

NORTHERN NEW MEXICO COLLEGE

Course Number Course Name	BIOL 4472 Biology Seminar
Credit Value (Breakdown of theory and lab credits)	1 Theory
Catalog Course Description	You will attend presentations given by faculty and visiting scientists on their research and careers, and students who have conducted research will present their results as well.
Course Student Learning Outcomes/Objectives /Competencies	<ol style="list-style-type: none"> 1. To promote active and sustained engagement with current science research. 2. To encourage greater appreciation for the diversity of science research. 3. To help build a community of students interested in science research. 4. To promote active listening and critical thinking with respect to the content and style of research presentations. This, in turn, should provide greater understanding of how an effective science presentation is structured and delivered.
College-Wide Student Learning Outcomes measured (General education courses only)	
Program Student Learning Outcomes measured	<ol style="list-style-type: none"> 1. Provide students with an understanding of the role of science in society and the ethical conduct of science.
