<tr>
<td><strong>Catalog Course Description</strong></td>
<td>A series of Laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for  Calculus-Based Physics II. Co-requisite: PHYS 1320 (1, 0T+1L)</td>

| **Student Learning Outcomes/Competencies of the Course** | **Student Learning Outcomes:** At the end of this course the student will be able to:  
  1. Develop a reasonable hypothesis.  
  2. Work effectively as part of a team.  
  3. Take measurements and record measured quantities to the appropriate precision.  
  4. Estimate error sources in experimental techniques.  
  5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.  
  6. Determine whether results and conclusions are reasonable.  
  7. Present experimental results in written form in appropriate style and depth.  
  8. Experience the relationship between theory and experiment |
| **College-Wide Student Learning Outcomes** | PHYS 1320L learning objectives align with the following NNMC College Wide Goal:  
  **Critical thought:** Students are required to analyze and synthesize information and draw reasoned conclusions. |
