. Students apply the Theory of Integral Nursing to a current health policy issue in a position paper expressed orally to a group. **Pre or Co-requisite:** NURS 4400 and NURS 4401. (3, 3T+0L)
4450 COMMUNITY AND GLOBAL HEALTH I  This first of a 2-part course provides an overview of contemporary community health nursing practice. The influence of culture on healthcare beliefs and practices is emphasized. Self-care is linked to population health. Health problems of selected populations within New Mexico are examined. Public Health Nursing Competencies are linked with the Theory of Integral Nursing to form the basis for student’s learning experiences. Pre- or Co-requisites: NURS 4400 and NURS 4401, and strongly suggest NURS 4410. (3, 3T+0L)

4451 COMMUNITY AND GLOBAL HEALTH II  This second of a 2-part course examines global health issues in relationship to local, regional, and international nursing practice. Self-care is linked to global health. In this course students select and focus upon a global health issue relevant to local community nursing practice. A service learning project based upon the selected issue provides the focus of clinical experience. Prerequisite: NURS 4450. (4, 3T+1L)

4460 INTEGRAL COMMUNICATION AND TEACHING  This course examines communication techniques, coaching, and teaching strategies, to enhance and facilitate cognitive and behavioral change. Students demonstrate principles of Integral Health Coaching, Motivational Interviewing, and Non-Violent Communication. Students implement an evidence-based service learning teaching project. Prerequisite: NURS 4401. (2, 2T+0L)

4470 TRANSFORMATIONAL LEADERSHIP IN NURSING  This course focuses on the principles of transformational leadership as applied to the nurse leader at the bedside, within an organization, in the community, and in the profession. The student is introduced to Complexity Science, Appreciative Inquiry, and Emotional Intelligence. Self-care is promoted as a leadership quality. Career advancement through lifelong learning is emphasized. Prerequisite: NURS 4401. (4, 4T+0L)

4480 INTEGRAL NURSING CAPSTONE COURSE  This capstone course emphasizes reflection, integration, and synthesis of concepts from previous courses. It is primarily a self-directed course, and is based upon the creation of a senior portfolio which demonstrates learning in cognitive, affective, and psychomotor domains. The portfolio is designed to demonstrate evidence of mastery of program objectives and serves as an assessment of student learning. The portfolio includes evidence of ability to conduct integral health assessments and evidence of ability to develop and implement service learning projects. Students include evidence of skill development in the use of complementary/alternative therapies in nursing practice. A reflective essay and a plan for continued professional and personal development is included in the portfolio. Pre- or Co-requisites: All Nursing courses. (2, 2T+0L)

NUTRITION (NUTR)

2110 HUMAN NUTRITION  This course provides an overview of nutrients, including requirements, digestion, absorption, transport, function in the body and food sources. Dietary guidelines intended to promote long-term health are stressed. Prerequisite: BIOL 1100/L or CHEM 1120/L. (3, 3T+0L)

OFFICE ADMINISTRATION (OA)

1103 INTRODUCTION TO KEYBOARDING  Introduction to basic keyboarding skills on the letters of the alphabet, numbers, and symbols. Emphasizes speed and accuracy. This course is for students with no previous instruction in keyboarding. (1, 1T+S)

1151 INTRODUCTION TO MS PUBLISHER  Introduction to electronic desktop publishing, focusing on how to design and edit publications for use in a variety of personal and business applications. (1, 1T+0L)
2236  ADMINISTRATIVE PROCEDURES  You will study office procedures, technology, records management, human relations, ethics, and telecommunications. Prerequisites: BUSA 1210, ENGL 1110, and BCIS 2110. (Spring) (3, 3T+0L)

2261  DESKTOP PUBLISHING MS PUBLISHER  Introduction and application of desktop publishing concepts using Microsoft Publisher in the Windows environment to create flyers, newsletters, reports, brochures, resumes, and other publications using page-layout software. (3, 3T+0L)

2266  MICROSOFT OFFICE SPECIALIST TRAINING  This course will focus on advanced training in the use of the Microsoft Suite of software applications (Word, Excel, PowerPoint, and Access) in preparation to take the Microsoft Office User Specialist Exam (MOUS). Prerequisites: BCIS 2210, or BCIS 2217, or BCIS 2220 or BCIS 2230. (Spring) (1, 1T+0L)

PERSONAL DEVELOPMENT (PD)

108N  BASIC COMPUTATIONAL SKILLS  Develops proficiency in basic mathematical concepts, including addition, subtraction, multiplication, and division of whole numbers, fractions, and decimals. You will also study the use of percentages, ratios, solving for one unknown (pre-algebra), and determining simple geometric areas. Math concepts are presented in a simple, logical, and applied way to prepare you for MATH 100N or above. CR/NC (Fall and Spring) (4, 3T+1L)

121N  READING AND WRITING FOR COLLEGE SUCCESS  This course focuses on the skills necessary to succeed in college courses, including skills in critical reading and writing, critical thinking, study strategies, computer literacy, time management, and goal setting. Students will also be exposed to the services offered by essential campus resources and learn strategies to best utilize those resources for academic success. (4, 4T+0L)

120  BECOMING A MASTER STUDENT  Through concentrating on study skills, learning styles, goal setting, and developing critical thinking and writing skills you will be given an opportunity to develop strategies which you can adopt and modify for lifelong learning and academic, personal, and professional success. (1-3, 1-3T+0L)

PHILOSOPHY (PHIL)

Note: All 100 and 200 level courses have a Prerequisite of ENG 109N or an adequate score on the Course Placement Evaluation.

1120  LOGIC, REASONING & CRITICAL THINKING  The purpose of this course is to teach students how to analyze, critique, and construct arguments. The course includes an introductory survey of important logical concepts and tools needed for argument analysis. These concepts and tools will be use to examine select philosophical and scholarly texts. Prerequisite: ENGL 1110. (3, 3T+0L)

1160  HISTORY OF PHILOSOPHY  Surveys the history of philosophical thought from the ancient Greeks to the present. (3, 3T+0L)

2110  INTRODUCTION TO ETHICS  This course introduces students to the philosophical study of morality and will explore questions concerning our human obligations to others and related issues. Students may be asked to relate various approaches to ethics to present-day ethical debates and their own lives. (3, 3T+0L)

3300  COMPARATIVE METAPHYSICS  You will study texts from various cultures which show the metaphysical principles or assumptions regarding such matters as: whether time is linear or cyclical, and whether human beings are fundamentally individual or social. Prerequisite: PHIL 1120. (Fall) (3, 3T+0L)
PHYSICAL EDUCATION

3364  GREAT WORKS OF WESTERN PHILOSOPHY  You will explore major works from the Western philosophical tradition, using varied texts based on student and instructor interest. You may take this course twice for credit (with permission of program director). Prerequisite: PHIL 1120. (Fall) (3, 3T+0L)

3366  GREAT WORKS OF ASIAN THOUGHT  You will explore a selection of canonical readings from the classical Eastern traditions, including literary, philosophical, and religious writings of China, India, and Japan. You will use textual analysis which emphasizes recurrent, essential themes and concepts to highlight common themes between texts in an effort to identify the shared wisdom in these diverse traditions. Prerequisite: PHIL 1120. (Spring) (3, 3T+0L)

4452  PHILOSOPHY OF TECHNOLOGY  You will examine technology in its distinctly Western form by tracing the essence of technology back to fundamental characteristics of Western thinking, beginning with the ancient Greek philosophers through contemporary philosophical analyses of technology. You will explore technology through popular works (such as film), which provide insight into the current human relationship to technology. Prerequisite: PHIL 1120. (Spring) (3, 3T+0L)

PHYSICAL EDUCATION (PHED)

All PHED courses are graded Credit/No Credit (CR/NC).

1110  AEROBICS I  Exercise and movements for general physical fitness. (1, 0T+1SL)

1210  BASKETBALL  Instruction and participation in the game of basketball, including rules, skills, shots, and strategies. (1, 0T+1L)

1230  GOLF  Focuses on the development of knowledge and skill competencies necessary to play golf; emphasis is placed on skill progressions, practice opportunities, and error diagnosis and correction. (1, 0T+1L)

1280  BEGINNING VOLLEYBALL  Teaches you the basic skills and rules of volleyball, emphasizing learning basic bump, set, and spike which are the fundamentals of volleyball skills. (1, 0T+1L)

1320  SWIMMING  A course for those who can swim, not for those who want to learn the basics. It involves supervised lap swimming, including some instruction in swimming for fitness. (1, 0T+1L)

1320  WATER AEROBICS  Exercises and movements in waist-high water, and usually performed to music, to promote general fitness and health. This course is self-paced and non-competitive, and the ability to swim is not required but preferred. (1, 0T+1L)

1410  INTRODUCTION TO KUNDALINI YOGA  Introduces you to Kundalini Yoga techniques and postures, emphasizing meditation and breathing. (1, 0T+1L)

1410  STRESS RELIEF YOGA  You will learn intermediate Kundalini Yoga in support of stress relief, through its imparting a deeper experience of yogic technology and the principles for managing stress and renewing vitality on a constant basis. (1, 0T+1L)

1410  WEIGHT LOSS YOGA  You will learn intermediate Kundalini Yoga in support of weight loss, through its imparting a deeper experience of yogic technology in working on helping you achieve self-control and self-fulfillment. (1, 0T+1L)

1430  PILATES  You will learn the basic concepts and skills in the Pilates method of non-impact mat conditioning designed to increase core strength and stabilization, muscle tone, balance, coordination, and flexibility which develop whole body awareness and control, and which can be modified to various fitness levels. (1, 0T+1L)
1460  CONDITIONING EXERCISES Various exercises designed to promote endurance, strength, flexibility, and general physical fitness. (1, 0T+1L)

1460  POWER CONDITIONING I A conditioning course emphasizing aerobics, weight training and cardiovascular conditioning. (1, 0T+1L)

1510  WEIGHT TRAINING Skill training for developing strength and endurance with free weights and machines, emphasizing knowledge of equipment, lifting safety, and theories of training. (1, 0T+1L)

1830  WALKING/RUNNING FOR FITNESS Designed for all levels, including walkers, joggers, race walkers, and competitive marathon runners. (1, 0T+1L)

2250  TECHNIQUES OF COACHING BASKETBALL You will develop the knowledge and skill competencies you need for coaching, with an emphasis on skill progressions, practice opportunities, and error diagnosis and correction. Prerequisite: basic basketball skills. This course does not satisfy HPER requirements for graduation. (2, 1T+1L)

2310  INTERMEDIATE SWIMMING Designed for individuals with a swimming background, this course begins with a review of beginning techniques and continues on to five swimming strokes, with an introduction to the butterfly. Emphasis is on building endurance in preparation for Lifeguard Training course. May be repeated twice for credit. Prerequisite: Must have swimming background and familiarity with basic swimming strokes. (1, 0T+1L)

2460  POWER CONDITIONING II This is an advanced cardiovascular conditioning course, utilizing weight training, aerobics, and exercise equipment. Prerequisite: HPER 125. (1, 0T+1L)

PHYSICS (PHY)

1230  APPLIED PHYSICS I An algebra-based treatment of Newtonian mechanics. Topics include kinematics and dynamics in one and two dimensions, conservation of energy and momentum, rotational motion, equilibrium, and fluids. Prerequisite: MATH 1215; Co-requisite: PHYS 1230L. (3, 3T+0L)

1230L  APPLIED PHYSICS I LAB A series of laboratory experiments associated with the material presented in PHYS 1230. Co-requisite: PHYS 1230. (1, 0T+1L)

1240  APPLIED PHYSICS II The second half of a two semester algebra-based introduction to Physics. This course covers electricity, magnetism and optics. Prerequisite: PHYS 1230/L; Co-requisite: PHYS 1240L. (3, 3T+0L)

1240L  APPLIED PHYSICS II LAB A series of laboratory experiments associated with the material presented in PHYS 1240. Co-requisite: PHYS 1240. (1, 0T+1L)

1310  ENGINEERING PHYSICS I A calculus level treatment of classical mechanics and waves, which is concerned with the physical motion concepts, forces, energy concepts, momentum, rotational motion, angular momentum, gravity, and static equilibrium. Prerequisite: MATH 1510 or ENGR 120; Co-requisite: PHYS 1310L. (3, 3T+0L)

1310L  ENGINEERING PHYSICS I LAB A series of laboratory experiments associated with the material presented in Calculus-based Physics I. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-based Physics I. Co-requisite: PHYS 1310. (1, 0T+1S)

1320  ENGINEERING PHYSICS II A calculus level treatment of classical electricity and magnetism. It is strongly recommended that this course is taken at the same time as Calculus-based Physics II laboratory. Prerequisite: PHYS 1310/L; Co-requisite: PHYS 1320L. (3, 3T+0L)
POLITICAL SCIENCE

1320L ENGINEERING PHYSICS II LAB A series of Laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-Based Physics II. Co-requisite: PHYS 1320. (1, 0T+1L)

2115 GENERAL PHYSICS You will study optics and modern physics. Prerequisites: PHYS 1240/L or PHYS 1320/L; Co-requisite: PHYS 2115L. (3, 3T+0L).

2115L GENERAL PHYSICS LAB You will engage in laboratory experiences supportive of PHYS 2115, for which this course is a Co-requisite. (1, 0T+1L).

2992 UNDERGRADUATE RESEARCH EXPERIENCE IN PHYSICS A math-based experience in physics research, combining computational and experimental techniques through which you will learn computational modeling, experimental design, library and internet information searches and research methodology while interacting with peers and faculty. You will prepare a technical report or poster on your activities. Research questions focus on nonlinear dynamics, chemical physics, and particle physics. (may be repeated for credit). Prerequisite: Grade average of at least 3.50 in MATH 1215 and MATH 1220, or permission of instructor. (3, 3T+0L)

3302 OPTICS You will study geometrical optics, wave theory of light, Fresnel and Fraunhofer diffraction, polarization, absorption, dispersion, and scattering. Prerequisite: PHYS 2115/L. (3, 3T+0L)

3330 INTRODUCTION TO MODERN PHYSICS You will study special relativity, quantum effects, quantum mechanics, atomic and subatomic physics, and the instruments of modern physics. Prerequisite: PHYS 2115/L; Co-requisite: PHYS 3330L. (3, 3T+0L)

3330L INTRODUCTION TO MODERN PHYSICS LAB You will engage in laboratory experiences supportive of PHYS 3300, for which this course is a Co-requisite. (1, 0T+1L)

3331 THERMODYNAMICS AND STATISTICAL MECHANICS You will study the concepts of heat and thermodynamics, large numbers and probability distributions, oscillator, spin and gas systems, simple interacting systems, and Fermi statistics. Prerequisites: MATH 3311 and 3314. (3, 3T+0L)

4405 ELECTRICITY AND MAGNETISM You will study electrostatics, the theory of dialectic materials, magnetostatics, the theory of magnetic materials, direct and alternating circuit theory, Maxwell equations, propagation, refraction and reflection of plane waves and wave guides. Prerequisites: MATH 3311 and 3312. (3, 3T+0L)

POLITICAL SCIENCE (PSCI)

Note: All courses have a Prerequisite of ENG 109N or an adequate score on the Course Placement Evaluation.

1110 INTRODUCTION TO POLITICAL SCIENCE This course covers fundamental concepts in political science, such as political theories, ideologies, and government systems. (3, 3T+0L)

1120 AMERICAN POLITICS This course explains the role of American national government, its formation and principles of the Constitution; relation of state to the national government; political parties and their relationship to interest groups. This course also explains the structure of the legislative, executive, and judicial branches. (3, 3T+0L)

1130 ISSUES IN AMERICAN POLITICS This course is designed to introduce the students to the contemporary study of American political issues. The course analysis of government policies, examining various approaches to the economy, democracy and the structure and the function of American political institutions. (3, 3T+0L)
2160 STATE AND LOCAL GOVERNMENT This class is an introductory course designed to familiarize students with the institutions, politics, and policies of state and local governments in the United States. An underlying assumption of this course is that states and localities are the center of a stable and viable democracy. As such, a major objective of the course is the empowerment of each student through knowledge; that is, to provide students with the understanding, analytical and political skills, and motivation to become an active and knowledgeable part of state and local government and politics. The problems addressed at the state and local levels are usually highly contentious and controversial because they hit people close to their homes. Through this class, students will learn how to become effective solvers of those problems. (3, 3T+0L)

2310 THE AMERICAN PRESIDENCY You will study the presidency as an institution of power and of leadership and its relation to other political institutions. (3, 3T+0L)

**PSYCHOLOGY (PSYC)**

Note: All 100 and 200 level courses have a Prerequisite of ENG 109N or an adequate score on the Course Placement Evaluation, unless otherwise specified.

1110 INTRODUCTION TO PSYCHOLOGY This course will introduce students to the concepts, theories, significant findings, methodologies, and terminology that apply to the field of psychology. (3, 3T+0L) Meets New Mexico Lower Division General Education Core Curriculum Area IV Social and Behavioral Sciences

1130 INTRODUCTION TO SUBSTANCE ABUSE STUDIES This survey course offers an overview of the biological, psychological, and sociological aspects of drug and alcohol abuse and addiction and an overview of substance abuse problems in the family, school, and industry. Consideration will be given to current research, attitudes towards drugs, theories of drug addiction and treatment, and Licensed Alcohol and Drug Abuse Counselor requirements in the state of New Mexico. Prerequisite: ENGL 1110 (3,3T+0L)

1140 PSYCHOLOGY OF DRUG AND ALCOHOL ABUSE The physiological and behavioral effects of alcohol and other drugs will be examined. Emphasis is placed on the psychopharmacology of commonly abused substances, the disease concepts of chemical dependency, and on current research. Prerequisite: ENGL 1110 (3, 3T+0L)

2110 SOCIAL PSYCHOLOGY This course is an introduction to the scientific study of human social influence and interaction, and explores how an individual’s actions, emotions, attitudes and thought processes are influenced by society and other individuals. Prerequisites: ENGL 1110 and PSYC 1110. (3, 3T+0L)

2120 DEVELOPMENTAL PSYCHOLOGY Study of human physical and psychological change and stability from a lifespan development perspective. (3, 3T+0L)

2130 ADOLESCENT PSYCHOLOGY Study of human physical and psychological change and stability from adolescence through the emerging adulthood years. (3, 3T+0L)

2140 CHILD PSYCHOLOGY Study of human physical and psychological change and stability from conception through the late childhood years. (3, 3T+0L)

2160 BASIC COUNSELING TECHNIQUES In this course, you will become acquainted with basic counseling skills, including active listening techniques such as paraphrasing, summarization, attending behaviors, and focusing; emphasis is on rehearsal of skills. (3, 3T+0L)

2210 ABNORMAL PSYCHOLOGY This course provides students with an introduction to the field of abnormal psychology. Subject areas include history, methods, theories, etiologies, classification and treatment of disorders. (3, 3T+0L)
2230  PSYCHOLOGY OF ADJUSTMENT  This course focuses on the individual’s adjustment to society, and the application of psychological principles to the understanding of adjustment. (3, 3T+0L)

2240  PSYCHOLOGY OF PERSONALITY  Theories of personality introduces students to the major theories in the development of personality. Students will analyze in detail the major theories of personality including psychoanalytic, behavioral, social learning, humanistic and trait theory. Students will have the opportunity to apply these theories in practical examples and applications whenever possible and appropriate. (3, 3T+0L)

2286  POST TRAUMATIC STRESS DISORDER, DIAGNOSIS AND TREATMENT  The purpose of this course is to prepare students to serve as Trauma Stress Aides. Materials that inform understanding of the impact of psychological trauma, diagnosis, treatment strategies will be presented. Prerequisite: ENG 109 or passing score on the English Competency Exam. (3, 3T+0L)

2315  DRUG AND ALCOHOL ASSESSMENT, REFERRAL, & TREATMENT METHODS  You will study twelve core functions and global criteria of the alcohol and other substance abuse, including screening, intake, orientation, assessment, crisis intervention, treatment planning, counseling, case management, client education, referral, report and record keeping, and consultation with other professionals in regard to client treatment and services. Attention will be given to the ethical considerations involved in the therapeutic process. In this course you will devote six clock hours to ethics of the substance abuse counselor. Pre- or Co-requisites: PSYC 1130, ENGL 1110. (3,3T+0L)

2340  PSYCHOLOGY OF PERSONAL GROWTH & INTERPERSONAL RELATIONS  Students will apply psychological insights and principles to better understand themselves and their relationships with others and the world in order to live more effectively. Such topics as self-identity, role of emotions in behavior, love, relationships, health and stress, sexuality, death, meaning and values, forgiveness, and non-violent communication will be explored. This course is experiential in nature with an emphasis on dialogue and group activities. No Prerequisites. (3, 3T+0L)

2440  FAMILY SYSTEMS THEORY  This course examines different theoretical approaches including major systems theories, strategies, and techniques of family therapy. It emphasizes the application of counseling interventions with struggling or dysfunctional family structures. (3, 3T+0L)

2990  PRACTICUM  Field or practical experience for individuals in the Human Services degree program: supervision by faculty member and a professional worker in a situation involving practical application of skills learned in the classroom. With the instructor’s guidance and permission, you will arrange for the experience which requires at least 50 clock hours of supervised experience for each credit hour granted. Prerequisite: HMSV 1110 and permission of the program director. (3, 3T+0L)

3301  BIOPSYCHOLOGY  You will explore the biological bases of behavior, learning how the biological perspectives are applied to understanding behavior including, but not limited to, anatomy and physiology of the brain, sensory systems, genetics, sexuality, hormones, neurotransmitters, and the biological basis of learning, memory, emotions, and stress. Prerequisites: ENGL 1110 and PSYC 1110. (3, 3T+0L)

3302  ISSUES OF DEATH AND DYING  This course studies the issues of death and dying including individual and social perspectives, developmental understanding of death, impact of death on families, the stages of dying and grief and the legal and ethical issues regarding death and dying. Prerequisites: ENGL 1110 and PSYC 1110. (3, 3T+0L)
3305 POSITIVE PSYCHOLOGY This course studies how human beings prosper in the face of adversity. Its goal is to identify and enhance the human strengths and virtues that make life worth living. Prerequisites: ENGL 1120 and PSYC 1110 (Fall, Spring, Summer). (3, 3T+0L)

3321 RESEARCH DESIGN This course presents the methods of scientific research, using active learning and hands-on experiences, to include an emphasis in theory and in learning the basic skills of research methodology such as experimental and quasi-experimental design. There will be a module on ethics of research. The goal of this class is for the student to have acquired the skills necessary to conduct research in an independent research project. Offered only in the Fall. Students planning to graduate in May should take this course in the Fall before their projected Spring graduation. Prerequisites: ENGL 1110 and PSYC 1110. Cross listed with CJUS 3321. (3, 3T+0L)

4400 SPECIAL TOPICS IN PSYCHOLOGY You may enroll in this course twice for credit as its content and focus will be on varied specialized fields in psychology. Prerequisites: ENGL 1110 and PSYC 1110. (3, 3T+0L)

4410 COMPARATIVE PERSPECTIVES IN PSYCHOLOGY In this course, you will examine various theories related to the fundamental nature of the mind, mental states, and mental processes. Your study will emphasize traditional perspectives of the East and the West, giving careful consideration to questions concerning the relation between the mind and the physical world. Prerequisites: ENGL 1110 and PSYC 1110. (3, 3T+0L)

4411 HUMAN ECOLOGY Because each of us contributes to the human ecological web, in this course you will explore how the human psychological perspective and environment are independent and interrelated. Prerequisites: ENGL 1110 and PSYC 1110. (3, 3T+0L)

4421 INDEPENDENT RESEARCH PROJECT You will implement, interpret, and report on individually designed research projects. Prerequisite: PSYC 3321. (3, 3T+0L) Cross listed with CJUS 4421.

4477 PSYCHOLOGY OF GENDER AND SEXUALITY The student will explore issues in the behavior of men and women, including theoretical perspectives, stereotyping, gender differences, development, sexuality, and social and cultural problems. Prerequisites: ENGL 1110 and PSYC 1110. (3, 3T+0L)

PUEBLO INDIAN STUDIES (PINS)

Note: All 200 level courses have a Prerequisite of ENG 109N or adequate score on Course Placement Evaluation.

1110 INTRODUCTION TO PUEBLO INDIAN STUDIES Bepowaveh - Welcome! This course will provide an introduction to the Pueblo experiences of New Mexico by drawing upon historical contacts, relations, literature and stories. Our class material will include lectures, films, guest speakers and site visits to important historical places and collections. Prerequisite: ENG 109N. (Fall, Spring) (3, 3T+0L)

2110 NATIVE AMERICAN LITERATURE I Involves a survey of Native American writing from the time of the European invasion to the present with an emphasis on contemporary authors. Cross-listed as ENG 265. Prerequisite: ENGL 1110. (3, 3T+0L)

2120 NATIVE AMERICAN LITERATURE II Involves critical reading and discussions of writings by Native American writers of fiction (short stories and novels) and poetry. Cross-listed as ENG 266. Prerequisite: ENGL 1110. (3, 3T+0L)

2130 PUEBLO INDIAN HISTORY You will study academic approaches to historical studies of Pueblo Indians in New Mexico and Arizona from pre-Columbia to the present using archival sources, ethno-historical resources, and federal records. (3, 3T+0L)
2140 RADIATION PROTECTION

2140 PUEBLO ARTS, CRAFTS, AND CULTURE You will be introduced to this course through stories which accompany hands-on learning in various arts and crafts as told in the Pueblos for daily life and the transmission of cultural practices and knowledge. The course is taught by social scientists, along with artists in beadwork, fabric work, wood carving, storytelling, and more. (3, 3T+0L)

2150 PUEBLO INDIAN WOMEN’S LIVES You will survey anthropological, sociological, historical, life history, art and its SENSES OF PLACE. You will examine the meaning of place in your life and its particular importance to understanding Native identity and culture. You will focus on how to relate place with examples of how Native writers, poets, artists, storytellers, and other performers convey a “sense” or “spirit” of place in their work. Cross-listed as HUM 381. Prerequisites: PIS 200 and ENGL 1110. (Fall, Spring) (3, 3T+0L)

3386 SPECIAL TOPICS IN PIS Prerequisites: PIS 200 and ENGL 1110. (Fall, Spring) (1-6, 1-6T+0L)

4458 ADVANCED RESEARCH You will further develop research techniques applied throughout PIS courses through a focused, individual research project. Prerequisite: Permission of instructor. (Spring) (3, 3T+0L)

4483 TEWA ETHNOBIOLOGY: PLANTS AND ANIMALS OF THE TEWA WORLD You will study, through lecture and field trips, how Tewa cultures reproduce knowledge of nature, including how indigenous plants and animals are named in Tewa dialect, as well as Spanish and English, and how those introduced by Spanish and American settlers became incorporated into Tewa culture. Prerequisites: PIS 200 and ENGL 1110. (Fall, Spring) (3, 3T+0L)

4484 AGRICULTURE PRACTICES OF THE PUEBLO WORLD You will study diverse agricultural practices used by Eastern and Western Pueblos from pre-Columbian times to the present. Prerequisites: PIS 200 and ENGL 1110 (Fall, Spring) (3, 3T+0L)

4488 PUEBLO INDIAN STUDIES SENIOR SEMINAR This is your capstone course which is designed to bring Integrated Studies students together in your final semester for an intensive review of materials covered in your full course of study. Prerequisite: PIS 458. (Spring) (3, 3T+0L)

RADIATION PROTECTION (RDPR)

2233 RADIATION BIOLOGY Survey of radiobiology: effects of differing types of radiation on matter, different radiations and their properties; detailed modes of action of radiation on biochemical and biophysical systems with emphasis on the large macromolecules of living tissue; nature of radiation damage to long-chain nucleic acid molecules; potential problems from indiscriminate use of radiation therapy and diagnostic x-rays, and nuclear facility accidents; effects of low-level radiation exposure. Cross-listed as ENVS 3333. (Fall only) (3, 3T+0L)

2234L INTRODUCTION TO RADIOSCIENCE AND TECHNOLOGY Production, properties, interactions, dosimetry, detection and instrumentation of radiations from radioisotopes, radiation producing equipment, and nuclear reactors; phenomenon of radioactive materials from the viewpoint of nuclear stability, decay processes, and interaction with matter; devices and instrumentation for detection of radiation sources; applications of radiation and radioisotope techniques; radiation safety. (Fall only) (4, 3T+1L)

2238L INTRODUCTION TO RADIATION PROTECTION Theory and practice of radiation protection: health physics programs for area, site, and personnel monitoring for various types of facilities including nuclear materials production and processing, nuclear reactors, accelerators, radioisotope handling, and x-ray production facilities; interaction of radiation
with material; devices and instrumentation for the detection of radiation with emphasis on health physics applications; safe handling procedures and survey methods; translation of guides and regulations to working procedures. **Prerequisite:** RDPR 2234L, or permission of instructor. (Spring only) (4, 3T+1L)

**2242 PROBLEMS IN RADIATION PROTECTION** Considers current topics of concern in radiation protection, such as natural radiations, radiations peculiar to industrial and manufacturing processes, low-level radiation exposure, and ALARA principles. **Prerequisite:** RDPR 2234L, or permission of instructor. (4, 4T+0L)

**2243 PRACTICAL RADIOLOGICAL PROGRAMS AND SAMPLING METHODS** Practical methods of handling Health Physics problems in the field. Includes techniques for environmental monitoring, sampling, and contamination control. Environments covered: uranium, plutonium, and tritium facilities, and accelerators, reactors, and general hospitals. (4, 4T+0L)

**READING IMPROVEMENT (RDG)**

**108N READING IMPROVEMENT** Introduces students to reading required for vocational programs and the workplace. Comprehension and critical thinking are stressed. **Prerequisite:** ENG 106N or adequate score on Course Placement Evaluation. (3, 3T+0L)

**109N READING AND CRITICAL THINKING** Introduces students to reading required for college success. You will work on comprehension, problem solving, not taking summarizing and computer assisted research. **Prerequisite:** RDG 108N, or adequate score on Course Placement Evaluation. (3, 3T+0L)

**RENEWABLE ENERGY (RE)**

**103 RENEWABLE ENERGY INTRODUCTION AND OVERVIEW** In this course you will view the past, present, and future fields of renewable energy used to: heat, light, and cool buildings; produce domestic hot water; power, heat, and cool industrial processes; provide transportation; and provide communications. You will cover many systems: passive, active, and photovoltaic solar; wind; micro-hydro; wave; geothermal; biomass; fuel cells; human and animal power; and hydrogen. You will also cover vehicle fuels, such as ethanol, biodiesel, CNG, along with electric and hybrid systems, regenerative braking, and flywheels. Classes will be conducted both on- and off-campus. **Prerequisite:** ENG 108N and MATH 100N. (3, 3T+0L)

**108 ACTIVE SOLAR HEATING** Solar energy can supply heat for buildings, domestic hot water, and industrial processes. Active systems acquire heat with collectors; distribute the heat with fluids driven by pumps or blowers; store the heat in liquids, solids, or change-of-state materials; and control the process with electrical or electronic sensors and controls. In this course you will analyze requirements and match needs with appropriate systems. Recommended **Co-requisite:** RE 108L. (3, 3T+0L)

**108L SOLAR ENERGY LAB** Working with components of both active and passive solar heating systems: flat plate and concentrating collectors; heat transfer gasses, liquids, and solids; monitoring, control, and distribution systems; glazing, selective surfaces; and low emissivity materials. You will cover heat storage in liquids, solid, and change-of-state materials, with an emphasis on mounting components, pipe and duct connections, and safety. Classes will take place on- and off-campus. Recommended **Co-requisite:** RE 108 or ADOB 107. (2, 0T+2L)

**111 BEGINNING PHOTOVOLTAIC INSTALLATION** Introduction to photovoltaic energy and photovoltaic (PV) system installation. Includes markets and applications, safety
RENEWABLE ENERGY

basics, electricity basics, energy efficient appliances, solar energy fundamentals, photovoltaic materials, module fundamentals, concentrators, system components, system sizing, electrical design, mechanical design, and performance analysis and troubleshooting. This course specifically provides preparation for the North American Board of Certified Energy Practitioners (NABCEP) Photovoltaic Installer Certification exam. (Fall, Summer, Spring) (3, 1T+2L)

112 ROOF MOUNTING FOR SOLAR INSTALLATION Techniques and skills for Photovoltaic (PV) installers to size, design, and install solar panels. An introduction to different types of mounting systems, site location of panels, orientation to house, shading at the site, weather, roof materials, soil and load bearing capacity. (Fall, Spring, Summer) (4, 2T+2L)

127 GEOTHERMAL SYSTEMS FOR HEAT AND POWER You will discuss the full range of geothermal systems, from their origins and uses to how geothermal energy can provide industrial process heat and electrical energy. Classes will take place on- and off-campus. Prerequisite: RE 103. (4, 2T+2L)

128 BIOMASS SYSTEMS FOR HEAT, POWER, AND COGENERATION You will study biomass, a wide range of heat and energy productions systems that use plant materials. You will also study the range of equipment: from the fire pit to the highly efficient nearly zero-emitting industrial furnaces. You will be introduced to coal-fired power plants, carbon material, and carbon-neutral and carbon-sequestering concepts. You will work with small scale systems and equipment both on- and off-campus. Prerequisite: RE 103. (4, 2T+2L)

129 TRENDS AND EMERGING ENERGY SOURCES You will use this class as a forum to research, discuss, and forecast emerging trends in the field of renewable and emerging energy sources, which have been around for a long time and have now grained international attention and a high status not previously enjoyed to the extent that homeowners, garage scientists, multinational companies and national governments are focused on incremental developments and giant leaps into new technologies. Prerequisite: RE 103. (2, 2T+0L)

207 WIND ENERGY SYSTEMS DESIGN AND INSTALLATION In this course you will study and discuss electrical energy production from the wind, including mechanical windmill water pumps; generator types from propeller driven units on towers to vertical axis turbines and emerging designs; the installation and maintenance of systems and safety concerns. Classes will take place on- and off-campus. Prerequisites: ENG 108N, MATH 100N, RE 103, and ECET 160. Recommended Co-requisite: ELEC 190. (4, 2T+2L)

208 PHOTOVOLTAIC SYSTEMS DESIGN AND INSTALLATION In this course, you will cover the rapidly developing technology dealing with electrical energy production from the sun. You will study the contrasts between AC versus DC, and grid-tied versus stand-alone systems. You will discuss collectors, batteries, control systems, disconnects, over-current protection and distribution to structures, with an emphasis on the installation and maintenance of systems and safety concerns. Classes will take place on- and off-campus. Prerequisites: ENG 108N, MATH 100N, RE 103. Recommended Co-requisite: ELEC 190. (4, 2T+2L)

212 ADVANCED PHOTOVOLTAIC INSTALLATION Continuation of RE111. Includes advanced photovoltaic (PV) energy and system installation training, safety basics, stand-alone PV system sizing, grid-tied system sizing, National Electric Code (NEC), compliant wire sizing, grounding of PV systems, site analysis and array mounting, and PV system commissioning, troubleshooting, maintenance and performance evaluation. This course specifically provides preparation for the North American Board of Certified Energy Practitioners (NABCEP) Photovoltaic Installer Advanced Certification exam. (Fall, Spring, Summer) (3, 1T+2L)
SOCIOLOGY (SOCI)

Note: All courses have a Prerequisite of ENG 109N, or adequate score on the Course Placement Evaluation.

1110 INTRODUCTION TO SOCIOLOGY  This course will introduce students to the basic concepts and theories of sociology, as well as to the methods utilized in sociological research. The course will address how sociological concepts and theories can be utilized to analyze and interpret our social world, and how profoundly our society and the groups to which students belong influence them. Students will be given the opportunity to challenge their “taken for granted” or “common sense” understandings about society, social institutions, and social issues. Special attention will also be paid to the intimate connections between their personal lives and the larger structural features of social life. In addition, the implications of social inequalities, such as race/ethnicity, gender, and social class will be central to the course’s examination of social life in the United States. (3, 3T+0L)

1310 SOCIOLOGY OF ALCOHOL AND SUBSTANCE ABUSE  You will survey the history, law, economics, and social problems regarding alcohol and drug use and abuse, including prevention and treatment efforts. (3, 3T+0L)

2210 SOCIOLOGY OF DEVIANCE  This course is designed to provide an overview of the study of deviance and social control from multiple sociological perspectives. The instructor will present how sociologists research deviance and social control and the ethical issues involved in studying human subjects involved in these activities. The course also examines central sociological theories for understanding the causes of deviant behavior. (3, 3T+0L)

2240 SOCIOLOGY OF INTIMATE RELATIONSHIPS AND FAMILY  This course provides an overview of contemporary intimate relationships and families from sociological perspectives. We will examine intimate relationships and families as social constructions whose meanings have changed over time and from place to place. This course will aid students in developing a greater understanding of intimate relationships and families as institutions in contemporary U.S. society. Intersections of race, class, gender, sexual orientation, nationality, and other factors within these institutions will be addressed. (3, 3T+0L)

2250 SOCIOLOGY OF RACE AND ETHNICITY  This class will examine race and ethnicity as social constructs, including the history of race and ethnic relations in the United States and how and why these constructs continue to play such important roles in the lives of U.S. peoples today. This course will also explore how other types of social stratification, such as class, gender, nationality, and sexual orientation, intersect with race and ethnicity. (3, 3T+0L)

2260 SOCIOLOGY OF AGING  This is an introductory gerontology course for students interested in behavioral, social, or family studies. The course is designed to understand the separate processes of biological, psychological, and social aging and how these aging processes interact with each other and with our environment. (3, 3T+0L)

2310 CONTEMPORARY SOCIAL PROBLEMS  This course studies the nature, scope, and effects of social problems and their solutions. The course will concentrate on sociological perspectives, theories, and key concepts when investigating problems, such as inequality, poverty, racism, alienation, family life, sexuality, gender, urbanization, work, aging, crime, war and terrorism, environmental degradation, and mass media. This course is designed to build students’ sociological understanding of how sociological approaches attempt to clarify various issues confronting contemporary life, as well as how sociologists view solutions to these problems. (3, 3T+0L)
SOCIAL WORK / SPANISH / SPECIAL COURSES / TOPICS / INDEPENDENT STUDY

SOCIAL WORK (SOWK)

2110  INTRODUCTION TO HUMAN SERVICES AND SOCIAL WORK  Introduces you to the structure, nature, purpose, and procedures of the private and public human services systems; i.e., health, welfare, education, employment, religion, and criminal justice. During this course, you will be required to perform two hours per week of field or practical experience in the community. (3, 3T+0L)

SPANISH (SPAN)

1124  BEGINNING CONVERSATIONAL SPANISH I  For non-native speakers of Spanish; simple conversation, designed primarily to give students extra practice in the oral use of language. (1-3, 1-3T+0L)

1110  SPANISH I  Designed for students with little exposure to Spanish, this course develops basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication at the Novice Level of proficiency based on ACTFL guidelines. During this course, students perform better and stronger in the Novice-Mid level while some abilities emerge in the Novice High range. This is an introductory course aimed at helping the student to communicate in Spanish in everyday familiar situations via recognition and production of practiced or memorized words, phrases, and simple sentences. (3, 3T+0L)

1120  SPANISH II  Designed for students with some degree of exposure to Spanish in high school and/or at home, this course continues to develop basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication based at the Novice High Level of proficiency based on ACTFL guidelines, although a few abilities may emerge in the Intermediate Low Level. Students in this course communicate in Spanish in familiar topics using a variety of words, phrases, simple sentences and questions that have been highly practiced and memorized. Prerequisite: SPAN 1110. (4, 4T+0L)

1421  SPANISH FOR MEDICAL PERSONNEL I  An introductory course in Spanish medical vocabulary and terminology. The course focuses on situations commonly encountered by healthcare professionals, such as routine physical exams, basic laboratory tests, patient interviews, the delivery of a baby, and giving instructions regarding medication and follow-up procedures that patients should understand. Key vocabulary, grammatical structures and proper pronunciation are introduced in the context of a practical medical situation. (3, 3T+0L)

SPECIAL COURSES / TOPICS (TP)

1147, 2247  Lower division courses in selected subject areas. When available they will be shown in the published Schedule of Classes with a specific descriptive title. No more than 6 credit hours of “TOPICS” courses may be applied toward completion of an associate degree or certificate. (1-6)

399, 499  Upper division courses in selected subject areas. When available they will be shown in the published Schedule of Classes with a specific descriptive title. No more than 6 hours of “TOPICS” courses may be applied toward completion of a baccalaureate degree. (1-6)

SPECIAL COURSES / INDEPENDENT STUDY (IS)

2248, 3398, 4498  Reserved for students whose educational needs cannot be met within the traditional curriculum offerings. Individual work experience, research projects, or
practicum may be used to earn credit through Independent Study. No more than 6 credit hours of Independent Study courses may be applied towards completion of an associate degree or certificate, or toward a baccalaureate degree (1-6)

Syllabi for all Special Courses must be on file at the Registrar’s Office prior to the first day of the semester in which the Topics or Independent Study course will be offered.
Administration, Faculty, and Staff

BOARD OF REGENTS
Michael A. Martin . . . . . . . . . . . . . . President of the Board
Erica Rita Velarde, PE . . . . . . . . . . . . Vice-President
Porter Swentzell, PhD . . . . . . . . . . . . Secretary/Treasurer
Damian Martinez, Esq . . . . . . . . . . . . Member
Tomás Rodriguez . . . . . . . . . . . . . . Member

CHIEF EXECUTIVE OFFICER
Richard Bailey, Jr., PhD . . . . . . . . . . . . President, Northern New Mexico College

CHIEF ACADEMIC OFFICER
Ivan López Hurtado, PhD . . . . . . . . . . . . Provost, Vice President for Academic Affairs

ADMINISTRATIVE OFFICERS
Ricky Bejarano, CPA, CGMA . . . . . . . . Vice President for Finance and Administration

DEANS & CHAIRPERSONS
Sadie Ahmed, PhD . . . . . . . . . . . . . . Chair, College of Engineering and Technology
Lori Baca, D.B.A . . . . . . . . . . . . . . . . Dean, College of Business Administration
Mateo Frazier, MA . . . . . . . . . . . . . . Chair, Arts, Film and Media
Lori Frankin, MA . . . . . . . . . . . . . . Chair, Language and Letters
Joaquin Gallegos, MS . . . . . . . . . . . . Chair, Biology, Chemistry, and Environmental Science
Tara M. Lopez, PhD . . . . . . . . . . . . . Chair, Humanities and Social Sciences
Sandra Rodriguez, PhD . . . . . . . . . . Chair, College of Education
Ellen Trabka, MSN . . . . . . . . . . . . . Dean, College of Nursing and Health Sciences
David Torres, PhD . . . . . . . . . . . . . Chair, Mathematics and Physical Science

ACADEMIC PROGRAM DIRECTORS
Ana X. Gutiérrez Sisneros, PhD . . . . . Interim Director, ADN Nursing Program
ADMINISTRATIVE DIRECTORS / COORDINATORS / MANAGERS

Kristy Alton, MA . . . . . . . . . . Project Director, Title V CASSA
Janice Baca, BBA . . . . . . . . . . Associate Registrar
Julianna Barbee, MA . . . . . . . . Director, Small Business Development Center
Tobe Bott-Lyons, MA . . . . . . . . Director, Upward Bound
Ryan Cordova, BA . . . . . . . . . . Director, Athletics / Head Men’s Basketball Coach
Kenneth Dvorak, PhD . . . . . . . Director, Center for Distance Learning
Shari Jobe, BS . . . . . . . . . . . . . Director, High School Equivalency Program (HEP)
Sandy Krolick, MA . . . . . . . . . Creative Director, Communications & Marketing
Cindy Leyba, BAFA . . . . . . . . Director, Adult Education Program
Kenneth Lucero, BA . . . . . . . . Interim Director, Human Resources
Jimi Montoya . . . . . . . . . . . . . Director, Information Technologies
Sara McCormick, MA . . . . . . . Assistant Director, Recruitment
Frank Orona, MA . . . . . . . . . . Interim Dean, Student Services
                            Director, Admissions & Recruitment
Jacob Pacheco, BA . . . . . . . . Director, Financial Aid
Andy Romero . . . . . . . . . . . Director, Facilities & Security
Carmella Sanchez, MS . . . . . Director, Institutional Research
Richard Sedillo . . . . . . . . . . Student Life Coordinator
Tamara Trujillo, MA . . . . . . . Coordinator, Assessment and Accreditation
Patricia Trujillo, PhD . . . . . Director, Diversity & Equity
Verna Trujillo, MA . . . . . . . . Coordinator, Accessibility Resources Center
Stephanie Vigil-Roybal, MA . . . Director, College Assistance Migrants Program
Gerald Wheeler, MS . . . . . . . . Registrar
Lisa Wilson, MA . . . . . . . . . . Director, Advisement & Student Success
FULL-TIME FACULTY

Sadia Ahmed, Assistant Professor
University of South Florida: PhD, 2014

Claudia Aprea, Associate Professor
University of Washington-Seattle: PhD, 1996

Lori Baca, Associate Professor
University of Phoenix: D.B.A., 2014

David Barton, Associate Professor
Pacifica Graduate Institute: PhD, 2006

Teresa Beaty, Assistant Professor
University of Texas at Arlington: PhD, 2014

Robert Beshara, Assistant Professor
University of West Georgia: PhD, 2018

Sarah Bogar, Assistant Professor
University of New Mexico: MSN, 2011

G. Scott Braley, Assistant Professor
Colorado State University: PhD, 2019

Melanie Colgan, Assistant Professor
University of New Mexico: MSN, 2004

Steven Cox, Assistant Professor
Rensselaer Polytechnic Institute: PhD, 1988

Victoria Eckhart, Visiting Professor
Stayer University: MBA, 2005

Betty Espinoza, Technical Assistant Professor
Northern New Mexico Community College: AAS, 1995

Kiersten Figurski, Assistant Professor
New Mexico Highlands University: MA, 2017

Lori Franklin, Associate Professor
California State University: MA, 1989

Mateo Frazier, Associate Professor
The New School: Media Studies, MA, 2010

Joaquin Gallegos, Assistant Professor
New Mexico State University: MS, 2007

Jerome Gomez, Assistant Professor
University of New Mexico: PhD, 2015

Gloriadell Gonzales, Technical Assistant Professor
Northern New Mexico College: Certificate, 2008
Ana Malinalli X. Gutiérrez Sisneros, Assistant Professor
New Mexico State University: PhD, 2017

Ajit Hira, Associate Professor
University of Texas–Arlington: PhD, 1990

Joan Hodge, Assistant Professor
University of Texas-Austin: MSN, 1976

Mario Izaguirre-Sierra, Associate Professor
John Innes Center, East Anglia University: PhD, 2009

Pamela Lapcevic, Associate Professor
New Mexico Highlands University: MA, 2009

David Lindblom, Assistant Professor
Institute of American Indian Arts: MFA, 2016

Brenda Linnell, Associate Professor
University of Texas–El Paso: PhD, 2011

Tara M. Lopez, Assistant Professor
University of Manchester, UK: PhD, 2008

Qi Lu, Assistant Professor
University of New Mexico: PhD, 2019

Bryan Malone, Assistant Professor
Colorado Technical University: DCS, 2014

Adela Martinez, Assistant Professor
New Mexico Highlands University: MBA, 2018

Behnam Mousavi, Assistant Professor
University of New Mexico: PhD, 2018

Ashis Nandy, Associate Professor
Pennsylvania State University: PhD, 2012

Sushmita Nandy, Assistant Professor
All India Institute of Medical Sciences, New Delhi, India: PhD, 2012

Carolyn Newman, Assistant Professor
University of Texas–Austin: PhD, 1993

Veronica O'Halloran, Assistant Professor
University of New Mexico: MSN, 2014

Pam Piccolo, Assistant Professor
St. John's College: MA, 2003

Anne Reines, Assistant Professor
University of New Mexico: MSN, 2018
Susan Wayne Skelton, Instructor
Stonybrook University: MSN, 1986

David Torres, Associate Professor
University of New Mexico: PhD, 1996

Ellen Trabka, Associate Professor
University of Massachusetts-Lowell: MSN, 1995

Patricia Trujillo, Associate Professor
University of Texas-San Antonio: PhD, 2008

Ana Vasilic, Assistant Professor
University of Delaware: PhD, 2009

Simon Vaz, Assistant Professor
Nova Southeastern University: Ed.S., 2006

Rhiannon West, Assistant Professor
University of New Mexico: PhD, 2013

Heather Winterer, Associate Professor
University of Nevada–Las Vegas: PhD, 2007

Margaret Zak, Assistant Professor
Oregon Health and Science University: MN, 2010

FACULTY AND STAFF EMERITUS

Cora Abeyta, Certificate
Instructor Emeritus of Cosmetology, 1977-1983

Jose Griego, PhD
President Emeritus, 2005-2009

Sigfredo Maestas, PhD
President Emeritus, 1996-2005

Anthony Sena, PhD
Professor Emeritus, 2015

Priscilla C. Trujillo, MA
Executive Vice-President Emeritus, 1996-2003

Levi Valdez, MA
Dean Emeritus, Continuing Education and Community Services, 1996-2001
Academic Calendar 2019–2020

FALL 2019

PAYMENT DEADLINE: pay in full, or 5% down + plan,  
or be disenrolled ................................................. Fri., Aug. 2
Deadline for Degree & Certificate Students to  
Submit an Application for Fall 2019 .................................. Fri., Aug. 9
Convocation ............................................................... Mon., Aug. 12
First day to use financial aid for bookstore charges ................. Mon., Aug. 12
Deadline for Non-Degree Students to Submit an Application  
or Fall 2019 .......................................................... Thurs., Aug. 15
REGISTRATION FOR FALL .................................. Mon., April 15 – Sun. Aug. 18
CLASSES BEGIN ................................................... Mon., Aug. 19
Late Registration ($41.80 late fee required) .............................. Mon., Aug. 19
Last Day to Change Full-term Course Schedule (Drops/Adds only)  
Fri., Aug. 23
Last Day to Receive a Refund for Texts through the Bookstore .... Thurs., Aug. 29
Last Day to Change Grade Option from CR-AU/AU-CR ............... Fri., Aug. 30
Holiday (Labor Day) No classes. .................................... Mon., Sept. 2
Last Day to Drop from a Full-Term Course with 100% Refund  
without Record .................................................... Tues., Sept. 3
Mid-Term Week ....................................................... Oct. 7-11
Fall Break (no classes) ............................................. Mon.-Tues., Oct. 14-15
Mid-Term Grades Due ................................................ Wed., Oct. 16
Faculty and Staff Development Day (no classes) ..................... Wed., Oct. 16
REGISTRATION FOR SPRING 2020 BEGINS ......................... Mon., Oct. 21
Last Day for Instructors to Initiate a Withdrawal .................... Fri., Oct. 25
Last Day to Withdraw from a Full-Term Course ..................... Fri., Nov. 8
Holiday (Veterans Day) No Classes ................................. Mon., Nov. 11
Deadline to Petition to Graduate in Spring 2020 .................... Fri., Nov. 15
Thanksgiving Break .............................................. Wed.-Sun., Nov. 27–Dec. 1
Final Exams* ........................................................... Sat.-Fri., Dec. 7-13
*Exam make-up days in case of bad weather ....................... Fri.-Sat., Dec. 13-14
Last Day of Term. ..................................................... Fri., Dec. 13
Final Grades Due ...................................................... Mon., Dec. 16
Winter Break (College Closed) ..................................... Sat.-Sun., Dec. 21–Jan. 5, 2020

SPRING 2020

Deadline to Petition to Graduate in Spring 2020 .................... Fri, Nov 15
Deadline for Degree & Certificate Students to Submit Admissions Application  
for Spring 2020. .................................................... Mon, Dec 30
PAYMENT DEADLINE for Spring 20: pay in full, or 5% down plus a payment plan,  
or be disenrolled .................................................... Mon., Jan 10
Deadline for Non-Degree Students to Submit an Admissions Application  
for Spring 2020. .................................................... Thurs, Jan 16
REGISTRATION FOR SPRING 2020. ................................. Mon, Oct 21-Mon, Jan 20
