EARN WHILE YOU LEARN!
BECOME A RADIATION CONTROL TECHNICIAN

A complete application includes:

- Resume
- Cover Letter
- Personal Statement Essay addressing your interest in Radiation Protection
- Applicable high school or college transcripts

DEADLINE: May 14, 2021

The Radiation Protection program at NORTHERN trains students for entry level Radiation Control Technician (RCT) positions while providing tuition, fees, a paid student internship at LANL, and more!

Or APPLY DIRECTLY TO LANL HEREs

QUESTIONS? Contact Cynthia Lentini,cynthia.lentini@nnmc.edu or (505)747.5488

This competitive opportunity will reimburse awarded students’ tuition and fees as a full-time undergraduate intern at LANL. Students will be paid for hours while physically in class, for hours dedicated to the initiation of the security clearance process, and have the opportunity to transition to full time employment upon graduation with an Associate’s degree after meeting all LANL eligibility requirements. On-site student internships will be determined based on LANL need and student availability. Not all internships will begin in semester one, some will begin in subsequent semesters. Upon successful completion of the program, students will commit to Los Alamos National Laboratory employment as an RCT for no less than 3 years. Failure to fulfill this commitment may result in repayment of all tuition and fees to LANL.
